Pour toute machine en mouvement, empruntant la force motrice à la vapeur, à l'eau, au gaz, à l'électricité ou à la transmission générale, les sommes payées par l'exposant, pour son emplacement, lui seront remboursées jusqu'à concurrence de 50 p. c. du prix de l'emplacement de la machine en mouvement, et ce sur justification du payement d'une somme au moins équivalente pour consommation de force.

AVIS.

Le Conseil d'administration de la Société anonyme de l'Exposition se charge gratuitement de la décoration générale des halls et de la manutention de tous les colis dont le poids n'excédera pas 1,500 kilogrammes et qui lui seront remis, au plus tard, le 10 avril 1897.

La manutention comprend :

(a) **La réception sur quai dans l'enceinte de l'Exposition ;**

(b) La mise à pied d'œuvre ;

(c) L'enlèvement des caisses vides et emballage ;

(d) La remise à pied d'œuvre des caisses vides et emballage ;

(e) **L'enlèvement des colis réemballés.**

Les exposants se conformeront aux instructions qui seront données par le Comité exécutif pour faciliter l'enlèvement des caisses vides.

Les exposants devront effectuer à leurs frais le déballage, l'installation, l'étalage et le réemballage de leurs produits ainsi que la mise en état des caisses vides, etc. Le réemballage se fera dans l'ordre qui sera indiqué par le Comité exécutif et devra être effectué avant le 31 décembre 1879 : le démontage des machines devra être terminé de façon à en permettre l'enlèvement, au plus tard, le 31 décembre 1897. Passé ces délais, les produits non emballés ou non démontés seront enlevés d'office et emmagasinés aux frais, risques et périls des exposants. Les objets non retirés au 31 mars 1898 seront vendus publiquement et le Conseil d'administration de la Sociéte anonyme de l'Exposition aura le droit de disposer du produit de la vente.

Pour les colis dont le poids dépasserait 1,500 kilogrammes, l'exposant aura à se mettre en rapport avec le Comité exécutif qui fixera une taxe modérée de manutention.

La Société anonyme de l'Exposition apportera les plus grands soins à la manutention dont elle se charge ; mais il est expressément stipulé qu'elle ne saurait, en aucun cas, être rendue responsable des pertes, manquants, dommages, avaries, etc., que les colis ou leur contenu pourraient subir.

Les taxes d'emplacement seront encaissées par les soins de la Société organisatrice. Elles seront payables en deux fois pour les sommes supérieures à 1,000 francs, la première moitié au moment de la réception du bulletin d'admission, la seconde moitié le 1*er* avril 1897. Les taxes inférieures à 1,000 francs sont payables en une fois à la réception du bulletin d'admission. (Voir art. 38 du Réglement général de la Société organisatrice.)

HALLES DE L'INDUSTRIE.

DEMANDE D'EMPLACEMENT.

Section...........................

Groupe...........................

Classe...........................

Designation des objets à exposer.	Emplacement non isolé sur sol.			Emplacement isolé sur sol.			Emplacement sur cloison.		Avis Important.	Observations.	Renseignements.
	Longueur (façade).	Largeur.	Hautor.	Longueur.	Largeur.	Hauteur.	Longueur.	Hauteur.			
	1	2	3	4	5	6	7	8	9	10	
									Avoir soin d'envoyer un plan cote de l'installation, du meuble que l'on veut employer ou de la façade du salon. Indiquer le poids total de l'installation.		Les prix des emplacements ne comprennent aucun meuble. Les exposants devront soumettre à l'approbation du Comité exécutif les plans des vitrines, mobilier ou meubles dont ils voudront se servir. Les planchers des halles pourront supporter un poids de 500 kilogrammes et même de 1,500 kilogrammes par mètre carré dans certaines parties: ils ne pourront être modifiés, déplacés ou consolidés pour les besoins des installations, que d'accord avec le Comité exécutif et aux frais des exposants calculés sur les prix des bordereaux déposés. L'enlèvement des cloisons pour les vitraux ou verres gravés, les charpentes de cloisons seront exécutés aux frais des exposants. Les exposants pourront fixer des tapis sur les planchers, utiliser les charpentes de cloisons pour attacher les revêtements ou leurs installations, pourvu qu'il n'y ait pas usage abusif; les bois ne pourront être entaillés. Si l'exposant peint les planchers ou les charpentes, il devra indemniser l'entrepreneur des halles si celles-ci sont louées et la Société de l'Exposition s'il s'agit de bâtiments définitifs. Le Gouvernement belge a assuré: *A.* Le transport gratuit sur les lignes de l'État, à l'aller et au retour, des œuvres, produits et travaux d'origine belge qui seront envoyés à l'Exposition, ainsi qu'aux caisses vides et emballages ayant servi à l'expédition et devant servir à leur réexpédition. *B.* L'application du tarif No. 10 sur toutes les lignes de l'État, pour les œuvres, produits et travaux étrangers. Ce tarif consacre la gratuité du transport au retour et la perception de la taxe pleine à l'aller. Des demarches seront faites pour obtenir des conditions analogues sur les lignes concédées et sur les réseaux étrangers en relation avec les chemins de fer belges. La plupart des lignes regulieres de navigation consentent des reductions sur les taux des frets. L'exposant devra installer ses produits à ses frais et les reemballer a la cloture de l'Exposition. Des adresses de representants de commerce seront données aux exposants qui en feront la demand, sans responsabilite pour le Comité exécutif.

Galerie centrale ([1]).

Galerie latérale.

Toutes les mesures ci-dessus sont les dimensions maxima de l'emplacement demandé.

Si l'exposant demande un emplacement pour des voitures ou des cheminées d'appartements, il donnera séparément les dimensions pour chacune d'elles, ainsi que la désignation du type des voitures.

***Je déclare**, par le present engagement, accepter les conditions des règlements et tarifs de l'Exposition **Internationale de Bruxelles en 1897**, et je m'y conformerai si ma demande est accueillie.*

Lieu:..............................*date:*..............................*1896.*

HALLES DE L'INDUSTRIE.

TARIFICATION.

Le prix des emplacements, *comprenant la decoration générale des halles et la manutention*, sera établi sur les bases suivantes, d'aprés la place occupée par les produits.

Emplacements non isoles.

SUR SOL	(*a*) La profondeur ne dépassant pas 1 mètre. **Par metre courant de façade . . . fr. 60**	*Exemple:*	Un emplacement de 2^m50 de façade $\times 0^m60$ de profondeur, payera: 2^m50 de façade à 60 francs par mètre courant . . =fr. 150
	(*b*) La profondeur dépassant 1 mètre. **Par metre carré de surface horizontale 60**	*Exemple:*	Un emplacement de 3 mètres de façade sur 1^m50 de profondeur, payera: 3 mètres de façade $\times$ 1^m50 de profondeur $\times 4^m50$ à 60 francs par mètre carré=fr.270
SUR CLOISON	**Par metre courant de façade . . . 60**	*Exemple:*	Un emplacement de 2^m50 de façade sur 2^m50 de hauteur, payera: 2^m50 de façade à 60 francs par mètre courant = fr. 150

Le prix des emplacements non isolés ne pourra être inférieur à 60 francs.

Emplacements isoles.

(*a*) Mesurés sur la plus grande dimension, la plus petite n'atteignant pas 1 mètre. **Par metre courant de façade . . . fr. 90**	*Exemple:*	Un emplacement de 2 mètres $\times$ 0^m75, payera: 2 mètres de façade à 90 francs par mètre courant . . = fr. 180
(*b*) Les deux dimensions dépassant 1 mètre. **Par mètre carré de surface horizontale 90**	*Exemple:*	Un emplacement de $1^m50 \times 1^m50$, payera: 2^m25 à 90 francs par mètre carré . = fr. 202·50

Le prix des emplacements isolés ne pourra être inférieur à 90 francs.

Dans les *galeries centrales*, le prix des emplacements.	non isolés, par mètre carré, fr.	90
	isolés, par mètre carré. . .	130
La taxe pour *salons* ayant au moins 5 mètres de façade sur 5 mètres de profondeur.	à façade, par mètre carré .	fr. 70
	sur angle, par mètre carré . .	90

Toutes les surfaces seront établies au grand carré.

Les installations seront mesurées d'après les plus grandes dimensions au-dessus du plancher.

Les installations ou vitrines isolées peuvent, dans certaines parties des halles, atteindre une hauteur de 10 mètres.

AVIS.

Le Conseil d'administration de la Société anonyme de l'Exposition se charge gratuitement de la décoration générale des halles et de la manutention de tour les colis dont le poids n'excédera pas 1,500 kilogrammes et qui lui seront remis, au plus tard, le 10 avril 1897.

La manutention comprend:

(*a*) La réception sur quai dans l'enceinte de l'Exposition;

(*b*) La mise à pied d'œuvre;

(*c*) L'enlèvement . . } des caisses vides et emballage;
(*d*) La remise à pied d'œuvre }

(*e*) L'enlèvement des colis rèemballés.

Les exposants se conformeront aux instructions qui seront données par le Comite exécutif pour faciliter l'enlèvement des caisses vides.

Les exposants devront effectuer à leurs frais le déballage, l'installation, l'étalage et le réemballage de leurs produits ainsi que la mise en état des caisses vides, etc. Le réemballage se fera dans l'ordre qui sera indiqué par le Comité exécutif et devra être effectué avant le 31 décembre 1897 : le démontage des machines devra être terminé de façon à en permettre l'enlèvement, au plus tard, le 31 décembre 1897. Passé ces délais, les produits non emballés ou non démontes seront enlevés d'office et emmagasinés aux frais, risques et périls des exposants. Les objets non retirés au 31 mars 1898 seront vendus publiquement et le Conseil d'administration de la Société anonyme de l'Exposition aura le droit de disposer du produit de la vente.

Pour les colis dont le poids dépasserait 1,500 kilogrammes, l'exposant aura à se mettre en rapport avec le Comité exécutif qui fixera une taxe modérée de manutention.

La Société anonyme de l'Exposition apportera les plus grands soins à la manutention dont elle se charge ; mais il est expressément stipulé qu'elle ne saurait, en aucun cas, être rendue responsable des pertes, manquants, dommages, avaries, etc., que les colis ou leur contenu pourraient subir.

Les taxes d'emplacement seront encaissées par les soins de la Société organisatrice. Elles seront payables en deux fois pour les sommes supérieures à 1,000 francs, la première moitié au moment de la réception du bulletin d'admission, la seconde moitié le 1er avril 1897. Les taxes inférieures à 1,000 francs sont payables en une fois à la réception du bulletin d'admission. (Voir art art. 38 du Règlement général de la Société organisatrice.)

BRUSSELS INTERNATIONAL EXHIBITION.

PATRON. — H. M. THE KING OF THE BELGIANS.

OPEN 24TH APRIL 1897.

OFFICIAL CATALOGUE.

RULES.

ART. I.—The catalogue will be issued as per the form hereunder. No stereotype or other plates will be accepted.

ART. II.—Every exhibitor has the right, for each class in which he exhibits, to four lines of detail. The name and address will be printed in large type, the description of the goods exhibited and rewards obtained in small type.

ART. III.—Extra lines will be inserted at the following prices.

First line	Fr.	1 00
Second line	„	2 00
Third line	„	3 00
Fourth line	„	4 00
Fifth line	„	5 00
Each following line	„	5 00

Each line consists of an average of 40 letters, figures and spaces (hyphens count for five letters).

Every incomplete line is reckoned as a full one.

ART. IV.—The form herewith duly filled up, and signed, must be returned, under stamped envelope, the same time as the form of admission, to the Executive Committee of the Exhibition, 10, Rue du Congrés, Brussels. The Exhibition Company declines any responsibility in regards to the matter furnished by the exhibitors.

ART. V.—The Executive Committee reserves the right to modify the wording,—notice previously being given to the exhibitor.

ART. VI.—Special arrangements will be entered into with groups of exhibitors, as to the number of gratuitous lines, mentioned in Art. II.

SPECIMEN SHOWING APPLICATION OF CHARGES.

INVENTIONS and DESIGNS.

Calcutta, the 5th November 1896.

NOTIFICATIONS.

No. 3156 P.—APPLICATIONS in respect of the undermentioned inventions have been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 31st October 1896:—

No. 366 of 1896.—Bishambar Nath, assistant engineer, Provincial works, Multan, for a cheap water heater.

No. 367 of 1896.—Franz Joachim Alexander Kindermann, engineer, of Queen Street, Melbourne, in the colony of Victoria, for improvements in and connected with the driving mechanism of bicycles and like machines.

No. 368 of 1896.—Emile Stern, civil engineer, of 3, bis, Rue d'Athènes, Paris, for apparatus for closing vessels and charging them with liquefied or compressed gases.

No. 369 of 1896.—William Carew, retired warrant officer; Ordnance department, now living at Dum Dum Cantonment, for an improved tin lamp for use by the natives of India.

No. 370 of 1896.—Joseph Rowley, engineer, 27, Martin's lane, Cannon Street, London, for improvements in cricket stumps.

No. 371 of 1896.—Nathan William Horatio Sharpe, engineer, of 26, Perth road, Stroud green, London, for improvements in or connected with apparatus for drying tea leaf and similar substances.

No. 372 of 1896.—Nathan William Horatio Sharpe, engineer, of 26, Perth road, Stroud green, London, and Samuel Robert Baildon, gentleman, of 1, Whitefriars Street, London, for improvements in machinery for treating tea leaf, for sorting, ball-breaking, separating, cooling, drying and sifting purposes.

No. 373 of 1896.—William James Orsman, analytical chemist, of Gathurst, in the county of Lancaster, for improvements in the manufacture of explosives, applicable for use in coal or other fiery mines.

No. 374 of 1896.—The Sussmann Electric Miners Lamp Company, Limited, of 37, Walbrook, and Sigmund Adolf Rosenthal, electrician, of 5, Christopher Street, Finsbury square, both in the city of London, for improvements in active material for secondary battery plates.

No. 375 of 1896.—John Malvern Dame, engineer, at present agent to Messrs. T. Cesser and Company, Lahore, for a patent fuel economiser for locomotive engines.

No. 3157 P.—A SPECIFICATION of the undermentioned invention has been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. Every specification is open to public inspection from 11 A.M. to 4 P.M., at the Secretary's office in the Imperial Secretariat Buildings, Government Place, West, Calcutta, on payment of a fee of one rupee, and certified copies will be given to any person requiring them on payment of the expense of copying plus two annas for every hundred words :—

No. 197 of 1895.—Louis J. Bischoff, doctor of dental surgery, Kobe Lodge, Royapettah, Madras, for clay pigeons, combined with metal or other materials. (Specification filed 1st April 1896.)

No. 3158 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 215 of 1891.—Eduard Theisen, engineer, of Sinzig on the Rhine, Germany, for improvements in apparatus for evaporating liquids. (From 27th November 1896 to 26th November 1897.)

No. 216 of 1891.—Eduard Theisen, engineer, of Sinzig on the Rhine, Germany, for improvements in apparatus for condensing steam and other condensible vapours or gases. (From 27th November 1896 to 26th November 1897.)

No. 320 of 1891.—Daniel Kemp West, engineer, of 23, St. Mary Axe, in the city of London, for improvements in and connected with presses for baling cotton and other goods. (From 15th December 1896 to 14th December 1897.)

No. 227 of 1892.—Richard Harley Williamson, joiner, of 21, Victoria Street, Ashton-under-Lyne, in the county of Lancaster, for an improved mechanical stoker. (From 15th October 1896 to 14th October 1897.)

No. 3159 P.—WHEREAS the inventors of the undermentioned inventions have espectively failed to pay within the time limited in that behalf by the fourth schedule o the Inventions and Designs Act (V of 1888) the fees hereinafter respectively menioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said invenions in British India and of authorising others so to do has ceased :—

No. 311 of 1891.—Alexander Morison's invention for a machine for breaking, scutching and dressing flax and similar fibre-bearing plants. (Specification filed 29th July 1892.)

No. 59 of 1892.—Francis Gascoigne Lynde's invention for court bowls. (Specification filed 28th July 1892.)

No. 96 of 1892.—Pierre Lamena's invention for a new or improved motive-power engine. (Specification filed 28th July 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No. 129 of 1889.—George Henry Smith's invention for improvements in producing manifold copies, and in materials to be used for this purpose. (Specification filed 25th July 1889.)

Fee in respect of the continuance of an exclusive privilege—

(*d*) After the filing of the specification and before the expiration of the sixth year from the date of the filing thereof—

The sum of R50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

AGENT TO THE GOVR.-GENERAL IN BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 29th October, 1896.

No. 7683.—In consequence of the retirement of Khan Bahadur Muhammad Taki Khan, Native Assistant to the Agent to the Governor-General, Khojak Pass, substantive *pro tempore*, with effect from the forenoon of the 1st October, 1896, Muhammad Rafik Khan, Officiating Tahsildar of the 5th grade, is appointed to be Native Assistant to the Agent to the Governor-General, Khojak Pass, substantive *pro tempore*.

The 30th October 1896.

No. 7752.—It has been decided that the paper to be used in Courts in the Quetta-Pishin, Thal Chotiali, Zhob and Bolan Pass districts for judicial petitions and copies of judicial documents shall be of the standard pattern from the 1st January, 1897 The following rules are, therefore, made with effect from that date to regulate the supply by the stationery depôt at Calcutta of paper of the standard pattern, the custody and sale of such paper and the credit of the sale proceeds to Governments.

2. From the 1st January, 1897, no paper other than the standard paper will be used for copies of documents (whether in English or the Vernacular) supplied to parties by judicial officers; and from that date all licensed petition-writers practising in the Courts in the Quetta-Pishin, Thal-Chotiali, Zhob and Bolan Pass districts will be required to use the standard paper only.

3. In the case of copies supplied on payment of fees, the cost of the paper will be defrayed by the copyist; in the case of copies supplied by Government free of cost, no charge will be made

for the paper, but the paper used for such copies must be duly accounted for in the annual statement prescribed by rule VII.

4. The Treasury Officer, Quetta, Sub-Treasury Officers and the Courts will supervise the working of the arrangement in order to prevent vendors of the standard paper demanding more than the fixed price of three pies per sheet:—

(1) Paper required for judicial petitions and copies of judicial documents will be obtained from the Stationery depôt at Calcutta by annual indent.

(2) Requisitions for the paper will be sent by the Political Agents in Thal-Chotiali and Zhob to the Treasury Officer, Quetta, not later than the 15th October in each year. The Treasury Officer, Quetta, after including the requirements of the Quetta-Pishin districts will submit to the Political Agent in Quetta-Pishin not later than the 15th November in each year, an indent for the paper in the form prescribed for indents for stationery. The indent will provide for the requirements of all the courts in the Quetta-Pishin, Thal-Chotiali, Zhob and Bolan Pass districts, and will show the amount of paper required for use during the financial year.

(3) Expenses of carriage will be paid by the indenting officer out of the grant for judicial contingencies.

(4) The rules which regulate the custody of stamps and stamp paper will apply, *mutatis mutandis*, to the custody of the paper.

(5) The standard paper will be sold to licensed vendors of stamps at R7-8-0 a ream for cash for retail to the public at the uniform rate of three pies a sheet; ordinarily not less than a quarter of a ream will be sold to a licensed vendor.

(6) The receipts from the sale of the paper calculated at R7-8-0 a ream, will be credited in the Treasury accounts and in those of sub-treasuries and of the officer in charge of the stamp depôt at Chaman, to a distinct sub-head under "Stamps," the commission of one anna in the rupee, which will be allowed to license vendors being debited to the same head.

(7) At the close of each financial year, a statement of the operations of the year will be submitted by Sub-Treasury Officers through the Treasury Officer, Quetta, to the Political Agents in Thal-Chotiali and Zhob in the annexed form. Similar statements will be submitted by the officers in charge of the sub-treasury at Pishin and the stamp depôt at Chaman to the Treasury Officer, Quetta, who will submit a consolidated statement, in the annexed form, for Quetta-Pishin to the Political Agent in that district.

5. This Notification supersedes, with effect from the 1st January, 1897, the Notification from this Office, No. 7320, dated the 13th November, 1895.

By Order,

W. M. CUBITT,

First Assistant.

FORM.

Statement showing the receipt and consumption of petition paper during the year and the financial results of the year.

Amount received.	Rms.	Qrs.	Shts.	Amount expended.	Rms.	Qrs.	Shts.

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below :—

Hand-book of Cyclonic Storms in the Bay of Bengal for the use of Sailors, describing the phenomena of Cyclonic Storms and Cyclones in the Bay of Bengal, and giving a brief account of six typical Bay of Bengal Cyclonic Storms. It also gives practical hints to sailors respecting Cyclonic Storms in the Bay. Demy, 212 pages, 29 plates (shewing diurnal oscillation of barometer at different Latitudes and Longitudes, mean monthly barometric height, tracks of different Cyclonic Storms, etc., etc.) R5.

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R3.

Instructions to Observers of the India Meteorological Department, in which are described in detail the various Meteorological instruments in use at the Meteorological observatories, with full instructions how to read them, etc. Demy, 103 pages. R3.

Tables for the Reduction of Meteorological Observations in India. This book contains tables for reducing barometric observations taken at different heights, and for calculating humidity and vapour tension, etc., etc. R2.

Barometer, Wind and Current Charts of the Bay of Bengal and adjacent sea, north of the equator, R5.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature, and currents of the sea surface. R1-8.

Barometer, Wind and Current Charts of the Arabian Sea and the adjacent portion of the North Indian Ocean. R5.

Monthly Weather Review of India, giving a summary of the chief features of the weather in India and containing discussions on atmospheric pressure, barometric depressions, temperature of the air, winds, rainfall, etc. It also contains all available information about snowfall in the mountain districts to the north and north-west of India, and an abstract of observations taken at about 200 observatories in India. Published *monthly*. R1 per month or R12 per annum. Postage 1a 6p. for each copy outside Calcutta.

India Daily Weather Report and Chart, containing observations recorded at 8 A. M. at 147 observatories, with a Chart shewing the distribution of atmospheric pressure and rainfall all over India, and a brief summary of the chief features of the weather of the day. Issued *daily* from the Simla Meteorological Office. Monthly subscription R2, and postage annas 8.

JOHN ELIOT,

Meteorological Reporter to the Govt. of India.

List of Books for sale at the Library of the Asiatic Society of Bengal, No. 57, Park Street, Calcutta, and obtainable from the Society's Agents, Messrs. Luzac & Co., 46, Great Russell Street, London, W. C., and Mr. Otto Harrassowitz, Bookseller, Leipzig, Germany.

Complete copies of those works marked with an asterisk cannot be supplied—some of the Fasciculi being out of stock.*

BIBLIOTHECA INDICA.

SANSKRIT SERIES.

Advaita Brahma Siddhi, (Text) Fasc. I—IV, at annas 6 each. R1-8.

***Agni Purana,** (Text) Fasc. II—XIV, at annas 6 each. R4-14.

Aitareya A'ranyaka of the Rig Veda, (Text) Fasc. I—V, at annas 6 each. R1-14.

Ai'areya Brahmana, Fasc. 1—4, at annas 6. R1-8.

Anu Bhashyam, (Text) Fasc. I—II. 12a.

Aphorisms of Sandilya, (English) Fasc. I. 6a.

Ashtasáhasriká Prajnapáramitá, (Text) Fasc. I—VI, at annas 6 each. R2-4.

As'vavaidyaka, (Text) Fasc. I—V, at annas 6 each. R1-14.

Avadana Kalpalata, (Sans. & Tibetan) Vol. I, Fasc. I—IV; Vol. II, Fasc. I—III, at R1. R7.

***Bhamati,** (Text) Fasc. II—VIII, at annas 6 each, R2-10.

Brahma Sutra, (English) Fasc. I. 12a.

Brihaddevata, (Text) Fasc. I—IV, at annas 6 each. R1-8.

Brihadharma Purana, (Text) Fasc. I—V, at annas 6 each. R1-14.

Brihataranyaka Upanishad, (English) Fasc. 2—3, at annas 6 each. 12a.

Chaitandya-Chandrodaya Nataka, (Text) Fasc. 2—3, at annas 6 each. 12a.

***Chaturvarga Chintamani,** (Text) Vols II, 1—25; III. Part I, Fasc. 1—18, Part II, Fasc. 1—9, at annas 6 each. R19-8.

***Chhandogya Upanishad,** (English) Fasc. 2. 6a.

***Hindu Astronomy,** (English) Fasc. 2—3, at annas 6 each. 12a.

Kala Madhaba, (Text) Fasc. I—IV, at annas 6 each. R1-8.

Kátantra, (Text) Fasc. I—VI, at annas 12 each. R4-8.

Katha Sarit Sagara, (English) Fasc. I—XIV, at annas 12 each. R10-8.

Kurma Purana, (Text) Fasc. I—IX, at annas 6 each. R3-6.

***Lalita Vistara,** (Text) Fasc III—VI, at annas 6 each R1-8.
Ditto, (English) Fasc. I—III, at annas 12 each. R2-4.

Madana Párijáta, (Text) Fasc. I—XI, at annas 6 each. R4-2.

Manutika Sangraha, (Text) Fasc. I—III, at annas 6 each R1-2.

***Markandeya Purana,** (Text) Fasc. IV—VII, at annas 6 each. R1-8.

Markandeya Purana, (English) Fasc. I—III, at annas 12 each. R2-4.

***Mimamsá Darsana,** (Text) Fasc. III—XIX, at annas 6 each. R6-6.

Narada Smriti, (Text) Fasc. I—III, at annas 6 each. R1-2.

Nyayavartika, (Text) Fasc. I—II. 12a.

***Nirukta,** (Text) Vol. I, Fasc. 4-6 Vol. II, Fasc. 1—6, Vol. III, Fasc. 1—6, Vol. IV, Fasc. 1—6, at annas 6 each. R8-10.

* The other Fasciculi of those works are out of stock and complete copies cannot be supplied.

***Nitisara or The Elements of Polity, by Kamandaki** (Sans.) Fasc. II—V, at annas 6 each. R1-8.

Nyayabindutika (Text). 10a.

Nyaya Kusumanjali Prakarana, (Text) Vol. I, Fasc. 1—6; Vol. II, Fasc. 1—2, at annas 6 each. R3.

Paris'ishta Parvan, (Text) Fasc. I—V, at annas 6 each. R1-14.

Prithiraj Rasau, (Text) Part I, Fasc. I, Part II Fasc. I—V, at annas 6 each. R2-4.

Ditto, (English) Part II, Fasc. I. 12a.

Prakrita Lakshanam, (Text) Fasc. I. R1-8.

Parasara Smriti, (Text) Vol. I, Fasc. 1—8; Vol. II, Fasc. 1—6; Vol. III, Fasc. 1—4, at annas 6 each. R6-12.

Parasara, Institutes of (English). 12a.

S'rauta Sutra of A'pastamba, (Text) Fasc. I—XII, at annas 6 each. R4-8.

*Ditto, **Latyayana,** (Text) Fasc. II—IX, at annas 6 each. R3.

* Ditto, **S'ankhayana,** (Text) Vol. I, Fasc. 1—7; Vol. II, Fasc. 1—4; Vol. III, Fasc. 1—3, at annas 6 each. R5-4.

***Sama Veda Samhitá,** (Text) Vol. I. Fasc. 5—10; Vol. II, 1—6; Vol. III, 1—7; Vol. IV, 1—6; Vol. V, 1—8, at annas 6 each Fasc. R12-6.

Sankhya Sutra Vritti, (Text) Fasc. I—IV, at annas 6 each. R1-8.

Ditto, (English) Fasc. I—III. R2-4.

***Sankara Vijaya,** (Text) Fasc. II and III, at annas 6 each. 12a.

***Sankhya Pravachana Bhashya,** Fasc. III, (English preface only). 6a.

S'ri Bhashyam, (Text) Fasc. I—III, at annas 6 each. R1-2.

Sus'ruta Samhita, (English) Fasc. I and II, at annas 12 each. R1-8.

***Taittiriya Aranya,** (Text) Fasc. II—XI, at annas 6 each. R3-12.

* Ditto **Samhita,** (Text) Fasc. IX—XXXVII, at annas 6 each. R10-14.

Tandya Brahmana, (Text) Fasc. I—XIX, at annas 6 each, R7-2.

Tattva Chintamani, (Text) Vol. I, Fasc. 1—9; Vol. II, Fasc. 1—10; Vol. III, Fasc. 1—2; Vol. IV, Fasc. 1, at annas 6 each. R8-4.

Tul'si Sat'sai, (Text) Fasc. I—IV, at annas 6 each. R1-8.

Uvasagadasao, (Sanskrit and English) Fasc. I—VI, at annas 12 each. R4-8.

Varaha Purana, (Text) Fasc. I—XIV, at annas 6 each. R5-4.

***Vayu Purana,** (Text) Vol. I, Fasc. 2—6; Vol. II, Fasc. 1—7, at annas 6 each Fasc. R4-8.

Vishnu Smriti, (Text) Fasc. I—II, at annas 6 each. 12a.

Vivadaratnakara, (Text) Fasc. I—VII, at annas 6 each. R2-10.

Vrihannaradiya Purana, (Text) Fasc. I—VI, at annas 6 each. R2-4.

Vrihat Soayambhu Puran, Fasc. I—III. R1-2.

TIBETAN SERIES.

Pag-Sam Thi S'in, Fasc. 1—4, at R1 each. R4.

Sher-Phyin, Vol. I, Fasc. 1—5; Vol. II, Fasc. 1—3, at R1 each. R8.

Rtogs brjod dpag hkhri S'in, (Tibn. and Sans.) Vol. I, Fasc. I—IV; Vol. II, Fasc. I-II, at R1 each. R6.

ARABIC AND PERSIAN SERIES.

Alamgirnamah, with Index, (Text) Fasc. I—XIII, at annas 6 each. R4-14.

Ain-i-Akbari, (Text) Fasc. I—XXII, at R1 each. R22.

Ditto, (English) Vol. I, Fasc. 1—7; Vol. II, Fasc. 1—5; Vol. III, Fasc. 1—5, at R1-12 each. R29-12.

Akbarnamah, with Index, (Text) Fasc. I—XXXVII, at R1 each. R37.

Arabic Bibliography, by Dr. A Sprenger. 6a.

Badshanamah, with Index, (Text) Fasc. I—XIX, at annas 6 each. R7-2.

Catalogue of the Persian Books and Manuscripts in the Library of the Asiatic Society of Bengal, Fasc. I and II, at R1 each. R2.

Dictionary of Arabic Technical Terms and Appendix, Fasc. I—XXI, at R1 each. R21.

Farhang-i-Rashidi, (Text) Fasc. I—XIV, at R1 each. R14.

Fihrist-i-Tusi or Tusy's list of Shy'ah Books, (Text) Fasc. I—IV, at annas 12 each. R3.

Futuh-ul-Sham Waqidi, (Text) Fasc. I—IX, at annas 6 each. R3-6.

Futuh-ul-Sham Azadi, (Text) Fasc. I—IV, at annas 6 each. R1-8.

Haft A'sman, History of the Persian Mansawi, (Text) Fasc. I. 12a.

History of the Caliphs, (English) Fasc. I—VI, at annas 12 each. R4-8.

Iqbalnamah-i-Jahangiri, (Text) Fasc. I—III, at annas 6 each. R1-2.

Isabah, with Supplement, (Text) 51 Fasc., at annas 12 each. R38-4.

Maasir-ul-Umara, Vol. I, Fasc. 1—9; Vol. II, Fasc. 1—9; Vol. III, 1—10, Index to Vol. I, Fasc. X & XI, at annas 6 each. R11-4.

Maghazi of Waqidi, (Text) Fasc. I—V, at annas 6 each. R1-14.

Muntakhab-ul-Tawarikh, (Text) Fasc. I—XV, at annas 6 each. R5-10.

Muntakhab-ul-Tawarikh, (English) Vol. II, Fasc. I—IV, at annas 12 each. R3-12.

Muntakhab-ul-Lubab, (Text) Fasc. I—XIX, at annas 6 each. R7-2.

Ma'asir-i-'Alamgiri, (Text) Fasc. I—VI, at annas 6 each. R2-4.

Nokhbat-ul-Fikr, (Text) Fasc. I. 6a.

Nizami's Khiradnamah-i-Iskandari, (Text) Fasc. I and II, at annas 12 each. R1-8.

Riyazu-s-Salatin, (Text) Fasc. I—IV, at annas 6 each. R1-8.

***Suyaty's Itqan, on the Exegetic Sciences of the Koran, with Supplement,** (Text) Fasc. VII—X, at R1 each. R4.

Tabaqat-i-Nasiri, (Text) Fasc. I—V, at annas 6 each. R1-14.

Tabaqat-i-Nasiri, (English) Fasc. I—XIV, at annas 12 each. R10-8.

Tarikh-i-Firuz Shahi of Zia-al-din Barni, (Text) Fasc. I—VII, at annas 6 each. R2-10.

Tarikh-i-Baihaqi, (Text) Fasc. I—IX, at annas 6 each. R3-6.

Tarikh-i-Firozshahi, of Shams-i-Siraj Aif, (Text) Fasc. I—VI, at annas 6 each. R2-4.

Ten Ancient Arabic Poems, Fasc. I—II, at R1-8 each. R3.

Wis o Ramin, (Text) Fasc. I—V, at annas 6 each. R1-14.

Zafarnamah, Vol. I, Fasc. 1—9, Vol. II, Fasc. 1—8, at annas 6 each. R6-6.

Tuzuk-i-Jahangiri, (English) Fasc. I. 12a.

ASIATIC SOCIETY'S PUBLICATIONS.

1. **Asiatic Researches,** Vol. VII, Vols. XIII and XV, and Vols. XIX and XX, at R10 each. R50.
   Ditto. Index to Vols. I—XVIII. R5.
2. **Proceedings** of the Asiatic Society from 1865 to 1869 (incl.), at annas 6 per No.; and from 1870 to date, at annas 8 per No.
3. **Journal** of the Asiatic Society for 1843 (12), 1844 (12), 1845 (12), 1846 (5), 1847 (12), 1848 (12), 1850 (7), 1851 (7), 1857 (6), 1858 (5), 1861 (4), 1862 (5), 1864 (5), 1866 (7), 1867 (6), 1868 (6), 1869 (8), 1870 (8), 1871 (7), 1872 (8), 1873 (8), 1874 (8), 1875 (7), 1876 (7), 1877 (8), 1878 (8), 1879 (7), 1880 (8), 1881 (7), 1882 (6), 1883 (5), 1884 (6), 1885 (6), 1886 (?), 1887 (7), 1888 (7), 1889 (10), 1890 (11), 1891 (7), 1892 (8), 1893 (11), at R1-8 per No. to Subscribers, and at R2 per No. to Non-Subscribers.

N. B.—The figures enclosed in brackets give the number of Nos. in each Volume.

4. **Centenary Review of the Researches of the Society,** from 1784—1883. R3.

   General Cunningham's Archæological Survey Report for 1863-64 (Extra No., J. A. S. B., 1864). R2.

   Theobald's Catalogue of Reptiles in the Museum of the Asiatic Society (Extra No., J. A. S. B., 1868). R2.

   Catalogue of Mammals and Birds of Burmah, by E. Blyth (Extra No., J. A. S. B., 1875). R4.

   Introduction to the Maithili Language of North Bihar, by G. A. Grierson, Part II, Chrestomathy and Vocabulary (Extra No., J. A. S. B., 1882). R4.
5. **Anis-ul-Musharrahin.** R3.
6. **Catalogue of Fossil Vertebrata.** R3.

* The other Fasciculi of these works are out of stock, and complete copies cannot be supplied.

7. **Catalogue of the Library of the Asiatic Society, Bengal.** R3-8.
8. **Istilahát-us-Súfiyah,** edited by Dr. A Sprenger, 8vo. R1.
9. **Inayah.** a Commentary on the Hidayah Vols II and IV at R10 each R32
10. **Jawami-ul-'ilm ir-riyazi,** 168 pages, with 17 plates, 4 o, Part I R2.
11. **Khizanat-ilm.** R4
12. **Mahábhárata,** Vols. III and IV, at R20 each R40.
13. **Modern Vernacular Literature of Hindustani, by G A. Grierson.** (Extra No, J A. S B., 1888.) R4.
14. **Moore and Hewitson's Descriptions of New Indian Lepidoptera,** Parts I—III, with 8 coloured Plates, 4to, at R6 each R18
15. **Sharaya-ool-Islam.** R4
16. **Tibetan Dictionary,** by Csoma de Körös. R10.
17. **Tibetan Grammar,** by Csoma de Körös R8
18. **Vuttodaya,** edited by Lt-Col G E Fryer R2

Notices of Sanskrit Manuscripts, Fasc I—XXV, at R1 each R25.

Nepalese Buddhist Sanskrit Literature, by Dr R L Mitra R5

N.B.—All Cheques, Money Orders, etc, must be made payable to the "Treasurer, Asiatic Society," only

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students

Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required —

VOLUME I *

Section	I.	Building Materials	(1895),	R2-0.
"	II.	Masonry	(1891),	R1-4.
"	III.	Carpentry	(1889),	R1-4.
"	IV.	Earthwork	(1892),	R1 4.
"	V.	Tools and Plant (never published).		

VOLUME II *

Section	VI.	Buildings	(1891),	R1-4
"	VII.	Bridges	(in the Press).	
"	VIII.	Roads	(in the Press).	
"	IX.	Railways	(1891),	R1-4.
"	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8

" II. The Stability of Structures, mostly by Graphic Methods (in the Press)

MANUALS.

VII. **Surveying** (by Major Firebrace, R E.) (6th edition), with Curve Table (in the Press)

XIII **Drawing** (by Lieut. R. Pulford, R.E.) † R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4

XIV. **Simple Applied Mechanics** (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II. (1st edition). 8a

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C C Sullivan, Esq., Head Master (5th edition) (in the Press)

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat

* Date of Edition on sale.

† Originally published at R13, reduced to R8.

MISCELLANEOUS.

ENGINEERING WORKS

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet. 8a.; mounted on cloth and bound (in the Press). R1-12

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1 4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq , M D , F.R S E 6a

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M I C E R2-4

Graphic Hydraulic Diagram for Channels in earth, etc By R. G. Kennedy, Esq , Executive Engineer. R7-8

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width R1-8

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition) R1-8.

Boileau's Tables of Log sin² ½ P (for computing time), 4a

Cape's Logarithms, with Tables of Squares, Cubes, etc (in the Press).

Cape's Geometry. R1-4

" **Mechanics** R1

Military Topography. 8a.

HINDUSTANI

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. R1

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu). 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.
Surveying Field-Books (ruled). R1.
Levelling Field-Books (English Pattern). R1-8.
„ „ (Canal „). R1-8.
„ „ (College „). R2-0.
P. W. D. Note-Book. R1-4.
„ **Measurement Book.** R1-4.
Circular Card-board Protractors, 12 inches (exclusive of packing). R1-6.

MISCELLANEOUS.

Distributary Velocity and Discharge Table. By Capt. Allan Cunningham 8a.
Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India") R1-8.
Ditto, ditto, in Urdu. R1-4.
Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.
Map of Roorkee. R1.
Thomason College Calendar for 1891, 1892, 1894,* and 1895,* each R2.
Ditto ditto, for 1896 * R4-12.
Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 8a.
Memo. of Instructions for Road Project. R1.
Project for College Mess (sample Project). R1
Ferrotype Printing Processes. 8a
Thomason College Library Catalogue. R2-2.
Ditto, Supplement, 1895. 2a.
Ditto, ditto, 1896. 2a.
Irrigation by Rajbahas, 12a.
Irrigation Tract, No. I. 8a.
„ „ „ II. 8a.
„ „ „ III 8a.
Land Measuring Chain Statement, Area of kucha and pucka Bighas, sheet 4a.
Report of the Ganges Canal Committee (Major Crofton's Project for remodelling the Ganges Canal according to the views of Major-General Sir Arthur Cotton, R.E., K C S.I.), 1866. 8a.
Report of the Ganges Canal. By Captain J. Crofton, R.E., with Estimates and Plan—
Vol. I, Report, 1865. R1.
Vol. II, Estimates. R1.
Shakesperian Readings, *viz.*:—
1. Taming of the Shrew,
2. Othello,
3. Macbeth,
4. Comedy of Errors,
5. Merchant of Venice,
} each 4a.
Graphic Hydraulic Diagrams for channels in earth, giving Discharges and mean Velocities for varying bed widths, depths, and slopes. By R G. Kennedy, Executive Engineer. R7 8.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared between 1804 and 1808 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)

Bengal, 51 Plans,
Madras, 99 Plans,
Bombay, 91 Plans,
N.-W. Provinces, 104 Plans,
Oudh, 21 Plans,
Rajputana, 4 Plans,
British Burma, 19 Plans,
Central Provinces,
} each 8a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.
Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.
Vol. II, Quarterly Nos. 6 and 7, at R1 each.
„ III, „ No. 13, R1.
„ V, „ Nos. 18, 19, 20, and 21, R1 each.
„ VI, „ Nos. 22, 23, 24, and 25, R1 each.
„ VII, „ Nos. 26, 27, 28, and 29, R1 each.
Extra No., April 1870, R1.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each
Quarterly Number 41A of Vol. X, at R1 each.
Cloth covers for Volumes, 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each.
Index to Professional Papers, and loose Papers, 1st and 2nd Series, at 2a. each.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870.—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8.

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0	5	3	0	5	9
„ the Calcutta Series. For the year .	7	2	6	8	6	3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	" 24
" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 64
" twelve "	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage		
	R	a.	p.	R	a.	p.
Bengal Law Reports, for one year	20	0	0	22	8	0
Single copies, R2 per copy.						
Full Bench Rulings, Parts I and II	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No 8, Hastings Street, Calcutta, and will be supplied to non subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names, habitat or source, history, properties and uses (both chemical and industrial), trade statistics, markets etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries

Volume I contains the letters A and B, and consists of 559 royal 8vo pages, Volume II embraces the letter C in 669 pages, Volume III contains the letters D, E, F, and half of G, Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O, Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4a.)
1888-89, 18 Plates with Text. R4-8 a set (8a.)

Lost or Stolen.

Debenture No. 14975, of the 5 per cent. Bombay Municipality Tansa Water Works Loan, for R500, originally standing in the name of the Agra Bank, Limited, and Debentures Nos. 15542, 15543, 15544, 15545 and 15546, of the 5 per cent. Bombay Municipality Tansa Water Works Loan, for R500 each, originally standing in the name of the Hongkong and Sanghai Banking Corporation, and last endorsed to Krishnabai, widow of Bapuji Vishwanath Kale, the proprietress, by whom they were never endorsed to any other person. Payment of the above Debentures and the interest thereupon have been stopped at the Bank of Bombay, and application is about to be made to Municipal Commissioner for the city of Bombay, for payment of interest and the issue of duplicates.

KRISHNABAI,

Widow of Bapuji Vishwanath Kale,
Shanwar Peith, Gadgil's Wada,
opposite Bara Jotilinga, Poona.

SUPPLEMENT TO

The Gazette of India.

No. 45.} CALCUTTA, SATURDAY, NOVEMBER 7, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

J. F. FINLAY,
Secretary to the Government of India.

ORGANISATION OF RELIEF WORKS IN THE PATNA DIVISION.

THE following papers are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 10th December 1896.

RESOLUTION—No. 5133.

READ—

(1) Notes made on his tour in Bihar by the Hon'ble Mr. Finucane, Revenue Secretary to this Government, between 23rd November and 5th December 1896.

(2) Notes of the Proceedings of a Conference held at Muzaffarpur on the 4th and 5th December 1896.

(3) Letters from the Commissioner of Patna, No. 625G., dated 19th November, and No. 669G., dated 7th December 1896.

Read again—

Notes of Proceedings of a Conference held at Sonepore on 20th November 1896.

Report of the Commissioner of Patna, No. 699G., dated 11th November 1896, drawn up in accordance with section 9 of the Famine Code.

At the Conference held at Sonepur on 20th November, Sir Alexander Mackenzie, in summarising the results of the discussion that had taken place on impending scarcity in the Patna Division, said that as the Commissioner and local officers were of opinion that it would be undesirable for the Lieutenant-Governor personally to visit the affected areas at that time, he would refrain from doing so, but would leave behind him the Hon'ble Mr. Finucane, the Revenue Secretary to this Government, who would visit the various districts with Mr. Bourdillon, the Commissioner, and that both of them would discuss with District Officers the relief works necessary, the area and organisation of relief circles, the tasks of work to be demanded, the rates of wages to be given, and various other details of famine-relief administration. The Commissioner was, unfortunately, owing to temporary ill-health, unable at that time to go on tour; but Mr. Finucane, accompanied by the District Officers, moved rapidly over the tracts in which the failure of the winter rice crop is greatest and distress imminent and likely to be severe. He laid the results of his observations before a Conference held at Muzaffarpur on the 4th and 5th of December, at which there were present Mr. Bourdillon, the Commissioner, Messrs. Hare, Macpherson and Carlyle, Collectors of Muzaffarpur, Champaran and Darbhanga, Mr. Stevenson-Moore, Settlement Officer, Mr. Russell, Subdivisional Officer of Sitamarhi, the Hon'ble Mr. Glass, C.I.E., Chief Engineer and Secretary to this Government in the Public Works Department, Mr. Mills, Inspector of Local Works, and Mr. Healy, District Engineer of Champaran.

2. The Lieutenant-Governor considers that Mr. Finucane's tour has been most useful, and is much indebted to him for the care and thoroughness with which he has gone into the questions that came before him. The results of the deliberations of the Conference are summarised in their recommendations annexed to this Resolution, on which the Lieutenant-Governor now desires to record the following observations and orders:—

Area affected in the Patna Division.

It appears that the rice crop is very seriously short, and in some tracts almost a total failure, throughout the non-irrigated parts of the rice-growing areas of Darbhanga, Muzaffarpur and Champaran.

The following statement shows the areas estimated by the District Officers to be more or less severely affected in these districts. In some of the areas shown in the statement distress is already beginning to be felt, and in the rest it will certainly be felt more or less generally a little later on. In the former

areas it is proposed to form relief charges at once, and in the latter as the necessity arises. The following table also shows the number of relief charges and circles which it is proposed to create, and the number of relief charges proposed to be created at once and later on:—

District.	Area likely to be ultimately affected.	Population of the affected area.	Number of Superintendents' charges—		Number of circles—	
			Ultimately to be formed.	Now to be formed.	Ultimately to be formed.	Now to be formed.
1	2	3	4	5	6	7
	Sq. miles.					
Champaran ...	2,589	1,469,308	11	4	55	9
Muzaffarpur ...	1,851	1,660,000	12	6	85	33
Darbhanga ...	2,044	1,720,000	8	5	57	24
Total ..	6,484	4,849,308	31	15	197	66

Establishment proposed for administration of Famine Relief.

It is proposed to appoint a Superintendent of relief of the rank of a gazetted officer to each charge, having an area of 200 to 300 square miles and a population of about 250,000 persons, with a staff of Circle Officers or Inspectors and clerical and other establishment as noted in the margin. The number of Circle Officers in a Superintendent's charge is to be so regulated that each Circle Officer will have an area of about 30 to 40 square miles with a population of about 25,000 to 30,000 persons. The proposed establishment is large, especially in Muzaffarpur, where the number of charges proposed by the Collector may probably be reduced, but the Lieutenant-Governor sanctions the scheme so far as present requirements are concerned, for His Honour is clearly of opinion that a strong and efficient establishment is necessary at the early stages of a famine, in order to make sure that relief works are properly organised and undertaken, as soon as they are required, in strict accordance with the provisions of the Famine Code, that lists of deserving objects of gratuitous relief are drawn up after house-to-house visitation and enquiry, as contemplated by sections 31 (*a*) and 41 to 43 of the Code, and that respectable women and others who are unable to labour and are ashamed to beg, and have nobody to maintain them, are not allowed to die in their homes for want of food.

Clerical and other staff for each Superintendent—

	Rs.
A clerk on ..	30
A muharrir on	20
One orderly on	6
	56

For each Circle Officer or Inspector—

One muharrir on	12 to 20
One peon on	6
Petty establishment to be selected from applicants for relief.	

3. In all the areas for which it is now proposed to organise relief charges, rice is the predominating, and in some of them almost the only crop grown, and serious failure of that crop must necessarily mean severe and protracted distress. It is to be remembered that while in *rabi*-growing tracts a good *rabi* crop will replenish the food-supply in April, in rice-growing areas, on the other hand, food-supplies will not be replenished till the next *bhadoi* harvest in August and September, and in these latter tracts credit is contracted and alarm felt sooner, while distress lasts longer than where hopes of early relief may be entertained from *rabi* crops.

4. The Conference for these reasons recommends that relief charges should be organised immediately in areas where the failure of the winter rice is greatest and distress is beginning to be already felt, and that afterwards, as the necessity for them shows itself, relief charges be created in the remaining tracts in which the failure of crops has not been actually so great.

The Lieutenant-Governor accepts the recommendations of the Conference on this point.

The comparatively slight expense that will be entailed by the early appointment of an adequate relief staff where distress is likely to be acute will be recouped manyfold later on, not only in saving life and guarding the classes dependent in ordinary times on private charity and others, from getting into a state of weakness and emaciation, but also in preventing the waste of money and confusion that may arise if large bodies of people were suddenly to rush on to relief works, before the staff necessary to classify them and to exact the tasks and to distribute the maximum and minimum wage prescribed by the Code, is prepared to receive them.

5. It is proposed to appoint 15 Superintendents of relief and 66 Circle Officers at once. Of the Superintendent's charges, five can be filled up from the existing staff of Government officers in the Division, and every effort will be made by the Appointment Department to fill up at once some of the other charges by Assistant Superintendents of Police of some standing from other parts of Bengal.

The Conference recommend that the remaining charges should be manned by Indigo-planters (if their services can be obtained) with local knowledge and experience of the country and people, on salaries of Rs. 200 to Rs. 300 per month, with horse allowance of Rs. 100, and that Superintendents of relief who are Government servants be allowed, in addition to their ordinary pay, a horse allowance of Rs. 100 per month.

Having regard to the facts, that a great strain is already placed on the administration of these Provinces by the employment of a large number of officers on settlement and survey work, that distress more or less severe is apprehended in nearly all districts, that it is consequently impossible to weaken the normal staff in districts outside Bihar, that it is improbable that other Provinces will be able to lend any of their officers, and looking especially to the advantages secured by the employment on famine duty of gentlemen of active habits, local knowledge and experience, the Lieutenant-Governor is anxious, if the Government of India have no objection, to secure the services for famine relief, of as many suitable Indigo-planters as can be procured and may be required. Young assistants of a few years standing with an adequate knowledge of the language would be the kind of agency to be sought for.

It is, however, to be clearly understood that non-official gentlemen who may be employed as Superintendents of relief charges, in the way proposed by the Conference, are for the period of such employment to be regarded as Government servants, that they are to be exclusively engaged on famine duty, that they are to be liable to be employed in any part of Bihar at the discretion of the authorities, and that they are to be subject to the same discipline and control as Government servants.

6. The Indigo Planters' Association have offered to give the services of its members in their respective neighbourhoods, as circle officers, under the Superintendents and free of charge. The Lieutenant-Governor thankfully accepts the offer, but here again it is necessary that it should be clearly understood that these gentlemen should perform the famine duties which they voluntarily undertake, under the same rules and conditions as to submission of returns and accounts and supervision of relief works and distribution of gratuitous relief, as other circle officers who are paid by Government. A small clerical establishment may be allowed them for the compilation of returns and accounts if found to be necessary.

Suitable candidates to fill up the remaining number of circle officers, who are to be paid, can, the Commissioner reports, be obtained locally on a pay of Rs. 50 with Rs. 25 horse allowance. The Commissioner is hereby authorised to entertain these officers as they may be found to be required.

7. It is believed that the arrangements, as regards establishment, now authorised, will be amply sufficient to meet present requirements. By the time when it becomes necessary to extend the organisation of relief charges and circles, it is probable that a large number of officers will be set free, say, by the end of February, from survey and settlement work, and will thus become available for employment on famine relief, so that it will not, it is hoped, at any time become necessary to draw very largely on the regular staff of other districts, which is already as small as it can safely be.

Provision of tents, treasure-chests, &c.

8. In paragraph 11 of the memorandum of the proceedings of the Conference, it is recommended that each Superintendent of relief should be furnished with a tent for himself and a *pal* for his servants, and each Circle Officer with a *pal*. The Military Department will be asked if they can lend the requisite number of tents and *pals* on indent from the Commissioner; if not, the Lieutenant-Governor will sanction their purchase.

9. His Honour sanctions the purchase of treasure-chests as proposed in paragraph 12 of the memorandum—one for each Superintendent, to hold Rs. 10,000, and two for each Circle Officer, one of iron to hold Rs. 500 in silver, and another of wood to hold the same amount in copper.

Accounts.

10. The Lieutenant-Governor also accepts the proposals contained in paragraph 13 of the memorandum, namely, that sums available for expenditure on relief works by District Boards should, with the consent of the Boards, be placed to the credit of the Collector. It is certain that the District Board Funds will have to be largely supplemented by Government, and it is obviously desirable that there should be uniformity from the outset, in the method of keeping famine accounts, and that the delays attendant on the cumbrous procedure of estimates and sanction by the Boards at meetings which it may not be possible to convene in due time, should be avoided. The Boards should, however, be consulted and their wishes met, so far as possible, in the allocation of their funds to the particular works on which they may desire to expend them. The transfer will only be made for the purpose of facilitating the keeping of accounts in a proper and uniform manner.

11. Sir Alexander Mackenzie agrees (paragraph 14 of the memorandum) that for all major works carried out under the Public Works Department agency, accounts should be kept under the Public Works departmental system, and that for all other accounts the Collector is to be responsible. He is also of opinion that in order to avoid keeping Subdivisional Officers tied down to their offices, and to enable them to move about freely and supervise all relief work in their respective subdivisions, they should be merely disbursing officers and not officers of account.

The Accountant-General will be asked to depute an officer to Bihar to confer with the Commissioner and Collectors, and to arrange the details of the account system on the lines indicated.

Contributions for well-sinking (paragraph 16 of the Memorandum).

12. It is proposed, in order to encourage the extension of the sowing of *rabi* crops, and especially of food *rabi* crops, such as barley, potatoes, *cheena* and *khesari*, for the sowing of which it is not yet too late, and to secure the *rabi* that has been sown against possible failure from want of rain, that a contribution of one rupee should be given by Government for each *kutcha* well sunk after the date of notice, up to a limit of two lakhs of rupees over the whole Division. The cost of these wells is only about Rs. 2-8 each. Every well sunk now, in suitable land, will not only add largely to the food-supply of the country in March and April, but will also save Government later on from expenditure on wages of cultivators on relief works, who by securing and extending their *rabi* crops will *pro tanto* be enabled to keep longer away from relief works. The Lieutenant-Governor therefore sanctions the proposal, and hopes that vigorous steps will be taken to give effect to it. The expenditure incurred in this way may be charged to famine relief. It is said that in some tracts the raiyats are unwilling to irrigate their lands from wells or to sow *rabi* crops where they have not hitherto been accustomed to do so. The Lieutenant-Governor believes that the apathy of the raiyats and their unwillingness to help themselves in this way are exaggerated; and that if prompt steps are taken to give effect to the orders regarding well-digging already passed, and now repeated and emphasised, much good can still be done in this direction.

It may, no doubt, be a fact that in certain parts of Bihar the conditions of the soil, sub-soil and water are such that well-irrigation may prove injurious, and that as regards such parts caution is necessary. Samples of the soils and

water referred to have been sent to Dr. Leather, Agricultural Chemist to the Government of India, whose opinion will be communicated to the local officers on the earliest possible date.

Advances for purchase of grain imported from beyond the seas (paragraph 17 of the memorandum).

13. It was brought to the notice of the Conference that many gentlemen of position, local knowledge and experience in Bihar, are of opinion that stocks, especially in the more inaccessible places, are likely to become depleted before private trade could supply the local deficit, and it was suggested for consideraation whether, without in any way interfering with private trade, Government might unobjectionably advance money, at moderate interest, for the purchase of grain imported from Burma or elsewhere, which might be sold or distributed locally without any interference on the part of Government. The Commissioner recommends that the suggestion be accepted "as the last bulwark against depletion of stocks in out-of-the-way places," on the condition that grain for which loans are made is in the first instance imported from beyond the seas and purchased in Calcutta or other distant markets, and that full and adequate security is forthcoming for the repayment of the loans. The Commissioner is also of opinion that such advances should only be made to well-known men who may be trusted not to compete with local bunniahs. In 1873-74 Government sanctioned arrangements whereby, in places likely to be in want, and in which there were not thought to be traders to import food, advances might be made—

(*a*) to zamindars, planters or others, on the condition that they would import grain from a distance and sell it as near as possible at cost price, all expenses included;

(*b*) to traders and others of safe and responsible character at a moderate interest of 6 per cent., who were to import grain from a distance without any conditions as to the rate or manner of selling it.

Proposals such as were sanctioned under head (*a*) in 1873-74 clearly involve interference with private trade, and cannot now be entertained; but there appears to the Lieutenant-Governor to be no strong objection to advances of money by Government at reasonable interest (say 6 per cent., and on adequate security, for purchase in Calcutta of grain, imported or to be imported from beyond seas, and sale or distribution of it in remote areas, provided the persons to whom such loans are given are allowed to sell or otherwise dispose of it at their discretion and at their own risk. The only conditions which it would be necessary to stipulate for would be (1) that supplies are drawn from districts beyond those in which scarcity extends or is apprehended (in the present instance all India), and (2) for occasional inspection of grain invoices (chalans), in order to verify that the persons to whom advances are made do really import grain into the inaccessible tracts, and that it was obtained originally outside Bengal or other provinces threatened with scarcity. No maximum or minimum limit need be put on the amounts of such loans, nor need any distinction be made as to the class of persons to whom such loans may be made as long as they can give sufficient security for repayment with interest at any time, up to the end of 1897 that Government may demand repayment. If the conditions of the loan should be violated, the amounts advanced might be realised at once, but otherwise they would not be recovered before the end of 1897.

Page 50 of Correspondence on Famine in Bengal and Bihar of 1873, Vol. I.

The question appears to be more one of finance than of interference with trade. It will be submitted for the orders of the Government of India, but meanwhile if, pending receipt of the orders of the Supreme Government, the Commissioner or District Officers receive any definite applications for loans for the purpose indicated, they should submit them for the orders of Government.

Charitable Relief Committees (paragraph 18 of the memorandum).

14. The question of the creation and functions of Charitable Relief Committees is under the consideration of the Government of India. The Trustees of the Bengal Distress Relief Fund have been requested to place at

the disposal of the Accountant-General the Funds on their hands, for distribution among Commissioners and Collectors in order to meet the immediate wants of those who are in need of gratuitous relief.

Relief Works (paragraphs 19 to 27 of the memorandum).

15. Sir Alexander Mackenzie approves the suggestion that the Hon'ble Mr. Glass, who has had large experience of famine relief works, should draw up scales of work to be done by individuals and gangs for various classes of soils and varying conditions of lead and lift, and His Honour desires that the scales thus drawn up should be generally adhered to by local officers. The task of work to be demanded being fixed, Collectors can, under the Commissioner's control, determine the daily wage to be given under the provisions of the Famine Code.

The Lieutenant-Governor agrees that the major works mentioned in paragraph 20 of the memorandum should be placed directly under the officers of the Public Works Department, and be administered by an entirely separate staff. They should not, however, be carried out on piece work by contractors, but as relief works under the rules prescribed in sections 89 to 96 of the Famine Code. Ordinarily only able-bodied labourers should be employed (section 89) on them, but the wages of the labourers who are employed should be regulated by the provisions of Chapter VII, sections 101 to 106 of the Code, as regards the maximum and minimum wage. Section 52 (4) of the Code prohibits the carrying out of any famine relief work by contract.

16. An officer of the Irrigation Department has been directed to proceed to Bihar at once, as suggested by the Conference (paragraph 20). He should first examine the possibility of the irrigation schemes already suggested in North Madhubani and afterwards of the other schemes proposed in North Bettiah and Muzaffarpur. Another officer of experience is also being deputed to examine the country generally with a view to the elaboration of other schemes.

17. The Lieutenant-Governor approves the proposals of the Conference for expediting the taking up land for the proposed railway lines noted in the margin, to the survey of which the sanction of the Government of India has already been received.

Nos 2 and 3, Barragnia-Bagaha and Sakri-Joynagar

18 The proposals made in paragraph 24 of the memorandum regarding the establishment required for supervision of relief works is approved, but His Honour thinks that one, or at the outside two, Civil Hospital Assistants ought at first to be sufficient for each Superintendent's charge. Many of the labourers on relief works will return daily to their homes, but where large numbers are congregated in one work and do not return daily to their houses, one Civil Hospital Assistant and sanitary arrangements may be required for each camp with 3,000 persons at work; for small works a visiting Hospital Assistant and one central hospital in each charge ought to suffice. The Inspector-General of Civil Hospitals, in communication with the Commissioner, will be requested to make the necessary arrangements for giving effect to these orders.

The arrangements indicated in paragraph 26 of the memorandum as to supply of baskets, *kodalis*, medical stores, including permanganate of potash and chloride of lime, &c., are approved.

Advances for tanks and other village improvements (paragraph 27).

19. The Conference suggest that advances should be given by Government, free of interest, in the distressed areas to zamindars, middlemen, substantial raiyats, and traders, for excavation in their own villages of tanks and execution of other petty works.

The Lieutenant-Governor considers that it would be desirable to give advances freely for such works, provided that care is taken that the works for which they are given are really executed, and that the money advanced is not spent on purposes other than those for which it is advanced, and that the works are really improvements which are likely to add to the supply of water for drinking or irrigation purposes. This object might be attained by making such advances in instalments, the later instalments not being paid till the Government officers are satisfied that the sums previously advanced have been properly spent.

. It is probable that a saving to the State would be ultimately effected by making such advances to persons who, from religious or charitable motives or in order to perpetuate their names, are now willing to excavate tanks, but have not the necessary funds available. Even if the whole of the amounts so advanced are not ultimately recovered, what may be realised will be so much saved, for in any case the tanks, if not made by such persons, would probably have to be made as relief works at the expense of the State. Before advancing Government money for tanks, care should be taken that the sites of tanks proposed are selected and approved by the officers of Government with due regard to levels, so that it may be possible to connect them with rivers by *pynes* or channels, and thus to have them flushed with water when it is required, and so made permanently useful for purposes of irrigation and consequent prevention or mitigation of future scarcities from drought. This is an object which should be carefully borne in mind in connection with all relief works of this class in North Bihar.

The rules for making advances under the Famine Code (section 200) do not, however, permit of advances or loans being given without interest. The Government of India will be asked whether they are willing to relax, during the present and following year, the rules under the Land Improvement and Agricultural Loans Acts, in areas affected by scarcity.

20. In connection with this subject the attention of all officers is invited to section 77 of the Tenancy Act, which empowers raiyats at fixed rates and occupancy raiyats to make improvements [in which term are included tanks and wells, water channels for irrigation, and storage and supply or distribution of water for the purposes of agriculture or for the use of men and cattle employed on agriculture] without the consent of the landlord, where the landlord is unwilling to execute them himself Instances have come to the notice of Government in which raiyats were desirous to execute such works, but were prevented from doing so, because the landlords refused consent, though unwilling themselves to make them. If the provisions of the law in this respect are made widely known, it is possible that many works will be voluntarily undertaken by private persons which would otherwise have to be done at the expense of Government.

21. As to the question whether the people should be drafted off at the early stages to the major works, as suggested in paragraph 27 of the memorandum, a reference will be made to the Government of India.

Sir Alexander Mackenzie is himself disposed to think that when villagers take advances for relief works to be executed in their villages, at their own expense, they may be left to decide for themselves whether they will carry them out at the early or later stages, as they think fit, but that in case of works executed at the public expense, the people should at the earlier stages be provided with work near their homes; and that as soon as they have become accustomed to the system of work and payment and have acquired confidence in the officers under whom they are employed, the able-bodied may be drafted off to the major works in the manner prescribed in sections 72 to 75 of the Code.

22. The Lieutenant-Governor notices with pleasure that, in the areas over which Mr. Finucane travelled with one or two exceptions, no complaints were made by the raiyats of their being pressed by their landlords for payment of rent, but on the contrary that it was admitted by the raiyats that no attempts were being made to realise from them now, rents which they are manifestly unable to pay.

23. In conclusion, Sir Alexander Mackenzie trusts that the arrangements now sanctioned will be sufficient and suitable for effecting what is the paramount aim of famine relief, namely, the saving of human life—while they will at the same time, it is hoped, be adequate to guard against unnecessary waste of public money, and His Honour has every confidence in the ability and determination of the Commissioner, the District Officers and their subordinates, with the willingly promied aid and co-operation of the non-official community, European and Native, to attain these most important objects.

24. The memorandum of the   of the Conference with the Revenue Secretary's diary are published with this Resolution for general information.

By order of the Lieutenant-Governor of Bengal,

E. M. KONSTAM,

For Secretary to the Government of Bengal.

MR. FINUCANE'S DIARY FROM THE 23RD NOVEMBER TO 5TH DECEMBER.

23rd November.—Left Sonepur at 10 A.M. on the 23rd November 1896 Mr. Bourdillon was, owing to temporary illness, unable to come. Mr Hughes travelled with me to Muzaffarpur. Ploughing for *rabi* sowing going on in the neighbourhood of Hajipur, where some rain fell on the night of the 22nd.

Sarai Railway Station.—Little rain last night, and no ploughing going on here. Between Sarai and next station little rain. *Rahar* and sugarcane good Much potatoes sown in this neighbourhood.

Bhagwanpur Station —Only a slight shower last night.

Garaul Station—Batcul a part of dehat.—Scarcely any rain last night. No ploughing. Rice between Sonepur and Garaul I should say 4 annas or more.

Garaul to Kurhani.—No ploughing. Very little rain last night. Rice worse than in the preceding tract.

Kurhani to Turki.—Some *koeri* cultivation. *Rabi* not sown yet in parts and not being sown now. Station-master says there were importations of *makai* (1,000 maunds) last week; none in corresponding period of last year Rice will be, he says, 4 annas if there is rain now; otherwise 2 annas *Rabi* may, with rain, be 16 annas. Only a slight shower here last night. No ploughing for *rabi* going on.

Apparently there was somewhat more rain near Muzaffarpur. Rice better near Muzaffarpur than in the preceding tract.

Breakfast at Muzaffarpur Rice crop estimated by Director in Sadar subdivision at 3 annas. I should say it will be much more in villages so far along the line of rail. Muzaffarpur station-master says exports and imports here are normal. He thinks large stocks are in hand in the town

Left Muzaffarpur at 12-30 Rice and other crops in immediate neighbourhood of Muzaffarpur on Darbhanga route comparatively good. Crops between Muzaffarpur, Silout and Dholi stations very good. Rice I should say 8 annas *Rabi* doing well. *Rahar* and sugarcane very good. I should think this tract safe. Little rain last night. Between Dholi and next station (Waini) tobacco very good. Rice 8 to 10 annas. *Rabi* doing well. Crops here unexpectedly good. Saw large *mats* or stretches of rice which I should say have a 10- to 12-anna rice crop. Cattle in good condition. *Rabi* doing well, and villages in normal condition.

Samastipur to Darbhanga —Rice crop on the Darbhanga side is far worse than on the Muzaffarpur side Saw buffaloes grazing down the rice in parts, a few miles out of Samastipur. The crop generally near the railway is very bad (2 annas at the outside) near Samastipur. The rice crop in the Director's returns in the Darbhanga Sadar subdivision is put down at 4 to 5 annas. About Kishenpur Railway station it does not appear to me to be so much.

Kishenpur to Hyaghat —In some of this tract there is no crop on the ground. Little or no rain last night. Near Hyaghat *rahar* and *chota janera* very good. Cattle in good condition.

Darbhanga side of Hyaghat *rahar* and *janera* good. Raj peons at Hyaghat say rice only a 2-anna crop. Approaching nearer Darbhanga about Laheria Sarai rice extremely bad.

24th November.—Left Darbhanga for Sakri with Mr. Carlyle, C.S., Collector of Darbhanga, having previously discussed relief matters with Mr. Bell, Manager of the Darbhanga Raj. Mr. Gladstone, of Gillanders, Arbuthnot and Company, Calcutta, has sent up samples of Californian maize, which can be landed in Calcutta at Rs. 4 a maund. It appears to be quite good.

Station-master at Darbhanga says that imports are normal, and that telegraphic messages have come from up-country to traders in Darbhanga telling them to stop purchases for there owing to recent rain. Export of food-grain for week ending 7th November, 15,372 maunds against 27,303 maunds last year. Week ending 14th November, exports 15,512 maunds against 28,865 last year. Imports, 7th November, 18,754 maunds against 10,215 maunds last year; imports 14th November, 12,810 against 12,424 maunds last year. Exports are therefore less and imports more than in the previous year.

Darbhanga Station to Tar Sarai.—Great part of the land not even sown down with rice. What there is of rice is extremely bad—not more than 2 annas. These villages require very careful watching and opening of relief works without delay. Most of the villages belong to the Darbhanga Raj

Tar Sarai to Sakri.—More of a *rabi* country than preceding tract. *Rahar* and sugarcane good. Rice also better More of it irrigated from tanks

Drove from Sakri to Madhubani (10 miles). *Rabi* germinating well. Rice looks better than I expected. Sugarcane and *rahar* good. This is an indigo and therefore a *rabi* country.

Drove from Madhubani to Nararh (21 miles). The rice crop all over this tract is bad; and there is little *rabi* Mr Carlyle estimates the rice we saw in this part at 6 to 8 annas. I should think it was not so much—about 4 annas at the outside.

Arrived at the camp of the Subdivisional Officer, Mr. Smither, C.S. (at about 8-30 P.M.) at Jageeahi on the Nipal frontier. Mr. Smither estimates the outturn of the rice crop in the subdivision generally at less than 4 annas In the tract where he is in camp from Jageeahi to the Devoge outpost, 4 miles all round, it is, he thinks, less than 1 anna rice crop. At Dedar there will be a 16-anna crop owing to irrigation by the Kamla river. The Subdivisional Officer has opened one relief work at Nararh, raising the *likha* of a road; one at Kamtaul, raising the approaches to a bridge; one at Khajauli, raising the road there. There were 130 workmen yesterday at Nararh.

The average task is 35 feet of earthwork for each person (man, woman and child), or 105 feet for a family of three.

Wages.

	As.
For full-grown men	1½
For full-grown women	1¼
For big children	¾
For small children	½

These works all require some professional supervision. The task appears to be too small.

Harbans Sahai, Deputy Inspector of Schools, who has been appointed by Mr. Carlyle to inspect certain villages round Jageeahi, says that he has visited nine or ten villages, and that beggars and old women are already suffering from distress. He is giving gratuitous relief in grain doles an anna's worth to adults, half anna's worth to big children and a quarter anna's worth to small children. He thinks the crops here worse than in 1873-74. He was on famine relief in Sitamarhi in 1873-74: thinks there are no stocks in hand.

Saw the Tahsildar (an ex-Sub-Inspector of Police) who has been endeavouring to collect rents in villages Parwa, Jageeahi and Kamlabari.

November 25th, morning.—Went through Jageeahi village and saw the standing crops. The rice may be said to be almost a complete failure. The land is quite hard and dried up. Raiyats complain much that the zamindar's agents are pressing for rents. Some few raiyats ran away within the last few days.

It is admitted that some of the jeth raiyats have some 50 maunds of grain each in stock. No rain here recently.

Saw relief work at Dhulapatti. Men employed are principally *dosads* and *chamars*: women and children numerous, and children rather weakly. Rode from Nararh to Porsa. First dâk; rice here appears to me to be 6 to 8 annas or more. *Rahar* good.

I saw Mr. Christian at Umgaon. He says the rice is a total failure in parts of the country round Umgaon; that the crops generally are worse than in 1872-74. Imports from Nepal are stopped. People from our side going over for work there are turned back. On the whole, the rice is very bad from Umgaon to Balwa and there is little *rabi*. Relief works will be required in this part of the country in a month or less. People came out here and asked to have work on tank excavation begun, or work given on roads. For a month, they say, they may get on with such employment, as they can get in cutting *dhan*, &c. After that, relief works will be required generally. In one place raiyats said it is necessary to open relief works now. In particular villages where there were means of irrigation the rice crops looked far better than I expected. In them there will be an 8- to 12-anna crop, but generally the rice crop about Umgaon all the way as far as I saw it before it become dark was very bad, 2 to 4 annas, and in places nothing: *rabi* germinating fairly where sown, but no rain here recently, and soil is too hard to permit of further sowings.

Arrived at Kamtaul 8-30 P.M.; distance driven about 46 miles. Mr. Cruickshank, who is Manager of Kamtaul, for the Darbhanga Raj, says rice crop about Kamtaul is a total failure in some places. He has 42 villages, in 8 of which there will to be 8 to 12 annas, irrigated from the Kamla. In the rest either nothing or 2 to 4 annas. Stocks in hand from last year's crop put down at 65,000 maunds for villages containing 30,000 persons.

Messrs. Halliday, Manager of Rai Gunga Pershad's estates, and Carlyle, who accompanied me from Sakri to Jageeahi and thence to Kamtaul, agree in the above estimates of crops.

26th morning.—Drove through the following villages with Mr. Cruickshank and Mr. Carlyle, and made enquiries—

(1) Herapath, (2) Jagwari, (3) Madhpore, (4) Rajwan, and (5) Megwan.

1 to 4 are all non-Raj villages. The Darbhanga Raj has a small share in 5. The rice crop in all these villages is a complete failure. There are large stretches of rice land, which are absolutely without anything. There is little *rabi*, and that not good. People came out on the way and asked to have relief works opened. The more substantial raiyats asked for advances, offering to pledge their lands: they said no rents are being collected by their maliks. Kishunbullub, who is part owner of a village where we stopped and made enquiries, says he has no grain in stock, but others have, and thinks that grain will be procurable if work be given on roads and tanks, and charitable relief to those who cannot work. There is a good deal of sickness (paralysis) here, said to be caused by eating *khesari*. Some of the children look underfed and suffering from spleen. A relief work has been opened at Kamtaul by the Darbhanga Raj. Told Mr. Carlyle to inform Mr. Bell that more works might be opened with advantage in this locality.

Eight or ten villages here west of Palu and including East Jageeahi, all like the villages visited. No *dhan* on the ground. North of Trimohan a good crop, 8 to 12 annas along the frontier. One mahajan has 10 or 12 thousand maunds of grain in stock. Want of drinking-water felt here. Mr. Cruickshank thinks a tank is required, which I think ought to be dug. Returned to Kamtaul; after breakfast left by rail for Sitamarhi.

26th evening.—Arrived at 9 P.M. at Sitamarhi. Stayed the night with Mr. Russell, C.S., Subdivisional Officer, and discussed state of subdivision with him.

27th morning.—6 A.M.—Went with Mr. Russell up to Righa, 6 miles by trolly, on the Bengal and North-Western Railway to Bairagnia. The rice crop here is very bad. Whole stretches of rice land are without a crop. The rice has been in places grazed or cut down, and

what is standing is without much grain. I should say 1 to 2 annas about all there is here. *Rabi* germinating well and a number of kutcha wells being made. Saw these wells all over the place. *Rabi* is being irrigated from them. Area under *alwa* (yams) increased manyfold this year (six times) owing to failure of rice. The wells and sowing of *alwa* are new. It is satisfactory to see that the people here are endeavouring to help themselves by sinking kutcha wells, sowing *alwas* and *rabi* crops where they are not usually sown Very little has been done in the way of making advances by Government for wells, but Mr. Russell deserves much credit for his personal successful efforts in inducing the people to sink wells and sow (*alwas*) yams. Will ask Mr. Hare to encourage giving advances.

Started for Muzaffarpur. 1st dak, Sitamarhi to Dhema. Went off the road to paddy-fields where rice was being cut, and questioned the raiyats and coolies. I should say the crop here was generally about 4 annas. The coolies said they received one bundle of paddy out of 16 per day for wages, which came to a seer a day for cutting two kottahs. This would mean an outturn of 10 × 2 × 16 seers per bigha of about an acre = 8 maunds, but this was a better field than the average. *Rabi* looks promising. Mahajans here are said to have 10,000 maunds. Well irrigation not so much practised as towards Righa; but there are numerous kutcha wells from which *rabi* was being irrigated. Saw relief work at Sitamarhi. People employed look thin and fit objects of relief. Road being widened. It is a matter for consideration whether it is not being made too wide. It would be well, I think, to have a professional sub-overseer appointed to supervise the work.

Saw Mr. Crowdy, indigo-planter, at Belsund Factory. He thinks the rice crop as bad as in 1873-74. Thinks relief work should be opened. Crops appear to me to be good, especially the *rahar* and sugarcane *Rabi* germinating well. The country from Belsund to Attri appears to me to be particularly good, and I should be inclined to say, so far as the villages I saw are concerned, safe from famine.

Saw Mr. Stevens, indigo-planter, at Rooney-Saidpur Factory. Mr. Stevens says crops are worse than in 1873-74, especially between Rooney-Saidpur and Poopri in Nanpore direction to north-east of Saidpur. He would recommend relief works to be opened on road south-west from Bangaon at once. In irrigated rice land there will be something of a crop, but he says there is nothing in non-irrigated lands.

Started from Saidpur-Rooney about 3 P.M. From there to Janarh (first dàk, about five miles) rice crop along the road on high land very bad—about 2 annas or less. In some few places there are irrigated low lands with a fair crop: little *rabi* here and little irrigation.

Janarh to the Bhagmutti river. Some good *rahar* on banks of the latter.

Bhagmutti to Rampur bungalow.—Rice appears bad—about 3 annas perhaps. Some *rahar* near the river fairly good; nothing else.

From Rampur to Bikanpur.—Rice very bad and little *rabi*. No well irrigation being carried on as in Sitamarhi. This is bad as any tract I have hitherto seen.

Arrived at Muzaffarpur about 7 P.M. (distance driven over, 56 miles).

28th morning.—Wrote letters; discussed famine matters with Mr. Hare, Collector of Muzaffarpore; advised him to encourage advances, or even give rewards, for well-sinking; to employ two kanungos in Sitamarhi to assist the Subdivisional Officer in pushing on wells and in making enquiries, &c, especially as to persons who should receive gratuitous relief.

Mr. Hare also wants a Deputy Collector to relieve Mr. Russell of case-work at Sitamarhi, where crime is increasing; wrote accordingly to His Honour.

Left 11 A M. for Motihari. Station-master of Muzaffarpur says coolie emigration to Assam largely increasing this year.

Muzaffarpur to Kanti (first station on line to Motihari).—Rice withered up 2 to 4 annas. No kutcha wells and no irrigation going on. Kanti Station-master says exports of food-grains stopped, but no imports have begun. He thinks there will be "great famine" in March or April.

Kanti to Motipur.—Rice very bad—1 to 2 annas. This is as bad as any tract I have seen. No *kutcha* wells being made. Station-master says that water is 10 *hàts* below the surface. Grain said by the Station-master to be scarce in the bazars. Little *rabi*, rahar or sugarcane here.

Motipur to Mahowl (flag) station.—Same as preceding tract; very bad.

Muzaffarpur district ends here. Rice said by Station-master to be difficult to procure. This tract requires, I think, careful enquiry and looking after, without delay. River Bura Gandak completely dried up.

CHAMPARAN DISTRICT.—*Mahowl to Maisi.*—Looks better. More *rabi* and *rahar*; richer looking country generally. *Rabi* seems to be germinating well. Little rice crop seen from railway line. Export of *makai* was going on a fortnight ago, but is, according to station-master, now stopped. No imports of food-grains.

Maisi onward to Bara.—Rich looking *rabi* country. *Rabi* doing well, and a good deal of it like neighbourhood of Madhubani and Pandowl in Darbhanga.

There is an indigo factory at Bara. I should say with a good *rabi* crop this tract would be comparatively safe. Exports of *makai* stopped; no imports.

Leaving Bara [illegible]
there is is bad [illegible] generally;
after. Some [illegible] m-master
rice very bad. No exports. One waggon of paddy came from Pratabganj, about 172 maunds, a few days ago. This is the first I have heard of importation of food-grain from outside the district.

Pipra to Jodhara.—Rice near Pipra very bad—2 annas. *Rahar* poor. This tract generally looks poor, and requires looking after. Not much *rabi*. Soil poor.

Jodhara.—Crops entirely dried up. Rice about here almost *nil*. Much land gone out of cultivation, probably, owing to change of river course or something of the kind. The country looks bad and wretched; but this is, to some extent, its normal state.

Jodhara to Motihari.—Country gets better after crossing river near Jodhara, but still is jungly and poor. Village *bastis* about here consist of wretched mat huts.

I see the Collector estimates the outturn of the rice crop in the Sadar subdivision at 5 annas. In the tract I saw along the railway I should put it down, except in the neighbourhood of Maisi, at much less; but as railway lines run along the highest part of the country, it is probable that the rice near them is worse than the average of the whole area which they serve.

Arrived at Motihari and discussed the state of things with the Collector (Mr. Macpherson) and District Superintendent of Police (Mr. Tucker). The Collector informs me that as a matter of fact, the rice crop in thana Adapur to the north is really good; hence the estimate of 5 annas for the whole subdivision.

November 29th.—Left Motihari accompanied by Mr. Macpherson (Collector). Met Mr. Crawford, Manager of Bara Factory. He says he was here 22 years ago in the famine of 1873-74, and thinks the crops worse now than then. From Motihari to Semra rice crop wretched. *Rabi* germinating well. Land out of cultivation. Soil and country bad at the best, I should think.

Semra to Segowli.—Same as preceding tract. Saw one or two *kutcha* wells being made. Railway being made from Segowli. A good deal of *parti gadid* (new fallow land) or land recently gone out of cultivation in this neighbourhood. *Rahar* looks better near Segowli, but is poor between here and Motihari.

Segowli to Majhowlea.—Rice practically a total failure. *Rabi* bad for the most part. *Rahar* poor. The soil itself looks bad. Villages of wretched huts; an altogether poverty-stricken tract. Population sparse Noticed some opium cultivation in places.

Majhowlea to Bettiah.—Same as preceding tract. Arrived at Bettiah in the evening. Met Mr J. Macleod and Mr. Apperly at the residence of Mr. Lewis, Manager of the Bettiah Raj. Mr. Macleod says a cheque given by him for purchase of rice to Indigo Planters' Association was returned, as grain could not be got cheaper in Calcutta than in local markets: told him of an offer by Mr. Wilson of Serajganj to deliver good Bengal rice in Bihar at Rs. 4 a maund.

30th November.—Left Bettiah for Ramnagar by road with Mr. Macpherson (28 miles by road) First dâk to Gurwalia (about 4 miles). Rice crop I saw from road fairly good, 6 to 8 annas. *Rabi* doing well. Opium being cultivated here. Villages look far more substantial than on Motihari side. Second dâk to Siswara. Country same as preceding tract; comparatively safe, I should say; *rabi* good. Sugarcane and *rahar* good.

Third Dâk, Siswaria to Porsa. (A factory here.) Getting more into rice country. Not so good as in the preceding tract.

To Lowria.—Nearly the same, but slightly worse than preceding tract.

Lowria to Ramnagar.—This is quite the worst tract I have seen. The country is almost entirely rice-producing. There is no rice crop worth speaking of, and little or no *rabi*. The country looks bare and desolate. Saw some weakly persons on the road, who said they had nothing to live on. Went into the house of one, and found only a seer or two of rice in it. Picked up on the road an emaciated woman with two children, who said she had come from Bhagalpur, and was travelling in an aimless way. Had her brought into Ramnagar, where she was put on charitable relief by the Collector.

Arrived at Ramnagar—28 miles from Bettiah by road—about 12-30 P.M. Met Mr. Sealy, the District Engineer, and discussed matters with him. In the evening went with Messrs. Sealy and Macpherson to see a relief work 3 miles from Ramnagar. There were 111 persons employed in digging out an old tank, a large proportion of whom were women and children. Questioned them as to task and wage and payment of it. The provisions of the Code are not fully complied with. Gangs are formed and paid at Rs. 2 per 1,000 cubic feet for work done, but the lead is a long one, 100 feet or more. The Collector's instructions were in accordance with the Code, but the District Engineer found a difficulty in complying with them strictly, owing to inadequacy of establishment for keeping muster-rolls, &c. The workers all got at least the prescribed minimum wage of 1½ anna a day for men and in proportion for women and children. Many of them were miserable creatures who evidently stand in need of relief. Among them I noticed a Brahmin of about 13, who said he had four female relations at home and one brother who had gone to cut *dhan*. The workers complained that they were paid in Government pice, which were not accepted by the *bunniahs*. Arranged with Mr. Sealy that a *bunniah* be brought on to the work and told to accept Government pice, which would be exchanged for their value in rupees by the overseer in charge every day. This is what the Collector contemplated and explained should be done when he ordered Government pice to be used. The coolies were satisfied with this arrangement. On the whole, the work was being satisfactorily done, though susceptible of improvement. The labourers were evidently people who need relief, and the wage was not excessive but sufficient to carry them on with. There is no time to be lost, I think, in organising circles and preparing lists of deserving objects of charitable relief in this part of the country. I notice from the fortnightly reports of 1873-74 that this (Ramnagar) tract was far the worst in Champaran in that year also. Suggested that patwaris, the village panch or zamindars should be asked to furnish lists of deserving object of gratuitous relief which lists can be tested when a Circle Officer and suitable agency

[The necessary instructions for this have since been issued by the Collector on the 3rd December to the Subdivisional Officer and the Manager, Bettiah Raj.]

1st December. Started from Ramnagar for Bagaha and Patkaulia (20 miles). Rice crop fair between Ramnagar and the Masan river, where irrigated by a *pyne* from the latter. Also irrigated up to a distance of 4½ miles west of Ramnagar. Then again got into bad non-irrigated rice country where there is little or nothing of a rice crop.

Went into village Nadha Parsowni Went into the house of a Brahmin jeth raiyat who has 20 bighas. He had no grain in stock. Other jeth raiyats have food for two months: saw some few emaciated people, and specially one child of 3 or 4, son of a *Musahar* widow, who seemed to be much emaciated. The village headman said this was caused by insufficient food. Went into the village Bagaha, and saw some weakly persons who, the Assistant Surgeon said, were reduced by want of food.

		Inches.		Inches.	
Rainfall at Bagaha	September ...	4·20	against	2·57	at Bettiah.
	August ...	9·68	„	10·86	
	July ...	13·17	„	9·49	
	June ...	2·23	„	2·67	
	October				

I think that organisation for preparation of charitable relief lists should be made here at once, and that advances for sinking wells and purchase of seed should be more freely made. Told Mr. Macpherson this, and he issued full instructions on his return. Picked up a deaf and dumb woman on the road at Bagaha and an old man who was in an emaciated condition. The Assistant Surgeon here examined them and said they were suffering from insufficiency of food and the woman from diarrhœa also. Arranged that Mr. Wood, the Subdivisional Officer, should undertake making organisation for the preparation of charitable relief lists at once, and that a test relief work be opened between Bagaha and Ramnagar, and that advances should be given more freely for wells and seed and for any other improvements.

Went into a house at Patkhowlia (4 miles north of Bagaha) and examined "kothis" (receptacles for storage of grain) of one of the petty maliks. He had one "kothi" full of *dhan* and several empty. Returned in evening to Ramnagar.

December 2nd.—Left Ramnagar *en route* to Motihari *viâ* Shikarpur, Sati and Bettiah. 32 miles by road).

Visited on way village Chauki in the zamindary of Mahant Gopal Gir. In these villages seven families have run away, leaving their houses deserted and tumbling down. There are altogether about 80 houses in the village. The Mahant is not pressing for rent, but giving no assistance to his tenantry. *Rabi* being sown with well irrigation. Oats, wheat, *china* being sown.

Thirty families out of 60 said to have run away from Pipra owing to distress: 7 were raiyats: rest who fled were labourers (Musahars).

Village Banwaha.—Muhammadan raiyats say they would take money for digging wells and for *rabi* seed; told them to go to Mr. Wood (Subdivisional Officer) who has instructions to give money. Raiyats said to be running away.

Lucknowlee.—Raiyats complain that the ticcadar, Debi Prasad of Gorackpur, is pressing them for rent. He is a ticcadar of the Ramnagar Raj. About here there is some irrigation from a pyne. The country generally from Ramnagar is very bad. No rice crop—little *rabi*—and raiyats absconding—all the usual signs of imminent distress.

Shikarpur.—There is a relief work going on here—raising the road from Shikarpur—in charge of sub-overseer of Bettiah subdivision—pay Rs. 50 to Rs. 75.

Near Shikarpur, where land is irrigated by a pyne from the Pandai river, there are good rice crops to a distance of 2 miles south of Shikarpur and 2 miles beyond Lak, but a few miles from the river the crops again look poor.

Called in at Mr. Coffin's factory and had breakfast. The country round here is irrigated by pynes made by Mr. Coffin at his own expense, and the crops are in consequence very good and in marked contrast to those on parched country previously gone through. Mr. Still, who has taken great interest in irrigation and helped Mr. Coffin to construct pynes, was here. He thinks advances for wells and seed and purchase of grain might be freely made with advantage. The crops continue good up to within a short distance of the Sikrana river.

Went into Chandnipitta Bazar with Mr. Macpherson and made enquiries as to stocks. This is one of the biggest bazars in the district. The mahajans said they had only 2,000 to 3,000 maunds of food-grains in hand, but were prepared to import food-grain as soon as the difference between prices here and in Calcutta or elsewhere is so great as to make it profitable to import. They expect that the food-supply in the country and proceeds of *rabi* and *aghani* with imports from Nepal, which are still being smuggled across the frontier, will suffice till Jeyt and Asar, when they expect prices to go up. They would themselves import if they could make so small a profit as 2 annas a bag of two maunds.

Arrived at Bettiah 28 miles from Ramnagar, about 5-30 P.M. Met Mr. Lowis, Mr. J. Macleod, Mr. Apperley, Mr. Coffin and Mr. Canning (indigo-planters) here. Mr. Macleod said a case of emaciation from starvation had come to his notice yesterday. He ordered his *amla* to give relief at once. Some 90 beggars assembled at his factory to-day on hearing that he had given some relief. These gentlemen are doubtful whether private enterprise will suffice to import grain in time.

Told them that I thought advances for wells should be made as freely and as soon as possible, in order to promote the sowing of *rabi*, and ensuring the growth of what has been sown. They agreed. I told them that Mr. Wood had been instructed to give advances at once, but that he was to go round and see that the wells are actually sunk; that where money is taken for wells or *rabi* seed, but not expended on these objects, the Subdivisional Officer had been told to recover the amount advanced at once. Also asked them to help in having lists of deserving objects of gratuitous relief prepared for their several villages at once, and sent to the Subdivisional Officer They agreed to do so. I suggested that wherever zamindars and raiyats wished to dig tanks or to carry out other works of improvement, advances might be freely given by Government in instalments, on the condition that the Subdivisional Officer or other officer of Government would see that a reasonable portion of the work for which an instalment is given is completed before he gives a second instalment. They seemed to think the zamindars would not care for this form of assistance, but the raiyats probably would. I found in 1875-76 that respectable raiyats were willing to make tanks at *their own expense* without any advances. Even if the advance is never realised in full, what is realised is gained, for otherwise Government would have to dig the tank at its own expense.

Tanks should be made, however, with some regard to levels and to the possibility of their being flushed by pynes from the rivers, and thus being made permanently useful in preventing the recurrence of famines.

I also suggested to Mr. Lowis and the other gentlemen present, who were doubtful whether private traders would import grain sufficiently early, that importation of food deficit for their tenantry should not be left by themselves to chance. They should make definite enquiries from mahajans with whom they are acquainted and see if they, as a fact, will import. If so, well and good; if not, I said I thought they might import themselves, and that it would not, in my opinion, be interfering with private trade if Government gave them advances for importation of grain at moderate interest, Government making no other condition than that of getting adequate security for repayment of the loan. They promised to consider this matter. I pointed out that tenants were already beginning to "abscond," and this meant lands going out of cultivation and reduction of their rentals, which things they were as much or more interested than Government in guarding against. Mr. J. Macleod agreed. He said he had experienced the loss that accrued to zamindars from allowing their tenants to run away in years of scarcity. It is easy to let them go, but difficult to get them back.

Came on by train with Messrs. Macpherson and Sealy to Motihari, where we meet Messrs. Stevenson-Moore, Coupland, and Tucker.

December 3rd.—Drove with Mr. Macpherson and Mr. Sealy from Motihari to Seraha (Sir William Hudson's Factory), 12 (?) miles. The country from Motihari to Seraha is principally a *bhadoi* and *rabi* growing tract. *Rabi* doing fairly well, and with the usual winter rains there ought not to be much distress here, but if winter rain fails, *rabi* will also fail. Irrigation not practised here. It is said that irrigation from wells spoils the soil, producing an efflorescence of *reh*. If once irrigated, the land must, it is said, be always irrigated. Brought specimens of soil and water for analysis. Had a long talk with Sir William Hudson. He thinks private trade will not suffice for importing food requirements. Stocks in hand are not, he says, sufficient for three months, and thousands will die of starvation before private trade imports grain from a distance.

Evening.—Went with Sir William Hudson and Mr. Macphersen to village Chowrosia where a tank has been started as a relief work. Yesterday there were at work—

Men	...	349
Women	...	238
Children	...	204
Total	...	791 (or 800)

to whom was paid Rs. 50-14-3: work done 21,694 cubic feet of earthwork. Average wage 1 anna ½ pie per day per person. As elsewhere, the provisions of the Famine Code have not been strictly conformed to in the matter of giving every one a minimum wage, and nobody more than the maximum, but on the whole the work was being done satisfactorily.

Rice very bad in tract we went over: practically nothing.

Sir William Hudson proposes that the indigo rates fixed by Sir Ashley Eden should be raised by 25 per cent., because prices of other produce has risen 25 per cent. He has actually raised the rate himself 25 per cent. in his own villages, and has expended Rs. 12,000 in importing grain, Rs. 1,400 for wells and increased wages. Altogether he will sustain a loss of Rs. 40,000 or more by expenditure on relief and suspension or remission of rent.

Sir W. Hudson expects that 40 per cent. of the entire population of the very bad tracts in his neighbourhood will come on to relief works.

4th December.—From Seraha (6 miles) to Bara station, and thence by rail to Motihari, with Messrs. Macpherson and Sealy. At Muzaffarpur met the Commissioner (Mr. Bourdillon), Mr. Hare, Collector of Muzaffarpur, Mr. Carlyle, Collector of Dharbanga, Mr. Russell, Subdivisional Officer of Sitamarhi, and Mr. Stevenson-Moore, Settlement Officer. We proceeded to discuss famine matters.

I said the general result of my tour was to confirm the estimates of Collectors of the districts I had visited (Darbhanga, Muzaffarpur and Champaran) as to extent of failure of crops in non-irrigated rice tracts. The rainfall appears to have been very unequally distributed even in different thanas of the same subdivision. It is extremely difficult to strike an average of the outturn in particular local areas, as some villages in which advantage was taken of water from rivers or tanks for purposes of irrigation had an unexpectedly good crop of rice, and others a worse crop than I had anticipated. It would be well to differentiate villages now if possible before the traces of the crop in the ground disappear. If Collectors erred at all, it was, I thought, in the direction of under estimating rather than over estimating the extent of failure in the non-irrigated rice lands. I pointed out that advances for wells and tanks might be more freely given and that indigo-planters, zamindars, village panchayats and patwaries might be called upon at once to prepare lists of deserving objects of gratuitous relief, which could be tested by the official organization about to be introduced. Meanwhile the Subdivisional Officers had been instructed to give charitable relief wherever they found it to be needed. I suggested that we should discuss—

1st.—The area most seriously affected at present; the strength and pay of the staff immediately required for administration of relief in it; how far that establishment can be locally procurable, and how far the locally available establishment will have to be supplemented by Government.

2nd.—Next, that we should consider what establishment would be required and would be locally available later on as the distress spreads, and what further establishment would have to be supplied by Government.

The task to be enforced and rate of wage might next be considered and establishment required for supervision of relief works, so as to ensure conformity with the provisions of the Famine Code, which I thought to be absolutely essential from the outset; also the question of encouraging advances for wells and tanks, both with a view to extend *rabi* sowing and to ensure area already sown against failure of the winter rains. Finally, we might consider, if possible, the question of stocks in hand, whether it would be desirable or necessary to give advances to merchants or planters for importation of grain for sale on the relief works or to the public generally also, and the questions of establishment of poor houses, kitchens, relief of artisans and respectable classes—fodder for cattle, medical arrangements, and keeping of accounts. We discussed these subjects on the 4th and 5th December. The conclusions come to are shown in the annexed notes of the proceedings, drawn up by Mr. Bourdillon.

M. FINUCANE.

The 8th December 1896.

Memorandum of a Conference held at the Collector's house in Muzaffarpur on the 4th and 5th December 1896.

PRESENT ON THE 4TH:

The Hon'ble Mr. Finucane, Messrs. Bourdillon, Hare, Macpherson, Carlyle, Stevenson-Moore, and Russell (Subdivisional Officer of Sitamarhi).

PRESENT ON THE 5TH:

The same gentlemen as above (except Mr. Stevenson-Moore), and also the Hon'ble Mr. Glass, Mr. C. A. Mills, and Mr. Sealy (District Engineer of Champaran).

1. Mr. Finucane laid on the table the rough draft of a note he had commenced, stating that the result of his tour in the districts of Darbhanga, Muzaffarpur and Champaran was to confirm fully the estimates of the Collectors. If they erred at all it was not on the side of exaggeration of distress, but rather on that of optimism. He also propounded a list of subjects for discussion.

2. The Commissioner also laid on the table a list of questions and matters for discussion.

3. All matters referring to relief works and those in which Public Works officers were concerned were left till the morning of the 5th.

4. The following is a summary of the conclusions arrived at:—

PART A.—GENERAL.

5. *Nomenclature.*—Each sub-division should be divided into "charges" under "Superintendents," each charge into "Circles" under "Circle officers," and if any smaller areas are required, they can be obtained by increasing the number of circles.

Size of areas.—The "charge" should be, generally speaking, 300 square miles in extent. This being 20 miles by 15, the "Superintendent" ought to be able to go to any part of his charge and back in a day, and to ride at once to any spot without previous notice. With an average mean density in Muzaffarpur and Darbhanga of 875 to the square mile, this area will give the population to be supervised at 262,500. In Champaran the population is less dense, and deducting hill and jungle, the area is 5,230 square miles, which gives a population of about 170,000 to each charge. Each charge should ordinarily contain about 10 circles. At first circles may be doubled up, and two or more may be placed under one circle officer, but boundaries should be settled at once as far as possible, and exterior boundaries once settled should not be broken. Where planters are available for circle officers, the circles should be made to fit their "dehats."

7. *Staff.*—For each charge an officer of the standing of Assistant Magistrate, Deputy Magistrate or other gazetted officer, such as officers of the Survey, Opium, Police and other Departments, will be required. When the supply of these fails, or good material is locally available, non-officials may be entertained. Officials should draw their own salary plus Rs. 100 a month as horse allowance or permanent travelling allowance, provided that they keep three horses. Non-officials to receive up to Rs. 300 a month besides the allowance as above.

8. For each circle an officer of the kanungo class will be required on Rs. 50 with Rs. 25 a month horse allowance, provided that he keeps two horses. Many of the circles will be gratuitously supervised by planters.

9. Charges and circles will be manned only as wanted. The requirements of the three districts are given in an appendix.

10. *Establishment.*—For each Superintendent's office will be required—

				Rs.
One clerk on	...	...	...	30
One muharrir on	...	...	...	20
One orderly on	...	...	...	6
		Total	...	56

and for each circle officer, 1 muharrir on from Rs. 12 to Rs. 20 (say Rs. 16), and a peon at Rs. 6; total Rs. 22. Other petty establishment may be selected from applicants for relief (see below).

11. *Tents and huts.*—Each Superintendent will require a tent for himself, and a *pal* for his servants, and each circle officer will need a *pal*. As the weather gets hotter it may be found necessary to build wattle and daub huts, as was done in 1873-74. Tents should be borrowed on indent from the Military Department. The district and divisional reserve of tents will all be wanted for the ordinary staff. Each officer will supply his own furniture.

12. *Treasury arrangements.*—Each Superintendent who will usually have his head-quarters at a thana, will require a treasure chest to hold not less than Rs. 10,000. It has been decided after discussion that cash cannot be sent direct to circle officers, but must go through the charge Superintendent. It has been calculated that each circle officer will

distribute not less than Rs. 1,000 a week in bi-weekly payments, and each of them therefore will require two chests, an iron one to hold silver (Rs. 500 worth), and a wooden one to hold the same amount of copper. The price of a large chest in Messrs. Leslie and Company's list is quoted at Rs. 130, and that of a small one at Rs. 80.

13. The contributions of District Boards should be placed to the credit of the Collector and all expenditure should be taken out of the hands of the District Boards and placed under the control of the Collector. When the accounts are finally settled the District Board can be debited with the amount which they have been able to contribute for famine relief.

14. For all works under Public Works Department agency, accounts may be kept under their own system. For all other accounts the Collector will be responsible. The Conference were unanimous that the Subdivisional Officer should be merely a disbursing officer and not an officer of account. The Circle officers should send their accounts to the Superintendent of the charge, who should be supplied with an imprest or permanent advance, which should be recouped from the nearest treasury, whether Sadar or Subdivisional. But the bills and vouchers should go direct to the Collector's office. On the bills and vouchers being passed, a pay order should be issued from the sadar treasury, enfaced for payment where required.

15. Accepting this as the general principle, details should be settled by an officer of the Account Department, to be sent up by the Accountant-General to confer with the Commissioner and Collectors.

16. *Advances*: (*a*) *for wells*, (*b*) *for purchase of grain*.—As to (*a*) it was decided, though with some doubts on the parts of the Collectors of Champaran and Darbhanga, that Mr. Finucane's suggestion might be tried, and a contribution of one rupee paid to every person who, after the date of notice, should construct a *kutcha* well. It was decided that the Commissioner should ask Government to allow him to spend up to two lakhs in this manner over the whole Division.

17. As to (*b*), it was brought to the notice of the Conference that many gentlemen, especially those in comparatively inaccessible places, were afraid that stocks might be depleted, and it was therefore thought desirable to recommend Government to advance funds to them at a low rate of interest for the purchase of grain, which they would be permitted to sell locally at their discretion. Full and complete security would be demanded, which would be certified by the Collector of the district and the Commissioner, and Sir W. B. Hudson and the Manager of the Bettiah Raj were mentioned as willing to take advances on these terms.

18. *Charitable Relief Committees*.—Articles 187, 188 of the Famine Commissioner's Report (Part I) were referred to, and it was the opinion of those present that if private charity were now checked, it would probably not flow again at the end of the famine relief operations. It was thought best that no general appeal should be made for private subscriptions, at any rate until Mr. Finucane had been able to discover whether anything was to be done in Calcutta in the way of a provincial relief fund, but that it would be well in all towns and large villages to appoint a few of the leading residents as a Vigilance Committee, to check the lists of the indigent and to report cases of distress, and eventually, if need be, to control charitable relief.

PART B.—RELIEF WORKS.

19. *Division of duties*.—It was decided, after a perusal of the Resolution of the Government of the North-Western Provinces, dated the 20th October 1896, that the principles advocated in paragraphs 7 and 14 of that Resolution, which agree with section 54 of the Famine Code, should be adopted, viz., that all large works requiring professional supervision, should be placed directly under officers of the Public Works Department, and be administered by them with an entirely separate staff, and a separate organisation, while all the rest should be under the control of the District Engineer and the District Officer. It was understood that the definition of the powers of the latter, as laid down in section 22 of the Famine Code, should be fully accepted, so that he would have full power to visit works under the Public Works Department, and to bring to the notice of the Superintending Engineer anything that he thought necessary: over other works his authority would be supreme. It was suggested that these major works would be carried out by contractors as in ordinary times.

20. *Major Works*.—The following schemes were mentioned as likely to be taken up by the Public Works Department in each district.

Champaran.

1. Feeder roads for railways.
2. Bairagnia-Bagaha Railway.
3. Tribeni Canal Scheme.
4. Dhanauti Drainage Scheme.
5. Madhubani Canal extension and distributaries.

Muzaffarpur.

6. Bhagamati Irrigation Scheme.
7. Feeder roads to railways.

Darbhanga.

8. Sakri-Jainagar Railway.
9. Irrigation scheme for the north of Madhubani.

Saran.

10. Distributaries for the Saran Canals.

Most of these schemes are still only in the preliminary stage. It was, therefore, decided that the Commissioner should request Government to have the surveys for schemes 2 and 8 put in hand as soon as possible, and to depute an officer of the Irrigation Department to examine the possibility of an irrigation scheme for the north of Madhubani (No. 9). It was understood that schemes 6 and 10 are already under the consideration of the Superintending Engineer, Sone Circle, and that Mr. Mills would at once look into schemes 3, 4 and 5. The remaining works, Nos. 1 and 7, can be taken up at a later stage.

21. Complaints having been made as to the difficulties felt in obtaining and making over land to the Railway authorities, it was decided that the Commissioner should request Mr. Stevenson-Moore to depute several parties to each work, who would, in Darbhanga survey and plot the land as quickly as possible, and in Muzaffarpur would mark the land on the existing village maps. When this has been done, and the land made over, it is proposed that the Land Acquisition Deputy Collector should take up the work and carry it out to completion. The cost of the settlement establishment should be charged to the Land Acquisition Department.

22. *Tanks.*—Much discussion took place on this subject, and Mr. Glass' great experience enabled him to give much valuable advice. Finally he agreed to prepare, for several classes of soil, and for varying conditions of lead and lift, scales of work to be done by typical gangs. Mr. Hare undertook to check these and to prepare similar tables from actual statistics to be obtained from the Railway authorities while constructing the Hajipur-Katihar line.

23. *Relief work staff.*—It was pointed out by Mr. Glass that the requirements of works in this respect differed vastly according as the labourers were concentrated or dispersed. After much discussion the following were laid down as general principles to be adopted in ordinary cases.

24. If, as stated above in paragraph 6, the number of persons in a circle is about 30,000, it may be expected that 10 per cent of that number, or 3,000, will be on the work for a considerable period, though the numbers would be much higher for a short time, and much lower at the beginning and end of the operation. Taking 3,000 persons as a unit, the staff * named in the margin would be required. There will also be a Civil Hospital Assistant eventually for each circle, and one or more baniyas at each work. It is proposed that the mate-muharrirs should muster the gangs morning and evening, and pay them when required, and that during the day they should work under the sub-overseer. The cashier must be a trustworthy man and well paid. Pensioned officers of Government would be suitable for this work and perhaps for that of mate-muharrir. Most of the establishment, from the blacksmiths downwards, would be selected from the applicants for relief, and they might be paid a daily wage somewhat in excess of that given to the coolies, but for the guards and chaukidars it would be advisable to obtain pensioned soldiers, who abound in Shahabad and Saran. It is proposed to keep the petty establishments in a separate list, and not to enter them in the registers with the coolies.

	Rs.
Cashier, 1 at	30
Sub-overseer, 1 at	20
Store-keeper, 1 at	15
Blacksmiths, 2.	
Carpenters, 4.	
Mate-muharrirs, 6 when the work is concentrated and 12 when it is diffuse.	
Treasure guards and chaukidars, 4.	
Sweepers, 3.	
Water-drawers, water-carriers and messengers, as required.	

25. Treasure chests have already been referred to. It is calculated that with payments twice a week each circle officer's chest should always contain at least Rs. 400 in Government copper coin, Rs. 200 in small silver, and Rs. 400 in rupees. Arrangements will be made for exchanging silver for copper coin daily with the baniyas. If the gang system is properly worked, many of the payments can be made in silver.

26. In addition to and including the articles mentioned in the Famine Code, a supply of the following articles would be required at each relief work :—(1) baskets and (2) kodalies; 2,400 of the former and 600 of the latter for every 3,000 persons, with a constant reserve of 20 per cent. and a much larger reserve at the head-quarters of each charge. Some of the relief workers might be employed to make baskets, (3) wood for handles, (4) bamboos, (5) string, (6) earthen pots for water, (7) simple medical stores, including permanganate of potash and chloride of lime, (8) flags, (9) registers, forms, paper and ink. The above list is not exhaustive, and as soon as poor-houses and kitchens are opened and house to house relief is organised, other articles will be required.

27. *Village works.*—It was also agreed that Government should be moved to allow money to be advanced free of interest (at a very low rate) to zamindars and substantial men in villages for the excavation of tanks and other petty works in their own villages. Security would be taken. It was noted that the execution of works of this nature was found to be very useful in Bundelkhand. If Government approve the proposal, applications will be called for and sanction can be given when the time comes; for the Conference were of opinion that the policy of Sir A. P. MacDonnell, as stated in an article in the *Pioneer* and suggested in paragraph 12 of the Resolution already referred to, should be adopted *i.e.*, to collect relief workers on large works first, and afterwards to turn them into village works. The Conference recognise the following advantages in this policy :—

(*a*) The people are induced to leave their villages while they are still in good case and can do a fair day's work;

(*b*) They are collected in large numbers while the weather is good and the season healthy;

(c) They are sent back to their homes and the gathering is dispersed before the unhealthy season commences; and

(d) they are then on the spot to resume agricultural operations as soon as these require to be taken up.

28. Lastly, it was noted that some of the forms and registers could probably be simplified.

J. A. BOURDILLON,

Offg. Commissioner.

BANKIPORE,

The 6th December 1896.

APPENDIX A.

DISTRICT REQUIREMENTS.

CHAMPARAN.

Area likely to be affected, excluding hill and jungle ...	2,589 sq. miles.
Population of affected area	1,469,308 „

A.—SADAR SUBDIVISION—

(a) *Magisterial staff available.*—1 Joint Magistrate (Mr. Bonham-Carter), 1 Assistant Magistrate (Mr. Coupland), and 3 Deputy Magistrates.

(b) *Relief staff required.*—5 Superintendents and 25 Circle Officers, of whom 2 Superintendents, and 3 Circle Officers are wanted at once.

B.—BETTIAH SUBDIVISION—

(a) *Magisterial staff available.*—1 Subdivisional Officer (Mr. Wood), 1 Deputy Magistrate (immediately expected), 1 Sub-Deputy Magistrate.

(b) *Relief of staff required.*—6 Superintendents and 30 Circle Officers, of whom 2 Superintendents and 6 Circle Officers are wanted at once.

Of the above relief staff immediately required, viz., 4 Superintendents and 9 Circle Officers, Mr. Macpherson proposes to obtain 2 locally from among the indigo assistants. I am sending him Mr. Forrester, Assistant Magistrate from Gaya, and he will require one officer from the Chief Secretary. Later on he hopes to obtain 3 Superintendents locally (including Mr. Coupland), and to ask the Chief Secretary for four more officers. Circle Officers will be obtained locally.

MUZAFFARPUR.

Area of affected tract	1,851 sq. miles.
Population of tract	1,660,000 „

A.—SADAR SUBDIVISION.

(a) *Magisterial staff available.*—1 Joint-Magistrate (Mr. Roe), 1 Assistant Magistrate (Mr. Sheepshanks). 4 Deputy Magistrates and 1 Officiating Deputy Magistrate.

(b) *Relief staff required.*—4 Superintendents and 46 Circles Officers, of whom 2 Superintendents and 20 Circle Officers are wanted at once.

B.—SITAMARHI SUBDIVISION.

(a) *Magisterial staff available.*—1 Subdivisional Officer (Mr. Russell), 1 Deputy Magistrate (Babu K. N. Mookerji), 1 Sub-Deputy Collector (Babu Probhat Chunder Mukerji).

(b) *Relief staff required.*—6 Superintendents and 23 Circle Officers, of whom 4 Superintendents and 12 Circle officers are wanted at once.

C.—HAJIPUR SUBDIVISION.

(a) *Magisterial staff available.*—1 Subdivisional Officer (Mr. Gruning), 1 Sub-Deputy Collector (Syed Abdul Fazail); a Deputy Magistrate urgently required to set the Subdivisional Officer free.

(b) *Relief staff wanted.*—2 Superintendents and 16 Circle Officers, of whom only 1 Circle Officer is wanted if the Deputy Magistrate above asked for can be given.

The total Superintendents immediately wanted is 6. Mr. Sheepshanks, Assistant Magistrate (Sadar), will be one, and Mr. Clarke from Patna (Sitamarhi) another. Three officers will be selected locally, and 1 is required from the Chief Secretary. All the remainder—6—will probably be wanted from the Chief Secretary. Circle Officers will be entertained locally, many of them being planters.

DARBHANGA.

Area of affected tract	2,044 sq. miles.
Population of affected tract ...	1,720,000 „

A.—Sadar Subdivision—

(a) *Magisterial staff available.*—1 Joint-Magistrate (Mr. Wheeler), 1 Assistant Magistrate (Mr. Blackwood), 4 Deputy Magistrates.

(b) *Relief staff required.*—3 Superintendents and 22 Circle Officers, of whom all the Superintendents and 9 Circle Officers are required at once.

B.—Madhubani Subdivision—

(a) *Magisterial staff available.*—1 Subdivisional Officer (Mr. Smither), 1 Deputy Magistrate (to arrive shortly), 1 Sub-Deputy Collector (Babu Khettro Bhushan Pershad).

(b) *Relief staff required.*—4 Superintendents and 30 Circle Officers, of whom 2 Superintendents and 15 circle officers are wanted at once.

C.—Samastipur Subdivision—

(a) *Magisterial staff available.*—1 Subdivisional Officer (Mr. Beachcroft), 1 Officiating Deputy Magistrate (Babu Ram Niranjan Pershad).

(b) *Relief staff required.*—1 Superintendent and 5 Circle Officers, of whom none are required at present.

Of the above relief staff immediately required, viz., 5 Superintendents and 24 Circle Officers, Mr. Carlyle already has Mr. Blackwood (Assistant Magistrate), and Mr. Byrne (Assistant District Superintendent of Police), and will endeavour to obtain three men locally. He will eventually require three officers from the Chief Secretary. Circle Officers will be obtained locally.

Captain H. Lowther, officiating Wing Commander, 1st Infantry, Hyderabad Contingent, to be Wing Commander;

6th Infantry—

Captain G. W. Priestley, Wing Commander, 2nd Infantry, Hyderabad Contingent, to be Wing Commander and 2nd-in-Command;

Dated 12th November, 1896.

PERSONAL STAFF.

No 1242.—Lieutenant J. Duncan, Royal Scots Fusiliers, officiating Aide-de-Camp to Major-General J. Duncan, Commanding Poona District, is confirmed in that appointment. Dated 7th October, 1896.

No. 1243.—Lieutenant H. W. F. Cooke, 24th Punjab Infantry, officiating Aide-de-Camp to Major-General E. Stedman, C. B., Commanding Burma District is confirmed in that appointment. Dated 7th October, 1896.

CANTONMENTS.

REGULATIONS.

No. 1244.—The following draft of certain rules, which it is proposed to make for the Cantonment of Poona, in exercise of the powers conferred by section 26, clause (14), and section 27 of the Cantonments Act (XIII of 1889), is hereby published, as required by the said Act, for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor-General in Council after the 14th December, 1896.

2. Any objection or suggestion which may be received from any person with respect to the

draft before the date aforesaid will be considered by the Governor-General in Council:—

DRAFT RULES.

1. (1) Whenever it appears to the Cantonment Authority that any block of buildings is, by reason of the manner in which the buildings are crowded together, in an unhealthy condition, the Cantonment Authority may cause the block to be inspected by a Committee consisting of—

Removal of over-crowded buildings.

(a) the Sanitary Officer,

(b) the Civil Surgeon of the district, or, if his services are not available, some other medical officer of the Government, and

(c) the Executive Engineer, or some person deputed by him.

(2) Such Committee shall make a report in writing on the sanitary condition of the block; and, if they consider that its overcrowded condition is likely to cause risk of disease to the inhabitants of the buildings or of the neighbourhood, or to endanger the public health, they shall clearly indicate, on a plan verified by the Executive Engineer or by the person deputed by him to serve on the Committee, the buildings which should, wholly or in part, be removed in order to abate the unhealthy condition of the block.

(3) If, upon receipt of such report, the Cantonment Authority is of opinion that all or any of the buildings indicated should be removed, it may, by notice in writing, require the owners thereof to remove them:

Provided that the Cantonment Authority—

(i) shall make compensation to such owners for any buildings which may have been erected under proper authority; and

(ii) may, if it appears to it to be equitable under the circumstances to do so, pay to such owners such sum as it may think fit as compensation for any buildings which may not have been erected under proper authority.

(4) The sum payable as compensation under sub-clause (1) of this rule may be settled by mutual agreement between the Cantonment Authority and such owners as aforesaid, or, in default of agreement, by a Committee of Arbitration constituted as provided in the Appendix to these rules.

EXPLANATION — In this rule "buildings" include enclosure-walls or fences connected with buildings.

2. If it appears to the Cantonment Authority that any building used as a dwelling is so overcrowded as to endanger the health of the inmates thereof, it may, after such enquiry as it may think fit to make, by notice in writing, require the owner or occupier, within a reasonable time, to be specified in the notice to abate the overcrowding of the building by reducing the number of lodgers, tenants or other inmates thereof.

Reduction of number of inmates of over-crowded dwelling

3. Whoever fails to comply with any notice issued under rule 1 or rule 2 shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing failure, with an additional fine which may extend to five rupees for every day after the date of first conviction on which the failure is proved to have been persisted in.

Penalties.

APPENDIX.

I. If the Cantonment Authority and the person or persons concerned are unable to agree as to the amount of any compensation payable under rule I, sub-clause (1), the Commanding Officer of the cantonment shall proceed to convene a Committee of Arbitration to determine the amount payable.

Obligation of Commanding Officer of cantonment to convene a Committee of Arbitration to determine amount of compensation payable.

II (1) Whenever a Committee of Arbitration is to be convened, the Commanding Officer of the cantonment shall cause an order to be published in Station Orders, stating the matter to be determined.

Procedure for convening Committee of Arbitration.

(2) The Cantonment Magistrate shall send a copy of such order to the District Magistrate and to the parties concerned and shall, by notice in writing, require such parties to nominate members of the Committee in accordance with rule III and rule IV.

III. (1) Every Committee of Arbitration convened in pursuance of rule I shall consist of—

Composition of Committee of Arbitration convened in pursuance of rule I.

(a) the District Magistrate or, if it is inconvenient for him to act on the Committee, some Magistrate, being a Justice of the Peace, appointed by him to act in his stead,

(b) a member to be nominated by the person or persons concerned, and

(c) a member to be nominated by the Cantonment Authority:

(2) Provided that—

(i) if the person or persons referred to in clause (b) of this rule shall fail to nominate a member within seven days from the date on which he or they may be called upon to do so, or

(ii) if any member nominated by such person or persons neglects or refuses to act, and such person or persons shall fail to nominate another member in his place within seven days from the date on which he or they may be called upon to do so,

the Commanding Officer of the cantonment shall forthwith appoint a member

in the place of a nominee of such person or persons.

IV. No person shall be nominated or appointed a member of a Committee of Arbitration who is personally interested in the matter under reference, and whose services are not immediately available for the purposes of the Committee; and the nomination of any person who is so interested, or whose services are not so available, shall be deemed to constitute a failure to make a nomination.

Members of Committee of Arbitration to be persons who are not personally interested, and whose services are immediately available.

V. When a Committee of Arbitration has been duly constituted, the Cantonment Magistrate shall, by notice in writing, inform each of the members of the fact, and the Committee shall assemble within seven days from the service of such notice.

Assembly of Committee of Arbitration.

VI. The District Magistrate or the Magistrate appointed by him to act in his stead shall be the chairman of every Committee of Arbitration.

President of Committee of Arbitration.

VII. (1) The decision of every Committee of Arbitration shall be determined by the majority of the votes of the members present at a meeting at which the chairman attends and of which notice specifying the time and place therefor has been served on each of the other members of the Committee.

Decision of Committee of Arbitration to be by vote.

(2) In case of an equality of votes, the chairman shall have a second or casting vote.

(3) The decision of every Committee of Arbitration shall be final

Attention is invited to the Circular Memo. of the Government of India, Home Department, of February, 1870, directing that all Notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Publisher's Office not later than 2 P.M. on Friday afternoon, and that matter sent after that hour must be certified to be extremely urgent in order to ensure its appearance in the next day's Gazette.

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

WM. ROSS,

Publisher, Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 11th November, 1896.

NOTIFICATIONS.

No. 3181 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 7th November 1896:—

No. 376 of 1896.—Kavasji Khurshedji Mehta, secretary, Central India Spinning, Weaving and Manufacturing Co., Ld., No. 3, Pedder road, Bombay, and Dinshaw Pestonji Mehta, mechanical engineer, Grant road, Bombay, for improvements in cotton gins.

No. 377 of 1896.—Horace Walter Cobham, lieutenant, Indian Staff Corps, at Quetta, Baluchistan, for a camel saddle.

No. 378 of 1896.—Ghanshamdas Khatanmal Kirpalani, sarishtadar to the Collector of Karachi, for improving the structure of the closet used in India.

No. 379 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in tea leaf-rolling machines.

No. 380 of 1896.—David White, engineer, and Thomas Moore Simpson, metallurgist, both of Stawell, in the colony of Victoria, for an improved method and apparatus for extracting precious metals from slimes or other finely divided material containing the same.

No. 381 of 1896.—Samuel Benjiman Allison, gentleman, of New Orleans, Lousiana, one of the United States of America, at present of Guatemala, Central America, for improvements in machines for separating and cleaning the fibres of plants of every description.

No. 3182 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. Every specification is open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office in the Imperial Secretariat Buildings, Government Place, West, Calcutta, on payment of a fee of one rupee, and certified copies will be given to any person requiring them on payment of the expense of copying plus two annas for every hundred words:—

No. 255 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in apparatus for filling tea or other substances into chests or the like while being packed. (Specification filed 29th October 1896.)

No. 266 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in tea equalising or cutting mills. (Specification filed 29th October 1896.)

No. 314 of 1896.—James Woolford, metallurgist, No. 659, Commercial road, east, in the county of London, for a process for extracting precious metals from refractory ores. (Specification filed 29th October 1896.)

No. 3183 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 172 of 1890.—Robert Aitken Speirs and Heinrick Stumpp, rice millers and engineers, Upper Poozoondoung, in the city of Rangoon, for improvements in rice milling. (From 18th December 1896 to 17th December 1897.)

No, 220 of 1890.—Cornelius Curtin Sullivan, head master of the Thomason civil engineering college, Rurki, in the North-West Provinces, for a new machine for raising water, earth and other substances, (From 13th January 1897 to 12th January 1898.)

No. 3184 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased:—

No. 15 of 1892.—Alfred Ernest Markwick's invention for improvements in sheet metal can and case openers, (Specification. filed 1st August 1892.)

No. 264 of 1891.—John Gillespie, Cairns Deas and Henry Wicks' invention for a self-registering target. (Specification filed 1st August 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

[II A 2

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

	1896.	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Reunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	18th Nov.	Per P. & O. Str. from Bombay.
Parcels for the United Kingdom and other Foreign places.	17th ,,	Ditto.
*Australasian Colonies . .	14th ,,	*Viâ* Tuticorin and Colombo.*
Straits Settlements, China, and Japan.	16th ,,	Per Steamer *Suisang*.
Rangoon and Moulmein . .	20th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	17th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	14th ,,	Ditto.
Ditto ditto (Supplemental)	15th ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon.	18th ,,	Ditto.
Port Blair	17th ,,	*Viâ* Rangoon.
South African Ports . . .	14th ,,	Per Steamer *Congella*.
Ditto ditto . . .	16th ,,	*Viâ* Madras.
Mauritius	16th ,,	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any Steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,
Principal, Thomason College.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا *

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هی— يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه *

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هی - يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ يک پونڈ والا ٹين بقيمت باره روپيه *

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانوں مين بهي بکتي هی - ماسواے قيمت مذکورۂ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½ „	R 9,	„	R9-8.
¼ „	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন .	১৮৲	বা ডাকমাশুল বিনা	১৮৸৹
৷ আধ „ „	৯৲	„	৯৷৹
। সিকি „ „	৪৷৹৲	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

J. CLIBBORN, *Lieut.-Col., I.S.C.*,
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FINANCE AND COMMERCE DEPARTMENT.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th November.*—No rain fell north of Nellore, but there were light falls in the rest of the Carnatic and in some parts of the Central districts, moderate falls in the Southern districts and a few showers on the West coast. The water-supply is inadequate except in the Deltas and Southern districts and even the Godavari is low. Agriculture is at a standstill in the Circars and the Deccan except under wells and channels; and it is retarded in the Carnatic but is progressing elsewhere. The standing crops are good in the South, fair on the West coast, the Central districts and the Carnatic but deteriorating elsewhere. Pasturage and fodder are both scarce in the Deccan and the Circars and sufficient generally elsewhere. Prices have risen generally and sharply in the Deccan and in the greater part of the Carnatic and Central districts. The numbers on two test relief works in Cuddapah were 2,110.

Bombay.—*For week ending 11th November.*—No rain fell during the week and more is urgently wanted generally for the late sowings. The standing crops have withered or are withering in eight districts and have been damaged by locusts or other causes in parts of Sind, by locusts in parts of Ahmedabad and Kaira, and by insects in parts of Ahmednagar and Broach. Preparations for sowing the late crops are progressing in nine, and reaping of the early crops in parts of eleven, districts. Cotton-picking continues in Khandesh. Fodder is insufficient in parts of ten districts. Agricultural stock are healthy except in parts of seven districts. Prices are rising in twelve, and are stationary or lower in six, districts. Relief works have been ordered to be opened in three districts of the Deccan and in parts of the Karnatak.

Bengal.—*For week ending 9th November.*—With the exception of showers at Basirhat (24-Parganas), Magura (Jessore), Khulna, Dacca, Faridpur, and Puri, there was no rain in the Province during the week. The general agricultural prospects continue unfavourable. The winter rice, except in low or irrigated tracts, is withering. In some districts, it is reported that cattle are being turned into the drying rice-plants to graze. The spring sowings are generally retarded for want of moisture; but where irrigation is available, the sowings are progressing and are so far doing well. In Cuttack the insects which had been infesting the rice-plants are gradually disappearing. Locusts have appeared in places in the 24-Parganas and Patna, but have done little or no damage. Cattle are healthy, except in certain parts of Bankura, Midnapore, Backergunge, Saran, Monghyr, Bhagalpur, and Manbhum. Prices are abnormally high and are still rising in many districts, but at Patna the price of common rice is reported to have fallen from 9 to 10½ seers a rupee.

North-Western Provinces and Oudh.—*For week ending 11th November.*—The weather has been somewhat cloudy but no rain has fallen during the week. The harvesting of the autumn crops is approaching completion and the outturn for the provinces will be known next week. Preparations for the spring crop sowings are being actively pushed on and the seed wheat sown is reported to be germinating well. Labourers generally find employment on agricultural operations. Flights of locusts passed over three districts and caused slight damage to the crops in Mirzapur. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, 7th November, were:—Banda 36,629, Hamirpur 8,007, Jhansi 1,714, Jalaun 7,508, Hardoi 8,158, Rae Bareilli 9,624,—total 70,640; of these, 9,217 were dependants gratuitously

relieved on the works, and there were besides 15,209 persons gratuitously relieved under other provisions of the Famine Code. The figures for Banda are under verification. This was the district which was most distressed last summer and autumn and in which severe distress is now anticipated. Test works have been opened in other districts. Supplies are deficient in Bulandshahr and Cawnpore and fodder is scarce and dear in places. Prices are still high but generally stationary.

Punjab—*For week ending 11th November.*—Rain has fallen in Rawalpindi and very slightly in parts of Amritsar, Sialkot, Lahore, Mooltan, and Dera Ismail Khan The harvesting of the autumn crops and the picking of cotton are going on. Pressing of sugarcane has commenced in Sialkot, and sowings of the autumn crops are in progress on irrigated lands, but are much retarded owing to the deficient water-supply. Hardly any crops are sown on lands solely dependent on rain which is very much needed throughout the province. The condition of the standing autumn crop is average to poor and the outturn of the autumn crops is generally reported average in Gujranwala, below average in Shahpur, Dera Ismail Khan and Rohtak, and poor in Mooltan. The prospects of the spring crops are bad in Delhi, favourable on canal lands, and fair on well lands in Gujranwala. The crops have failed for want of rain in Hissar. The stock of food-grains is insufficient in Hissar, Amritsar, Rawalpindi, and parts of Delhi, Jullundur, and Ferozepore, average in Peshawar and getting low in Gujranwala. The autumn crops are being destroyed by insects in parts of Ferozepore and some damage is reported to have been done by locusts in Mooltan. Cattle are said to be in poor condition in Hissar, Ferozepore, Sialkot, Rawalpindi, Gujranwala, and parts of Dera Ismail Khan, and they are dying of starvation in the Hissar district. Fodder is sufficient in Peshawar, dear in Rohtak, and scarce elsewhere. The aggregate number of persons employed on relief work in Gujrat, including non-working children, on Saturday, the 7th November, was 5,750. Prices are still rising in Umballa, Peshawar and Rohtak, and wheat is selling at 7½ to 9½ seers, gram 9 to 10 seers, *bajra* (Bulrush millet) 8¾ to 11¼ seers, maize 10 to 12 seers, rice 8 to 9 seers, and *jowar* (Great millet) 9 to 10½ seers per rupee. The continued high prices are being felt by the poorer classes in Jullundur.

Central Provinces.—*For week ending 11th November.*—No rain The weather is generally clear with slight clouds at places, the days being hot and the nights cool. The standing crops are withering for want of moisture and the outlook continues very gloomy. Cotton-picking is in progress and reaping of *jowar* (Sorghum vulgare) has commenced in some districts. The spring crop sowings are nearly completed, but the seedlings are suffering much for want of rain. Prices have risen slightly in Damoh, Hoshangabad, Seoni and Wardha.

Burma.—*For week ending 7th November.*—In Lower Burma crop prospects are good everywhere. In Upper Burma no rain fell during the week in any district except Thayetmyo where 44 cents were registered. The paddy crop, except on irrigated lands, has practically failed already and the crops of millet, peas and late sessamum are suffering severely from want of rain and are in imminent danger of total failure. Prospects are very gloomy, and large reductions of tha'hameda will be necessary. The price of paddy has risen slightly in Rangoon, fallen considerably in Akyab, and is stationary elsewhere. The numbers on relief works were 8,057 and on gratuitous relief 571.

Assam.—*For week ending 10th November.*—The weather is hot and the crops are suffering from want of rain in the Surma Valley and the lower portion of the Brahmaputra Valley. The condition of tea and of the crops in Upper Assam are fair. Sowing of mustard continues. Prices of food-grains are high. A scarcity of fodder is reported from Cachar.

Mysore and Coorg.—*For week ending 11th November.*—MYSORE: The standing crops are withering for want of rain. Prices have risen throughout the State, except in Hassan.

COORG : The rice crop is maturing and *ragi* (Eleusine coracana) has been stacked. Picking of cardamoms continues and that of coffee has commenced on some estates. Prices of food-grains are normal and water and fodder are sufficient.

Berar and Hyderabad.—*For week ending 11th November.*—BERAR : No rain fell during the week and the weather continues warm. The prospects of the monsoon crop are reported to be unfavourable throughout the province. The preparation of the land for the ensuing winter crop is nearing completion. Sowing operations are in progress. An insufficiency of fodder and water prevails in most places. The price of food-grains has risen considerably and distress among the labouring classes is anticipated shortly in four districts, while in Akola relief is at present being provided wherever urgently needed. No report from Ellichpur has been received.

HYDERABAD : No rain during the week. The autumn crops have withered in most talukhs and the rice crop is withering. Agricultural prospects are becoming very serious, especially in the Raichore, Singsaugor, Naldrug, Gulburga and part of the Mahabubnagar districts. Prices—wheat 7, coarse rice 7, white jowar 10½, yellow jowar 12½, gram 8½, and *tur* (Cajanus indicus) 11, seers per current sicca rupee.

Central India.—*For week ending 11th November.*—No rain fell in Central India during the week. Rain is urgently wanted everywhere. Agricultural operations are still suspended in Baghelkhand, but are in progress in other Agencies. The autumn crops have been damaged for want of rain. Agricultural stock are in fair condition in Bhopal, Bundelkhand and Malwa, and indifferent in Baghelkhand. Pasturage is fair in Bhopal and Malwa, insufficient in Bundelkhand and indifferent in Baghelkhand. Prices are above normal in Bhopal, Bundelkhand, Baghelkhand and Malwa The numbers employed on relief works were :—Bundelkhand 960, and Baghelkhand 797. The numbers on gratuitous relief were—Bundelkhand 1,169 and Baghelkhand 1,096. Reports from Gwalior and Bhopawar were not received

Rajputana.—*For week ending 11th November.*—No rain. Agricultural operations are generally satisfactory except in Jaisalmere. The crops are generally fair. *Jowar* (Sorghum vulgare) is suffering for want of rain in Jhallawar and Kotah, and the crops are indifferent in Deoli and Tonk, and unfavourable in Jeypore. *Moong* (Phaseolus mungo) and *Kolath* have been damaged in Serohi, the unirrigated crops in Deoli, Tonk and Ajmere, and *Jowar* (Sorghum vulgare) in Jhallawar. Prospects are fair, but unfavourable in Jeypore and the outlook of the spring crops is gloomy in Kerowli. Agricultural stock are generally in good condition except in Bhurtpore where they are lean for want of fodder. Pasturage and fodder are generally sufficient; but scarce in Tonk, Ulwar, parts of Meywar, Jeypore and Jaisalmere, and failing in Dholepur and Bhurtpore. Prices are rising in Marwar, Kotah, Haraoti, Ajmere, Bhurtpore, Jaisalmere, falling in Pertabgurh, Meywar, Jhallawar, and steady elsewhere. Test relief works have been started in Bhurtpore. The aggregate number of persons on relief works was :—Kotah 625, Dholepore 2,570, Bikanir 7,819, and Jaisalmere 2. The numbers on gratuitous relief were .—Bikanir 1,753. The report for Sironj (Tonk State) was not received.

Kashmir.—KASHMIR VALLEY.—*For week ending 10th November.*—Rain fell during the week The spring sowings are still in progress. Prices are below normal.

JAMMU PROVINCE.—*For week ending 11th November.*—No rain. The autumn crops are suffering. Prices are rising. Cattle are in good condition. Fodder is scanty.

Nepal.—No report received.

DENZIL IBBETSON,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 19th November 1896.

NOTIFICATIONS.

No. 3231 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 14th November 1896:—

No. 382 of 1896.—Mephan Ferguson, engineer, of the "Olderfleet," 475, Collins street, Melbourne, in the colony of Victoria, for improved means for joining the edges of metal plates or sheets to each other—a method principally useful in the manufacture of pipes.

No. 383 of 1896.—Samuel Willoughby, engineer, of Devon House, St. Mary's Grove, Chiswick, in the county of Middlesex, for improvements in or connected with destructor furnaces for the treatment of town refuse.

No. 384 of 1896.—Henry William Headland, electrical engineer, of Leyton, in the county of Essex, for improvements in secondary batteries.

No. 385 of 1896.—Frank Lambert, manufacturer, of Brooklyn, New York, United States of America, for a type writer.

No. 386 of 1896.—Samuel Telford Dutton, civil engineer, of Marl bank, Worcester, for improvements in roller frames for point or signal rods.

No. 387 of 1896.—Robert Henry Cave, indigo planter, of Patterghatta, Colgong, E. I. Ry., in the presidency of Bengal, for improvements in the process of indigo manufacture, whereby the deposit of indigo is increased and a better quality of dye obtainable.

No. 388 of 1896.—Martin Martin, major in the corps of Royal Engineers, of Agra, North-West Provinces, for improvements in automatic sluice gates or shutters to retain water for irrigation and other purposes in tanks and reservoirs or against embankments, and automatically to open and discharge it in time of floods.

No. 389 of 1896.—Henry Vander Weyde, artist and electric light photographer, of 182, Regent street, London, for an improved method of and apparatus for producing, branding, and packing for transport blocks of ice, subdivided or sub-divisible into cubes.

No. 390 of 1896.—Henry George Hills, tea planter, of Silcoorie tea estate, Cachar, for a machine for drying tea leaf and analogous substances.

No. 391 of 1896.—William Smith Dawson, accountant, of Goosery, Howrah, for an improved tin lamp for use by the natives of India.

No. 3232 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), upon payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 30 of 1896.—Alfred Hurley, paving inspector, Bombay municipality, of Parell road, Byculla, Bombay, for an improved artificial stone. (Specification filed 30th October 1896.)

No. 89 of 1896.—Richard Lamb, gentleman, of No. 1, Broadway, New York, in the county and state of New York, United States of America, for improvements in traction systems for hauling purposes. (Specification filed 1st October 1896.)

No. 3233 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 117 of 1888.—Alfred Savill Tomkins, captain in the Victoria Rifles, of Holmwood, Caterham, in the county of Surrey, for improvements in portable cooking apparatus. (From 6th December 1896 to 5th December 1897.)

No. 246 of 1891.—William James Sawyer, gas engineer, of Elmfield, Selhurst road, South Norwood, in the county of Surrey, for an improved ink-stand. (From 23rd November 1896 to 22nd November 1897.)

No. 306 of 1892.—Rudolf Diesel, engineer, of Berlin, Prussia, for a process for producing motive work from the combustion of fuel. (From 19th April 1897 to 18th April 1898.)

No. 3234 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 162 of 1891.—Frederick Josiah Jones' invention for improvements in the production of coke for foundry and other purposes. (Specification filed 11th August 1892.)

No. 273 of 1891.—Albert Abegg's invention for improvements in picking band fastenings for looms. (Specification filed 8th August 1892.)

No. 128 of 1892.—William Marriott's invention for improvements in springs, chiefly designed for use in railway vehicles. (Specification filed 8th August 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

CALCUTTA POST OFFICE NOTICE.

Mails for	Date of closing at Calcutta	Route by which despatched.
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., Natal, and Cape Colony, and in general all countries served through the United Kingdom.	1896 25th Nov.	Per P. & O. Str. from Bombay.
Parcels for the United Kingdom and other Foreign places.	24th ,,	Ditto.
*Australasian Colonies . .	21st ,,	*Viâ* Tuticorin and Colombo *
Madras, Pondichery, Ceylon, Singapore, China, and Japan.	28th ,,	Per French Str. *Eridan.*
Colombo	23rd ,,	Per P. & O. Str. *Chusan.*
Straits Settlements, China, and Japan.	25th ,,	Per Steamer *A. Apcar.*
Rangoon and Moulmein . .	27th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	24th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	21st ,,	Ditto.
Ditto ditto (Supplemental)	22nd ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	25th ,,	Ditto.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published sailing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

N.B.—The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

CIVIL ENGINEERING COLLEGE, SIBPUR.

APPRENTICE DEPARTMENT.

The date for admission to this Department is 1st February, 1897.

Candidates must be at least 15 and not more than 17 years of age.

They must have passed Standard VII of the code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard, so as to reach the Principal not later than the 6th January, 1897. No applications will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding R10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list.

For natives there will be at least nine vacancies, possibly more on the reduced† fee list. These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

* R5 per mensem.

† R2 per mensem.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,
The 16th November, 1896.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½ „	R 9,	„	R9-8.
¼ „	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন .	১৮৲	বা ডাকমাশুল বিনা	১৮৸০
৷৷ আধ „ „	৯৲	„	৯৷৷০
৷ সিকি „ „	৪৷৷০	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College, Book Depôt, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-0.
„	II.	Masonry	(1891),	R1-4.
„	III.	Carpentry	(1889),	R1-4.
„	IV.	Earthwork	(1892),	R1-4.
„	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-4.
„	VII.	Bridges	(in the Press).	
„	VIII.	Roads	(in the Press).	
„	IX.	Railways	(1891),	R1-4.
„	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth and bound (in the Press). R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq., Executive Engineer. R7-8.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time) 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (in the Press).

Cape's Geometry. R1-4.

„ Mechanics. R1.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu). 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.

Surveying Field-Books (ruled). R1.

Levelling Field-Books (English Pattern). R1-8.

„ „ (Canal „). R1-8.

„ „ (College „). R2-0.

P. W. D. Note-Book. R1-4.

„ Measurement Book. R1-4.

Circular Card-board Protractors, 12 inches (exclusive of packing). R1-8.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.
Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.
Vol. II, Quarterly Nos. 6 and 7, at R1 each.
" **III,** " No. 13, R1.
" **V,** " Nos. 18, 19, 20, and 21, R1 each.
" **VI,** " Nos. 22, 23, 24, and 25, R1 each.
" **VII,** " Nos. 26, 27, 28, and 29, R1 each.
Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each
Quarterly Number 41A of Vol. X, at R1 each.
Cloth covers for Volumes 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each.
Index to Professional Papers, and loose Papers, 1st and 2nd Series, at 2a each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.
Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month; at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.
The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.
In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876.—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage. R a. p.	With postage. R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	[illegible] 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series, per copy . .	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series, per copy . . .	0 5 3	0 5 9
" the Calcutta Series For the year .	7 2 6	8 6 3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance.—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
" three issues . . .	" 55	" 36	" 24
" six " . . .	" 100	" 68	" 45
" nine " . . .	" 145	" 96	" 64
" twelve " . . .	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage. R a. p.
Bengal Law Reports, for one year . .	20 [illegible] 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FOR SALE BY THE

SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA,

8, HASTINGS STREET, CALCUTTA.

All books published by the Superintendent of Government Printing, India, can be purchased either directly or through the following or any other booksellers:—

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

POSTING OF INDIAN CIVIL SERVANTS WHO HAVE BEEN APPOINTED IN ENGLAND TO THE BENGAL PRESIDENCY.

No. $\frac{6 \text{ Estabts.}}{850-908}$.

Extract from the Proceedings of the Government of India in the Home Department (Establishments),—under date Calcutta, the 19th November 1896.

RESOLUTION.

THE undermentioned gentlemen have recently been appointed in England to the Indian Civil Service (Bengal Presidency) in the order specified below :—

Mr. William Sinclair Marris, North-Western Provinces and Oudh, Punjab and Central Provinces.

" William John Keith, Burma.

" Montagu Sherard Dawes Butler, North-Western Provinces and Oudh, Punjab and Central Provinces.

" Charles Frederick Balfour, North-Western Provinces and Oudh, Punjab and Central Provinces.

" Stephen William Gracey, North-Western Provinces and Oudh, Punjab and Central Provinces.

" Vere Arthur Stowell, North-Western Provinces and Oudh, Punjab and Central Provinces.

" Francis Joseph Jeffries, Bengal.

Mr. William Bissill Heycock, Bengal.
„ Frederick William Johnston, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Alexander Montagu Stow, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Samuel Wilberforce, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Hugh Aylmer Thornton, Burma.
„ William Edgar Marmaduke Campbell, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Alfred Hare Clayton, Bengal.
„ William Alexander Marr, Bengal.
„ Arthur Norman Moberly, Bengal.
„ Frank Yewdall, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Charles Robert Wilkinson, Burma.
„ Egbert Laurie Lucas Hammond, Bengal.
„ Reginald Arthur Rossiter, Bengal.
„ Sheikh Asghar Ali, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ James Donald, Bengal.
„ Reginald George Kilby, Bengal.
„ John Carlisle Fergusson, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Edgar de Montfort Humphries, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Herbert Philip Duval, Bengal.
„ Harold Heather Emslie, Bengal.
„ Henry Sheldon Platt, Burma.
„ Norman Cecil Stiffe, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Edwin Ashby Phelps, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Charles William Loxton, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Stephen Steward Skinner, Bengal.
„ Edward Ernest Pilkington Rose, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Arthur Henry Vernède, Bengal.
„ Edward Brooks Henderson Panton, Bengal.
„ Benwell Harold Bird, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ James Leonard Johnston, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Walter Sibbard Adie, Bengal.
„ William Strachan Coutts, Bengal.
„ James Cowlishaw Smith, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Francis Hely Burton, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ John Joseph Barniville, Bengal.
„ William Raw, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Sidney Charles Hall, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Alfred James Chotzner, Bengal.
„ Charles Allan Mumford, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Charles Agacy Clarke, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ John Fuller Graham, Bengal.

Mr. John Thomas Marten, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Cecil Alfred Pelham Rogers, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Charles Gerrans Leftwich, North-Western Provinces and Oudh, Punjab and Central Provinces.
„ Percy Hemingway, North-Western Provinces and Oudh, Punjab and Central Provinces.

2. The Governor General in Council has been pleased to attach the abovementioned gentlemen to the Province specified opposite each name, as follows:—

Name	Province
Mr. F. J. Jeffries.	Bengal.
„ W. B. Heycock.	
„ A. H. Clayton.	
„ W. A. Marr.	
„ A. N. Moberly.	
„ E. L. L. Hammond.	
„ R. A. Rossiter.	
„ J. Donald.	
„ R. G. Kilby.	
„ H. P. Duval.	
„ H. H. Emslie.	
„ S. S. Skinner.	
„ A. H. Vernède.	
„ E. B. H. Panton.	
W. S. Adie.	
„ W. S. Coutts.	
„ J. J. Barniville.	
„ A. J. Chotzner.	Assam.
„ J. F. Graham.	
„ W. S. Marris.	North-Western Provinces and Oudh.
„ C. F. Balfour.	
„ V. A. Stowell.	
„ W. E. M. Campbell.	
„ J. C. Fergusson.	
„ E. deM. Humphries.	
„ N. C. Stiffe.	
„ E. A. Phelps.	
„ E. E. P. Rose.	
„ J. L. Johnston.	
„ J. C. Smith.	
„ W. Raw.	
„ S. C. Hall.	
„ C. A. Mumford.	
„ M. S. D. Butler.	Punjab.
„ S. W. Gracey.	
„ F. W. Johnston.	
„ A. M. Stow.	
„ S. Wilberforce.	
„ F. Yewdall.	
„ S. Asghar Ali.	
„ C. W. Loxton.	
„ B. H. Bird.	
„ F. H. Burton.

" C. G. Leftwich.	
" P. Hemingway.	
" W. J. Keith.	Burma.
" H. A. Thornton.	
" C. R. Wilkinson.	
" H. S. Pratt.	

3. The Governor General in Council is further pleased to direct that the gentlemen posted to the Lower Provinces of Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. Should any of them land in Bombay, they should enquire of the Secretary to the Government of Bombay whether any orders are awaiting them from the Government of Bengal. The officers posted to Assam should report their arrival by telegraph from the port of arrival to the Secretary to the Chief Commissioner of that Province at Shillong, by whom they will be instructed to which portion of the Province to proceed. The officers posted to Burma should proceed to Rangoon and report themselves to the Chief Secretary to the Chief Commissioner of that Province.

4. The officers posted to the North-Western Provinces and Oudh should report themselves to the Chief Secretary to the Government of the North-Western Provinces and Oudh, Allahabad. The officers posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination, in the event of their not finding instructions awaiting their arrival at Bombay. The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Secretary to the Chief Commissioner of those Provinces at Nagpur, by whom they will be instructed to which portion of the Province to proceed.

5. Local Governments and Administrations are requested to inform the Government of India of the dates on which the gentlemen in question so report themselves Should any officer attached to one of the Upper Provinces in India wish to exchange with an officer of his year attached to another of those Provinces, he is at liberty to do so; but he must report to the Government of India in the Home Department for previous sanction any arrangement of the kind he may be able to effect.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh, and the Punjab, and the Chief Commissioners of the Central Provinces, Burma, and Assam, for information and guidance. Also that the Resolution be published in the Supplement to the *Gazette of India*, and that a copy be forwarded to each of the gentlemen named therein.

(True Extract.)

J. P. HEWETT,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 7th, 1896.

With one exception the weather has been very quiet and settled during the week under review. The barometric changes have been small from day to day and the winds have been light, but steady. Along the Madras Coast the wind has been steadily north-westerly instead of blowing from the normal north-easterly direction, and, as these winds have come from the land, the weather in this region has been continuously dry. Showers have occurred at times both in Lower Burma and in the south of the Peninsula and Ceylon, but these showers have been local and have generally been small in amount. The single exception to the general quietness has been shown in the north-west. On the 4th of November the barometer was falling slowly in Sind and a slight pressure irregularity appeared over the western desert, which drew the wind into south over that area and occasioned cloud over North-West India. On the following day a shallow depression was shown over Sind and cyclonic winds over North-West India, while on the 6th slight rain was reported from many stations in Baluchistan and the Punjab. The mean temperature has again been generally excessive, but in the Punjab, the North-West Provinces and Rajputana and Sind on some days, owing to the unsettled weather noticed above, the mean temperature fell below the normal.

Daily Summary.—*Sunday, November 1st.*—The barometer had risen almost everywhere—briskly over North-Western and Northern India—and a large high pressure area was shown in the north-west. Readings decreased slowly from this area and were lowest over Ceylon. Light north-west winds and calms were reported from the Gangetic plain, northerly winds from the Bay area, and easterly winds from the centre and west of the Peninsula. The mean temperature was excessive except in parts of North-West India, the hottest area relatively to the normal lying over the central parts of the country. Some light showers had fallen over Assam, Central Burma, the Madras coast districts, and Ceylon.

Monday, November 2nd.—The barometer had fallen a little over the Punjab, but had hardly changed elsewhere. The high pressure area in the north-west was hence less strongly marked, but there was no other alteration. The barometer read higher than usual everywhere, but especially so over Madras. The winds were practically unchanged and calms were very numerous. The mean temperature remained excessive except in the extreme north-west and extreme north-east of India The hottest area was still the central parts of the country. Showers had occurred over the south of the Peninsula and over Ceylon.

Tuesday, November 3rd.—Pressure had decreased everywhere, and the change had been brisk over the Punjab. Readings were highest over the east of Rajputana and were low in Malabar, Ceylon and Lower Burma. Pressure was nearly normal over Northern India, but was excessive elsewhere—considerably so over Madras. The winds were north-westerly on the Madras coast, but were unchanged in direction elsewhere. The mean temperature was low in Assam and North-Western India, and excessive in all other places, the abnormal excess exceeding 6° over the central parts of the country Showers had again occurred at a few places in the south of the Peninsula and in Ceylon.

Wednesday, November 4th.—The barometer had fallen a little over Sind, been steady over the Peninsula and Burma, and risen slightly over Northern and Central India. Readings remained highest over Eastern Rajputana and lowest in Ceylon, and there was still a considerable excess of pressure over Madras.

There was a slight pressure irregularity over the western desert, where the wind had shifted to the southward. Elsewhere the winds were little changed. The mean temperature was low over Northern India and the Bay area. There had been a few showers over Lower Burma, the Madras coast districts and Ceylon.

Thursday, November 5th.—Pressure had decreased practically everywhere. The change had been brisk in the north-west of India and rapid in Kashmir. A small depression had appeared over Upper Sind. The winds were feebly cyclonic in the north-west, but were unchanged in other parts of the country. The mean temperature was excessive except over the Madras coast districts, the North Gangetic plain and North-East India. Showers of rain had again been received over Lower Burma, the south of the Peninsula, and Ceylon.

Friday, November 6th.—The depression from Sind had advanced eastward, and the barometer was falling over Sind, Rajputana and the central parts of the country. Elsewhere the changes, though slight, were upward. Northerly winds had appeared over the Punjab, where a slight cyclonic circulation existed over Southern Rajputana and Gujarat. In other places there was no change. The mean temperature was again lower than usual over the extreme north-west and north-east of India and higher in all other places. Showers of rain had been received over Baluchistan, the Punjab and Kashmir, and light rain had continued over Lower Burma and Ceylon, but over the south of the Peninsula the fall had ceased.

Saturday, November 7th.—Pressure had risen very generally. The change had been brisk to rapid in the north-west, and a high pressure area had been established over the Punjab. A general northerly current of air prevailed throughout the country. The mean temperature was low in the north-east, but was excessive over the central parts of the country. There had been a few very light showers of rain over the North-West Himalayas, a few light showers in Burma and Ceylon, and a local shower at Cuddalore.

Temperature.—During the week the prevailing direction of the wind has been from north, and these winds apparently reduced the temperature of the north-east and north-west of India below the normal average, but except in these two regions this effect was not produced and the mean temperature was steadily excessive. The greatest abnormal excess was over the Central Provinces and across the head of the Peninsula, where the mean excess was over 5°.

The following table gives the variations of the mean temperature from the normal average in the different provinces of India :—

PROVINCE	NOVEMBER 1896.							Mean variation of week.
	1st.	2nd.	3rd.	4th.	5th.	6th.	7th.	
	°	°	°	°	°	°	°	°
Burma	+1·.	0	+0 3	+0·6	+0·2	+0·9	+1·4	+0 6
Bengal and Assam . .	+3·7	+3·1	+3 0	+1·3	+0·4	+0 3	+0·4	+1·7
North-Western Provinces and Oudh	+2 5	+1·3	—0·1	—1·1	—0 3	+1 8	+1·2	+0·8
Punjab	—0 6	—1·0	—0·7	+1·0	+2·8	+2·9	+1·4	+0·8
Bombay	+3·0	+3 0	+3·8	+3 6	+3·9	+3·7	+2·9	+3 4
Central Provinces and Berar	+5·5	+6·3	+6·3	+5·5	+5·2	+5·0	+5 5	+5 6
Central India and Gujarat .	+2 8	+2·6	+2·5	+1·4	+1·2	+3·3	+5·1	+2 7
Sind and Rajputana . .	+1·0	+0·6	—1·3	+0·4	+3·2	+6·4	+4 2	+2·1
Madras	+2·4	+3·0	+1·7	+2·0	+1·4	+1·1.	+2·3	+2·0
MEAN FOR WHOLE OF INDIA	+2·4	+2·1	+1·7	+1·6	+2·0	+2·8	+2·7	+2·2

The mean temperature of the whole country for each day and of each province for the whole week exceeded the normal average; but between the 3rd and

the 5th in the North-West Provinces, between the 1st and the 3rd in the Punjab, and on the 3rd in Sind and Rajputana the mean temperature was below the normal. In Burma, the North-West Provinces and the Punjab the mean temperature was about normal, but elsewhere it was excessive, the amount ranging from 1°·7 in Bengal to 5°·6 in the Central Provinces. The maximum temperatures call for no particular notice, though they were very generally largely above the normal average.

Rain.—The circumstances under which rain fell and the area affected by it in the present week were generally similar to those reported last week. The only important difference was over the Punjab, where rain was received during the week under review in five divisions as compared with only two divisions last week. The amount of rain received was, however, distinctly less in the present than in the past week with the same exception. The rainfall in the Punjab occurred during the 6th and 7th, and was due to a slight shallow depression which appeared over Sind and the western desert and drew the wind into south-east and east over North-Western India. These winds occasioned a sudden and considerable increase in the humidity of the atmosphere, and gave rain to the hills and a few showers to the plains of the Punjab. The rainfall in other parts of the country fell as local showers affecting only small parts of the country, and, except in Tenasserim and South Madras, were generally very trifling insignificant falls. The concluding table gives the rainfall data. Effective rain occurred during the week only in eleven divisions; *viz*, Tenasserim, Lower and Central Burma, the Bengal Hills, the Punjab Hills, the Punjab (north), Malabar, Madras (south-central and south), and the East Coast (central and south). Light rain fell also in ten other divisions, but except in the eleven divisions mentioned above, the rainfall of the week was absolutely or practically *nil*. The heaviest average actual rainfall was 0·69" reported from Tenasserim and Madras (south) and the lightest effective fall was 0·11" in the Hill district of the Punjab and in the East Coast (central). The rainfall was almost everywhere deficient, but there was a trifling unimportant excess reported from Tenasserim, from the Bengal hills, from most of the Punjab divisions, and from Baluchistan. Over the greater portion of the northern and central parts of India the anticipated rainfall during the week under review is small, but in Arakan, Lower Burma, and the south and east of the Peninsula the anticipated fall varies between one inch and two and a half inches, and over these regions the deficiency is hence considerable.

For the period October 18th to November 7th there has been deficient rain almost everywhere In Central Burma there has been some excess and over the Punjab hills and the northern division of the Punjab the small anticipated fall has been exceeded, but in all other places the rainfall is short and over a large part of the country there has been absolutely no rain.

Province.	Division.	Rainfall data for week ending November 7th, 1896. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from October 18th to November 7th, 1896. Average actual rainfall of season to date.	Average normal rainfall, October 18th to Nov. 7th	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 12th November 1896.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th November.*—Heavy rain in the Carnatic, except in Nellore where there was none; also in Trichinopoly, Tanjore, Tinnevelly and parts of Madura; moderate falls in parts of North Arcot and showers in parts of the rest of the Central districts; no rain elsewhere. Since the end of the week further heavy rain has fallen in the Carnatic from Nellore southwards and moderate falls in parts of North Arcot which have done much good. The water-supply is sufficient from Madras southwards and for a few larger irrigation works to the north, but in Godavari and Kistna the supply is low. Agricultural operations are active in parts where rain has fallen, but are at a standstill in the Circars, Deccan, Nellore, and parts of North Arcot. In the latter area the country is drying up rapidly, the crops are perishing and much land is lying waste. Some harvest of the early crops progresses in parts; the outturn is bad to middling. Pasture is improving over the southern half of the Presidency; elsewhere it has generally perished. Fodder is scarce and cattle in the Deccan districts are suffering, but are using forest reserves in which free cutting of grass is also permitted. Prices have again risen moderately in the Circars and on the West Coast but very sharply elsewhere, partly owing to the demand for export. The price of staple food-grains in the Deccan districts is now nearly three times the normal rate. People everywhere are in good condition but want employment in the Deccan districts and Nellore. Test works have been started during the week in Kurnool, Bellary, and Anantapur in addition to Cuddapah last week. The total number on relief works was 9,740. In Bellary, 1,239 weavers were relieved and 719 were fed at kitchens; in Cuddapah 384 were relieved at kitchens.

Bombay.—*For week ending 18th November.*—No rain during the week. More rain is urgently wanted for the late sowings in six districts. The standing crops have withered or are withering in seven districts and they have been damaged by locusts in parts of four districts and by insects in one taluka of Broach Preparations for the late crops or sowing are progressing in ten, and reaping of the early crops in parts of eight, districts. Cotton-picking continues in Khandesh. Fodder is insufficient in parts of twelve districts. Agricultural stock are healthy except in parts of ten districts. Prices are rising in fifteen districts but are stationary or lower in five. Four relief works have been opened in the Ahmednagar district. The number on relief works is about 1,400. The opening of relief works is ordered in the remaining Deccan districts, except Khandesh, Bijapur and Dharwar, but the numbers on works are not yet known.

Bengal.—*For week ending 16th November.*—There was some rain in Northern Bengal and in parts of Orissa, and also in the Brahmanbaria subdivision of Tippera. It is said to have been insufficient to benefit the rice crop, and prospects remain generally unaltered. In Rangpur and Bogra the rain was accompanied by hail which did some damage to the crops, but in these two districts the prospects of the winter rice crop are reported to be fair. In Saran locusts have done considerable damage. The spring crops are reported to be germinating well in Northern Bengal and in Patna, Gaya and Saran; elsewhere the prospects of these crops are unfavourable. Prices continue very high, but, except in Patna and Champaran, there has been no material rise since last week. In Patna, Champaran and the Bhabua sub-division of Shahabad test works have been opened, but in Patna they have not been largely attended. In Champaran and Shahabad the numbers employed on the 14th were:—Champaran—men 705, women 444, and children 268; Shahabad—men 387, women 305, and children 138.

North-Western Provinces and Oudh.—*For week ending 18th November.*—The weather has been cloudy in the greater part of Oudh and in portions of the Rohilkhand, Allahabad and Gorakhpur divisions, but no rain has fallen. There is no material change in the situation. Harvesting of the autumn crops has been completed almost everywhere; it was expected that the outturn would be accurately known this week but delays have occurred. The spring crop sowings are in active progress and the seed where sown is reported to be germinating well. The number of districts in which relief measures have become necessary and the number of persons relieved have increased, the distress being most marked in Bundelkhand which suffered severely last spring and summer. The numbers were as follows on Saturday, November 14th:—Banda 37,493; Hamirpur 8,457; Allahabad 9,337; Jhansi 5,047; Jalaun 11,069; Jaunpur 5,537; Rae Bareili 11,941; Sitapur 2,293; Hardoi 7,834,—total 99,008; of these 13,632 were dependants gratuitously relieved, and 17,424 persons were gratuitously relieved under other provisions of the Famine Code. 596 persons were employed on village works in Allahabad. Supplies and fodder are getting deficient in several places. Prices are still high and are rising in several districts.

Punjab.—*For week ending 18th November.*—Slight rain in Mooltan only. Harvesting of the autumn crops is nearly finished. Sugarcane is being pressed in Sialkot. Cotton-picking continues in Sialkot, Mooltan, and Dera Ismail Khan. The spring crops are being sown on irrigated land, but sowings are much retarded owing to the deficient supply of water. Rain is badly wanted throughout the province. The condition of the autumn crops is average on irrigated lands only and poor elsewhere. The outturn is poor in Mooltan and below average in Dera Ismail Khan. The stock of grain is sufficient in Amritsar, Lahore and in parts of Ferozepore, and is average in Peshawar. Locusts did some damage in Mooltan. The condition of cattle is generally good to fair but they are hard worked in Jullundur and are getting poor in Kulachi in Dera Ismail Khan. Fodder is scarce everywhere except in Umballa, Peshawar, and Rohtak. The number of persons on relief work in Karnal was 426, and the aggregate number in Gujrat on the 14th November was 7,139, including non-working children. Prices generally rule high:—wheat is selling at 7 to 9, gram 8 to 9½, Bulrush millet 8¾ to 11, maize 9 to 10½, rice 7½ to 8, and great millet about 11 seers per rupee.

Central Provinces.—*For week ending 18th November.*—The weather has been occasionally cloudy but there has been no rain. The days are still hot. Reaping of the autumn crops continues; apart from irrigated rice the outturns are very poor, except in a few favoured tracts such as the Dhamtari tehsil of Raipur and the Sambalpur Districts. Spring sowings are almost completed, but large areas have been left unsown in most districts. Germination is frequently defective and the young seedlings are in many cases very weakly. In the poorer lands they are withering away. Insects also are doing damage. Fooder is getting scarce in parts of five districts. Prices continue to rise almost throughout the provinces. Wheat is now selling at 7½ seers in Damoh and in most other districts at 8 to 9 seers the rupee.

Burma.—*For week ending 14th November.*—In Lower Burma rain has fallen in most districts and crop prospects continue good everywhere. In Upper Burma slight rain fell in all districts except Pakokku, Kyaukse, Myingyan, and the Southern Shan States. Rain has improved the crops considerably in Shwebo and to some extent in Bhamo and Meiktila; elsewhere more rain is urgently needed and prospects have not improved. The price of paddy has fallen largely in Myaungmya and the Upper Chindwin and slightly in Amherst, Thayetmyo, and Pakokku; elsewhere the price has been stationary. The numbers on relief works were 7,919; and on gratuitous relief 600.

Assam.—*For week ending 17th November.*—The weather is seasonable. Prospects of the crops are not favourable in the Surma Valley and parts of four lower districts in the Assam Valley. Sowing of the mustard crop continues. The condition of tea is fair. The condition of cattle is good, but scarcity of fodder is felt in parts of Cachar. Water is sufficient. Prices of food-grains are rising.

Mysore and Coorg.—*For week ending 18th November.*—MYSORE: Rain is much needed. The crops are withering for want of rain. *Ragi* (*Eleusine coracana*) has been harvested in parts of Tumkur, Shimoga, Chitaldroog, and Mysore. Prices have risen in six districts.

COORG: Rainfall moderate. The rice crop is maturing but rain is wanted. Cardamom-picking is completed. Coffee-picking has commenced. Water and fodder for cattle are sufficient. Prices of food-grains are rising.

Berar and Hyderabad.—*For week ending 18th November.*—BERAR: The weather is warm and clear. Agricultural prospects are unsatisfactory. The crops on high and rocky land have withered almost throughout the province while the crops on rich black soil are stunted through insufficient moisture. Ploughing of fields for the winter crops is completed but sowings are deferred in places and weeding operations have been stopped in most districts. Scarcity of fodder and water prevails in Akola Amraoti, and Wun. High prices for food-grains continue and relief works appear likely to be necessary early next year.

HYDERABAD: No rain during the week. Sowing of the spring crops has commenced. The irrigated rice crop is withering. Agricultural prospects are getting more and more gloomy, especially in the Gulburga division. The water-supply is decreasing. Fodder and pasture are scarce. Prices are:—wheat $6\frac{3}{4}$, coarse rice $6\frac{1}{2}$, white *jowar* 10, yellow *jowar* $11\frac{3}{4}$, gram 8, and *tur* (*Cajanus indicus*) 12 seers per current rupee.

Central India.—*For week ending 18th November.*—No rain fell in Central India during the week. Rain is wanted urgently everywhere. Agricultural operations are still at a standstill in Baghelkhand but are in progress in other Agencies. The autumn crops have been damaged for want of rain everywhere. Agricultural stock are in fairly good condition in Bhopal, Bundelkhand and Bhopawar, but are indifferent in Baghelkhand. Pasturage is fair and sufficient in Bhopal and Bhopawar, but is indifferent in Baghelkhand and insufficient in Bundelkhand. Prices are above normal in all Agencies. Opium is being sown in Bhopal and to a limited extent in Bhopawar. The number of persons employed on relief works in Bundelkhand was 859 and in Baghelkhand 859. The numbers on gratuitous relief were—Bundelkhand 1,229 and Baghelkhand 1,169.

Rajputana.—*For week ending 18th November.*—No rain. Agricultural operations are generally satisfactory except in Jaisalmere. The crops are fair except in Jeypore. *Jowar* (*Sorghum vulgare*) is suffering for want of rain in Jhallawar. Harvest prospects are not promising in Jeypore. *Moong* (*Phaseolus mungo*) and *Kolath* have been damaged in Serohi, *jowar* in Jhallawar, and the unirrigated crops in Ajmere. Agricultural stock are in good condition. Pasturage and fodder are sufficient except in Tonk, Ulwar and parts of Meywar, Jeypore and Jaisalmere. Fodder is failing in Dholepore and Bhurtpore. Prices are high in Marwar, Meywar, Kotah, Harowti, Bikanir, Jaisalmere, but are falling in Pertabgurh and Jhallawar, and are steady elsewhere. Scarcity is apprehended later in the season in Bundi and a portion of Tonk. Test relief works have been started in Bhurtpore. The aggregate number of persons on relief works was:—Kotah 648; Dholepore 3,529; Bikanir 1,224; Jaisalmere 58. The numbers on gratuitous relief were:—Bikanir 2,747.

Kashmir.—KASHMIR VALLEY.—*For week ending 17th November.*—The weather is fine. Spring sowings are still in progress in some places. Prices are a little below normal.

JAMMU PROVINCE.—*For week ending 18th November.*—No rain. The autumn crops are suffering. Fodder is scanty. Prices are rising.

Nepal.—*For week ending 14th November.*—Snow has fallen on the nearer ranges. The weather is dull. Harvesting of low-land rice is finished; the outturn is about $\frac{3}{4}$ of an average.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 9TH NOVEMBER 1895, AND FROM 1ST JULY TO 7TH NOVEMBER 1896.

N B.—As regards the figures in column *Total Earnings from 1st July 1896*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the second-half of 1895.	Week ending 9th November 1895.			Week ending 7th November 1896.			Earnings from 1st July to 9th November 1895.	Earnings from 1st July to 7th November 1896.	Increase.	Decrease.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 26th November, 1896.

No. 29.—In exercise of the power conferred by section 17 of the Indian Councils Act, 1861 (24 and 25 Vict., Cap 67), the Governor General in Council has been pleased to appoint Thursday, the 17th December, 1896, at 11 A.M., as the time, and the Council Chamber in the Government House, Calcutta, as the place, for a meeting of the Council of the Governor General for the purpose of making Laws and Regulations.

H. W. C. CARNDUFF.

Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 26th November 1896.

No. 1825.—The following drafts of certain Rules which it is proposed to make in exercise of the powers conferred by sections 5 and 7 of the Indian

Explosives Act (IV of 1884) are published, as required by section 18 of the said Act and Government of India, Home Department, Notification No. 1964, dated 2nd September 1887, for the information of persons likely to be affected thereby, and notice is hereby given that the drafts will be taken into consideration by the Governor General in Council after the 15th day of February 1897.

2. Any objection or suggestion, which may be received from any person with respect to the drafts before that date, will be considered by the Governor General in Council.

NOTE.—All changes proposed in the existing rules are indicated in italics.

Draft Rules to regulate the transport and importation of explosives.

In supersession of the Notification by the Government of India, Home Department, No. 1417 (Public), dated the 24th June 1887, and in exercise of the powers conferred by sections 5 *and 7* of the Indian Explosives Act (IV of 1884), the Governor General in Council is pleased to make the following rules to regulate the transport and importation of explosives.

These Rules extend to the whole of British India, but the rules relating to the transport of explosives shall cease to apply to any port as defined in the Indian Ports Act (X of 1889) for which special rules made by the Local Government are for the time being in force, in so far as they are expressly superseded by, or are inconsistent with, such special rules.

Nothing in *these Rules* shall apply to the manufacture, possession, use, sale, transport, or importation of any explosive—

(*a*) by order of the Government, or

(*b*) by any person employed under the Government in the execution of *the Indian Explosives* Act *(IV of 1884)*, or as a keeper of a magazine, artizan, soldier, sailor, policeman, or otherwise, or enrolled as a volunteer under the Indian Volunteers Act (*XX of* 1869), in the course of his employment or duty as such.

PRELIMINARY.

1. For the purposes of these rules, explosives shall be classified as follows, namely,—

Class 1	Gunpowder.
Class 2	Nitrate-mixture.
Class 3	Nitro-compound.
Class 4	Chlorate-mixture.
Class 5	Fulminate.
Class 6	Ammunition.
Class 7	Firework.

And when an explosive falls within the description of more than one class, it shall be deemed to belong exclusively to the latest of the classes within the description of which it falls.

CLASS 1—*Gunpowder Class.*

The term "gunpowder" means exclusively gunpowder ordinarily so called.

CLASS 2.—*Nitrate-mixture Class.*

The term "nitrate-mixture" means any preparation, other than gunpowder ordinarily so called, formed by the mechanical mixture of a nitrate with any form of carbon or with any carbonaceous substance not possessed of explosive properties, whether sulphur be or be not added to such preparation, and whether such preparation be or be not mechanically mixed with any other non-explosive substance.

The nitrate-mixture class comprises such explosives as—

Pyrolithe,
Pudrolithe,
Poudre saxifragine,

and any preparation coming within the above definition.

CLASS 3.—*Nitro-compound Class.*

The term "nitro-compound" means any chemical compound possessed of explosive properties, or capable of combining with metals to form an explosive compound, which is produced by the chemical action of nitric acid (whether mixed or not with sulphuric acid) or of a nitrate mixed with sulphuric acid upon any carbonaceous substance, whether such compound is mechanically mixed with other substances or not.

The nitro-compound class has two divisions.

Division 1 comprises such explosives as—

Nitro-glycerine,
Dynamite,
Lithofracteur,
Dualine,
Glyoxiline,
Methylic nitrate,

and any chemical compound or mechanically mixed preparation which consists either wholly or partly, of nitro-glycerine or some other liquid nitro-compound.

Division 2 comprises such explosives as—

Gun-cotton ordinarily so called,
Gun-paper,
Xyloidine,
Gun sawdust,
Nitrated gun-cotton,
Cotton gunpowder,
Schultz's powder,
Nitro-mannite,
Picrates,
Picric powder,
Tonite (or cotton powder),

and any nitro-compound as before defined which is not comprised in the first division.

CLASS 4.—*Chlorate-mixture Class.*

The term "chlorate-mixture" means any explosive containing a chlorate.

The chlorate-mixture class has two divisions.

Division 1 comprises such explosives as—

Horsley's blasting powder,
Brain's blasting powder,

and any chlorate preparation which consists partly of nitro-glycerine or of some other liquid nitro-compound.

Division 2 comprises such explosives as—

Horsley's original blasting powder,
Erhardt's powder,
Reverley's powder,
Hochstadter's blasting charges,
Reichen's blasting charges,
Teutonite,
Chlorated gun-cotton,

and any chlorate-mixture as before defined which is not comprised in the first division.

CLASS 5.—*Fulminate Class.*

The term "fulminate" means any chemical compound or mechanical mixture, whether included in the foregoing classes or not, which, from its

great susceptibility to detonation, is suitable for employment in percussion-caps or any other appliances for developing detonation, or which, from its extreme sensibility to explosion and from its great instability (that is to say, readiness to undergo decomposition from very slight exciting causes), is especially dangerous.

The fulminate class *has* two divisions.

Division 1 comprises such compounds as the fulminates of silver and of mercury and preparations of these substances, such as are used in percussion-caps, and any preparation consisting of a mixture of a chlorate with phosphorus, or certain descriptions of phosphorus compounds, with or without the addition of carbonaceous matter, and any preparation consisting of a mixture of a chlorate with sulphur, or with a sulphurate, with or without carbonaceous matter.

Division 2 comprises such substances as the chloride and the iodide of nitrogen, fulminating gold and silver, diazobenzol, and the nitrate of diazo-benzol.

CLASS 6.—*Ammunition Class.*

The term "ammunition" means an explosive of any of the foregoing classes when enclosed in any case or contrivance, or otherwise adapted or prepared so as to form a cartridge or charge for small-arms, cannon, or any other weapon, or for blasting, or to form any safety or other fuze for blasting or for shells, or to form any tube for firing explosives, or to form a percussion-cap, a detonator, a fog-signal, a shell, a torpedo, a war-rocket, or other contrivance other than a firework.

The term "percussion-cap" does not include a detonator.

The term "detonator" means a capsule or case which is of such strength and construction, and contains an explosive of the fulminate-explosive class in such quantity that the explosion of one capsule or case will communicate the explosion to other like capsules or cases.

The term "safety fuze" means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze will not communicate laterally with other like fuzes.

The expression "safety cartridges" means cartridges for small-arms of which the case can be extracted from the small-arm after firing, and which are so closed as to prevent any explosion in one cartridge being communicated to other cartridges. *The term also includes rifle-calibre machine-gun cartridges if they are of the above description, whether they are for use with machine-guns having chambers identical with those of rifles or with machine-guns which have special chambers.*

The maximum gauge at which a small-arm cartridge can be accepted as "safety" is one inch. The following are the gauges of the machine-gun cartridges which may be accepted as "safety"—

·303-inch cordite.

Martini-Henry rifle, solid case.

·45-inch Gardner, Gatling and Nordenfeldt, except Martini-Henry chambered guns.

·4-inch.

Cartridges of larger gauge are not safety cartridges.

The ammunition class has three divisions.

Division 1 comprises exclusively—

Safety cartridges,
Safety fuzes for blasting,
Fuzes for shells, and tubes friction for guns, provided there be no more than 5 fuzes or 25 tubes in one package, and that the package be a hermetically sealed metal cylinder.
Railway fog-signals,
Percussion-caps.

Division 2 comprises any ammunition, as before defined, which does not contain its own means of ignition and is not included in division 1, such as—

Cartridges for small-arms, which are not safety cartridges,

Cartridges and charges for cannon, shells, mines, blasting, or other like purposes,

Shells and torpedoes containing any explosive,

Fuzes for blasting, which are not safety fuzes,

Fuzes for shells,

Tubes for firing explosives,

War-rockets,

which do not contain their own means of ignition.

Division 3 comprises any ammunition, as before defined, which contains its own means of ignition and is not included in division 1, such as—

Detonators,

Cartridges for small-arms, which are not safety cartridges,

Fuzes for blasting, which are not safety fuzes,

Fuzes for shells,

Tubes for firing explosives,

which do contain their own means of ignition.

By ammunition containing its own means of ignition is meant ammunition having an arrangement, whether attached to it or forming part of it, which is adapted to explode or fire the same by friction or percussion.

CLASS 7.—*Firework Class.*

The firework class has two divisions.

Division 1 comprises firework compositions, that is to say, any chemical compound or mechanically mixed preparation of an explosive or inflammable nature, which is used for the purpose of making manufactured fireworks, and is not included in the former classes of explosives, and also any star and any coloured fire composition, *subject to the proviso hereinafter set forth.*

Division 2 comprises manufactured fireworks, that is to say, any explosive of *any of* the foregoing classes and any firework composition, when such explosive or composition is enclosed in any case or contrivance, or is otherwise manufactured so as to form a squib, cracker, *toy cap or amorce,* serpent, rocket (other than a war-rocket), maroon, lance, wheel, Chinese fire, Roman candle, or other article *specially* adapted for the production of pyrotechnic effects or pyrotechnic signals or *sound signals :*

Provided that a substantially constructed and hermetically closed metal case containing not more than 1 lb. of coloured fire composition of such a nature as not to be liable to spontaneous ignition shall be deemed to be a "manufactured firework."

TRANSPORT.

(a) Packing.

2. The following general rules shall be observed with respect to the packing of explosives for conveyance :—

I.—Each class of explosive shall be separately packed.

II.—An explosive, not being an explosive of the 5th (fulminate) class, or of the 2nd and 3rd divisions of the 6th (ammunition) class, or of the 1st division of the 7th (firework) class, shall, if not exceeding 5lbs. in quantity, be contained in a substantial case, bag, canister, or other receptacle made and closed so as to prevent the explosive from escaping.

III.—In every other case the explosive shall be contained in a double package. The inner package shall be a substantial case, bag, canister, or other receptacle made and closed so as to prevent the explosive from escaping, and the outer package shall be a box, barrel, or case of wood or metal or other solid material, and shall be of such strength, construction, and character that it will not be broken or accidentally opened, or become defective or insecure whilst being conveyed, and will not allow the explosive to escape :

Provided as follows :—

(a) If the explosive is of the 1st (or gunpowder) class or of the 2nd (nitrate-mixture) class, or is gun-cotton or another explosive of the 2nd division of the 3rd (nitro-compound) class, the quantity of *the* explosive in any one outer package shall not, in the case of explosives of the first two classes, exceed 100 lbs., and in *other cases* 50 lbs.

*If the explosive is picric acid, the inner package must be of such a nature as to effectually prevent any picric acid from coming into contact with any basic metallic oxide.**

(b) If the explosive belongs to the 1st division of the 3rd (nitro-compound) class or to the 4th (chlorate-mixture) class, the inner package shall be without any metal in its construction, and the inner or outer package, or both, shall be thoroughly waterproof.† No one of the inner packages shall contain more than 10 lbs., and the aggregate quantity of the explosive in any one outer package shall not exceed 50 lbs.

(c)—*1. If the explosive belongs to the 5th (fulminate) class, and is of such character that it cannot be packed mixed with water, or that danger would arise from such mode of packing, it shall be packed in such manner as shall be specially directed by the Governor General in Council.*

2. Any other explosive of the fulminate class shall be packed as follows : It shall be packed in bags or coverings of calico, canvas, or other material permeable to water, and containing each not more than 25 lbs. of fulminate, and so made and closed as to prevent any explosive from escaping. Such bags or coverings shall be packed in a case containing sufficient water to ensure the explosive being kept constantly wet, and such case (hereinafter called the inner case) shall be packed in an outer case containing sufficient water constantly to surround the inner case ; and the inner case and the outer case shall each be of such strength, construction, and character that it will not be broken or accidentally opened or become defective or insecure whilst being conveyed, and will not allow any fulminate or water to escape ; and the amount of the explosive in any one outer case shall not exceed 200 lbs., except with the consent of, and under conditions approved by, an Inspector of Explosives

3. Every package when actually used for the packing of one fulminate shall not be used for the packing of any other fulminate or for any other purpose.

4. On the outer case there shall be affixed in conspicuous characters by means of a brand or securely attached label or other mark the word "Explosive," with the name of the explosive followed by the words "Fulminate, Division 1" (or 2 as the case may be) and the name and address of the owner or sender.

* *Note.—This rule is intended to prevent picric acid being packed in a case lined with certain metals such as zinc or lead, which would result in danger arising from the formation of a picrate. Waterproof bags inside powder-barrels are suggested as a simple and safe method of packing picric acid for transport or storage.*

† *Note.—From the requisition that the package should be waterproof are excepted—*

(1) All explosives falling in the 2nd division of the 4th (chlorate-mixture) class.

(2) Those explosives, included in the 1st division of the 3rd (nitro-compound) class which do not yield up their nitro-glycerine in contact with water, such as blasting gelatine, gelatine dynamite, cordite and ballistite and gelignite : provided that any other substance than those named has been certified to be of this character by a Chief Inspector of Explosives.

(d)—1. *If an explosive belongs to the 1st division of the 6th (ammunition) class, it shall be contained in a box, barrel, or case of wood, metal, other solid material, and of such strength, construction, and character that it will not be broken or accidentally opened, or become defective or insecure whilst being conveyed, and will not allow any explosive to escape.*

2. *If the explosive belongs to the 2nd division of the 6th (ammunition) class, the following rules shall apply,* viz. :—

(i) *A shell or torpedo containing any explosive material, whether such shell or torpedo be separate or form part of a rocket or other appliance, shall be packed in such manner as may be specially directed by the Governor General in Council with reference to such explosive.*

(ii) *Any explosive material when made up into a cartridge or charge for cannon, shells, mines, blasting, or other like purposes, shall be packed in the manner required for the same explosive material when not so made up :*

Provided that where a double package is required, the enclosing case of such cartridge or charge, if it satisfies the conditions required for the inner package, may be held to be such inner package.

(iii) *Any other explosive of the 2nd division shall be packed in a box, barrel, or case of wood, metal, or other solid material, and of such strength, construction, and character that it will not be broken or accidentally opened, or become defective or insecure whilst being conveyed, and will not allow any explosive to escape : and any one such package shall not contain more than 100 lbs. of ammunition.*

(e) If the explosive belongs to the 3rd division of the 6th (ammunition) class, it shall be packed in a double package. The inner package shall not contain more than 2 lbs. of such explosive and no more than 50 lbs. shall be contained in the outer package.

(f) If the explosive belongs to the 1st division of the 7th (firework) class, it shall be contained in a double package. The inner package shall be a substantial canister, case, or other receptacle hermetically closed, and containing no more than 1 lb. of explosive, and no more than 20 lbs. shall be contained in the outer package ; and,

(g) If the explosive belongs to the 2nd division of the 7th (firework) class, it shall be contained in a box, barrel, or case of wood, metal, or other solid material, and of such strength, construction, and character that it will not be broken or accidentally opened, or become defective or insecure whilst being conveyed, and will not allow any explosive to escape, and the quantity of explosive in any one package shall not exceed 100 lbs.

IV.—Whatever be the amount of the explosive, and to whatever class or division of a class it belongs, the following conditions shall be observed :—

(a) the interior of every package, whether single or double, shall be kept free from grit and otherwise clean ;

(b) every package, whether single or double, when actually used for the packing of the explosive, shall not be used for the packing of any other explosive of the same or any other class or for any other purpose, *except with the consent of, and under conditions approved by, an Inspector of Explosives ;*

(c) there shall not be any iron or steel in the construction of any such single package or inner or outer package unless the same is effectually covered with tin, zinc, or other suitable material ;

(*d*) on the outermost package there shall be affixed, in conspicuous characters, by means of a brand or securely attached label or mark, the word "Explosive," followed by the name of the explosive or other description of the contents and the name and address of the owners or sender; and

(*e*) the amount of the explosive in any single package or, if there is a double package, in any one outer package, shall not exceed the amount specified in the foregoing rules, except with the consent of, and under conditions to be approved by, an *Inspector of Explosives or other* officer appointed by the Local Government in this behalf.

3. *Whoever* commits a breach of any of the foregoing rules relating to the packing of explosives for conveyance shall be punishable with fine which may extend to R1,000.*

(*b*) *Mode of conveyance.*

4. The following general rules shall be observed with respect to the conveyance of explosives :—

I.—No explosive shall be conveyed from place to place unless packed in the manner provided for in the foregoing rules.

II.—There shall not be conveyed in any carriage or vessel which is being used for the conveyance of an explosive, any explosive of a different class and division, of whatsoever nature, which contains its own means of ignition, unless it is sufficiently separated therefrom to prevent any fire or explosion which may take place in one such explosive being communicated to another.

III.—Except in the case of small consignments carried by railway, which may be unloaded at any time, explosives shall be loaded or unloaded only between sunrise and sunset. For the purposes of this rule no consignment of more than half a wagon-load booked to one station shall be deemed to be a small consignment.

IV.—Whilst the explosive is being loaded on or unloaded out of any carriage or vessel, no fire or artificial light, nor any article which is liable to cause or communicate fire or explosion [such as charcoal, lucifer-matches, articles for striking a light, petroleum to which the Petroleum Act (*XII of 1886*),] *or any other Act for the time being in force regarding the importation, possession, and transport of petroleum,* applies, or any spirit or oil or substance that gives forth an inflammable vapour at a temperature below 100° Fahrenheit] shall be, or shall be allowed to be, brought, had or used dangerously near to such carriage, ship, or boat, and no smoking shall be allowed in, on or dangerously near to, the same :

Provided that when the use of a light for the purposes of such loading or unloading is unavoidable, a lamp of such construction, position, or character as not to cause any danger from fire or explosion may be used; and no person, while handling any explosive (except *an* explosive of division 1, class 6, or *an* explosive of class 7, if packed in accordance with the packing rules), shall wear boots or shoes with iron or steel nails, heels, or tips.

V.—In *the* loading or unloading *of* any explosive, the casks and packages containing the same shall be passed from hand to hand and not rolled upon the ground; they shall not be thrown or dropped down, but shall be carefully deposited and stowed.

VI.—The explosive shall not be conveyed except in the interior of a carriage so enclosed on all sides with wood or metal, or in the hold of a ship or boat having a close deck so closed, as effectually to protect the explosive against accident by fire from without. If the explosive cannot be so secured, it shall be completely covered with painted cloth, tarpaulin, or other suitable material so as to effectually protect it against communication of fire.

VII.—There shall not be any iron or steel in the interior of the portion of the carriage or vessel with which the case containing the explosive is in contact, unless the same *is* effectually covered with leather, wood, cloth, or other suitable material.

* *Rules regarding search for, and detention of, explosives contravening regulations have been issued by the Local Governments.*

VIII.—In the stowing of *the* explosive, due precautions shall be taken by means of a partition or otherwise and by careful stowing to secure such explosive from being brought into contact with, or endangered by, any other article or substance conveyed in such carriage or vessel which is liable to cause fire or explosion; and if the explosive is dangerously affected by water, due precautions shall be taken to exclude water from coming into contact with such explosive.

IX.—The amount of *the* explosives conveyed in any one carriage or vessel at any one time shall not exceed 2,000 lbs., unless the carriage be so enclosed on all sides with wood or metal, or the vessel have a close deck so closed, as effectually to protect the explosive against accident by fire from without, in which case the amount of *the* explosives conveyed shall not exceed the following:—

	Tons.
In any one carriage on a railway	10
In any one other carriage ..	2
In any one vessel	20

NOTE.—This rule *shall* in the case of dynamite conveyed by railway, be read subject to paragraph XII of Rule 6.

X.—Nothing in the foregoing rules (except Rule I) shall apply to any explosive of the 1st division of the 6th (ammunition) class:

Provided *that* all due precautions are taken for the prevention of accidents.

5. The following rules shall be observed with respect to the conveyance of explosives otherwise than by railway:—

I.—No explosive shall be conveyed in a carriage or boat whilst carrying or plying for public passengers, unless the quantity is less than 5 lbs. and notice has been given beforehand to the person in charge of such carriage or boat:

Provided that there shall not be conveyed in any such carriage or boat any explosive of the 5th (fulminate) class or any explosive of the 3rd division of the 6th (ammunition) class, or of the 1st division of the 3rd (nitro-compound) class, except—

(*i*) dynamite which may be carried in the form of cartridges up to the limit of 5lbs:

Provided that no detonators are carried in the same compartment; and

(*ii*) detonators to the number of 200:

Provided that the amount of *explosive of the 5th (fulminate) class* in the detonators shall in no case exceed in the aggregate 3 oz. (a certificate to this effect being given by the Agent of the Company by whom the detonators are tendered for transport):

Provided also that no dynamite is carried in the same compartment.

II.—With respect to the conveyance by carriage or vessel of explosives of the 5th (fulminate) class, or of the 3rd division of the 6th (ammunition) class, or of the 1st division of the 7th (firework) class, or of larger quantities than 5 lbs. of any other explosive, the following regulations shall be observed:—

(1) The person in charge of the carriage or vessel shall not drive or conduct the same in a dangerous or reckless manner, and shall take all due precautions to avoid fire and explosion, and no person shall do any act or thing in relation to the explosive which tends to cause fire or explosion, and is not reasonably necessary for the conveyance of the explosive or for work immediately connected with such conveyance; and a person who is intoxicated shall not have charge of any carriage or vessel conveying explosive, and shall not be permitted to be in, or on, or attending the same.

(2) A person shall not forward to any warehouseman or carrier a consignment of explosive, unless he has given notice to such warehouseman or carrier beforehand, stating the name and quantity of the explosive proposed to be conveyed, and the name and address of the proposed consignee, and has had an intimation that the warehouseman or carrier is prepared to receive the consignment; and a warehouseman or carrier shall not make such an intimation, nor

receive such consignment, unless he is prepared to receive it, and forthwith to despatch the same, or to deposit it in a magazine or at a place at which a person is licensed to possess the same.

(3) The carriage or vessel conveying the explosive shall be in charge of, and constantly attended by, some competent person, or by a sufficient number of competent persons, and such persons shall not, if the amount of the explosive conveyed exceed 100 lbs., stop or delay for a longer time that may be reasonably necessary, or stop unnecessarily at any place where such stopping would be attended with special public danger.

6. The following rules shall be observed with respect to the conveyance of explosives by public railway:—

I.—No person shall send for carriage upon any railway any consignment of an explosive, unless he has given to the officer in charge of the railway station previous notice in writing which, at the option of the Railway Administration, may extend to 48 hours, of his intention to send such consignment, and stating the true name, description, quantity, and mode of packing of the explosive proposed to be conveyed, and his own name and address, and also the name and address of the proposed consignee, and unless he has had an intimation in writing from an authorised officer of the railway that such consignment will be received.

II.—No explosive which a Railway Administration shall, by any notice or regulation for the time being in force, notify that they will not receive, shall be brought, sent, or forwarded to, or upon, any railway of the said Railway Administration.

III.—Consignments of explosives shall be sent to the forwarding station and shall be received by the railway servants only at such times, between sunrise and sunset, as the Railway Administration may appoint; and every package containing any explosive proposed to be conveyed on any railway shall immediately on arrival at the station be unloaded and placed in a safe place under the special direction of the officer in charge of the station.

All gunpowder under despatch or receipt by a Government arsenal, depôt, or factory, shall be loaded or unloaded in the railway vans by Government servants employed in such arsenal, depôt, or factory. In each van used by the railway for the transport of gunpowder the packages of gunpowder shall be secured in such a way as to prevent concussion when the train is in motion.

IV.—An explosive *shall* be removed by the consignee from the receiving station during the twelve hours of daylight after arrival: if this condition is not strictly complied with, the Railway Administration may return the consignment to the consignor at his risk and expense. And such packages shall in the meanwhile be kept as far away from the station buildings as possible, in the wagon they were conveyed in, or, if unloaded, shall be completely covered with tarpaulins or other suitable material, and, if necessary, shall be protected by a police guard.

V.—The Railway Administration may refuse to receive any packages which they suspect to contain any explosive packed or sent in contravention of these regulations. And in case any package, which the Railway Administration suspect, shall be upon any railway, *the Railway Administration* may open, or require to be opened, such package, to ascertain the fact, at the risk and expense of the consignor, and may return the explosive contained in the package to the consignor at his risk and expense, keeping the packages, pending such return, in the manner prescribed in the preceding rule.

VI.—Subject to the exception provided for in clause (*e*), no explosive shall be conveyed by passenger-train except of the kinds and in the manner hereinafter specified in this rule:—

(*a*) Safety cartridges and percussion-caps and safety-fuse (for blasting) also fog-signals for railway use which may be conveyed in ordinary wagons or carriages.

(*b*) Dynamite which may be carried in the form of cartridges up to the limit of 5 lbs:

Provided that no detonators are carried in the same compartment.

(c) Detonators which may be carried to the number of 200:

Provided that in no case the amount of fulminate of mercury in the package or packages containing the detonators exceeds in the aggregate 8 oz. (a certificate to this effect being given by the Company, firm, or person tendering the detonators for transport or by its or his agent):

Provided also that no dynamite is carried in the same compartment.

(d) Sporting gunpowder or non-safety cartridges packed in double cases as before provided, so long as the gunpowder is contained in one-pound tin canisters packed in a stout wooden case with an outer covering of tin or zinc completely spark-proof, or in metal-lined cases of a pattern approved by the Railway Administration. But no outer case shall contain more than 25 lbs. of gunpowder, and the total consignment of gunpowder or non-safety cartridges by one train shall not exceed 80 lbs.

(e) Explosives may be carried by mixed trains on any line on which goods trains are not running, subject to the conditions that not more than one vehicle containing explosives is forwarded at any one time by a mixed train; that the precautions prescribed for conveyance by goods trains are observed; and that directly a wagon containing explosives arrives at a section on which goods trains are running, it is detached from the mixed trains.

VII.—Not more than five carriages containing explosives shall be loaded or unloaded at any railway station, or be conveyed by any one train at any one time; and the quantity of explosive to be contained in any one carriage shall not exceed two-thirds of the normal load, unless the carriages shall be specially built and approved of by the Government of India for the conveyance of explosives. But nothing in this clause shall be held to apply to separate consignments of small-arms ammunition.

VIII.—There shall not be conveyed in the same carriage with any explosive any lucifer or other matches, fuzes, pipelights, acids, naphtha, paraffine, petroleum to which the Petroleum Act (*XII of 1886*), *or any other Act for the time being in force regarding the importation, possession, and transport of petroleum*, applies, or any other volatile spirit or substance liable to give off an inflammable vapour or liable to spontaneous ignition, or to cause or communicate fire or explosion.

IX.—The consignor shall attach to the consignment note a certificate or (*provided the original is produced for verification*) *copy of a certificate*, signed by an officer authorised by the Local Government in this behalf that the explosive, if it is *an explosive of class 3 or 4*, is of the standard purity; and further, in the case of dynamite, and *all nitro-glycerine compounds, that there are* no signs of exuded nitro-glycerine *or of liquefaction*. The consignor shall also certify that the *explosive has* been packed in accordance with the packing rules in force in *England or in British India*.

X.—In the case of *explosives under classes 3 and 4* the outer packages shall be marked with the date *of the manufacture of the explosives. The above-mentioned certificate shall contain sufficient information to admit of all packages being easily recognised.*

XI.—The certificate referred to in Rule IX shall be valid for six months after date, if the examination has been made between the 15th October and 31st March; but any Railway Administration which accepts dynamite for transport may demand a fresh certificate for dynamite presented for conveyance between 1st April and 15th October (both inclusive).

XII.—Packages containing dynamite shall be stowed in one layer only and secured so as to prevent movement during transit, *and* the gross load in any one wagon shall not exceed 3 tons:

Provided that, if the packages of dynamite are in rectangular form and are properly secured so as to prevent movement during transit, they may be stowed in any number of layers not exceeding five, and the gross load in any one wagon shall not exceed 5 tons.

XIII.—No explosive belonging to the 5th (fulminate) class or to class VI, division 3, shall be carried in the same train with dynamite, or with any other explosive belonging to class III, division 1.

XIV.—Wagons used for the carriage of explosives shall be examined to see that they are spark-proof, and have been cleaned out before they are loaded. Hair cloth, hides, or other suitable materials shall be spread on the floor of the wagon and between each layer of packages, except when the packages are covered with gunny or felt, or contain small-arms ammunition packed in tin-lined service-pattern boxes.

XV.—Wagons containing explosives shall be loaded and unloaded on sidings distant as far as possible from the station buildings.

XVI.—*Five layers of packages in rectangular form and of uniform size (provided they are double packages, and are so secure as to prevent movement during transit) may be packed one above another. Otherwise not* more than three layers of packages containing explosives shall be packed one above another. *But* in the case of small-arms ammunition packed in tin-lined service-pattern boxes, *there is no restriction.* Subject to the provisions of Rule 4 (III), the loading and unloading of explosives when once begun shall be diligently proceeded with until the same is completed.

XVII.—When the train is being marshalled, wagons loaded with explosives may be shunted by a locomotive, *if* they are separated from the engine by not less than three wagons containing no explosive nor easily inflammable substance. This precaution is not necessary with wagons specially constructed for the carriage of explosive. The speed of these movements *shall* be restricted to 5 miles an hour; they *shall* be superintended by a duly authorised officer, who *shall* be held responsible for the observance of these orders. Flying shunts are strictly prohibited.

XVIII.—Wagons containing explosives shall be placed at the end of the train away from the locomotive, and shall be close coupled to one another, as well as to the adjoining wagons, and preceded and followed by three wagons not loaded with explosives or other traffic of an inflammable nature.

XIX.—If the wagons employed in the transport of explosives are provided with brakes, the brakes thereon shall on no account be worked while the wagons are running with a train, nor shall brakes, other than iron brakes, on vehicles immediately adjoining such wagons, be worked while such wagons are so running.

XX.—Wagons *shall* in every case be locked when loaded with explosives.

XXI.—All operations connected with the transhipment of explosives at junction stations shall take place during daylight.

7. *Whoever* commits a breach of any of the foregoing rules relating to the mode of conveyance of explosives shall be punish*able* with a fine which may extend to R100.

IMPORTATION.

8. An explosive shall not be imported by sea into British India, except under, and in accordance with, the conditions of a license to import the explosive granted under these rules:

Provided that any explosive other than an explosive specified in Rule 11 may, previous to the grant of an importation license, if certified to be of British manufacture or, if not of British manufacture, if imported from the United Kingdom and covered by the certificate granted by one of Her Majesty's Inspectors of Explosives in England, be landed in accordance with such regulations as the Local Government may prescribe in this behalf, and be stored in a place set apart by the Local Government for this purpose. The Governor General in Council may extend this privilege to any such explosive not of British manufacture regarding which he is satisfied that it has been manufactured under adequate official supervision.

Before any explosive is landed under the proviso to this rule, the consignee shall give to the Chief Customs Officer of the Port such undertaking, with or

without security, as the said officer thinks sufficient, to obey, in the event of the explosive failing to satisfy the prescribed tests, such directions as to its disposal as the Local Government may see fit to prescribe.

If samples are taken by an officer deputed by the Chief Customs Officer on board the ship on its arrival the procedure shall be that prescribed in Rule 15.

9. *Whoever* imports an explosive in contravention of Rule 8 shall be punish*able* with fine which may extend to three thousand rupees.

10. An explosive shall not be imported by sea except at the ports of Calcutta, Madras, Bombay, Rangoon, Calicut, Karachi, and Aden; but a license to import an explosive by sea from Rangoon into the ports of Akyab, Moulmein, Sandoway, Kyouk-Phyoo, Tavoy, and Mergui may be granted by the Magistrate of the Districts in which these ports are respectively situated. The fee payable in respect of each such license shall be one rupee, and the license shall be in form A in the Schedule hereto annexed.

11. If the explosive is gunpowder or an explosive of the 1st division of the 6th (ammunition) class or an explosive of the 7th (firework) class, the license to import the same may be granted at the ports of Calcutta, Madras, and Bombay by the Commissioner of Police, and at the ports of Rangoon, Calicut, Karachi, and Aden by the District Magistrate.

12. The fee payable in respect of each such license shall be R10; but, if any explosive imported under a license into a British port is exported thence to another British port named in Rule 10, the necessary license for such re-import may be granted on payment of a fee of one rupee instead of R10.

13. Licenses for the importation by sea of any explosives other than those specified in Rule 11 shall be granted by the Local Government or by some officer specially authorized by the Local Government in this behalf.

14. No license shall be granted for the importation of any explosive of the description referred to in Rule 13, if it be an explosive for which a test or examination has been prescribed by or under the orders of the Government of India, unless samples of the explosive taken as hereinafter provided are certified by the Chemical Examiner or some other officer appointed by the Local Government in this behalf to have passed the test or examination from time to time prescribed.

15. On the arrival in any port at which the importation of explosives is lawful, of a ship having on board an explosive other than an explosive of the description referred to in Rule 11, such officer as the Chief Customs Officer authorizes in this behalf shall, as soon as may be, proceed on board and *shall, if testing or examination is requisite under the last preceding rule,* obtain samples of the explosive.

All explosive of which samples are taken for examination shall be forthwith deposited in a duly licensed place or places of storage, and shall not be distributed for use until the importer has received from the licensing authority notice that it may be so distributed.

The master of the ship shall give to the said officer, without charge, such samples as he may require. The said officer shall affix to each such sample the name of the ship and of the consignee and such other distinguishing marks as he may think necessary, and shall forward the same to the Chemical Examiner or officer, as aforesaid, for report.

The Chemical Examiner or officer as aforesaid, after testing the said samples, shall without delay forward to the licensing authority, through the Chief Customs Officer, a report under his signature certifying whether the explosive has satisfied the prescribed test.

15-A. Explosives, other than those referred to in Rule 11, which have already undergone the test prescribed by Rules 14 and 15 at the ports of Calcutta, Madras, Bombay, Rangoon, Calicut, Karachi, or Aden, may be re-imported by sea into any other of those ports under a license granted under Rule 13, without re-testing, but subject, in the case of such explosives as are mentioned in Rule 6, Clause IX, to the production of the certificate prescribed in that clause.

Such certificate shall be valid for six months after date, if the examination has been made between the 15th October and 31st March; but in the case of

dynamite, a fresh certificate may be demanded if the consignment is imported between the 1st April and 15th October (both inclusive).

16. The period for which a license to import an explosive, granted under Rule 13, shall continue in force shall not exceed such period as may seem necessary to the authority granting the license.

17. The fee payable on a license granted under Rule 13 shall be R10, but, if any explosive imported under a license into a British port is exported thence to another British port named in Rule 10, the necessary license for such re-import may be granted on payment of a fee of one rupee instead of R10.

18. Every license granted under Rules 11 and 13 shall be in Form A in the Schedule hereto annexed, and shall be subject to the conditions therein prescribed, and also to such additional conditions with respect to the time and place of unloading, landing, delivery and conveyance of the explosive, and such other conditions as may in each case be thought by the licensing officer to be necessary for the public safety or in the interests of the State.

19. *Whoever* commits a breach of any condition subject to which a license under Rules 11 and 13 is granted, shall be punish*able* with fine which may extend to three thousand rupees.

GENERAL.

20. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted.

21. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the *Indian Explosives* Act (*IV of 1884*) or the rules thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on payment of one rupee.

22. The fees leviable under these rules shall be taken in the shape of impressed stamps. Ordinarily the applications for licenses or renewals of licenses shall, if not otherwise provided, be written on impressed stamps of value equal to the amount of fee leviable in respect of such licenses or renewals, the licenses themselves being issued on plain paper. But when the licenses themselves are written or printed on impressed stamps, the application may be on plain paper. When an application for license is written on an impressed stamp, and the license is refused, the value of the stamp will, on application, be refunded to the applicant.

23. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

24. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

25. All Magistrates or other authorities acting under these rules *shall* perform their duties subject to the control of their executive superiors and of the Local Government.

26. Any authority empowered to grant a license under the foregoing rules may, if he thinks fit, direct by any order written on the license that it shall have the effect of a like license under the Indian Arms Act (XI of 1878).

27. Any persons lawfully entitled under the Indian Arms Act (XI of 1878) or the rules thereunder, to possess any explosive coming under the head of ammunition, as defined in that Act, may possess or import without license under these rules any such explosive in reasonable quantities for his own private use: but when an explosive is so imported, the Collector of Customs or any other officer empowered by the Local Government in this behalf by name or by virtue of his office may at any time detain such explosive until he receives the orders of the Local Government thereon.

FORM A.

(*See Rules 11, 18 and 18.*)

FEE TEN RUPEES IN STAMPS.

*License to import Explosives into the Port of*__________

Name, etc., and address of licence-holder.	Number of packages.	Explosive.			Purpose for which required.	Destination.	Period for which the license is valid.
		Description.	Weight.	Number.			
							From the ______ th of ______ to the ______ th of ______ 189 .

The ______ of ______ 189 . (Seal.) (Signature) ______ of ______

Conditions.

1. This license is given subject to the provisions of the Indian Explosives Act (IV of 1884) and the rules thereunder. *Certain general rules are quoted separately below.*

2. This license *shall* become void after expiry of the period named thereon.

3. This license is valid for importation only: if the articles named herein are to be transported to any place outside the Presidency Town, they must be protected by a transport license, to be issued in accordance with the rules under the Indian Arms Act (XI of 1878).

4. On the outside of each package there shall be affixed in conspicuous characters by means of a brand or securely attached label or mark the word "Explosive," followed by the name of the explosive or other description of the contents and the name and address of the owners or senders.

GENERAL RULES.

* * *

20. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted.

21. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act or the rules made thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on the payment of one rupee.

22. The fees leviable under these rules shall be taken in the shape of impressed stamps. Ordinarily the applications for license or renewals of licenses shall, if not otherwise provided, be written on impressed stamps of value equal to the amount of fee leviable in respect of such licenses or renewals, the licenses themselves being issued on plain paper. But when the licenses themselves are written or printed on impressed stamps, the application may be on plain paper. When an application for license is written on an impressed stamp, and the license is refused, the value of the stamp will, on application, be refunded to the applicant.

23. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

24. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

Draft Rule for Testing Explosives.

WITH reference to Rule 14 of the Rules to regulate the transport and importation of explosives, published with Home Department Notification , the Governor General in Council is pleased to make the following Rule on the subject of the tests which explosives should be required to pass before their importation is permitted:—

RULE.

Class 1.—Gunpowder Class. Gunpowder is not required to pass a test.

Class 2.—Nitrate-mixture class. Nitrate-mixture explosives are not ordinarily required to pass a test. The Local Government, however, or the authorized officer granting the import license under Rule 13 of the Rules to regulate the transport and importation of explosives published with Home Department Notification No. , dated the 1896, may in any particular case or class of cases require that a sample of the explosive which is to be imported be sent first to the Chemical Examiner for an analysis of its constituent parts.

Class 3.—Nitro-compound class. It is for explosives of this class that testing is chiefly required, in respect to the purity of their composition and their liability to liquefaction or exudation. The tests prescribed for nitro-compound explosives are contained in Schedule A attached to this rule.

Class 4.—Chlorate-mixture class. See Schedule A for remarks regarding the testing of this class(a).

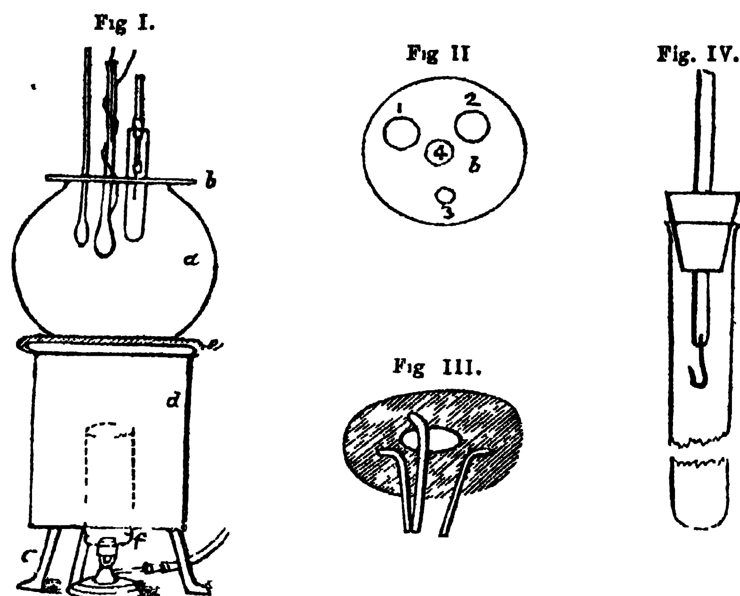
Class 5.—Fulminate class. No test has been laid down for explosives of the Fulminate class(a).

Class 6.—Ammunition class. No test is required for explosives of the 1st Division of this class. If the substances of which explosives of the 2nd and 3rd Divisions are composed have to be tested under the preceding rules, they will be equally liable to be tested when enclosed in any case or contrivance and thus falling under the Ammunition class.

Class 7.—Firework class. Explosives of this class are not required to pass a test.

SCHEDULE A.

Heat Test as applied to Explosives of the Nitro-compound Class.



GENERAL INSTRUCTIONS.

Apparatus required.

1. A water bath, consisting of a spherical glass or copper vessel [(*a*) Fig. 1] of about 8 inches diameter, and with an aperture of about 5 inches; the bath is filled with water to within a quarter of an inch of the edge. It has a loose cover of sheet copper about 6 inches in diameter (*b*), and rests on a tripod stand about 14 inches high (*c*), which is covered with coarse iron wire gauze (*e*), and is surrounded with a screen of thin sheet tin or copper (*d*). Within the latter is placed an Argand burner (*f*), with glass chimney. The cover (*b*) has four holes arranged as seen in Fig. II, No. 4 to receive the regulator, No. 3 the thermometer, Nos. 1 and 2 the test-tubes containing the gun-cotton or other materials to be tested. Around holes 1 and 2 on the under side of the

(*a*) Licenses are not at present given for the importation into British India of any explosives of those

cover are soldered three pieces of brass wire with points sightly converging (Fig. III); these act as springs and allow the test-tubes to be easily placed in position and removed.

*2. Scheibler's or Page's temperature regulator.

*3. Two cells of Le Clanché's battery No. 1 } if Scheibler's regulator is used.
*4. A few yards of insulated copper wire }

5. Test tubes from $5\frac{1}{4}$ to $5\frac{1}{2}$ inches long, and of such diameter that they will hold from 20 to 22 cubic centimeters of water when filled to a height of 5 inches.

6. India-rubber stoppers, fitting the test-tubes and carrying an arrangement for holding the test-paper, *viz.*, a narrow glass tube passing through the centre of the stopper, drawn out so as to form a hook, or terminating in a platinum wire hook (Fig. IV).

7. A thermometer, with range not less than from 30° to 212° Fahrenheit.

8. A minute clock.

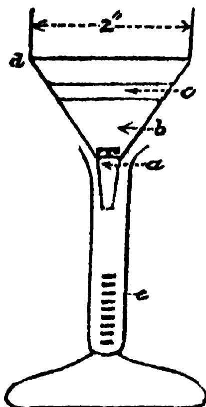
Materials required.

a. Test-paper.—The test-paper is prepared as follows:—45 grains of white maize starch (cornflour), previously washed with cold water, are added to $8\frac{3}{4}$ ounces of distilled water, the mixture is stirred, heated to boiling, and kept gently boiling for 10 minutes; 15 grains of pure potassium iodide (*i.e.*, which has been re-crystallized from alcohol) are dissolved in $8\frac{3}{4}$ ounces of distilled water. The two solutions are thoroughly mixed and allowed to get cold. Strips, or sheets, of white English filter paper previously washed with water and re-dried are dipped into the solution thus prepared, and allowed to remain in it for not less than 10 seconds; they are then allowed to drain and dry in a place free from laboratory fumes and dust. The upper and lower margins of the strips, or sheets, are cut off, and the paper is preserved in well-stoppered or cork bottles, *and in the dark*.† The dimensions of the pieces of test-paper used are about $\frac{4}{10}$ inch by $\frac{8}{10}$ inch (10 mm. by 20 mm.).

* This is not absolutely required, as the temperature of the bath can be kept constant by proper attention to the heating flame

† When a paper is freshly prepared, and as long as it remains in good condition, a drop of dilute acetic acid put on the paper with a glass rod, produces no coloration. In process of time, however, the sooner a drop of the acid produces a brown or bluish coloration (the stronger the light to which the papers is exposed, a single hour of direct sunlight produces a marked effect), and whenever this is the case, the paper should be rejected. On this account it is advisable not to prepare too much of the test-paper at one time, but to prepare it fresh every month or so.

b. Standard tint paper.—A solution of caramel in water is made of such concentration that when diluted one hundred times (10 cc. made up to 1 litre) the tint of this diluted solution equals the tint produced by the Nessler test in 100 cc. water containing 0·000075 grm. of ammonia or 0·00023505 grm. of chloride of ammonium. With this caramel solution lines are drawn on strips of white filter paper* by means of a clean quill pen. When the marks thus produced are dry the paper is cut into pieces of the same size as the test-paper previously described, in such a way that each piece has a brown line across it near the middle of its length, and only such strips are preserved in which the brown line has a breadth varying from ½ mm. to 1 mm. ($\frac{1}{50}$ of an inch to $\frac{1}{25}$ of an inch).



I.—Testing Dynamite, Blasting Gelatine, and other Explosives of the First Division of the Nitro-compound Class.

A.—DYNAMITE, ETC., ETC.

Nitro-glycerine preparations, from which the nitro-glycerine can be extracted in the manner described below, *must* satisfy the following test, otherwise they will not be considered as maufactured with "thoroughly purified nitro-glycerine" within the terms of the license.†

Apparatus required.

A funnel 2 inches across (*d*), a cylindrical measure divided into grains (*e*). (*See* sketch.)

Mode of operation.

About 300 to 400 grains of dynamite (*b*) finely divided are placed into the funnel, which has previously been loosely plugged by some freshly-ignited asbestos (*a*).

The surface is smoothed by means of a flat-headed glass rod or stopper, and some clean washed and dried Kieselguhr (*c*) is spread over it to the depth of about ⅛ inch.

Water is next carefully dropped from a wash bottle upon this Kieselguhr, and when the first portion has been soaked up, more is added; this is repeated until sufficient nitro-glycerine has been collected in the graduated measure (*e*) below.

If any water should have passed through with the nitro-glycerine, it should be removed with a piece of blotting paper, and the nitro-glycerine, if necessary, filtered through a dry paper filter.

* This paper must be carefully washed with distilled water, in the first instance, to remove any traces of bleaching matter, and dried.

† This test, though at present looked upon as the most important, as far as testing the purity of the nitro-glycerine is concerned, is in England only one of several which any given sample of nitro-glycerine preparation has to satisfy in order to establish its compliance with the definition in the license.

Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath described under I, page 2, into the water (which is to be steadily maintained at a temperature of 160° Fahr.) to a depth of 2¾ inches. Fifty grains of nitro-glycerine, to be tested, are weighed into a test-tube in such a way as not to soil the sides of the tube. A test-paper is fixed on the hook of the glass rod so that when inserted into the tube it will be in a vertical position. A sufficient amount of a mixture of half distilled water and half glycerine to moisten the upper half of the paper is now applied to the upper edge of the test-paper, by means of a camel's-hair pencil, the cork carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to such a depth that the lower margin of the moistened part of the paper is about five-eighths of an inch above the surface of the cover. The test is complete when the faint brown line which after a time makes its appearance at the line of boundary between the dry and moist part of the paper equals in tint the brown line of the standard tint paper.

The nitro-glycerine under examination will not be considered as "thoroughly purified" within the terms of the license unless the time necessary to produce the standard tint as above described is at *least* 15 minutes.

B.—BLASTING GELATINE, GELATINE DYNAMITE, AND ANALOGOUS PREPARATIONS.

Fifty (50) grains of blasting gelatine are to be intimately incorporated with one hundred (100) grains of French chalk.* The mixture is to be gradually introduced into a test-tube of the dimensions prescribed above for the dynamite heat test, with the aid of gentle tapping upon the table, between the introduction of successive portions of the mixture into the tube, so that when the tube contains all the mixture it shall be filled to the extent of 1¾ inches (one inch and three quarters) of its height. The test-paper is then to be inserted and the heat is to be applied in the manner prescribed above for the dynamite heat test, and the sample tested is to withstand exposure to 160° Fahr. for a period of ten (10) minutes, before producing a discoloration of the test-papers corresponding in tint to the standard colour test which is employed for governing the results of the dynamite heat test.

(For Exudation and Liquefaction tests for Blasting Gelatine, etc., etc., *see* Appendix, p. 7.)

N.B.—Non-gelatinized nitro-glycerine preparations, from which the nitro-glycerine cannot be expelled by water, are tested without any previous separation of the ingredients, the temperature being as above (160° Fahr.) and the time being seven (7) minutes.

C.—CORDITE AND BALLISTITE.

1. Apparatus required.

The apparatus necessary for the application of the heat test to cordite is identical with that described above (*see* page 2) for explosives of the nitro-compound class generally † with the addition of a mill and a nest of sieves similar to those used at Waltham Abbey for preparing the cordite for testing (*see* instructions below).

* This can be readily effected by carefully working the two materials together with a wooden pestle in a wooden mortar

The French chalk should be of good commercial quality, and after being carefully washed with distilled water and dried in a water oven, it should be exposed under a bell jar to moist air until it has taken up about 0·5 per cent. of moisture It should then be bottled for use, and with ordinary care the limits of 0 5 per cent. can be maintained in keeping

† In the Waltham Abbey apparatus the cover (Fig. II.) has all the holes around the circumference, instead of having one in the centre and three around the circumference.

2. Preparation of the sample to be tested.

Pieces half an inch long are cut from one end of every stick selected for the test; in the case of the thicker cordites, each piece so cut is further subdivided into about four portions. These cut pieces are then passed two or three times through the mill, the first portion of material which passes through being rejected on account of the possible presence of foreign matter from the mill. The ground material is put on the top sieve of the nest of sieves and sifted. That portion which has passed through the top sieve and been stopped by the second is taken for the test. After each sample has been ground, the mill must be taken to pieces and carefully cleaned.

3. Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath, described under I, page 2, so as to be immersed in the water to a depth of 2¾ inches. The water is maintained at a constant temperature of 180° Fahr. When this temperature is reached 25 grains of the sifted cordite are put into one of the test-tubes, and collected at the bottom by gentle tapping. A test-paper is fixed on to the hook of the glass rod, so that when inserted into the tube it will be in a vertical position. A mixture of equal parts of distilled water and pure glycerine (Price's) is now applied to the upper edge of the test-paper by means of a camel's-hair pencil, in sufficient amount to moisten the upper half; the stopper carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to the same depth as the thermometer. The lower margin of the moistened part of the paper should then be about five-eighths of an inch above the surface of the cover. The test is completed when the faint brown line, which after a time makes its appearance at the margin between the wet and dry portions of the test-paper, equals in depth of tint the brown line drawn on the standard tint paper.

4. The time which elapses between the insertion of the test-tube and the completion of the test must not be less than 15 minutes.

N.B.—In the case of ballistite the treatment is the same, except that when it is in a very finely granulated condition it need not be cut up.

II.—Testing Gun-cotton, Schultze Gunpowder, E. C. Powder, and other Explosives of the 2nd Division of the Nitro-compound Class.

A.—GUN-COTTON, TONITE, ETC., ETC.

Sufficient material to serve for two or more tests is removed from the centre of the cartridge by gentle scraping, and, if necessary, further reduced by rubbing between the fingers.

The fine powder thus produced is spread out in a thin layer upon a paper tray 6 inches by 4½ inches, which is then placed inside a water oven, kept, as nearly as possible, at 120° Fahr.

The wire gauze shelves in the oven should be about 3 inches apart. The sample is allowed to remain at rest for 15 minutes in the oven, the door of which is left wide open.

After the lapse of 15 minutes the tray is removed and exposed to the air of the room for two hours, the sample being at some point within that time rubbed upon the tray with the hand, in order to reduce it to a fine and uniform state of division.

Application of the Test.

The cover of the water bath is fitted with the gas regulator which is inserted through the centre hole (No. 4). The thermometer is fixed into hole No. 3. The water in the bath is then heated to 170° Fahr., and the regulator set to maintain that temperature. Twenty grains of the sample to be tested are weighed out, placed in the test-tube, and gently pressed down until the specimen occupies a space of as nearly as possible $1\frac{5}{16}$ inches in a test-tube of the dimensions specified. A test-paper is affixed to the hook of the glass rod or tube, and moistened by touching the upper edge with a drop of distilled water containing 50 per cent. of Price's glycerine. The quantity of liquid used must be only sufficient to moisten about half of the paper. The cork carrying the rod and test-paper is then fixed into the test-tube, and the latter inserted into the bath to a depth of $2\frac{1}{2}$ inches, measured from the cover, the regulator and thermometer being inserted to the same depth. The test-paper is to be kept near the top of the test-tube, but clear of the cork until the tube has been immersed for about five minutes. A ring of moisture will about this time be deposited upon the sides of the test-tube a little above the cover of the bath; the glass rod must then be lowered until the lower margin of the moistened part of the paper is on a level with the bottom of the ring of moisture in the tube; the paper is now closely watched. The test is complete when a very faint brown coloration makes its appearance at the line of boundary between the dry and moist parts of the paper.

The interval of time between the first insertion of the tube containing the sample of gun-cotton in the water at 170° and the first appearance of discoloration on the paper constitutes the test, and this interval of time must be *not less* than 10 minutes, or the sample will not be accepted as properly purified.

B.—GELATINIZED GUN-COTTON PREPARATIONS.*

Twenty-five grains introduced into test-tube* of the dimensions prescribed for the dynamite heat test, then proceed as for Blasting Gelatine, etc., taking the temperature at 180° Fahr., and the time as 15 minutes.

C.—SCHULTZE POWDER, E. C. POWDER, COLLODION COTTON, ETC., ETC.

Sufficient of the sample, without further mechanical division, is dried in the oven as above, and then exposed for two hours to the air. The test as directed above for Compressed Gun-cotton, etc., is then applied, the minimum duration of test being the same, *viz.*, 10 minutes.

D.—PICRIC ACID.

(1) The material shall contain not more than 0·3 part of mineral or non-combustible matter in 100 parts by weight of the material dried at 160° Fahr.

(2) One hundred parts of the dry material shall not contain more than 0·3 part of *total* (free and combined) sulphuric acid, of which not more than 0·1 part shall be *free* sulphuric acid.

(3) Twenty grains of the material shall stand the heat test as laid down for dynamite (*see ante*, p. 3) for not less than 15 minutes.

E.—AMMONITE, BELLITE, ROBURITE, AND EXPLOSIVES OF SIMILAR COMPOSITION.

These are required to stand the same heat test as gun-cotton (*see ante*, p. 5).

III.—Testing Chlorate Mixtures.

No tests have yet been laid down, as at present there are no authorized explosives of this class, but in the event of any being authorized, it would be

* If in a compressed form it should be broken up in the same manner as cordite and ballistite.

necessary to require that they should satisfy the heat test laid down for Gun-cotton, and from time to time the degree of sensitiveness to percussion or friction (especially a glancing blow) should be observed.

APPENDIX.

Exudation and Liquefaction Test for blasting Gelatine, Gelatine Dynamite, and Analogous Preparations.

TEST FOR LIQUEFACTION.

A cylinder of blasting gelatine is to be cut from the cartridge to be tested, the length of the cylinder to be about equal to its diameter and the ends being cut flat.

The cylinder is to be placed on end on a flat surface without any wrapper, and secured by a pin passing vertically through its centre.

In this condition the cylinder is to be exposed for one hundred and forty-four (144) consecutive hours (six days and nights) to a temperature ranging from 85° to 90° Fahr. (inclusive), and during such exposure the cylinder shall not diminish in height by more than one-fourth of its original height, and the upper cut surface shall retain its flatness and the sharpness of its edge.

N.B.—If the blasting gelatine and the gelatine dynamite to be tested be not made up in a cylindrical form, the above test is to be applied with the necessary modifications.

TEST FOR LIABILITY TO EXUDATION.

There shall be no separation from the general mass of the blasting gelatine or gelatine dynamite of a substance of less consistency than the bulk of the remaining portion of the materials under any conditions of storage, transport, or use, or when the material is subjected three times in succession to alternate freezing and thawing, or when subjected to the liquefaction test hereinbefore described.

ESTABLISHMENTS.

The 24th November, 1896.

No. 923.—Mr. H. J. S. Cotton, C.S.I., of the Indian Civil Service, is appointed to be Chief Commissioner of Assam, with effect from the date of assuming charge of that office.

The 25th November, 1896.

No. 931.—Sir E. C. Buck, Kt., C.S.I., is permitted to resign Her Majesty's Indian Civil Service, with effect from the 1st December 1896.

No. 937.—Mr. J. C. Price has been permitted to resign Her Majesty's Indian Civil Service, with effect from the 31st October 1896.

EXAMINATIONS.

The 26th November, 1896.

No. 447.—The undermentioned gentlemen are appointed to be members of the Board of Examiners, Calcutta:—

Dr. A. F. R. Hoernle, Ph. D.
The Hon'ble Nawab Syud Ameer Hussain, C.I.E.

MEDICAL.

The 24th November, 1896.

No. 1043.—Surgeon-Major J. T. W. Leslie, M.B., I.M.S. (Bengal), Secretary to the Director General of the Indian Medical Service, is granted privilege leave for two months and thirty days, with effect from the 8th December 1896 or the subsequent date on which he may be relieved.

No. 1044.—Surgeon-Captain A. E. Roberts, M.B., I.M.S. (Bengal), Civil Surgeon, Aligarh, is appointed to officiate as Secretary to the Director General of the Indian Medical Service, during the absence on privilege leave of Surgeon-Major J. T. W. Leslie, or until further orders.

JUDICIAL.

The 27th November, 1896.

No. 1498.—The services of Lieutenant C. C. Cook, late Officiating Cantonment Magistrate, Peshawar, are replaced at the disposal of His Excellency the Commander-in-Chief, with effect from the 3rd November 1896.

POLICE.

The 24th November, 1896.

No. 674.—Mr. J. C. T. Fairweather is appointed to officiate as an Assistant Superintendent of Police of the 2nd grade in the Hyderabad Assigned Districts.

ECCLESIASTICAL.

The 27th November, 1896.

No. 343.—The services of the Reverend V. W Kinsman, Officiating Chaplain of Nagpur, are placed at the disposal of the Government of Bengal, with effect from the 23rd November 1896 or from the subsequent date on which he may make over charge of his duties at Nagpur.

J. P. HEWETT,

Secretary to the Government of India

DEPARTMENT OF REVENUE AND AGRICULTURE

NOTIFICATIONS.

FORESTS.

Calcutta, the 26th November, 1896.

No. 1043—226-5-*F*.—Privilege leave for two months, under Article 291 of the Civil Service Regulations, is granted to Mr. F. B. Dickinson, Conservator of Forests, Pegu Circle, Lower Burma, with effect from the 8th November, 1896.

Mr. G. F. Prevost, Officiating Conservator, Tenasserim Circle, is placed in charge of the Pegu Circle, in addition to his own duties, during Mr. Dickinson's absence or until further orders.

GEOLOGY AND MINERALS.

The 26th November, 1896.

No. 491.—The following is published for general information :—

No. 901 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC

Calcutta, the 21st November 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government, therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Government of Bengal, Marine Department, No 233, dated the 14th September 1896, forwarding letter from the Vice-Chairman of the Commissioners of the Port of Calcutta, No 1893, dated the 5th September 1896

Letter from the Government of Bengal, Marine Department, No. 322, dated the 28th October 1896.

OBSERVATIONS.—The Commissioners of the Port of Calcutta have applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated the 22nd May 1896, published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Port Commissioners' railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 1st January 1897, the application to the Port Commissioners' railway of the General Rules for open lines of railway in British India administered by the Government, which are cited in the foregoing observations, in supersession of the rules now in force.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Government of Bengal, Marine Department, for information and guidance.

No. 492.—The following is published for general information :—

No. 905 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC

Calcutta, the 25th November 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March

1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government, therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Consulting Engineer to the Government of India for Railways, Lucknow, No. 4200, dated the 29th September 1896, forwarding letter from the Agent of the Bengal and North-Western Railway Company, No. 7022, dated the 24th September 1896.

Letter from the Consulting Engineer to the Government of India for Railways, Lucknow, No 4201, dated the 29th September 1896, forwarding letter from the Agent of the Bengal and North-Western Railway Company, No. 7012, dated the 24th September 1896.

Letter from the Consulting Engineer to the Government of India for Railways, Lucknow, No. 4607, dated the 28th October 1896.

OBSERVATIONS.—The Agent of the Bengal and North-Western Railway Company has applied that the General Rules for working open lines of railway in British India administered by the Government which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated the 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Gogra-Ghat Bhurwal, Turtipur-Benares, Mau-Revilganj and Mau-Azamgarh extensions, and the Gonda-Bulrampur-Tulsipur, Salempur-Barhaj and Syedpur Ghazipur branches, of the Bengal and North-Western railway, and to the Hajipur-Katihar extension of the Tirhoot State railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application to the Gogra-Ghat-Bhurwal, Turtipur-Benares, Mau-Revilganj and Mau Azamgarh extensions, and the Gonda Bulrampur Tulsipur, Salempur-Barhaj and Syedpur-Ghazipur branches of the Bengal and North-Western railway, and to the Hajipur-Katihar extension of the Tirhoot State railway, with effect from such dates as the said extensions and branches may be opened for the public carriage of passengers, animals or goods, of the General Rules for working open lines of railway which may, from time to time, be in force on the main line of the Bengal and North-Western railway.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules referred to—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Lucknow, for information and guidance.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

WM. ROSS,

Publisher, Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 26th November 1896.

NOTIFICATIONS.

No. 3278 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 21st November 1896:—

No. 392 of 1896.—Albert Gallatin Corre, capitalist, of Cincinnati, State of Ohio, United States of America, for an improvement in type-writing machines.

No. 393 of 1896.—Pontin's Patent Butter Box Company, Limited, of 6, Adam street, Adelphi, London, for improvements in and relating to boxes or packages for the transport of butter, fruit or other edible substances.

No. 394 of 1896.—John Dempster Whyte, engineer, of Falcon works, Poland street, Manchester, in the county of Lancaster, for improvements in yarn winding machinery.

No. 395 of 1896.—Charles Thomas Crowden, engineer, of Messrs. Humber and Company, Limited, Beeston, in the county of Nottingham, for improvements in or relating to tubular joints.

No. 396 of 1896.—James Cockle Coxe, sub-engineer, Public Works Department, Bhagulpore, and Alwynn James Cockle Coxe, a partner and manager of Messrs. Coxe & Co., engineers, of Neemuck mahal road, Garden Reach, Calcutta, for automatically opening, shutting and securely fastening the doors of cubicals in jails.

No. 397 of 1896.—Harry Morrison, of 27, Martin's lane, Cannon street, London, E. C., for improvements in chain driving wheels.

No. 398 of 1896.—Harry Morrison, of 27, Martin's lane, Cannon street, London, E. C., for improvements in brakes.

No. 3279 P.—A SPECIFICATION of the undermentioned invention has been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. This and other specifications are open to public inspection from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta,) upon payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 218 of 1896.—Thomas Cooper John Thomas, engineer, of 93, Manor Park road, Harlesden, in the county of Middlesex, and William Mudd Still, manufacturer, of 24, Charles street, Hatton garden, in the city of London, for improvements in gas lamps. (Specification filed 3rd November 1896.)

No. 3280 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 37 of 1888.—Thomas Toussaint Watson, assistant locomotive superintendent, G. I. P. railway, Jubbulpore, for pulling punkahs by a machine to be driven by water, steam or other motive power. (From 8th November 1896 to 7th November 1897.)

No. 95 of 1892.—Frank Joseph Agabeg, mining engineer, of Charanpore, *viâ* Asansol, Bengal, for a new and improved automatic punkah-pulling machine. (From 9th November 1896 to 8th November 1897.)

No. 3281 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 271 of 1891.—Francis Weldon's invention for an improved attachment or device for employment in the construction of temporary structures. (Specification filed 19th August 1892.)

No. 146 of 1892.—Joseph Price and Maunsel Casswell Bannister's invention for improvements in refrigerating or ice-making apparatus. (Specification filed 18th August 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

Straits Settlements, China, and Japan.	4th Dec.	Per Steamer *Chunsang*.
Rangoon and Moulmein . .	4th "	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	1st "	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	28th Nov.	Ditto.
Ditto ditto (Supplemental)	29th "	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	2nd Dec.	Ditto.
Mauritius, Réunion, Mayotte, Nossi Be, Delagoa Bay, Natal, and Cape Colony.	4th "	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Simla, the 20th September, 1893.

A Registry Office for men of all grades out of employ is kept up by the Principal, Thomason College, Roorkee. Officers requiring men are requested to apply to Principal.

J. CLIBBORN, *Major, S.E.*,

Principal, Thomason College.

CIVIL ENGINEERING COLLEGE, SIBPUR.

APPRENTICE DEPARTMENT.

The date for admission to this Department is 1st February, 1897.

Candidates must be at least 15 and not more than 17 years of age.

They must have passed Standard VII of the code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard, so as to reach the Principal not later than the 6th January, 1897. No applications will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding R10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list.

* R5 per mensem.

For natives there will be at least nine vacancies, possibly more on the reduced† fee list. These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

† R2 per mensem.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 16th November, 1896.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10.* The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا *

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هی — يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه *

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هی – يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه *

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانوں مين بهي بکتي هی – ماسواے قيمت مذکورۂ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or,	post free,	R18-12.
½ „	R 9,		„	R9-8.
¼ „	R4-8,		„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন .	১৮৲	বা ডাকমাশুল বিনা	১৮৸৹
½ আধ „ „	৯৲	„	৯৷৹
¼ সিকি „ „	৪৷৹৲	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-0.
„	II.	Masonry	(1891),	R1-4.
„	III.	Carpentry	(1889),	R1-4.
„	IV.	Earthwork	(1892),	R1-4.
„	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-4.
„	VII.	Bridges	(in the Press).	
„	VIII.	Roads	(in the Press).	
„	IX.	Railways	(1891),	R1-4.
„	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. **Drawing** (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics** (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8

O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth and bound (in the Press). R1-12

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5

The Indian Engineer's Pocket Book. 4a

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying. R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M D., F.R S.E. 6a

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq., Executive Engineer. R7-8

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log $\sin^2 \frac{1}{2}$ P (for computing time) 4a.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (in the Press).

Cape's Geometry. R1-4.

" **Mechanics.** R1.

Military Topography. 8a.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. R1

A Vocabulary of Common and Technical Words in English-Urdu. R1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4a.

Short Account of Ganges Canal (English and Urdu). 8a.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each R1-4.

Surveying Field-Books (ruled). R1.

Levelling Field-Books (English Pattern). R1-8.
" " (Canal "). R1-8
" " (College "). R2-0.

P. W. D. Note-Book. R1-4.

" **Measurement Book.** R1-4.

Circular Card-board Protractors, 12 inches (exclusive of packing). R1-8.

MISCELLANEOUS.

Distributary Velocity and Discharge Table. By Capt. Allan Cunningham. 8a.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1-8.

Ditto, ditto, in Urdu. R1-4.

Perspective (fully explained). By Col. A. M. Brandreth, R.E. R1-12.

Map of Roorkee. R1.

Thomason College Calendar for 1891, 1892, 1894,* and 1895,* each R2.
Ditto ditto, for 1896 * R4-12.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old) 8a.

Memo. of Instructions for Road Project. R1.

Project for College Mess (sample Project). R1.

Ferrotype Printing Processes. 8a

Ditto, ditto, 1896. 2a.

Irrigation by Rajbahas, 12a.

Irrigation Tract, No. I. 8a
" " " II. 8a.
" " " III. 8a.

Land Measuring Chain Statement, Area of kucha and pucka Bighas, sheet 4a.

Report of the Ganges Canal Committee (Major Crofton's Project for remodelling the Ganges Canal according to the views of Major-General Sir Arthur Cotton, R.E., K.C.S.I.), 1866. 8a.

Report of the Ganges Canal. By Captain J. Crofton, R E., with Estimates and Plan—
Vol. I, Report, 1865. R1.
Vol. II, Estimates. R1.

Shakesperian Readings, *viz.*:—

1. Taming of the Shrew,
2. Othello,
3. Macbeth,
4. Comedy of Errors,
5. Merchant of Venice,

each 4a.

Graphic Hydraulic Diagrams for channels in earth, giving Discharges and mean Velocities for varying bed widths, depths, and slopes. By R G Kennedy, Executive Engineer. R7 8.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared between 1864 and 1868 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)

Bengal, 51 Plans,
Madras, 99 Plans,
Bombay, 91 Plans,
N.-W. Provinces, 104 Plans,
Oudh, 21 Plans,
Rajputana, 4 Plans,
British Burma, 19 Plans,
Central Provinces,

each 8a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.

Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.

Vol. II, Quarterly Nos. 6 and 7, at R1 each.
" III, " No. 13, R1.
" V, " Nos. 18, 19, 20, and 21, R1 each.
" VI, " Nos. 22, 23, 24, and 25, R1 each.
" VII, " Nos. 26, 27, 28, and 29, R1 each.

Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each

Quarterly Number 41A of Vol. X, at R1 each

Cloth covers for Volumes, 1st and 2nd Series, at As. 8 each.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each

Index to Professional Papers, and loose Papers, 1st and 2nd Series, at 2a each

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depot. Application to be made to the Curator

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.*,
Principal, Thomason College, Roorkee

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870 —

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage R	a.	p.	With postage R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	..			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit —

	For town. R	a.	p.	For mofussil. R	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	3
„ each of the Madras, Bombay, and Allahabad Series, per copy . . .	0	5	3	0	5	9
„ the Calcutta Series. For the year .	7	2	6	8	6	3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance.—

	One page.	*Half page*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
„ three issues . .	„ 55	„ 36	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates·—

	Without postage. R	a.	p.	With postage. R	a	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies R2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FOR SALE BY THE

SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA,

8, HASTINGS STREET, CALCUTTA.

All books published by the Superintendent of Government Printing, India, can be purchased either directly or through the following or any other booksellers :—

AGENTS:

SUPPLEMENT TO

The Gazette of India.

No. 48.} CALCUTTA, SATURDAY, NOVEMBER 28, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 14th, 1896.

During the past week pressure has been steadily high over Northern India and steadily low in the extreme south. At first the difference was small, and the weather was quiet and settled throughout the Indian region, but on the 9th pressure began to give way decidedly in the extreme south, and as the week progressed the pressure difference increased and by the close of the week a well defined, though small, barometric depression was shown passing westward across Ceylon and the extreme south of the Indian Peninsula The gradual intensification of the low pressure area in the south was accompanied with very unsettled weather and moderate to heavy rain in the South Carnatic, but the rainfall at no time extended northward beyond Madras, and the heavy rainfall was almost wholly confined to the coast districts, the inland stations of Trichinopoly, Madura, etc., only receiving light showers. Fairly general showers were reported from Central and Upper Burma on the 14th, but with this exception the whole of the Indian region lying to the north of Madras (station) had fine and quiet weather throughout the week. In consequence of the continued fine weather the temperature has remained high generally, and over Sind, Rajputana, Central India and Gujarat the excess of heat has been very marked.

Daily Summary.—*Sunday, 8th November.*—The barometer had fallen briskly to rapidly in the Punjab, but had changed only slightly elsewhere. Pressure was uniform, and relatively high, over Northern and Central India,

and was relatively low over the south of the Bay, Ceylon and the south of the Peninsula. The winds were northerly over the Bay area, easterly over the centre and west of the Peninsula, and variable elsewhere. The mean temperature was excessive except in Bengal. The rainfall was generally light and local, and was generally confined to Lower Burma and the south of the Peninsula.

Monday, 9th November.—The barometer had given way over the greater part of the country, but except in Sind where the fall was brisk the changes were slight. In Ceylon and the South Carnatic, however, the fall was somewhat greater than in surrounding regions. Pressure was lowest over the south of the Bay and Ceylon. The winds were unchanged generally and the mean temperature remained excessive except in parts of North-East India. The rainfall reported was light and confined to Lower Burma and Ceylon

Tuesday, 10th November.—Pressure had changed only slightly. An area of depression had apparently been developed off the South Carnatic and East Ceylon coasts, but otherwise the distribution was little changed. A north-westerly gale had blown at Negapatam and the northerly wind at Madras was rising, but in other respects the winds were little changed. The heat remained excessive except over parts of the north-east of the Indian region. Moderate local rain had fallen over the south-east of the Peninsula and over Ceylon. The heaviest fall in this area was 2·29" at Cuddalore.

Wednesday, 11th November.—The barometer had fallen almost everywhere The change had been brisk over Burma and Assam and over the South Carnatic. Readings continued to decrease steadily from a high pressure area in the extreme north to a low pressure area in the extreme south. The winds were north-easterly to north-westerly over the Bay, easterly over the centre and west of the Peninsula, and variable elsewhere. The heat remained excessive except at some stations in the north-east of India and in South Madras. The rainfall was still confined to the extreme south, but the fall had become heavier in this locality. The largest amount reported was 4·15" at Negapatam.

Thursday, 12th November.—Pressure had again decreased everywhere, and the fall having been brisk in the north and only slight in the south, the pressure differences had decreased, but this was the only important change in the distribution. The winds were again practically unaltered. In the south of the Peninsula the force was fresh in places. The mean temperature remained excessive almost everywhere. The only important rainfall was reported from the extreme south where the largest amount received was 5·61" at Colombo.

Friday, 13th November.—Pressure had increased in the north and decreased in the south, so that the pressure differences had again increased, and a well defined low pressure area lay to the south of the Bay. Gradients were moderately steep over the Bay. The winds still showed very little change. The mean temperature was low over South Madras and over North-East India, but was excessive elsewhere. A few showers of rain had been received in the extreme north-east, but the only heavy rainfall was reported in the south, where Trincomalee had received 5·08", and Cuddalore and Negapatam over 1 inch.

Saturday, 14th November.—The barometer had fallen briskly at Tinnevelly, but elsewhere the barometric changes were upward. A small cyclonic storm, which had apparently been developed within the low pressure area noticed over the south of the Bay on the 13th, was travelling westward across the south of the Peninsula. The winds were cyclonic in its neighbourhood and were blowing strongly at Colombo. The mean temperature was low over Assam, North Bengal and Upper Burma, as well as in some places over the south of Madras, while in all other places the heat was excessive. Showers had been received over Upper and Central Burma, while the small storm in the south had given moderate to heavy rain over South-East Madras, from Madras (station) to Tinnevelly. The largest amount reported was 4·34" at Tinnevelly.

Temperature.—There has been no change worth noting in temperature during the past week. In those regions where rain was received, *viz.*, part of Burma, of Assam, of North Bengal and of South Madras, the mean temperature has been lower than usual, but in all other places the heat has been excessive.

The following table gives the variations of the mean temperature from the normal in the different provinces of India :-

Province.	November 1896.							Mean variation of week.
	8th.	9th.	10th.	11th.	12th.	13th.	14th.	
Burma	+1·1	+0·9	+0·2	—0·2	+1·1	+1·8	—0·1	+0·7
Bengal and Assam . .	+1·3	+0·7	+1·0	+1·2	+1·6	+1·2	+0·3	+1·0
North-Western Provinces and Oudh	+2·7	+3·6	+3·3	+3·3	+3·0	+2·7	+3·8	+3·2
Punjab	+1·7	+2·8	+4·3	+4·0	+3·2	+3·4	+3·0	+3·2
Bombay	+3·6	+3·8	+3·9	+3·9	+3·9	+4·0	+3·9	+3·9
Central Provinces and Berar	+4·0	+4·2	+4·8	+4·9	+5·0	+5·3	+5·7	+4·8
Central India and Gujarat .	+4·4	+6·0	+6·0	+6·4	+6·0	+5·7	+5·1	+5·7
Sind and Rajputana . .	+4·8	+4·4	+6·1	+7·2	+5·6	+4·0	+5·6	+5·4
Madras	+2·3	+2·6	+2·9	+2·1	+2·5	+2·2	+1·8	+2·3
MEAN FOR WHOLE OF INDIA	+2·9	+3·2	+3·6	+3·6	+3·5	+3·4	+3·2	+3·4

On each day of the week the mean temperature of the whole country was excessive, the abnormal excess on most days being more than 3°. The provincial variations show that the mean temperature was about normal over Burma, but was excessive in all other places. In Central India, Gujarat, Sind and Rajputana, the heat was more than 5° greater than usual for the week, and on one day, the 11th, in Sind and Rajputana the abnormal excess was as much as 7°·2.

Rain.—During the week under review the only considerable rainfall has occurred over the south-east of the Peninsula. Showers have, at different times, been received in Burma, Assam, part of Bengal, Ganjam and the south-west of the Peninsula, but in these localities the amounts received were generally small and considerably less than those reported from the south-east of the Peninsula. The rainfall in Madras was due to a depression which formed apparently over the south of the Bay within a large low pressure area. This depression crossed Ceylon and the south of the Peninsula on the 14th, but, previous to the actual appearance of the depression, the barometer fell, the weather became unsettled and rainy, and the wind rose along the South Carnatic coast. Heavy rain, in fact, commenced in this region as early as November 9th. The concluding table gives the rainfall data. Rain was received during the week in seventeen of the rainfall divisions, but of these seventeen divisions, no less than nine had an average actual fall of less than one-tenth of an inch for the whole week. The rainfall in these divisions may hence be neglected, so that there were only eight divisions which received effective rain during the week. These eight divisions were Lower and Upper Burma, Arakan, Assam (Surma), the Bengal Hills, the Malabar coast, the East coast (south) and Madras (south). Within these divisions the average actual rainfall varied from 3"·78" in the East coast (south) to 0"·21" in Upper Burma. In all other parts of India the fall was actually or practically *nil*. The showery period in Lower and Central Burma occurred at the commencement, and in Upper Burma, at the close, of the week. In Assam the showers were spread out over the whole week, and in Central and North Bengal and the Bengal Hills they occurred about the middle of the week. In Travancore there were light showers on nearly all days, while in the South Carnatic the rainfall, as mentioned above, commenced on the 10th. The second column of the table shows that there is usually no rain during the week under review in Bengal, the Gangetic Plain, and Upper and Central India, but that moderate rain generally falls in parts of Burma and of the south of the Peninsula. The third column shows that the week's fall has been 2·6" in excess of the normal over the East coast (south), half an inch in excess in Assam (Surma) and Madras (south), and a quarter of an inch in excess in Lower Burma. Elsewhere the rainfall has generally been in defect, or where it has been in excess, the difference from the normal is unimportant.

The three concluding columns of the table show the state of the rainfall for the four weeks October 18th to November 14th. The fall for that period has been about normal in Tenasserim, Lower and Central Burma, Madras (south) and the North Punjab, but has been less than usual in all other divisions, while absolutely no rain has fallen over a large part of the country.

The following considerable totals for the week ending November 14th are reported from the extreme south: Poonamalle (Chingleput), 5·77"; Chidambaram (South Arcot), 15·34"; Tiruttaraippundi (Tanjore), 12·19" and Palamcotta (Tinnevelly), 5·51".

Province.	Division.	Rainfall data for week ending November 14th, 1896. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 18th October to 14th November 1896. Average actual rainfall of season to date.	Average normal rainfall, 18th Oct. to 14th Nov.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

Simla, the 19th November 1896.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st November.*—Light showers in parts of the Circars and Deccan with fair falls in parts of Cuddapah. Heavy rain throughout the Carnatic and Southern districts and in many parts of the Central districts; moderate rain in the remainder of the Central districts and on the West Coast at the end of week There has not been much change in the weather from the previous week but subsequently good rain has fallen over greater parts of the Deccan districts and some parts of the Circars, the effect of which has yet to be seen. Heavy rain in the Carnatic continues. Except in the Circars and Deccan agricultural operations were actively progressing and the standing crops thriving and pasture sufficient. Until the rain came the outlook in the Circars and Deccan was growing worse; now cattle at least will find grazing, and sowing of dry land in parts of the latter districts with the late crops will be possible. No change in Ganjam. Prices are considerably cheaper in the greater part of the Deccan, Carnatic and Central districts, but dearer in the Circars, at Madras and in the Southern and West Coast districts. Since the end of the week the fall in the Deccan districts has continued and rates are cheaper elsewhere. Relief workers, 21st November, 34,115; weavers relieved, 1,247; and 1,181 fed at kitchens; all in the Deccan districts.

Bombay.—*For week ending 25th November.*—Rain fell during the week in twenty districts. More rain is urgently wanted generally for the late sowings in six districts. The standing crops have withered or are withering in three districts and have been damaged by locusts in parts of the Karachi and Hyderabad districts, and by insects in two talukas of Ahmednagar. Preparations for the late crops or sowing are progressing in eighteen, and reaping of the early crops in eight, districts. Cotton-picking continues in Khandesh. Fodder is insufficient in nine districts. Agricultural stock are healthy except in parts of nine districts. Prices are rising in eight districts, stationary in five, and falling in five. The number on test works in Nasik was 3,127; on two test works in Satara, 242; on two in Dharwar, 1,780. The number on two relief works in Bijapur was 2,119, on six in Ahmednagar, 4,273 The opening of relief works has been ordered in Khandesh. The number on gratuitous relief in Satara 23.

Bengal.—*For week ending 23rd November.*—Some rain has fallen in Behar and Chota Nagpur, but there has been practically none elsewhere in the Lower Provinces. Patna has had a fall of ·72 inch. The light rainfall is reported to have improved the prospects of the spring crops in Patna, Gaya, Shahabad, Saran, Darbhanga, Lohardaga and Singhbhum. Except in these districts and in Northern Bengal, the sowing of the spring crops and the germination of seed already sown are still retarded for want of rain. The harvesting of winter rice has begun. As previously reported, this crop has seriously suffered on high lands, but on low lands it is expected to yield a fair outturn. The insects which had been infesting the rice crop in Orissa are said to still exist in Banki. Locusts and insects have appeared in places in Midnapore, Nadia and Malda. Prices have shown a slight tendency to fall in a few districts. The numbers employed on relief works on Saturday, the 21st, were:—Nadia 1,009; Champaran 1,994 (men 1,138, women 425 and children 431); Shahabad 359 (men 153, women 133 and children 73). In Patna, it is said, the works have not been largely attended.

North-Western Provinces and Oudh.—*For week ending 25th November.*—Some rain. The area of the North-Western Provinces and Oudh, exclusive of the Kumaun Division, is about 93,000 square miles. In 12,000 square miles with a population of about 6 millions the autumn harvest was very good; in 25,000 square miles with a population of 12½ millions the autumn harvest varied from one-half to two-thirds of an average harvest; in 31,000 square miles with a population of 13½ millions the autumn harvest varied from one-third to one-half of an average harvest; in 25,000 square miles with a population of about 13½ millions the autumn harvest did not exceed one-third of the average, while in large tracts it was practically a complete failure. The failure was greatest in those

districts in which rice was most largely sown. The amount of rainfall of the last few days is not recorded in all the district returns, but, so far as can be judged from the available information, good showers fell in most of the districts which were in greatest need of rain. Some distressed districts, however, have had no rain. The rain has come too late for the autumn crops except for sugarcane and *arhar*, and it was not generally sufficient for ploughing, but it has improved the prospects of the ensuing spring crops as seed will now be sown in much land that had been previously prepared but not sown owing to lack of moisture in the soil. A flight of locusts passed over the district of Unao and caused slight damage to the crops. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, the 21st November, were:—Banda, 43,561; Hamirpur, 6,846; Allahabad, 9,035; Jhansi, 7,770; Jalaun, 12,550; Rae Bareli, 12,957; Sitapur, 3,814; Hardoi, 8,644; Jaunpur 6,595; total 1,11,772; of these 16,478 were dependants gratuitously relieved on the works and 19,119 were gratuitously relieved under other provisions of the Famine Code. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices are still high, but show a tendency to fall in places.

Punjab.—*For week ending 25th November.*—Rain has fallen in parts of the Hissar, Umballa, Rohtak and Gurgaon districts. The autumn crops have been cut and stored. Cotton-picking is going on and sugarcane is being pressed. Sowings of the spring crops are in progress; wheat is obtained with difficulty for sowing purposes in Lahore. Very little area of dry land has been sown, but owing to the recent rain at Gurgaon sowings have commenced on dry lands. Rain is badly needed throughout the province. The water-supply is deficient in Hissar. The outturn of the autumn crops is reported to be average on irrigated and poor on unirrigated lands. The prospects of the spring crops are said to be average to poor. The stock of food-grains is insufficient in Hissar, Amritsar, Rawalpindi, and in parts of Jullundur, Ferozepore and Shahpur; it is average in Peshawar. It is reported that the grain stock is sufficient with Sahakur grain dealers at Lahore, but they do not sell freely to the poorer classes. Locusts appeared in the Leiah tahsil of the Dera Ismail Khan district and damaged the standing *bajra* (Bulrush, millet), cotton and rape seed crops to some extent. Cattle are in bad condition in most districts owing to insufficiency of fodder and overwork. Fodder is scarce in all districts, except Umballa, Peshawar and Rohtak. The aggregate number of persons employed on relief works in Gujrat on Saturday, the 21st November, was 9,228 including non-working children. Famine work has also commenced in Hissar. Prices are rising in Peshawar and Rohtak and are abnormally high elsewhere. Wheat is selling from 7 to 9 seers per rupee, *bajra* (Bulrush, millet) from 8 to 9¼ seers, gram from 9 to 10 seers, maize from 8 to 11 seers, and rice from 6 to 8 seers.

Central Provinces.—*For week ending 25th November.*—Weather cloudy at the end of week Fair rain has fallen in most districts, but Saugor, Hoshangabad, and Nimar received only very light and partial showers; Chanda and Raipur have had the heaviest falls; Wardha and Bhandara about 1½ inches, Seoni and Balaghat one inch; other districts less. The rain has improved the autumn crops in Wardha but it comes too late to appreciably ameliorate the prospects of these crops throughout the provinces. The bulk of the rice crop is now reaped in Wardha, Chanda, and Nagpur. The yield of the autumn crops ranges between six and twelve annas. The spring crops which have germinated are much benefited. Sowings have been resumed in Wardha, Chanda, and Jubbulpur. More gram may be put down in Balaghat, Seoni, and Raipur. Prospects continue gloomy in Saugor and Hoshangabad where the young seedlings are dying. In Damoh and Jubbulpur where seven-twelfths of the normal area has germinated the outlook is better. Large areas still remain unsown in Narsinghpur, Seoni, and Raipur. In the Nagpur country, excluding Balaghat, prospects have materially improved. Relief works have been started in Nagpur and Wardha for the wandering poor. Prices have risen in Nimar owing to export demand; elsewhere prices are steady.

Burma.—*For week ending 21st November.*—In Lower Burma the crops are good everywhere, except in parts of Akyab and Prome, where rain has been insufficient. In Upper Burma no rain fell except in the Southern Shan States. Unirrigated paddy has failed generally, and the miscellaneous crops will yield a very poor outturn in large tracts of Pakokku, Minbu, Magwe, Meiktila, Yamethin and Myingyan. The price of paddy has fallen heavily in Tharrawaddy and slightly in Myaungmya, and has risen largely in the Southern Shan States; elsewhere prices are stationary. The numbers on relief works were 15,128; and on gratuitous relief, 1,445.

Assam.—*For week ending 24th November.*—More rain is wanted for the cold weather crops in Cachar. A hailstorm is reported to have done some injury to the standing crops in parts of Sylhet. The prospects of the crops are not favourable in parts of the lower districts of the Assam valley. Reaping of late rice has commenced. Sowing of the mustard crop continues. The condition of tea is good. Prices of food-grains are high. Fodder is sufficient except in the Khasi hills and parts of Cachar. Water is sufficient.

Mysore and Coorg.—*For week ending 25th November.*—MYSORE: Rain fell throughout the State, which has benefited the standing crops. Prices have fallen.

COORG: Rainfall good. The rice crop is maturing. Coffee-picking has commenced. Water and fodder for cattle are sufficient. Prices of food-grains are rising.

Berar and Hyderâbad.—*For week ending 25th November.*—BERAR: The weather is cool with light showers of rain during the week at Akola and Ellichpur. Harvesting of the monsoon crops has commenced in places. Cotton-picking is in progress. The winter crops are above ground in all districts, but are in poor condition through insufficient moisture. Sowings continue in Akola, Buldana and Ellichpur. Insufficiency of fodder and water is reported in most districts. Prices of food-grains continue high.

HYDERABAD: No rain during the week. The autumn crop has been harvested in the Hyderabad, Aurangabad and Gulburga divisions, but the crop is very poor. The irrigated rice crop is being harvested in the Hyderabad and Warangal divisions, but the crop has withered in most places in the Gulburga division. The water-supply is decreasing. Prices are :—wheat 6¾, coarse rice 6, white jowar 9½, yellow jowar 10⅔, gram 7¾, and *tur* (*Cajanus indicus*) 10½ seers per current rupee.

Central India.—*For week ending 25th November.*—Rain has fallen in all Agencies during the week, but more rain is still wanted. Agricultural operations are at a stand-still in Baghelkhand and Gwalior, but are in progress elsewhere. The autumn crops have been damaged for want of rain everywhere. Agricultural stock are in fairly good condition in Bhopal, Bundelkhand, Malwa and Bhopawar, but are indifferent in Baghelkhand and in most parts of Gwalior. Pasturage is fair in Bhopal, Malwa and Bhopawar; insufficient and indifferent elsewhere. Prices are still above normal in all Agencies. Opium is being sown in Bhopal and Bhopawar and the crop is in fair condition in Malwa. The numbers employed on relief works were:—Bundelkhand 1,012; Baghelkhand 717; on the Goona-Bara railway 13,105. The numbers on gratuitous relief were :—Bundelkhand 1,287 and Baghelkhand 1,224. Famine relief works' figures have not been reported for other districts of Gwalior.

Rajputana.—*For week ending 25th November.*—Rainfall 2·47 inches at Abu, 1·21 in Serohi, 1·50 in Kishangarh, above ½ inch in Kotah and Jeypore, ½ inch in Marwar and Ulwar, slight rain in Pertabgurh, Meywar, Jhallawar, Deoli, Tonk, Shahpura and Ajmere. Agricultural operations are satisfactory except in Jaisalmere. The crops are generally fair. Prospects of the spring crop are gloomy in Kerauli. Wheat and opium have been partially damaged in two tehsils of Jhallawar. The unirrigated crops have been damaged in Ajmere for want of rain. Agricultural stock are generally in good condition. Pasturage and fodder are sufficient except in Tonk and Ulwar and parts of Meywar and Jeypore. Fodder is failing in Dholepur and Bhurtpore. Prices are high in Serohi, Marwar, Kotah, Haraoti, Bikanir, Jaisulmere, but are falling in Pertabgurh, Meywar and Jhallawar and are steady elsewhere. Test relief works have been started in Bhurtpore. The aggregate number of persons on relief works was:—Kotah 600; Dholepur 3,602; Bikanir 17,414; Jaisalmere 246. The numbers on gratuitous relief were :—Bikanir 4,154.

Kashmir—KASHMIR VALLEY.—*For week ending 24th November.*—The weather is fine. Spring sowings are still in progress. Prices are a little below normal.

JAMMU PROVINCE.—*For week ending 25th November.*—No rain. The autumn crops are suffering. Fodder is scanty. Prices are rising.

Nepal.—*For week ending 21st November.*—The days are warmer than usual and the mornings foggy. Wheat is being sown.

DENZIL IBBETSON,
Offg. Secy. to the Govt. of India.

(a) Includes the Bhopal-Itarsi railway.
(b) Includes the Godhra-Rutlam Nagdá railway.
(c) Includes the Guntakal-Mysore frontier section.
(d) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(e) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(f) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(g) Includes the Wardha Coal, the Dhond-Manmad, the Khámgaon, and the Amraoti railways.
(h) Total earnings from 11th to 16th November 1895.
(i) Total earnings from 15th July to 14th November 1896.
(j) Includes the Mysore-Naujangud and the Yesvantpur-Mysore frontier sections.
(k) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(l) Total earnings from 1st August to 16th November 1895.

G. A. ANDERSON,
Under Secretary.

CALCUTTA, *the 26th November 1896.*

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

No. XXXI of 1896-97.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Earnings from 1st April 1896*, audited figures have been used as far as possible.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE THREE MONTHS ENDING WITH THE 31st MARCH 1896.

No 469 R. Stat, dated Calcutta, the 25th November 1896.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Government of India order No. 10 R. Stat., dated the 16th January 1896.

Read also—

The following note by the Director General of Railways, No. 424 Stat., dated the 9th November 1896, with abstract returns of accidents to trains, etc., on the open lines of railway in India for the three months ending with the 31st March 1896.

I.—Accidents to trains, rolling-stock, permanent-way, etc.

Accidents to trains, rolling-stock, permanent-way, etc., during the three months ending with the 31st March 1896, as shown under abstract No. 4, on pages 2098 and 2099 of the accompanying returns, caused the death of 3 and injury to 59 persons. The number of deaths was below and the number injured very much in excess of the figure reported during the previous corresponding quarter, while the number of accidents showed a very large increase, as will be seen from the following table, which compares the total number of accidents and the casualties resulting therefrom with the previous corresponding quarter under the heads "Standard gauge," "Metre gauge" and "Special gauges." The large increase in the number of persons injured was mainly due to the occurrence of an accident at Chooadangah on the Eastern Bengal (state) railway, standard gauge, in which 32 passengers were injured.

The failure of machinery, springs, etc., of engines	...	+33	+33	+106·45
Fire in trains	...	—14	—14	—41·17

It will be observed from the foregoing, that the principal increases on the standard gauge lines occurred under "Trains or engines travelling in the wrong direction through points," 18 accidents or 150·00 per cent.; under "Trains running over cattle on the line," 49 accidents or 28·99 per cent.; and under "Fire in trains," 26 accidents or 130·00 per cent.; and on the metre gauge railways under "Trains running over cattle on the line," 55 accidents or 31·07 per cent.; and under "The failure of machinery, springs, etc., of engines," 33 accidents or 103·45 per cent.

4. The number of cattle accidents was largest on the South Indian railway, *viz.*, 66; next to that line comes the Southern Mahratta railway with 53, then the North Western (state) railway with 37, the East Indian, the Eastern Bengal (state), standard gauge, and the Madras railways with 36 on each, the Rajputana-Malwa railway with 29, the Eastern Bengal (state) railway, metre gauge, with 19, and the Assam-Bengal railway with 17.

In relation to the train-mileage run, the number was highest on the Bengal Dooars railway, which gave an average of 1 accident in 3,990 train-miles run; the Assam-Bengal railway coming next with an average of 1 in 5,346; then the Jodhpore-Bickaneer, the Dibru-Sadiya and the South Indian railways, and the Eastern Bengal (state) railway, standard gauge section, with averages of 1 in 6·253, 1 in 7,907, 1 in 9,527, and 1 in 13,072, respectively.

The lowest number recorded relatively to the train-mileage run was on the Great Indian Peninsula railway, *viz.*, 1 in 189,686 train-miles, the Bengal and North-Western railway coming next with 1 in 96,657, then the Bombay, Baroda and Central India railway with 1 in 90,074, the East Indian railway with 1 in 86,234, the Oudh and Rohilkhand (state) railway with 1 in 61,816 and the North Western (state) railway with 1 in 61,126.

5. Under the head "Trains or engines travelling in the wrong direction through points," the largest number, *viz.*, 19, occurred on the Great Indian Peninsula railway; and under "Fire in trains," the largest number occurred on the Great Indian Peninsula and Madras railways, *viz.*, 14 accidents on each; next to these lines comes the East Indian railway with 13 accidents. Under the head "The failure of machinery, springs etc., of engines," although the largest number of accidents occurred on the East Indian railway, standard gauge, *viz.*, 27, the increase was confined to metre gauge lines, the largest number on these railways having occurred on the Southern Mahratta railway, *viz.*, 19.

In relation to the train-mileage run, the total number of accidents was highest on the Jorhát (state) railway, which gave an average of 1 accident in 979 train-miles; next to that line comes the Bengal Dooars railway with an average of 1 in 2,394, then the Dibru-Sadiya, the Assam-Bengal, the Jodhpore-Bickaneer, and the Rohilkund and Kumaon (including the Lucknow-Bareilly section) railways with averages of 1 in 3,163, 1 in 3,787, 1 in 5,517 and 1 in 5,749, respectively.

The lowest number recorded relatively to the train-mileage run was on the Bengal-Nágpur railway, *viz.*, 1 in 30,296 train-miles, the Oudh and Rohilkhand (state) railway coming next with 1 in 29,564, then the East Indian railway with 1 in 25,870, the Great Indian Peninsula railway with 1 in 25,404, the Indian Midland railway with 1 in 24,299 and the Nizam's Guaranteed State railway with 1 in 21,873.

II—Accidents from other causes not involving accidents to trains, etc.

6. In addition to those included in Division I, the casualties to passengers, servants in the employ of railways or of contractors, and to others from causes not involving accidents to trains (which are detailed in Abstract No. 2) are compared,

separately, for each gauge, with the previous corresponding period in the table below :—

Gauges.	Three months ending with the 31st March 1896.								Previous corresponding period.							
	Passengers		Servants.		Others.		Total.		Passengers.		Servants.		Others.		Total.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	11	27	20	42	74	16	114	84	17	24	20	70	72	16	109	110
Metre	6	7	14	19	34	13	54	39	3	13	13	19	23	7	39	39
Special	...	...	...	1	...	...	.	1	.	1	.	2	1	..	1	3
Total	17	34	43	61	108	29	168	124	20	38	33	91	96	23	149	152

It will be seen from the foregoing table that, except under "Servants killed" and "Others," the number of persons killed and injured has been less than that reported during the previous corresponding period.

III.—*Statistical results.*

7. The following table gives certain statistical results for the period under review, comparing the number of passengers killed and injured by accidents to trains and from all causes with the number carried and the number of passenger units carried one mile. Comparative results for the previous corresponding period are also given :—

Particulars		Three months ending with the 31st March 1896.				Previous corresponding period.			
		Standard	Metre.	Special.	Total.	Standard	Metre.	Special.	Total.
Mean mileage worked	Miles	11,347	7,987	257	19,601	10 013	7,661	267	18,841
Train-mileage run	Miles	11,996,296	5,033,630	124,456	17,154,382	11,952,951	5,199,357	107,789	17,260,097
Number of passengers carried	No	23,631,874	13,651,361	249,250	37,532,485	20,795,079	13,094,210	214,116	34,103,405
Number of passenger units carried one mile	No.	1,157,005,849	543,115,328	6,544,509	1,706,665,686	1,009,824,502	510,826,166	5,500,760	1,525,841,428

Number of passengers killed by accidents to trains	No.	..	...	...	..	1	...		1
Proportion of above to number carried	No.	,	...	...	...	1 in 20,795,079	...	.	1 in 34,103,405
Number of passengers injured by accidents to trains	No.	36	2	...	38	4	1	...	5
Proportion of above to number carried	No.	1 in 656,441	1 in 6,825,681	..	1 in 987,697	1 in 5,198,770	1 in 13,094,210	..	1 in 6,820,681
Number of passengers killed from all causes	No.	11	6	...	17	18	3	...	21
Proportion of above to number carried	No.	1 in 2,148,352	1 in 2,275,227	...	1 in 2,207,793	1 in 1,155,282	1 in 4,364,737	...	1 in 1,623,972
Number of passengers injured from all causes	No.	63	9	,	72	28	14	1	43
Proportion of above to number carried	No.	1 in 375,109	1 in 1,516,818	...	1 in 521,285	1 in 742,681	1 in 935,301	1 in 214,116	1 in 793,102
Number of passengers killed and injured from all causes	No.	74	15	..	89	46	17	1	64
Proportion of above to number carred	No.	1 in 319,350	1 in 910,091	...	1 in 421,713	1 in 452,067	1 in 770,249	1 in 214,116	1 in 532,866
Proportion of passengers killed and injured from all causes to number of passenger units carried one mile	No.	1 in 15,635,214	1 in 36,207,689	..	1 in 19,176,019	1 in 21,952,707	1 in 30,048,598	1 in 5,500,760	1 in 23,847,528

It will be seen that the results under the several heads were generally unfavourable. The large increase in the number of passengers injured by accidents to trains, etc., was due chiefly to 32 passengers having been injured in one accident on the Eastern Bengal (state) railway, standard gauge.

IV.—Number of persons killed and injured by accidents to trains, rolling-stock, etc., during the first quarter of 1896.

8. The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred :—

RAILWAY.	Number of accidents reported during the 1st quarter of 1896	PASSENGERS AND OTHERS		SERVANTS		TOTAL.	
		Killed	Injured	Killed	Injured	Killed	Injured

TOTAL .	19	3	40	...	19	3	59
CORRESPONDING QUARTER OF 1895 .	14	3	8	5	6	8	14

The cause of the large increase in the total number of persons injured during the first quarter of 1896, as compared with the previous corresponding quarter, is given in paragraph 1 of this note.

9. A brief description of accidents referred to in the previous paragraph is given below:—

East Indian railway.—On the 1st February 1896, during shunting operations at Mokameh, a crane and a wagon collided with certain vehicles standing on the line, owing to the pointsman having wrongly set the points. A servant was slightly injured.

North-Western (state) railway.—On the 3rd January 1896, a collision took place between the up Bombay mail and the two engines (one off going and another on going) of a down train at Phillour. The accident was due to the driver of the mail train having disregarded signals There was considerable damage to rolling-stock, and one passenger and six railway servants were injured.

On the 17th February 1896, a collision took place between a down goods and an up stone train at Chilianwálla station, owing to the driver of the former train having disregarded signals. There was some damage done to rolling-stock, and the guard and the driver of the goods train were slightly injured.

Oudh and Rohilkhand (state) railway—On the 18th January 1896, a down mail train ran into a bullock cart at the level-crossing gate No. 51 on the Aligarh Branch. The gateman was injured.

On the 21st February 1896, at Sháhjahánpur, the straw verandah of the menials' quarters belonging to a pointsman caught fire, and the wife and the child of the pointsman were slightly burned.

On the 23rd February 1896, the engine of a down passenger train ran through a level crossing gate at mile 10 near Benares Cantonment. The gate-keeper was seriously injured.

Eastern Bengal (state) railway.—On the 30th January 1896, a collision took place between a down passenger and an up goods train at mile $\frac{33}{3}$ between Básúldánga and Netra stations on the southern section of the line. The accident was owing to the carelessness of the assistant station master, Nazra. There was some damage done to permanent-way and rolling-stock and a passenger was slightly injured.

On the 8th February 1896, a collision took place between an up goods and an up mixed train outside the facing points at Chooadangah, owing to the carelessness of the driver of the up goods train in having arrived at the station at too high a speed. Thirty-two passengers were injured.

Great Indian Peninsula railway.—On the 15th January 1896, during shunting at Igatpuri, an engine collided with certain wagons and damaged them. The fireman was injured.

On the 12th February 1896, a collision took place between a down passenger and an up tranship train at Kopargaon station on the Dhond-Manmád railway, owing to the points being wrongly set. Two passengers and two railway servants were injured. There was also considerable damage done to the rolling-stock and permanent-way.

On the 12th February 1896, the engine of a down goods train failed at mile $477\frac{3}{4}$ near Pownar, owing the bottom gauge column of the engine breaking off. The driver was severely scalded by the escaping steam.

On the 21st March 1896, the station master's hut at Chandni took fire from the gangmen's huts and was partially destroyed. The fire in the gangmen's huts was caused by a gangman's son playing with matches. A child was burnt.

Bombay, Baroda and Central India railway.—On the 9th January 1896, an engine while being taken into the turn-table siding at Ahmedabad collided with a rake of wagons and an engine left unprotected with red lights The driver of the former engine was injured.

Rajputana-Malwa railway—On the 2nd January 1896, the engine of a down goods train failed at Gursahaiganj, owing to one of the boiler tubes bursting. A man travelling on the engine was scalded.

On the 10th February 1896, the engine of a down mixed mail train ran into a bullock cart at the level-crossing at mile $\frac{907}{9}$ between Indore and Rao The cartman was killed.

Assam-Bengal railway.—On the 8th February 1896, whilst hand shunting was being carried on at Sitakund station, some empty goods wagons collided with some third class bogie carriages forming part of an up mixed train. A passenger was slightly injured.

Burma (state) railway.—On the 21st January 1896, a goods train ran into a bullock cart at the level crossing gate at mile $\frac{73}{19}$ on the Irrawaddy section. The cartman was killed, and the gateman slightly injured.

On the 16th February 1896, an engine standing in steam in the locomotive yard at Katha, was run into a dead end buffer, owing to the engine lighter tampering with the regulator of the engine. A railway servant was injured.

Darjeeling-Himalayan railway.—On the 13th March 1896, an up goods train ran into a trolly between miles 10 and 11. A railway servant was injured.

ORDER.—Ordered that the above note, with the abstract returns and appendices thereto, be communicated, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that the above note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

G. A. ANDERSON,
Offg. Under Secretary.

Documents accompanying.

Abstract returns of accidents for the three months ending with the 31st March, 1896.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the three months ending with the 31st March 1896, as KILLED OR INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

ANNUAL REPORT ON THE OPERATIONS OF THE POSTAL LIFE INSURANCE AND MONTHLY ALLOWANCE SCHEMES FOR THE YEAR 1895-96.

No. 5020 P., dated Calcutta, the 27th November 1896.

ORDER—By the Government of India, Finance and Commerce Department.

The following papers relating to the operations of the Postal Life Insurance and Monthly Allowance schemes during the year 1895-96 are published for general information:—

J. F. FINLAY,
Secretary to the Government of India.

No. 5458, dated Calcutta, the 29th October 1896.

From—The Director-General of the Post Office of India,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit the Annual Report on the operations of the Postal Life Insurance and Monthly Allowance schemes for the year 1895-96.

2. In the year under report, as in the preceding one, no advantage was taken by the women employed by the Post Office and Telegraph Departments of the extension of the benefits of the two schemes to them.

3. During the year 195 new policies were granted of the aggregate value of R2,52,550, against 234 issued in the previous year for sums amounting in all to R3,26,950. Eight applications for Life Insurance were refused on account of unfavourable medical reports on the lives of the applicants. Of the 195 persons who insured their lives, 46 were servants of the Telegraph Department and the total amount of the policies issued in their favour was R96,050: the remaining 149 persons were postal servants and the aggregate amount of their policies was R1,56,500. Compared with the results of the previous year there was a decrease of 20 in the number and of R46,300 in the gross amount of new policies issued in favour of Post Office servants, and a decrease of 19 in the number and of R28,100 in the gross amount of new policies issued in favour of servants of the Telegraph Department.

4. The total sum realised on account of premia on both old and new policies amounted during the year to R1,01,215 as compared with R95,520 in the previous year. Claims to the extent of R43,074 were discharged as compared with payments amounting to R21,633 during the preceding year, and 26 policies representing a gross assurance of R22,850 as compared with 26 policies

representing R33,450 in 1894-95 either lapsed, or were surrendered or cancelled. The general results of the past two years are summarised below:—

Life Insurance.	Up to 31st March 1895.	Up to 31st March 1896.
Number of lives insured	2,257	2,452
	R	R
Amount received in premia	5,72,296	6,73,511
" of insurance	31,50,275	34,02,825
" of claims met	1,56,153	1,99,227

5. The active policies existing on the 31st March 1896 were 2,073 representing an aggregate insurance of R29,16,550 as detailed below:—

		R	
	1 for	700	—Effected by a single payment of premium.
	674 "	10,05,450	—Effected by payment of monthly premia up to the age of 50.
	751 "	10,08,400	—Effected by monthly premia up to the age of 55.
	647 "	9,02,000	—Effected by monthly premia during life.
TOTAL	2,073	29,16,550	

6. In this year, as in the preceding nine years, no insurance was effected by a single payment. Of the 195 policies actually issued in the year, 127 policies, representing a total insurance of R1,68,650, are subject to the payment of premia during a fixed period, while 68 policies, representing a total insurance of R83,900, are subject to payment of premia during life. The 149 policies taken out by servants of the Post Office may be classified territorially as below:—

50 issued in Lower Bengal and Assam.
16 " " Bombay.
22 " " Madras.
20 " " Burma.
41 " " Other Postal Circles.

149

7. The following statement shows the distribution of Life Insurance policies among the various grades of Post Office officials:—

Grades in Post Office.	Number of officials on 31st March 1896.	Number of Life Insurance Policies Held — On 31st March 1895.	On 31st March 1896.	Percentage of lives insured.
Superintendents and inspectors	429	111	113	26·34
Postmasters, sub and branch postmasters	5,077	381	403	7·93
Schoolmasters, etc.	4,741	5	5	·10
Clerks	7,135	774	844	11·83
Postmen and village postmen	18,600	117	119	·64
Road establishment	12,370	30	33	·26
Signallers, etc.	1,565	117	129	8·24
TOTAL	49,917	1,535*	1,646†	3·29

* Exclusive of 388 policies held by servants of Telegraph Department.
† Exclusive of 427 " " " " "

Out of a total of 49,917 servants of all grades in the Department on the 31st March 1896, 1,646 or 3·29 per cent. had insured their lives, and as in previous years the percentage was highest in the grades of supervising officers. The five policies held by schoolmasters and other extraneous agents were granted several years ago before it was decided that they were not entitled to the benefits of the scheme.

8. As in 1894-95, the scheme of monthly allowances made practically no advance, only one new contract for an immediate monthly allowance being entered into. There were thus at the end of the year only eight contracts for monthly allowances, the total of the monthly allowances contracted for being R123-8.

9. The following figures exhibit the financial results of both schemes to the end of the year under report:—

Life Insurance.	R a. p.	R a. p.	R a. p.
Balance including interest on 31st March 1895		4,81,132 2 11	
Amount of premia received during 1895-96	1,01,215 0 3		
Deduct—Amount of claims met	43,074 3 11		
		58,140 12 4	
Interest for 1895-96		17,830 4 1	
Balance on 31st March 1896			5,57,103 3 4
Monthly Allowances.			
Balance including interest on 31st March 1895		14,315 4 5	
Amount of subcription received during 1895-96	379 4 8		
Deduct—Claims met	1,182 0 0		
		—802 11 4	
Interest for 1895-96		486 4 6	
Balance on 31st March 1896			13,998 13 7
Total balance on 31st March 1896			5,71,102 0 11

	Number.	Amount. R	a.	p.	Remarks
Liabilities.					
Life policies in existence	2,073	29,16,550	0	0	Payment in a lump sum.
Monthly allowance contracts in existence.					
Immediate	6	68	8	0	Of R5, R9-8, R6, R40 and two of R4 each, the first commencing from March 1884, the second from April 1892, the third from March 1895, the fourth from September 1893, the fifth from June 1891, and the sixth from July 1895.
Deferred	2	55	0	0	One of R5 and the other of R50, the first to commence from October 1907, and the second commenced from September 1893

10. The subjoined statement gives the ages at which policies were surrendered, or lapsed, or were dischargad by payment on death of the person insured, up to the close of the year under report, and has been prepared in its present form with special reference to the request of the Actuary of the India Office in his memorandum, dated the 20th July 1892 :—

Ages at the time of the surrender, lapse, or discharge of the policy.	Surrendered at ages mentioned in the first column.		Lapsed at the ages mentioned in the first column.		Discharged by payment on death at the ages mentioned in the first column.		Total.		Number of policies obtained at the ages mentioned in the first column.			Remarks.

11. The percentage of the surplus of assets over liabilities of the fund, according to the valuations prepared by the Actuary of the India Office, had risen from 3·6 in 1887-88 to 8·3 last year. For the year under report the percentage, as worked out in my office, has been found to be 8·7.

12. During the year under review no purchases of Life Annuities under Article 867 of the Civil Service Regulations were made by the Trustees, Committee, or Managers of any Local Fund.

13. The appendices which usually accompany this report are attached.

Statement showing the operation of the Scheme of Life Insurance and Monthly Allowances during the years 1894-95 and 1895-96.

SEPARATE REVENUE.

POST OFFICE.

The 4th December 1896.

No. 5149-*S.R.*—In exercise of the powers conferred by Sections 20 and 63 of the Indian Post Office Act (XIV of 1866), the Governor General in Council is pleased to direct that, with effect from the 1st January 1897, the following rates of postage shall be charged on newspapers registered and posted, in accordance with the conditions set forth below, for transmission by the inland post :—

For every newspaper not exceeding 20 tolas in weight . .	½ anna.
For every additional 20 tolas or part of that weight . .	½ ,,

Nothing in this Notification shall be taken as affecting the conditions, rates, or system of postage (by cash payment in advance) prescribed by the Notification of the Government of India in the Finance Department, No. 3468, dated the 6th October 1881, which shall continue for the present to apply to newspapers not registered for the purposes of this Notification.

Conditions.

1. (i) For the purpose of this Notification, any publication, consisting wholly or in great part of political or other news, or of articles relating thereto, or to other current topics, with or without advertisements, shall be deemed a newspaper, subject to these conditions (1) that it be published in numbers at intervals of not more than thirty-one days, and (2) that it have a *boná fide* list of subscribers.

(ii) An extra or supplement to any newspaper, bearing the same date as the newspaper and transmitted therewith (if any), shall be deemed part of the newspaper. For the purpose of this Notification no publication shall be deemed an extra or supplement unless it consist wholly or in great part of matter like that of a newspaper, and have the title, and date of publication, of the newspaper printed at the top of each page.

2. (i) A newspaper shall be entitled to be registered under these conditions for transmission by post in the office of the Postmaster General, or officer exercising the powers of the Postmaster General, of the postal circle in which it is published.

(ii) The registration of a newspaper under these conditions shall cease to have effect at the close of the calendar year following that in which the registration was effected, and must be renewed if a continuance of the privilege conferred by this Notification beyond that time is desired.

3. The postage shall be prepaid by postage stamps.

4. The newspaper shall bear in print immediately above the address the word "Registered" followed by the registration number which shall be assigned to it by the Postmaster General or other officer referred to in condition 2.

5. The newspaper shall be posted at the place of publication.

6. The newspaper shall be posted without a cover or in a short cover open at the ends.

7. There shall be no word printed on the newspaper after its publication, or upon the cover (if any) thereof, nor shall any writing or mark be made upon it or upon the cover (if any) thereof except the name and address of the person to whom it is sent, and the name and address of the sender.

8. There shall be no paper or thing enclosed in or with any such newspaper other than the extra or supplement specified in condition 1.

J. F. FINLAY,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 30th November, 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government, therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Government of Madras, Public Works Department, No. 692 R., dated the 15th August 1896, forwarding letter from the Agent and Manager of the Madras railway, No. 8570—618, dated the 17th July 1896.

Letter from the Government of Madras, Public Works Department, No. 934 R., dated the 2nd November 1896.

OBSERVATIONS.—The Agent and Manager of the Madras railway has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated the 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Madras railway and to the railways worked by it, with the exception of rule 110 which, in the case of those railways, he desires may be modified as follows:—

RULE 110.—The tail and side lights must not be removed, but must be left in their normal position showing three red lights in a triangle to an approaching train, and care must be taken that they are burning brightly.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 1st January 1897 and in supersession of the General Rules at present in force, the application to such portions of the Madras railway and the railways worked by it as are situate in British territory, of the General Rules, cited in the foregoing observations, for working open lines of railway in British India administered by the Government, with the proposed modification of rule 110.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations,—which have already been published in the *Gazette of India*—with rule 110 as herein modified, be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Government of Madras for information and guidance.

The 4th December, 1896.

No. 503.—The following is published for general information:—

No. 2952 G.

Public Works Department Code, Volume I, Chapter I, paras. 115—117.
Despatch to the Secretary of State, No. 159 Finl., dated 23rd June 1896.
Despatch from the Secretary of State, No. 29 P. W., dated 3rd September 1896.
Finance and Commerce Department Resolution No. 3597 P., dated 21st August 1896.

RESOLUTION.—Under Public Works Department Code, Volume I, Chapter I, paras. 115—117, Government officers lent to Municipalities, Port Trusts,

and Local Boards are at present debarred from promotion on the Government list until such time as they return to Government service. The Government of India have recently had under consideration the question of placing these officers in the same position as other Government servants in foreign employ, namely, those lent to Native States and Railway Companies, in respect of *pari passu* promotion through the grades of the Department, including eligibility for the special pension of Rs. 1,000 and Rs. 2,000 after promotion to the Superintending Engineer and Chief Engineer classes, under the provisions of Article 714 of the Civil Service Regulations, or for the special pension of Rs. 1,000 admissible under Finance Department Resolution No. 3597 P., dated 21st August 1896, as the case may be.

2. With the concurrence of Her Majesty's Secretary of State for India, the Government of India are now pleased to rule that these officers shall receive *pari passu* promotion with their contemporaries in Government service through the Assistant and Executive Engineer grades, and that when their turn comes for promotion to the rank of Superintending and Chief Engineer, they shall be so promoted, subject to the conditions which regulate the promotion of other officers in foreign service; that is to say, provided that the appointments they hold are of equal rank and responsibility with those of a Superintending or Chief Engineer in Government service, and provided also that their qualifications are such as would have entitled them to promotion under the Government rules. They shall then on retirement be eligible for the special pensions admissible under the provisions of Article 714, Civil Service Regulations, or Finance and Commerce Department Resolution No. 3597 P., dated 21st August 1896, under the same conditions as obtain for officers in Government service, and those lent to Native States and Railway Companies.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments, Administrations and officers noted in the margin, for information and that it be published in Part I of the *Gazette of India*.

The Governments of Madras and Bombay, Public Works Department, General and Railway Branches.
The Governments of Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan
The Accountant General, Public Works Department.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

Ordered, also, that a copy be forwarded to the Finance and Commerce Department, for information.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 3rd December 1896.

NOTIFICATIONS.

No. 3346 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 28th November 1896:—

No. 399 of 1896.—Robert Alfred Fraser, gentleman, of "Alvie," Toorak road, Toorak, in the county of Bourke, in the colony of Victoria, for an improved mechanism, for opening or closing the doors of railway carriages, and for indicating to passengers the names of arrival stations.

No. 400 of 1896.—Solomon Meyers, manager, cotton mill, of Carroll road, Parel, Bombay, for an improved yarn cleaner for reels, etc.

No. 401 of 1896.—Alexandre Lefebvre, of Beersel, Belgium, for automatic signalling devices for preventing collision of railway trains.

No. 402 of 1896.—Edward Waller Stoney, civil engineer, of the Madras railway, Madras, for improvements in actuating and controlling railway signals, and interlocking points and signals.

No. 403 of 1896.—The Military Equipment Stores and Tortoise Tents Company, Limited, manufacturers, of 7, Waterloo place, Pall Mall, in the county of London, for a portable cooking stove.

No. 404 of 1896.—The Right Honourable Douglas Mackinnon Baillie Hamilton Cochrane, Earl of Dundonald, of No. 34, Portman square, in the county of London, for an improvement in pocket stoves.

No. 405 of 1896.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in machines for packing tea or other substances.

No. 406 of 1896.—Fredrik Ljungström, mechanician, of 37, Kommendorsgatan, Stockholm, in the kingdom of Sweden, for improvements in evaporating or heating apparatus.

No. 407 of 1896.—Arthur Clement Evans, A.M.I.C.E., executive engineer, Ganges canal, Aligarh, for a hay and grain kiln.

No. 408 of 1896.—Lincoln Gordon, district traffic superintendent, Oudh and Rohilkhand state railway, Lucknow, for an invention to be called "Gordon's automatic Scotch block and trap" for securing vehicles in lie by or other sidings without the aid of safety chains or other contrivances.

No. 409 of 1896.—William John Sharland, offg. station master, N.-W. railway, Lalamusa, for an automatic railway carriage door catch.

No. 410 of 1896.—John Gordon, engineer, of 7, Leadenhall street, London, E.C., for improvements in or relating to the glazing of brick, tile or other surfaces.

No. 411 of 1896.—John Gordon, engineer, of 7, Leadenhall street, London, E.C., for improvements in or relating to the glazing of brick, tile or other surfaces.

No. 3347 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 73 of 1896.—Frederick Robert Jones, M.I.M.E., state engineer, of Nahan, Punjab, for improvements in vertical sugarcane mills. (Specification filed 9th September 1896.)

No. 101 of 1896.—Philip Townshend Somerville Large, civil engineer, of Saugor, Central Provinces, for an automatic self-adjusting rope guide for sheaves or pulleys. (Specification filed 3rd November 1896.)

No. 201 of 1896.—Moncrieff Lemaitre, permanent-way inspector, Delhi, for a combined railway carriage key and ticket-punch. (Specification filed 23rd November 1896.)

No. 3348 P.—THE fee prescribed in Schedule 4 of Act V of 1888 has been paid for the continuance of exclusive privilege in respect of the undermentioned invention for the period shown against it :—

No. 184 of 1890.—B. L. Rajak, temporary engineer, state railways, late of 39, Ram Mohon Dutt's lane, Bhowanipore, Calcutta, for an automatic punkah-pulling machine and an adjusted punkah. (From 28th November 1896 to 28th November 1897.)

No. 3349 P.—WHEREAS the inventor of the undermentioned invention has failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said invention in British India and of authorising others so to do has ceased :—

No. 65 of 1892.—James Hughes Minto's invention for improvements in apparatus for charging liquids with gases. (Specification filed 22nd August 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

7, COUNCIL HOUSE STREET,
Calcutta, 3rd December, 1896.

CALCUTTA UNIVERSITY.

NOTICE.

His Excellency the Chancellor has decided to allow the Masters or holders of higher degrees in some Faculty and Bachelors of Arts *who graduated before the year 1867*, to fill up two vacancies in the Senate by election. Candidates for election must be Masters or holders of higher degrees in some Faculty or holders of the degree of Bachelor of Arts who took that degree before the year 1867.

The election will take place at the Senate House, College Square, on Friday, the 1st January, 1897.

Every candidate for election must be nominated by a graduate holding one of the abovenamed degrees, and no graduate will be allowed to nominate more than one candidate. The written nominations of candidates must reach the office of the Registrar not later than the 9th December.

On and after the 16th December, voting papers containing the names of the candidates nominated will be supplied on application by the Registrar. These papers must be filled up in the presence of the Registrar at the Senate House on the 1st January, 1897, between the hours of 10 A.M. and 5 P.M., but graduates who are not able to appear in person before the Registrar may fill up the papers in the presence of a Magistrate, a Judge, a Subordinate Judge or a Munsif (excluding village Munsifs), by whom the papers will be countersigned. All such voting papers must reach the Registrar not later than 3 P.M. on Friday, the 1st January, 1897, after which no voting paper will be accepted. Graduates who are not personally known to the officer in whose presence the voting papers are filled up, must bring with them their diplomas, or other satisfactory proof of identify.

A. PEDLER,
Registrar.

SENATE HOUSE,
The 30th November, 1896.

Rangoon and Moulmein . .	11th ,,	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	8th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	5th ,,	Ditto.
Ditto ditto (Supplemental)	6th ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	9th ,,	Ditto.
Port Blair	10th ,,	Per Steamer *Shahjehun.*
South African Ports . . .	12th ,,	Per Steamer *Umsinto.*
Madras, Colombo, Straits Settlements, China, and Japan.	13th ,,	Per A. Lloyd's Str. *Daphne.*

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

CIVIL ENGINEERING COLLEGE, SIBPUR.

APPRENTICE DEPARTMENT.

The date for admission to this Department is 1st February, 1897.

Candidates must be at least 15 and not more than 17 years of age.

They must have passed Standard VII of the code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard, so as to reach the Principal not later than the 6th January, 1897. No applications will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding R10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list.

* R5 per mensem.

For natives there will be at least nine vacancies, possibly more on the reduced† fee list. These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

† R2 per mensem.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 16th November, 1896.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا ٭

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمی حسب نرخ ذيل خريد کرسکتا هی — يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه ٭

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هی — يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه ٭

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانوں مين بهي بکتی هی — ماسواے قيمت مذکورهٔ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه ٭

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	।	১৮৲	বা ডাকমাশুল বিনা	১৮৷৷৹
½ আধ „	„	৯৲	„	৯৷৷৹
¼ সিকি „	„	৪৷৷৹	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার সাক্ষ্য দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

METEOROLOGICAL PUBLICATIONS FOR SALE.

At the Meteorological Office, No. 5, Russell Street, Calcutta, at the prices specified below:—

Hand-book of Cyclonic Storms in the Bay of Bengal for the use of Sailors, describing the phenomena of Cyclonic Storms and Cyclones in the Bay of Bengal, and giving a brief account of six typical Bay of Bengal Cyclonic Storms. It also gives practical hints to sailors respecting Cyclonic Storms in the Bay. Demy, 212 pages, 29 plates (shewing diurnal oscillation of barometer at different Latitudes and Longitudes, mean monthly barometric height, tracks of different Cyclonic Storms, etc., etc.) R5.

Rainfall Map of India in two sheets, scale 64 miles to one inch, showing the annual distribution of rainfall in India (in colours). R3.

Instructions to Observers of the India Meteorological Department, in which are described in detail the various Meteorological instruments in use at the Meteorological observatories, with full instructions how to read them, etc. Demy, 103 pages. R3.

Tables for the Reduction of Meteorological Observations in India. This book contains tables for reducing barometric observations taken at different heights, and for calculating humidity and vapour tension, etc., etc. R2.

Barometer, Wind and Current Charts of the Bay of Bengal and adjacent sea, north of the equator. R5.

Charts of the Bay of Bengal and adjacent sea north of the equator, showing the specific gravity, temperature, and currents of the sea surface. R1-8.

Barometer, Wind and Current Charts of the Arabian Sea and the adjacent portion of the North Indian Ocean. R5.

Monthly Weather Review of India, giving a summary of the chief features of the weather in India and containing discussions on atmospheric pressure, barometric depressions, temperature of the air, winds, rainfall, etc. It also contains all available information about snowfall in the mountain districts to the north and north-west of India, and an abstract of observations taken at about 200 observatories in India. Published *monthly*. R1 per month or R12 per annum. Postage 1*a.* 6*p.* for each copy outside Calcutta.

India Daily Weather Report and Chart, containing observations recorded at 8 A.M. at 147 observatories, with a Chart shewing the distribution of atmospheric pressure and rainfall all over India, and a brief summary of the chief features of the weather of the day. Issued *daily* from the Simla Meteorological Office. Monthly subscription R2, and postage annas 8.

JOHN ELIOT,

Meteorological Reporter to the Govt. of India.

each 8a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.
Quarterly Nos. 1, 2, 3, 4, and 5, at R1 each, original price R4 each.
Vol. II, Quarterly Nos. 6 and 7, at R1 each.
„ III, „ No. 13, R1.
„ V, „ Nos. 18, 19, 20, and 21, R1 each.
„ VI, „ Nos. 22, 23, 24, and 25, R1 each.
„ VII, „ Nos. 26, 27, 28, and 29, R1 each.
Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each
Quarterly Number 41A of Vol. X, at R1 each.
Cloth covers for Volumes, 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each.
Index to Professional Papers, and loose Papers, 1st and 2nd Series, at 2a. each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage. R a. p.	With postage R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.—

	For town. R a. p.	For mofussil. R a. p.
For the Calcutta Series; per copy	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. R a. p.	With postage. R a. p.
Bengal Law Reports, for one year	20 0 0	22 8 0
Single copies R2 per copy.		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III, & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L; and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4a.)
1888-89, 18 Plates with Text. R4-8 a set (8a.)

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 21st, 1896.

The unsettled weather, which was ushered into the southern half of the Peninsula by the small cyclonic storm which crossed the extreme south of the Indian region on Saturday, the 14th, has continued steadily and extended somewhat during the week under review. Heavy rain was received daily along the South Carnatic-coast and light showers at the inland stations in the south of the Peninsula. Up to the 17th this rainfall was confined to the region lying to the south of Madras (station), but, on the 18th, the fall extended northward to Nellore and on the 19th and 21st as far north as Masulipatam. At the same time, on the opposite side of the Peninsula, conditions have been unsettled. The cyclonic storm which crossed the Peninsula apparently set up a cyclonic circulation over the east of the Arabian Sea. This circulation gradually intensified and during the 18th commenced a northerly movement. On the 19th the lowest pressures were apparently off Goa, on the 20th off Bombay and on the 21st over Kathiawar. Rain commenced to fall lightly over North Bombay and Kathiawar during the 19th or morning of the 20th, and on the morning of the 21st light rain was reported from Bombay and Surat and moderate to heavy rain from Deesa, Ahmedabad, Bhuj and Rajkote. Other parts of the Indian region were wholly outside these areas of disturbance and there has been actually or practically no rain during the week over Burma, Assam, and the whole of Northern and Central India. In Burma the weather has been steadily cooler than usual throughout the week, but in all the other provinces of India the heat has been excessive. This has been particularly the case over Bombay and the more central parts of the country where the abnormal excess has been between 4° and 5°.

Daily Summary.—*Sunday, 15th November.*—The barometer had risen slightly to briskly over the extreme south of the Peninsula, but elsewhere the changes were slight though generally downward. The small cyclonic storm, noticed at the close of the previous week, had passed out into the Arabian Sea. Readings were high in Upper Burma and the North Punjab, and were low off the Malabar coast. The winds were south-east and easterly over the west and centre of the Peninsula and were generally northerly elsewhere. The rainfall was confined to Southern India and Ceylon, but was heavy in parts of that region, thus Trevandrum reported 3·08" and Cuddalore 2·09". The mean temperature was excessive except in Burma, Assam, East Bengal and South Madras, where it was lower than usual.

Monday, 16th November.—Pressure had changed very little, but the tendency was upward except in Western India. The distribution was the same as on the preceding day. Easterly winds were extending from the Peninsula into the Central Provinces, but elsewhere the wind directions were little changed. With the exception of showers at Moulmein and Taunggyi, the rainfall was again wholly confined to Southern India and Ceylon. The amounts were less than on the previous day, the heaviest rainfall being 2·00" at Trevandrum.

Tuesday, 17th November.—The barometer was falling slightly over the west and south of the Peninsula, but was rising elsewhere. Readings remained high over Assam and Upper Burma and over the North Punjab and low off the Malabar coast, but the pressure differences had increased. Northerly winds continued over the Bay area, easterly winds over the Peninsula and the central parts of the country, and variable airs and calms over Northern India. Light showers had been received in Lower Burma, while moderate to heavy rain had fallen over the south of the Peninsula and Ceylon. The amounts had become heavier again, Cuddalore reporting 4·42" and Madras, Trincomalee and Wellington over 3·00". The temperature distribution, with respect to the normal, was the same as on the preceding day.

Wednesday, 18th November.—The pressure changes continued slight or small, but the barometer continued to generally fall over the west of the Peninsula, where readings were low, and to rise in the north, where they were high, so that the pressure difference continued to increase. The winds were little

changed in direction, but the force at Bombay was steadily rising. The showers had ceased in Burma, and the rainfall had been confined to the south of India and Ceylon. The amounts received were lighter than on the 17th, but on the other hand the rainfall had extended northward as far as Nellore. The heat remained excessive except over Assam, part of Bengal and of Burma and over South Madras.

Thursday, 19th November.—The barometer had risen almost everywhere; the rise was small generally, but had been brisk over the south of the Peninsula and over the North-West Provinces. The low pressure area over the Arabian Sea had begun to move northward along the west coast and the lowest pressures lay to the west of Goa. Gradients had become steep over North Bombay and Central India. The wind directions were again little changed, but the force continued to rise at Bombay. In Madras the rainfall had continued to extend northward and had reached as far north as Masulipatam. Along the west coast there were some light showers. The mean temperature was excessive except over Assam, Burma and North Bengal.

Friday, 20th November.—Pressure had given way everywhere, and the depression which had been traced up the west coast lay over the north-east angle of the Arabian Sea. The winds were cyclonic in its neighbourhood and gradients were steep over Bombay and Central India. Fairly general rain had been received over the southern half of the Peninsula, moderate to heavy rain over the Bombay Deccan and light showers along the Bombay coast and in Kathiawar. Temperature remained high except in the north-east.

Saturday, 21st November.—The barometer had again fallen almost everywhere. The cyclonic storm had intensified and was passing through Kathiawar, where pressure was 0·269" below the normal. Cyclonic winds and gales prevailed in the neighbourhood of the disturbance. Heavy rain had fallen over Kathiawar and light to moderate rain over North Bombay, Berar and Rajputana. General rain had again fallen over the southern half of the Peninsula, the principal amounts having been 5·54" at Negapatam, 4·39" at Calicut and over 2·00" at Masulipatam and Cuddalore. The temperature had fallen in most places and the heat, though still abnormally great all over the more central parts of the India region, was less than usual in the north-east, in the south and in the north-west. In North Bombay the decrease had been nearly 15°.

Temperature.—Cloudy skies and cool northerly winds have kept temperature low during the week over Burma, Assam and part of Bengal, while the heavy rain in the extreme south has given lower temperatures than usual to South Madras. In all other places the heat was excessive until the last day of the week, when the rainfall, which accompanied the cyclone, brought about a rapid fall of temperature over part of North-West India and reduced the temperature to below the normal. As the cyclonic storm was progressing northward slight cloud spread over the sky over Bombay and the central parts of the country, and the night temperatures recorded at this time were extraordinarily high.

The following table gives the variations of the mean temperature from the normal average in the different provinces of India:—

Province.	November 1896.							Mean variation of week.
	15th.	16th.	17th.	18th.	19th.	20th.	21st.	
Burma	—1·8	—0·9	—1·0	—0·6	—0·6	—1·4	—1·4	—1·1
Bengal and Assam	+1·0	+0·5	+1·0	+0·6	+0·5	+0·4	+0·1	+0·6
North-Western Provinces and Oudh	+3·0	+3·4	+3·5	+2·8	+2·3	+2·1	+2·5	+2·8
Punjab	+1·8	+2·2	+1·1	+1·4	+1·3	+3·2	+3·2	+2·0
Bombay	+3·1	+2·5	+4·6	+4·2	+5·9	+5·5	+5·0	+4·4
Central Provinces and Berar	+5·2	+5·1	+5·3	+3·6	+3·5	+4·2	+7·5	+4·9
Central India and Gujarat	+5·3	+5·1	+5·2	+5·9	+6·1	+6·6	+2·4	+5·2
Sind and Rajputana	+4·7	+2·6	+3·8	+3·0	+2·9	+4·3	+0·1	+3·1
Madras	+0·5	+2·1	+2·7	+2·9	+3·8	+4·0	+2·5	+2·6
MEAN FOR WHOLE OF INDIA	+2·5	+2·5	+2·9	+2·6	+2·9	+3·2	+2·4	+2·7

The mean temperature of the whole country on each day of the week was above the normal by amounts ranging from 2°·4 on the 21st to 3°·2 on the 20th.

In Burma the mean temperature was below the normal average on each day of the week and for the whole week was 1° 1 below the normal, but in all the other provinces, the heat was excessive, the abnormal excess being largest over Bombay and the central parts of the country.

Rain.—The rainfall returns of the past week are remarkable (1) for the heavy burst of rain which accompanied and succeeded the passage of a cyclonic storm across the extreme south of the Indian region and (2) for the commencement of rain at the close of the week over the north of the Bombay Presidency and the adjoining parts of Central India and of Rajputana. The cyclonic storm which brought the rain to Bombay at the close of the week was the direct result if not the direct continuation of the storm which crossed the Peninsula on the evening of the 14th. That this storm passed out into the Arabian Sea is shown by the barometric and wind direction changes which occurred in the south of the Peninsula and more particularly in Malabar. The storm was probably a weak and diffused disturbance when it surmounted the Ghâts and entered the Arabian Sea, and the cyclonic circulation which it set up remained stationary off the Malabar coast uutil 8 A.M. on Wednesday, the 18th After that hour a northerly movement was developed, which brought the centre up to the latitude of Bombay by the morning of the 20th. In this position the storm appears to have increased in intensity and at 8 A.M. on the 21st when it was passing through Kathiawar, the abnormal barometric depression at its centre was as much as 0 27". Heavy rain fell over the north-west quadrant of the storm and light rain to the east and north. The principal rainfall of the week was due to this storm, but in addition local light showers were received at a few stations in Burma, West Bengal and the North-West and Central Provinces. The concluding table gives the rainfall data. From this table it will be seen that rain fell in thirty-one of the rainfall divisions. Of these thirty-one divisions, as many as eighteen received effective rainfall, while the remaining thirteen though reporting some rain had a total fall for the week of less than one-tenth of an inch. This is a considerable improvement as compared with last week, when only eight divisions reported effective rainfall. The eighteen divisions which reported good rain were:—Tenasserim and Lower Burma, Bihar (south), Oudh (south), Malabar, Madras (south-central), Coorg, Mysore, the Konkan, the Bombay Deccan, Khandesh, Gujarat, Rajputana, Central India (west), Madras (central), the East coast (central and south) and Madras (south) Except in these eighteen divisions the rainfall was practically or actually *nil*. The heaviest actual average fall was 6 66" in Madras (south) followed by 4·18" in the East coast (south), by 3·40" in Malabar and by over 2 00" in the East coast (central), Madras (south-central) and Coorg. The principal rainfall was thus in the extreme outh, but Mysore, the Konkan, the Deccan, Khandesh, and Gujarat all received fair rain. The third column of the table shows that more rain than usual was received in as many as 21 of the rainfall divisions. The excess was large to moderate over the Peninsula ranging from 5·97" in Madras (south) and 2·93" in Malabar to 0·43" in the Konkan, it was moderate (about ½ an inch) in the northern districts of Bombay, and was slight in Kathiawar, Rajputana, Gujarat and West Bengal. In Burma, Assam, West Bengal and the North-West Provinces the rainfall was exceedingly local and generally occurred on the last two days of the week. In the south of the Peninsula the fall was spread over the whole week, but in the Konkan, the Deccan, as well as the central parts of Madras, North Bombay and Rajputana the rainfall all occurred on the last two days of the week.

The three concluding columns of the table show that notwithstanding the fairly general character of the rainfall of the past week the total rainfall of the period, October 18th to date, is still very largely below the normal average. In the case of Tenasserim of the North-West Provinces (west), of Rajputana, of Central India (west) and of Madras (south) there has been an excess, and in the case of Lower and Central Burma, of Malabar, of Madras (south-central), of Coorg, of Berar, of Gujarat, and of the East coast (south) the fall has been about normal for the period, but in all other cases there is still greater or less deficiency, and over a considerable part of Bengal and of the north-east of the Peninsula there has been no rain whatever.

The following large or considerable totals have been recorded during the week, November 15th to 21st:—Agosteswaram (Travancore) 10·79"; Udamalpet (Coimbatore) 6·99"; Devala (Nilgiri) 9·77"; Yedatore (Mysore) 7·00"; Sholapur 5·03"; Kistnapatam (Nellore) 7·32"; Cuddalore 11·34"; Shiyali (Tanjore) 15·18"; Sankaranayinárkóyil (Tinnevelly) 11·56" and Usilampatti (Madura) 9·59".

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 26th November 1896*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th November.*—Light rain in parts of Ganjam and Vizagapatam, and good to heavy rain in the rest of the Circars and most parts of the Deccan districts; very heavy rain in the Carnatic and parts of North Arcot, and good rain in the remainder of the Central districts, in the South and on the West Coast. The rainfall in the Deccan has saved some standing crops and has encouraged sowings to some extent, but it came too late in Ganjam and Vizagapatam, to be of much value except for pasturage in parts; elsewhere the excessive falls have somewhat retarded cultivation, except in the South and on the West Coast. The standing crops generally have much benefited by the rain. Pasture is improving. The stocks of fodder are short, but cattle generally are in good condition. The price of rice is easier in almost all districts, except in the south and in Malabar where there is a slight rise. Dry grains are cheaper almost throughout, and in the Deccan districts there was a fall of 25 per cent. during the week in the price of staple grains. Staple grains are now nowhere above the scarcity rate. The number of relief workers was 26,508, fed at kitchens 783, and weavers relieved, 1,119; all in the Deccan districts. The decrease is owing to the weather and has occurred in all districts, except Bellary where the numbers have increased slightly.

Bombay.—*For week ending 2nd December.*—Rain fell during the week in seventeen districts. It was beneficial to the crops in parts of eight districts, but more rain is urgently wanted for the late sowings in seven districts. The standing crops have withered or are withering in three districts and have been damaged by locusts in one taluka of Hyderabad. Preparations for the late crops or sowings are progressing in seventeen, and reaping of the early crops in seven, districts. Cotton picking continues in Khandesh and Ahmedabad. Fodder is insufficient in nine districts. Agricultural stock are healthy except in parts of eleven districts. Prices are rising in six districts, but are falling in nine and are stationary in two. The numbers on test works in Dharwar were 650. The numbers on relief works were: Nasik 5,177; Ahmednagar 2,382; Satara 1,677. The numbers on works in Bijapur, Sholapur, Poona and Belgaum have not been reported.

Bengal.—*For week ending 30th November.*—There was general but irregularly-distributed rain in Bihar, especially in the south Gangetic districts, and in parts of Chota Nagpur, and slight showers in other parts of Bengal. There was a fall of 3 inches at Angul. In Patna, Gya, Shahabad, and Saran it is reported that the spring and poppy crops already sown are coming up well, and that further sowings are being made. In Muzaffarpur, Darbhanga, and Bhagalpur the rain has slightly improved the prospects of the spring crops. In Champaran these crops are said to be germinating fairly well. In Palamau the rain has been very beneficial. Elsewhere the prospects of the spring crops, except in Northern Bengal, continue unfavourable. The rain was too late for the winter rice which is being harvested. Reports of the sugarcane crop are generally good. Locusts visited parts of Midnapore, Howrah, and Nadia, but, save in Nadia, no damage to the crops is reported. New rice has been brought on the market in some parts, and has brought about a very slight fall in prices at a few stations; but there have been no important changes in prices generally. The numbers attending relief works on Saturday, the 28th, were —Nadia, 445, Patna 69 (men 32, women 26, and children 11); Shahabad, 1,002 (men 405, women 363, and children 234), Saran 38 (men 20, women 1, and children 17); Champaran, 1,937 (men 1,020, women 416, and children 501). Test works have also been opened in Khulna.

North-Western Provinces and Oudh.—*For week ending 2nd December.*—There were light showers of rain in a few districts. Spring sowings are

still in progress, and the rain which fell in the previous week in most districts has allowed more land to be brought under the plough. Germination is generally reported to be good. Poppy is being sown in certain districts. The numbers employed on relief works and in receipt of gratuitous relief on Saturday, 28th November, in districts officially recognised as distressed are as follows:—Banda, 48,504; Hamirpur, 10,171; Jhansi, 9,905; Jalaun, 13,761; Allahabad, 13,547; Jaunpur, 9,140; Rae Bareli, 14,622; Sitapur, 4,457; Hardoi, 11,179; total 1,35,086; of these 20,998 were dependants gratuitously relieved on the works, and 21,787 were gratuitously relieved under other provisions of the Famine Code. The numbers employed on village works were 731 in Allahabad and 730 in Rae Bareli. Supplies generally are sufficient. Fodder is somewhat scarce in places. Prices are still high. They show a tendency to fall in some districts and to rise in others.

Punjab.—*For week ending 2nd December.*—Slight rain in all districts, except Rohtak and Gurgaon. Harvesting is nearly completed. Cotton picking and sugarcane pressing are going on. Sowings of the spring crops are in progress on irrigated lands, and sowing has also commenced on dry lands in Gurgaon. More rain is urgently wanted throughout the province. The water supply is deficient in Hissar. The outturn of irrigated crops is average in Lahore, poor in Mooltan and below average in Dera Ismail Khan. Prospects of the spring crops are generally said to be average to poor, but bad in Delhi. The condition of the standing crops is fair to poor. The recent rain was not sufficient to extend sowings and did not benefit the standing crops, except in Dera Ismail Khan. The stock of food grains is insufficient in Hissar, Amritsar and Rawalpindi and in parts of Jullundur, Ferozepore and Shahpur. Cattle are generally in poor condition owing to deficiency of fodder and overwork. Fodder is scarce in all districts, except Umballa, Peshawar and Rohtak. The aggregate number of persons employed on relief works in Gujrat on Saturday, the 28th November 1896 was 10,850, including non-working children. Famine works have also started in Hissar. 69 persons are on test work in Umballa. Prices are rising in Peshawar, but are falling slightly in Gujranwala; elsewhere prices are high. Wheat was selling from 7 to 10 seers, *bajra* (Bulrush millet) 8¼ to 10¼ seers, gram 8 to 9½ seers, maize 9 to 11¼ seers, *jowar* (great millet) 9 to 10 seers, and rice 6 to 7½ seers per rupee.

Central Provinces.—*For week ending 2nd December.*—Sky often cloudy; weather abnormally hot, but no rain has fallen during the week. The Rehli tahsil of Saugor received some good showers in the previous week. The outturn of the autumn crops varies between four and eight annas in the Banda tahsil of Saugor and the open portion of Jabalpur; between two and six annas in the hilly portion of Jabalpur; between six and eight annas in Narsinghpur; between five and six annas in Hoshangabad. The recent rain has caused some damage to rice which was being harvested in Raipur, but has much improved the general prospects of the spring crops. Where the moisture is sufficient, seed which had hitherto failed to germinate is coming up. More land is being sown in places where the moisture from above and the moisture from below have met and no dry stratum remains. In the Nagpur country some gram is being put down where linseed failed. In Hoshangabad which received but little rain last week, 77 per cent. of the normal area was previously sown, and of this 95 per cent. has germinated. The present prospect in that district is six annas, but with cold weather rain it will rise to twelve annas. In two tahsils of Saugor only one-fourth of the area usually devoted to the spring crops is sown. Relief works have been started in Narsinghpur. Prices are generally steady, but are slightly easier in a few districts. The export traffic is keeping them up.

Burma.—*For week ending 28th November.*—In Lower Burma crop prospects continue satisfactory, except in small areas damaged by floods in Thongwa and Toungoo. Reaping of paddy has commenced. In Upper Burma no rain has fallen and the crops are dying rapidly on high lying lands of the dry zone districts. The irrigated crops also in Minbu and Magwe require more rain. The island crops are poor in Minbu, but promise well in Magwe and Myingyan. Wet-weather paddy is being reaped in most districts and dry-weather paddy has been sown. On islands the crops are being planted The price of paddy has risen in Rangoon, Tharrawaddy, and Henzada, but

has fallen slightly in Pakokku and largely in Amherst, Thayetmyo, and the Southern Shan States. The numbers on relief works were 17,563; and on gratuitous relief 2,774.

Assam.—*For week ending 1st December.*—The weather is seasonable. Rain is wanted for the cold weather crops in Cachar, but rice is now cheaper there. Prospects of tea, mustard, and linseed are good in Sylhet. Prospects of the crops are not favourable in parts of the lower districts of the Assam Valley. Reaping of late rice continues. Fodder is sufficient, except in the Khasi hills and Cachar. Water is sufficient. The price of food-grains is high.

Mysore and Coorg.—*For week ending 2nd December.*—MYSORE: Good rain in parts. Prospects are favourable. Paddy and *ragi* (*Eleusine coracana*) are being harvested in parts. Prices have fallen.

COORG: Rainfall moderate The rice crop is in good condition. Picking of coffee is in progress. Water and fodder for cattle are sufficient. Prices of food-grains have fallen slightly.

Berar and Hyderabad.—*For week ending 2nd December.*—BERAR: The weather is cool. The recent rainfall has benefited the crops in Ellichpur and Wun. Harvesting of the monsoon crops continues. Of the winter crops the young plants are now reported to be in fair condition. Cotton-picking is in progress. Scarcity of fodder and water prevails There is no material change in the high prices of food grains.

HYDERABAD: Rainfall over one inch. Agricultural prospects have decidedly improved and the spring crops have benefited by the recent rains. The water supply has increased slightly. Prices are—wheat 6¾, coarse rice 6, white *jowar* 9½, yellow *jowar* 10⅓, gram 7¾, and *tur* (*Cajanus indicus*) 10¼ seers per current rupee.

Central India.—*For week ending 2nd December.*—Report not received.

Rajputana.—*For week ending 2nd December.*—Slight rain fell throughout Rajputana, except in Serohi, Marwar, Bikanir and Jaisulmere. Agricultural operations are generally satisfactory, except in Jaisulmere. Sowing of the spring crops is in progress in Serohi, Marwar, Meywar, Ajmere and some parts of Jaisulmere. The standing crops are generally good. The harvest is improving in Ajmere and Jeypore. Agricultural stock are in good condition. Pasturage and fodder are sufficient, except in some parts of Meywar, Tonk and Ulwar. Fodder is dear in Kerowli and is failing in Dholepur. Prices are high in Haraoti and Bikanir and are fluctuating in Kotah, but are falling in Meywar, Jhallawar, Pertabgarh, Kishengurh and are steady elsewhere. Test relief works have been started in Bhurtpore. The aggregate number of persons on relief works was Kotah 3,551; Dholepur 4,278; Bikanir 24,229; Jaisulmere 120. The numbers on gratuitous relief were Bikanir 5,825.

Kashmir.—KASHMIR VALLEY.—*For week ending 1st December.*—Rain has fallen. The spring sowings are still in progress in some places. Prices are below normal.

JAMMU PROVINCE.—*For week ending 2nd December.*—Rainfall slight. The autumn crops have failed in the Kandi ilaka, and scarcity of water is also felt there. Advances for seed grain for the next spring crops will be necessary. Remission of revenue will have to be made in 229 villages of the Jammu district. Prices are high. Relief works will be necessary.

Nepal.—*For week ending 28th November.*—A little rain fell during the week, but the weather is clear again. Sowing of wheat continues.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 23RD NOVEMBER 1895, AND FROM 1ST JULY TO 21ST NOVEMBER 1896.

N.B.—As regards the figures in column *Total Earnings from 1st July 1896*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the second-half of 1895	Week ending 23rd November 1895. Mean mileage worked.	Week ending 23rd November 1895. Earnings. Total. No 5063-S. R, dated Calcutta, the 2nd December, 1896.

ORDER—By the Government of India, FINANCE AND COMMERCE DEPARTMENT.

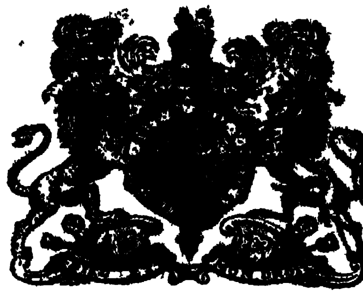
READ—

Customs Circular No. XXIV of 1896.

ORDERED, that the circular be published for general information in the Supplement to the *Gazette of India.*

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. XXIV of 1896.



From—The Government of India, FINANCE AND COMMERCE DEPARTMENT,
No 4760 S. R, dated the 11th November 1896,
To—The Secretary to the Government of Bengal, Financial Department.

I am directed to acknowledge the receipt of your letter No. 775 T. F., dated the 13th October 1896, requesting, with reference to the levy of duty on certain dredgers imported by Messrs. ____________ for the Bengal-Nagpur Railway, that these diggers or dredgers may be exempted from customs duty.

2. I am to say that the Government of India agree with the Collector of Customs and the Board of Revenue that the "dredgers" in question cannot be treated as coming under the exemption in article 14 (*o*) of Schedule IV of the Indian Tariff Act.

3. Nor can they be specially exempted as railway material because they are imported by or under the orders of a railway company. The law does not admit the principle that a railway company should be exempted from duty in respect of all the implements imported for its use which would be taxed if imported and used by other persons. Nor can everything be reckoned as railway material, within the scope of article 93, which is used by a railway company in the construction of its line. The present case is therefore not one in which the operation of the law should be relaxed, and the Governor General in Council regrets that he is unable to grant the exemption asked for.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 11th December, 1896.

NOTIFICATIONS.

No. 3477 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 5th December 1896:—

No. 412 of 1896.—Kunvarji Mancherji Mistri, superintendent and contractor of building works, of No. 12, Khambatta lane, Khetwady, Bombay, for improving the durability of tower bolts attached to doors, shutters, and window sashes.

No. 413 of 1896.—Adolf Berrenberg, engineer, of 11, Crystal palace, Station road, Upper Norwood, in the county of Surrey, and John Howard, director of a public company of Blomidon, Cranes park, Surbiton, in the same county, for motor engines.

No. 414 of 1896.—Ellis Spear and Frank Leander Middleton, patent solicitors, both of 1003 F. street, Washington, district of Columbia, United States of America, for a machine for forming seamless leather loops from slitted blanks.

No. 415 of 1896.—Ellis Spear and Frank Leander Middleton, patent solicitors, both of 1003 F. street, Washington, district of Columbia, United States of America, for a machine for use in the manufacture of seamless leather loops.

No. 416 of 1896.—Ellis Spear and Frank Leander Middleton, patent solicitors, both of 1003 F. street, Washington, district of Columbia, United States of America, for machinery for slitting and trimming leather.

No. 417 of 1896.—Bernhard Baron, manufacturer, of 51, St. Mary Axe, London, for improvements in or relating to the manufacture of cigarettes.

No. 418 of 1896.—John Poyser, engineer, of Bolehill, Wirksworth, near Derby, England, for improvements in let-off mechanism for weaving looms.

No. 419 of 1896.—John Marr, master mariner, of Roseville, Irvine, Ayrshire, North Britain, but at present living in Calcutta, for a tea packing box of novel construction, to be called the "Marr tea box."

No. 420 of 1896.—William Smith Dawson, accountant, of Goosery, Howrah, for an improved tin lamp for use by the natives of India.

No. 421 of 1896.—Henry Holmes, mechanical engineer, of Dadar, Bombay, for an improved alarm apparatus for railway carriages.

No. 422 of 1896.—Henry Richard Grimes, merchant and general agent, of No. 137, Canning street, Calcutta, for an improved composition for the destruction or extermination of trees, jungle, grass and other vegetable growths.

No. 3478 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, and the Chief Commissioner of Burma. This and other designs are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 13 D. of 1896.—J. Fitzpatrick, tea planter and manager of the Berenag Tea Company, Almorah, North-West Provinces, for a native Indian shield and a kukri connected by a chain, to be used as sleeve and other links.

No. 3479 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 48 of 1896.—Edward Lennon Cantwell, civil engineer and patent agent, of No. 5, Old Post Office street, Calcutta, for improved portable sugarcane crushing mills, for improvements therein, and for improved appliances connected therewith. (Specification filed 1st December 1896.)

No. 133 of 1896.—Thomas Royle, analytical and consulting chemist, of Dalton house, 329, Upton lane, London, for improvements in purifying water. (Specification filed 3rd December 1896.)

No. 139 of 1896.—The Apostoloff Automatic Telephone Parent Syndicate, Limited, of 13 and 14, Abchurch lane, in the city of London, for a system of automatic telephone exchange. (Specification filed 25th November 1896.)

No. 142 of 1896.—Melvin Linwood Severy, of 31, Milk street, Boston, in the county of Suffolk and Commonwealth of Massachusetts, United States of America, for improvements in platens, impression cylinders, and the like, for printing presses, type writers, and other like machines. (Specification filed 25th November 1896.)

No. 170 of 1896.—The American Wire Novelty Company, manufacturers, of Broadway, New York, United States of America, for improvements in wire devices convertible into twine holders, flower baskets, egg boilers, sad iron rests, napkin rings, and other household articles. (Specification filed 25th November 1896.)

No. 197 of 1896.—Frederick Elijah Blaisdell, gentleman, of

Wayne junction, in the city and county of Philadelphia, State of Pennsylvania, United States of America, for improvements in and connected with holders for pencils, crayons, caustics, and the like. (Specification filed 25th November 1896.)

No. 234 of 1896.—Louis Pelatan, engineer, of 6, Cité d'Antin, Paris, and Fabrizio Clerici, engineer, of Milan, Italy, for improvements in apparatus for the electrolytical separation of precious metals from their ores, or other materials containing them. (Specification filed 3rd December 1896.)

No. 309 of 1896.—Jacob Pulver Wright, mechanical engineer, of 46, Avon street, in the city and county of New Haven, and state of Connecticut, United States of America, for improvements in and relating to machines for making matches. (Specification filed 30th November 1896.)

No. 311 of 1896.—Adolph Gothard Christiansen, engineer, of Craiglands, Bellassis road, Byculla, Bombay, for a machine for desiccating excrementitious matter, blood, or other materials or compounds which, when dried, leave a residuum, to be called "Christiansen's desiccator." (Specification filed 21st November 1896.)

No. 320 of 1896.—Augustus Gross, engineer, of 68, Pitt street, Sydney, in the colony of New South Wales, for improvements in boots and shoes. (Specification filed 1st December 1896.)

No. 336 of 1896.—William Owen, civil engineer, of 51, Mervan road, Brixton, Surrey, for an improved manufacture of artificial stone, marble, and the like. (Specification filed 28th November 1896.)

No. 338 of 1896.—John Henry Bernard D'Cruze, gentleman, of 4, Church street, Serampore, for mechanically actuating punkahs, to be called "D'Cruze's punkah apparatus." (Specification filed 26th November 1896.)

No. 3480 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 79 of 1880.—Edward Lennon Cantwell, civil engineer, of Calcutta, for a machine of a new construction for expressing the juice of the sugarcane, or for expressing or pressing any other compressible material or substances. (From 6th December 1896 to 6th December 1897.)

No. 123 of 1888.—The Vacuum Brake Company, Limited, of 32, Queen Victoria street, in the city of London, for improvements in or applicable to vacuum brake mechanism. (From 11th January 1897 to 11th January 1898.)

No. 209 of 1891.—George Macallan, engineer, of Earlham grove, Forest gate, London, for improvements relating to the blast pipes of locomotives, and other high pressure engines. (From 25th January 1897 to 25th January 1898.)

No. 144 of 1892.—Edward Field, consulting engineer, of Chandos

Chambers, 22, Buckingham street, Adelphi, London, for improvements in engines to be worked by hot gases, such as air or products of combustion with steam. (From 6th December 1896 to 6th December 1897.)

No. 167 of 1892.—John Jonas, engineer, of 38, Lime street, London, for improvements in apparatus for plucking tea. (From 17th January 1897 to 17th January 1898.)

No. 224 of 1892.—Joseph Lindsay and John Nicoll Lindsay, engineers, of Blackness foundry, Dundee, for improvements in apparatus for forming cranks on shafts. (From 6th December 1896 to 6th December 1897.)

No. 12 of 1893.—Edward Garlick, architect, of No. 28, Apollo street, Bombay, for a refuse and excrement incinerator, to be called "Garlick's improved refuse and excrement incinerator." (From 29th June 1898 to 29th June 1899.)

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

L. P. D. BROUGHTON,
Administrator General of Bengal.

7, COUNCIL HOUSE STREET,
Calcutta, 10th December, 1896.

IN THE COURT OF THE RESIDENT IN MYSORE.

CRIMINAL SIDE.

Rule of Practice No. 3, dated Bangalore, the 30th October 1896.

Under section 553 of the Code of Criminal Procedure (Act X of 1882) the Resident hereby directs that the following rules be observed in regard to refund of fines ordered by a Court of Appeal or Revision :—

1. When the records of a criminal case are called for by a Court of Appeal or Revision and the judgment in such case includes a sentence of fine it should invariably be stated in the letter or docket with which the records are submitted whether such fine has been levied or not, and if so, the date of its remittance to the Treasury.

2. When a sentence of fine is reversed or reduced on appeal or revision the Appellate Court or Court of Revision, as the case may be, will, if the fine has been levied, give a refund certificate in the appended form A showing the amount to be refunded. This certificate will be issued to the party entitled to the refund as soon as the order of the Court has been passed, without requiring such party to make any special application for it.

3. When the refund certificate is presented by the party entitled to the refund to the Court which imposed the fine, such Court shall, after comparing the same with the fine register, prepare the payment order in the appended form B, and deliver it to the payee for presentation at the Resident's Treasury.

4. If the party entitled to the refund has not claimed the refund before the order of the Appellate Court or Court of Revision reaches the Court by which the fine was imposed, the latter Court shall immediately on receipt of the order, prepare the payment order in the form B and shall cause it to be delivered to the payee with as little delay as possible.

By Order of the Court,
A. RAMAYA PUNJA,
Registrar.

ORDERS BY THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

1. The following dates have been fixed for holding the ensuing Examinations in Medicine and Engineering:—

M.B. Examinations	Monday, the 22nd March, 1897, and following days.
L.M.S. and F.E. Examinations	Monday, the 19th April, 1897, and following days.
L.E. and B.E. Examinations	Monday, the 12th July, 1897, and following days.

Applications and fees for admission to the above Examinations must reach the office of the Registrar, Calcutta University, on or before the following dates:—

M.B. Examinations	8th March, 1897.
L.M.S. Examinations	5th April, 1897.
F.E. Examination	5th April, 1897.
L.E. and B.E. Examinations	28th June, 1897.

2. The following changes in the Regulations of the University have been adopted by the Senate and approved by the Governor-General of India in Council:—

(*i*) After paragraph 15 of the Regulations for the M.B. Examinations (p. 54, Calendar, 1896), the following new paragraph has been added:—

"16. A candidate who fails at the Second M.B. Examination shall be admitted to the next half-yearly re-examination of the unsuccessful Second L.M.S. candidates, and shall be re-examined in those subjects only in which he has been rejected at the Second M.B. Examination, provided that he has not failed in more than two of the four subjects, Medicine, Surgery, Midwifery, and Pathology, or in two of these subjects and in Medical Jurisprudence and Hygiene."

(*ii*) The numberings of the subsequent paragraphs have been changed accordingly.

The above changes in the Regulations are to come into effect at the ensuing examinations.

J. H. GILLILAND,
Offg. Registrar.

Number, Rank, and Name,—No. 2110 Gunner Fredrick William Stock.	Parish and County in which born,—Ahmednugger, India.
Age,—24 years.	Date of Desertion or Absence,—29th November, 1896.
Height,—6 feet.	Place of Desertion or Absence,—Manora, Karachi.
Colour of—Complexion, muddy; hair, brown; eyes, brown.	Marks,—Small supplemental nipple on left chest, one inch below permanent nipple.
Trade,—Engineer.	
Date of Enlistment,—12th December, 1893.	
Place of Enlistment,—Jhansi.	

H. K. JACKSON, *Major, R.A.,*

Comdg. No. 11 Company, Western Division, R.A.

CIVIL ENGINEERING COLLEGE, SIBPUR.

APPRENTICE DEPARTMENT.

The date for admission to this Department is 1st February, 1897.

Candidates must be at least 15 and not more than 17 years of age.

They must have passed Standard VII of the code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard, so as to reach the Principal not later than the 6th January, 1897. No applications will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding R10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list.

* R5 per mensem.

For natives there will be at least nine vacancies, possibly more on the reduced† fee list. These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

† R2 per mensem.

J. S. SLATER,

Principal, Civil Engineering College.

SIBPUR,

The 16th November, 1896.

CALCUTTA POST OFFICE NOTICE.

Mails for	Date of closing at Calcutta	Route by which despatched
	1896	
Aden, Egypt, Europe, America, Zanzibar, Mozambique, Delagoa Bay, Mauritius, Seychelles, Madagascar, Réunion, etc., and Natal, and Cape Colony, and in general all countries served through the United Kingdom	16th Dec	Per P. & O. Str. from Bombay.
Parcels for the United Kingdom and other Foreign places	15th "	Ditto
*Australasian Colonies . .	15th "	*Viâ* Tuticorin and Colombo *
Straits Settlements, China, and Japan	17th "	Per Steamer *Kutsang*.
Rangoon and Moulmein . .	8th "	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	15th "	Ditto
Rangoon, Moulmein, Penang, and Singapore.	12th "	Ditto.
Ditto ditto (Supplemental)	13th "	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	10th "	Ditto
Port Blair	15th "	*Viâ* Rangoon
South African Ports . . .	12th "	*Umzinto*.
Madras, Colombo, Straits Settlements, China, and Japan	16th "	Per A. Lloyd's Str. *Daphne*.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا ٭

سنکونا فبري فيوج کلکته کے بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هے — يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه : ايک پونڈ والا ٹين بقيمت دس روپيه ٭

عام آدميوں کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹنڈنٹ صاحب سے بقيمت نقد حسب نرخ ذيل مل سکتي هے — يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه ٭

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانوں ميں بهي بکتي هے — ماسواے قيمت مذکورۀ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه ٭

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows: —

1-pound tin,	R18,	or,	post free,	R18-12.
½ „	R 9,		„	R9-8.
¼ „	R4-8,		„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	.	১৮,	বা ডাকমাশুল বিনা	১৮৸০
½ আধ „	„	৯,	„	৯৷৷০
¼ সিকি „	„	৪৷৷০,	„	৫,

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-0.
„	II.	Masonry	(1891),	R1-4.
„	III.	Carpentry	(1889),	R1-4.
„	IV.	Earthwork	(1892),	R1-4.
„	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-4.
„	VII.	Bridges;*	(in the Press).	
„	VIII.	Roads	(in the Press).	
„	IX.	Railways	(1891),	R1-4.
„	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

„ II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. **Drawing** (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simple Applied Mechanics** (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. **Earthwork Estimating,** with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4*a*.

XVII. **Specimens of Printing** used in the College Drawing Course and Entrance Examinations. 6*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

ILC

O'Callaghan's Earthwork Tables for India, in one large sheet. 8a.; mounted on cloth and bound (in the Press). R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. R1-4.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. 4a.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12a.

Waugh's Instructions for Topographical Surveying R1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 8a.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. R2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq., Executive Engineer, R7-8.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time) 4a.

Cape's Logarithms, with Tables of Squares, Cubes etc. (in the Press).

Cape's Geometry. R1-4.

Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each
Quarterly Number 41A of Vol. X, at R1 each.
Cloth covers for Volumes, 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each.
Index to Professional Papers, and loose Papers, 1st and 2nd Series, at 2a. each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.
Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.*,
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.			With postage.		
	R	a.	p.	R	a.	p.
For the Calcutta Series	10	0	0	12	8	0
" each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	,			2	0	0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit —

	For town.			For mofussil.		
	R	a.	p.	R	a.	p.
For the Calcutta Series; per copy . .	0	8	9		10	3
" each of the Madras, Bombay, and Allahabad Series, per copy . . .	0	5	3	0	5	9
" the Calcutta Series For the year .	7	2	6	8	6	3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance.—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	24
" six "	" 100	" 68	45
" nine "	145	" 96	64
" twelve "	180	" 120	80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates —

	Without postage.			With postage.		
	R	a.	p.	R	a	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies R2 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

SUPPLEMENT TO

The Gazette of India.

No. 50.} CALCUTTA, SATURDAY, DECEMBER 12, 1896.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. .

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture,—No. $\frac{3414}{44}$ *(Famine), dated 11th December 1896.*

READ the undermentioned papers—

(1) Letter from the Government of the North-Western Provinces and Oudh, No. 196, dated 23rd November 1896, and enclosures.
(2) Letter from the Government of the Panjab, No. 13, dated 23rd November 1896, and enclosures.
(3) Letter from the Government of Bengal, No. 4549, dated the 18th November 1896, and enclosures.

RESOLUTION.

The papers referred to above contain the reports of the Local Governments of the North-Western Provinces and Oudh, the Panjab and Bengal on famine prospects so far as they had declared themselves by the middle of November. The Governor General in Council is pleased to direct that these letters, together with certain extracts from the enclosures to them, be published for general information. The complete appendices, in which full details are given, will be published in the local gazettes. Subsequent rain has somewhat improved prospects in the North-Western Provinces and Oudh; and a further report will be published as soon as enquiries which are being made into the extent of the improvement are complete.

[True Extract.]

DENZIL IBBETSON,

Officiating Secretary to the Government of India.

AGRICULTURAL PROSPECTS IN THE NORTH-WESTERN PROVINCES AND OUDH

Letter from the Government of the North-Western Provinces and Oudh to the Government of India, No. 196—S-73, dated the 23rd November 1896.

In my letter No. 3575S, dated 30th September 1896, the Lieutenant-Governor and Chief Commissioner drew the attention of the Government of India to the agricultural position and prospects of the North-Western Provinces and Oudh as they were at that time disclosed, and promised a further and fuller report should a premature cessation of the monsoon rains come to pass, entailing failure in the crops. I am now directed to make good that promise, and to state, for the information of His Excellency in Council, the extent to which the early cessation of the rains has injured this year's *kharif* harvest, prejudiced the prospects of the ensuing spring or *rabi* harvest, and affected the condition of the people at large. The delay in submitting this report is due to the desire which the Lieutenant-Governor and Chief Commissioner felt of verifying the reports of the local officers by personal enquiry and communication with them on the spot. His Honor has now visited each division, except Gorakhpur, in which the crops have failed and pressure in consequence on the people is anticipated, and the conclusions stated in this report are the result of conferences held, not only with the officers of Government, but with the principal landlords of the districts affected. The detailed results of these conferences, both for the divisions as a whole and for each district, will, with the statistical data for the *kharif* and *rabi* harvests, be found embodied in the memoranda appended to this letter.

2. It is known to the Government of India that the rainfall of 1895 was unequal and ill-distributed in these provinces, while in certain districts it was deficient. The consequence was that both the *kharif* and *rabi* harvests of last year were in many districts unsatisfactory, while in Bundelkhand and in isolated localities of Oudh and Rohilkhand the crop failure produced distress, which in Bundelkhand amounted to famine. The extent of this distress, and the measures taken to relieve it, have already been reported to the Government of India in Resolution No. 3545S., dated 20th October last, recorded by the Lieutenant-Governor and Chief Commissioner. I am to invite a reference to that Resolution as introductory to the present report and as explanatory, to some extent, of the much severer pressure to which the same tract of country will, there is reason to fear, be again subjected during the coming year.

3. In Appendix A to this letter will be found a statement comparing the monthly rainfall from May to October of this year in each tahsíl of each district of the Provinces with the normal rainfall for the same period and area. The following statement, supplied by the Meteorological Reporter to Government, shows the percentage of deficiency for the year for each division:—

Table showing the percentage of defect from normal of the rainfall during the six months ending 31st October 1896 in the revenue divisions of the North-Western Provinces and Oudh.

Divisions	The period from 1st May to 31st October.		
	Actual total.	Normal total.	Percentage of defect.
Meerut (exclusive of Dehra Dún)	21·38	25·85	—20
Agra	13·21	28·46	—54
Rohilkhand	28·59	37·91	—25
Allahabad	19·24	33·73	—43
Benares	24·59	37·29	—34
Gorakhpur	23·37	41·68	—44
Lucknow	21·02	34·79	—40
Fyzabad	25·42	36·68	—31

Taking the provinces as a whole, the deficiency in the rainfall first became pronounced in July; but, as will be seen from the statement of rainfall appended to this letter, the June rainfall was also seriously defective in the districts in which the *kharif* crop has suffered most. In July the fall was less by one-third than the normal for that month. In August, owing to good rain in the first three weeks, the normal was reached or nearly reached in all divisions except Lucknow, in which division it was seriously deficient, Agra, and Allahabad. Beyond a few ineffectual showers, there was practically no rain to speak of in September and October. The rain therefore ceased just at the time when it was most needed to bring the growing crops to maturity.

From this general deficiency and early cessation of the monsoon rains, no portion of the Province has escaped injury, except the Meerut Division, and the parts of the Agra Division which are protected by canals. In the rest of the provinces the failure in the *kharif* crop varied, as will presently be seen, from a loss of one-fourth in certain localities to a loss of three fourths and over in others, the failure being greatest in those districts in which the rice crop, which is peculiarly affected by short rainfall, is most largely grown.

4. From Appendix III to the Board of Revenue's last report on the Land Administration of the North-Western Provinces and Oudh, copies of which were submitted for the information of the Government of India, a clear conception may be formed as to the normal condition of agriculture in these provinces. Broadly speaking, the crops grown are three in number—the autumn or *kharif* crop, the spring or *rabi*, and the *zaid* (or miscellaneous) crops which, covering an inconsiderable area, are harvested in the summer. The following table, compiled from the local returns, shows the areas usually cropped in the various divisions of these provinces (the Kumaun Division excluded):—

Division.	Cropped in *kharif*.	Cropped in *rabi*	*Zaid* crops.
	Acres.	Acres.	Acres.
Meerut	2,519,430	2,918,714	29,513
Rohilkhand	2,809,432	2,443,802	34,507
Gorakhpur	2,713,346	2,411,686	24,527
Benares	1,952,097	1,793,390	10,594
Allahabad	2,866,645	3,012,173	22,971
Agra	2,250,272	2,194,587	28,245
Lucknow	2,797,646	2,472,713	62,426
Fyzabad	3,373,178	2,804,092	62,990
TOTAL	21,312 046	20,051,157	275,773

The preceding figures represent with sufficient accuracy the areas usually sown with each crop; but this year the area sown in *kharif*, while in some divisions below the normal, was in others, notably in the Allahabad Division, above the usual quantity—a testimony to the endeavour made by the people to recoup themselves for the losses of the preceding years. Allowing for excess and defect (the precise extent of which will be apparent from the crop statistics for each district in the appendix), it may be said that the area cropped in *kharif* this year amounted to about 21 million acres. Excluding the canal-protected Meerut Division, in which the *kharif* harvest has been excellent and where the prospects of the *rabi* are good, the area cropped this year in *kharif* in the divisions affected by crop failure may be taken at 18½ millions of acres.

5. Attached to this letter is a map showing the extent and intensity of the failure in the *kharif* harvest. Generally speaking, it will be seen that the crops have been good, indeed in some districts excellent, in the Meerut Division and in the canal-irrigated portion of the Agra Division; that there has been considerable failure in part of Rohilkhand, the north of Oudh, and parts of the Benares and Agra Divisions; still more severe failure in the rest of Rohilkhand and parts of the Gorakhpur, Fyzabad, and Allahabad Divisions; and that the failure has been greatest in the Gogra Ganges Doab, which includes the greater part of Oudh and the district of Azamgarh, with outlying districts to the south.

The area least affected contains about 11,900 square miles with a population of 6,006,819; the area of considerable failure consists of 25,266 square miles with a population of 12,530,808; the area of severe failure covers 30,812 square miles with a population of 13,520,258, while the area of greatest loss comprises 25,217 square miles with a population of 13,494,498. In the first of these four portions into which the Province has been thus divided, the *kharif* harvest has yielded not less than three-fourths of the normal outturn [in the Meerut and Muzaffarnagar districts it has been a splendid crop]; in the second portion the outturn has varied from one-half to three-fourths; in the third region the outturn varies from one-third to one-half; and in the last tract the outturn has not exceeded one-third of the average, with particular localities of complete failure.

The circumstance, however, that Bundelkhand suffered from famine this year calls for its classification now with the worst area, although the *kharif* in three out of four of the Bundelkhand districts has been returned as a trifle over one-third of an average harvest. In this way the area of greatest failure is raised to 35,420 square miles with a population of 15,794,060.

6. Coming now to the probable outturn of the *rabi* crop, I am to say that in the Meerut Division, with 2,918,714 acres usually cropped in *rabi*, the prospects are at present distinctly good. Of that acreage one-fourth is irrigated from canals and is absolutely safe; a very large portion of the remainder is protected by wells; and there is also a large extent of low-lying land which retains moisture and may be expected to yield a good crop with the usual winter rains. The Director of Land Records and Agriculture, in his *rabi* forecast published in the last issue of the *North-Western Provinces and Oudh Gazette*, anticipates that in this division the ensuing *rabi* area will be 37 per cent. below the normal: but, according to more recent information, the Director's figures have been exceeded, and there is now no doubt that not less than three-fourths (if not more) of the normal area cropped in *rabi* will be sown in this division; and in considering the prospects of the coming year, the Meerut Division gives at present no ground for anxiety.

In regard to the remainder of the provinces, the first matter which, in considering the *rabi* prospects, arrests attention is the contraction of the area now in process of being sown as compared with the area which is usually sown in ordinary years. In ordinary years *dofasli* or double-cropped lands are usually sown in *rabi*; but, owing to the cessation of the rains before the *kharif* crops had been removed from these lands, it was not generally possible to plough them, and they will to a very great extent lie fallow this season. In the district and divisional memoranda appended to this letter, and in the detailed statistics on which these are based, the best local opinion is given as to the extent of land which will be cropped in *rabi* this year. That opinion is to the effect that, failing rain before the end of the current month of November, when the sowing season may be said to end, the *rabi* area will not exceed 9½ million acres or 54 per cent. of the normal area, amounting to about 17½ million acres. But the lands that will be sown are the best lands, and more than one-half are irrigated from canals, wells, and tanks. More wells are being made every day, which will have the effect, not only of extending the cropped area, but of protecting the area already sown. We have at present, owing to the extent of land protected by irrigation, a more or less certain promise of a crop from nearly 58 per cent. of the area sown, or 31 per cent. of the total area usually cropped in *rabi*; and this protected area is increasing every day by the construction of new temporary wells. Of course the protection will be less efficient if the winter rains fail and the wells run dry; but still there will be protection. On the whole, there is no reason to think that the ensuing *rabi* harvest will, even without favourable winter rains, be less than one-third of the normal crop, while with winter rains it will probably be well over one-half. If regard be had to the high pitch of prices, this means for the Province as a whole a substantial money value compared with what an average harvest would bring in at prices prevailing in an ordinary year.

It is of course to be understood that if sufficient rain were to fall before the end of the sowing time, the situation would be at once relieved. In that case the cropped *rabi* area would be very greatly increased and with favourable winter rain most, if not all, of our difficulties would be entirely removed in some, and greatly lessened in the remaining, districts.

7. The following table exhibits the present prospects of the *rabi* crop in convenient form :—

Division.	Normal *rabi* area in acres.	Probable rabi area of 1896-97.					Percentage of column 7 on column 2.
		Irrigated from canals.	Irrigated from wells	Irrigated from tanks.	Unirrigated, but likely, with winter rains, to yield some crop.	Total of columns 3, 4, 5, and 6	
1	2	3	4	5	6	7	8
Meerut	2,918 714	654,971	676,921		845 355	2 177,247	71
Rohilkhand	2,443,802	57,398	510,327		1,255,831	1,823,556	75
Gorakhpur	2,411,686	.	1,071,954		388,901	1,460,855	60
Benares	1 793,390		629,355		425 813	1,055 163	59
Allahabad	3,012 173	206,053	385 406		671,619	1,263,078	42
Agra	2,191,587	417,754	651,853		204 303	1,273 910	58
Lucknow	2,472,714	..	489,839		512,993	1,002,832	41
Fyzabad	2,804,092	.	918,775		593,073	1,511,848	54
TOTAL .	20,051 158	1,336,176	5,334,430		4,897,888	11,568,494	58

According to the returns more recently received from the Irrigation Department, the area that will be irrigated from canals in the *rabi* will be 1,559,000 acres instead of 1,336,176 acres as shown in this Statement.

8. The general facts upon which the condition of the provinces regarding food supply locally produced at the last *kharif* and ensuing *rabi* may be estimated have been set forth in the preceding paragraphs, but a very important factor in the question is the quantity of stocks in hand. From the information forthcoming it may be assumed with considerable confidence that the stocks of grain in the country are considerable. It is true that the prices of food grains have already attained a phenomenally high pitch. From Statement E, appended to this report, which compares the prices now current with those current at the corresponding period of an average year, it will be seen that the prices now prevailing are not only phenomenally high, but present that feature peculiar to famine periods of approaching equality between the prices of the coarsest and of the best grains. But although the pitch of prices is usually an indication of the quantity of stocks, the Lieutenant-Governor is, in the present case, unable to infer from the extreme dearness of provisions that supplies are deficient. His information leads him to believe that supplies are not deficient; that food will be forthcoming for those who have the money wherewith to buy it; and that prices will find their natural level when the prospects of the *rabi* harvest are disclosed.

The general conclusion which the Lieutenant-Governor draws is that with sufficient rain during the *rabi* sowing time the full or nearly the full normal *rabi* area will be sown, and most of our difficulties removed ; that if sufficient rain does not fall while it is yet time to sow the *rabi* on unirrigated lands, still, with the usual winter rains, there will be sufficient food in the country for the people if only it could be distributed in accordance with the people's requirements. In certain regions there will be abundance, and in other regions supplies will be deficient if local wants have to depend for their supply on local production. But of course no such stagnation of trade as that consideration implies need be apprehended. High prices will prevail throughout the year, which will enrich the cultivators of the canal-protected districts, and the fortunate holders of stocks elsewhere; but these high prices will stimulate importation when the time for sowing the *rabi* has passed without rain, and it has become certain that scarcity over great areas and famine over smaller, but still large, regions must prevail until next year's *kharif* crops ripen.

9. And these considerations lead the Lieutenant-Governor and Chief Commissioner to consider what effect upon the people of the provinces may be expected to follow during the coming year from the circumstances of crop failure and dear

prices which have been set forth above. In this connection I am to invite attention to the following extract (paragraph 77) from the Report of the Indian Famine Commission :—

"From what is known of famines in respect to which any materials for a detailed estimate exist, it is calculated that from a half to three-quarters of the ordinary outturn of the food grain of the year has been lost in the tracts most severely affected. It may therefore be inferred from the experience of the past that a year which yields more than 50 per cent. of a full crop will produce food enough for the population under the stimulus to economy caused by high prices, and that, taking into account the grain stores and the probable importation, there will be no such pressure as to require special measures of relief. When the crop is so reduced that the whole outturn of the year is diminished to 25 per cent. of a full crop, it may be taken as certain that intense famine will prevail. Great uncertainties, however, surround all estimates of failure of crops in such a country as India, and it may easily happen that the particular circumstances of a province will render the effect of a drought more than ordinarily disastrous. An estimated failure of even a third of the year's outturn will always demand the utmost vigilance and preparedness on the part of the authorities, as relief measures may at any moment become necessary."

In the opinion thus expressed by the Famine Commission the Lieutenant-Governor generally concurs. Applying this opinion to the local circumstances, and bearing in mind the qualification as to rain falling during *rabi* sowing time mentioned in the preceding paragraphs, His Honor's conclusion is that in the area of greatest crop failure, comprising about 35,420 square miles with a population of 15⅝ millions, there will be famine, whether we have winter rains or not, although its severity would be mitigated by timely winter rains improving the yield of the *rabi* crops. In the area of less serious crop failure, comprising about 20,600 square miles with a population of 11½ millions, there will be much distress, deepening in particular localities into famine; but here, too, the severity of the distress will be alleviated by sufficient winter rains. In the remaining area of canal protection and mitigated crop failure high prices will cause much hardship among certain classes; there will probably be a further contraction in private charity, which will send to the State poorhouses indigent people who in ordinary years find subsistence in the villages; and there will probably be some emigration of labourers during part of the year into the localities in which relief works are established. But the Lieutenant-Governor does not think, if the railways mentioned in paragraph 18 below are undertaken, there will be need for further public works in this area.

10. From the divisional and district memoranda appended to this letter it will be noticed that the District Officers, as a general rule, take a much more gloomy view of the situation and prospects than do the Commissioners of divisions, while the Lieutenant-Governor is perhaps more hopeful than are most of the Commissioners. The following tables show (in round numbers), division by division and reduced to units of one day's rations, the numbers of people for whom, (A) in the opinion of District Officers, (B) in the opinion of the Lieutenant-Governor, provision should be made in the event, *first*, of rain falling while it is yet time to sow the *rabi*; *secondly*, in the event of the usual winter rains falling (no rain falling while it is yet time to sow the *rabi*); *thirdly*, in the event of a total failure in these winter rains :—

A.—According to District Officers.

Division.	Number of people on relief for one day in case rain falls during sowing time.	Number of people on relief for one day in case the usual winter rains fall (no rain falling while it is yet time to sow the *rabi*).	Number of people on relief for one day in case the usual winter rains do not fall.
Rohilkhand	7 000 000	8,500,000	26,000,000
Gorakhpur	2 000,000	15,000,000	31,500,000
Benares	3,000,000	13, 00 000	22,000,000
Allahabad	22 500,000	50 000 000	82,000,000
Agra	2 000,000	15,000 000	30,000 000
Lucknow	19 500,000	40 000,000	98,500,000
Fyzabad	13,000 000	28,000 000	45,000,000
TOTAL	69 000,000	170,000,000	335,000,000

The first of these estimates is equivalent to a daily average of about 730,000 persons, the second to a daily average of nearly 2 million persons, and the third to a daily average of about 3½ millions, for three months. It must be stated, however, that the District Officers seemed to attach but little precision to the first estimate, and that, in their opinion, the third estimate, that is, the estimate for the worst case, had more pretensions to accuracy than the second.

B.—According to the Lieutenant-Governor.

Division	Number of people on relief for one day in case sufficient rain falls while it is yet time to sow the *rabi*.	Number of people on relief for one day in case the usual winter rains fall (no rain falling while it is yet time to sow the *rabi*).	Number of people on relief for one day in case the usual winter rains do *not* fall.
Rohilkhand	2,000,000	8,000 000	15 000,000
Gorakhpur	3,000,000	8,000,000	20,000,000
Benares	2,000,000	7,000,000	20,000 000
Allahabad	10,000,000	30,000,000	60,000 000
Agra	2,000 000	10,000 000	20,000,000
Lucknow	7,000,000	25,000,000	60,000,000
Fyzabad . . .	3,000 000	12,000 000	30 000 000
Total .	29,000,000	100,000,000	225,000,000

The first of these estimates is equivalent to a daily average of about 330,000, the second to a daily average of over one million, and the third to a daily average of about 2½ million people, for three months.

11 His Excellency in Council will not fail to observe the great difference between the estimates made by the Local Officers on the one hand and by the Lieutenant-Governor on the other. In his lower estimate of the difficulties His Honor was supported generally by the Commissioners of Divisions, but the estimates make no special claim to precision. In this connection I am to say that nothing struck the Lieutenant-Governor more during his conferences than the much greater importance which the District Officers attached to their quantifications of crop failure than His Honor was disposed to attribute to them. The District Officers—all gentlemen of earnestness and ability—were quite alive to the facts that the subordinate native officials who supply these estimates in the first instance are extremely prone to estimate too low; and that it is very difficult, from mere observation and without extended experimental cuttings and weighings, to be accurate in estimating a crop at two annas of a full average and not at four; but nevertheless they adhered to their opinions. The significance of this fact must not be ignored.

The Lieutenant-Governor found confirmation for his view that even in the worst tracts the *kharif* has not been altogether so bad as represented by the fact that, except in a few localities which suffered severely last spring and summer, there are at present no general or widespread signs that the rural population is in a distressed condition. He has, indeed, been told by some native gentlemen that the people are already on short commons and are saving their food against a period of still greater pressure; but the fact remains that, except in Bundelkhand, in part of Oudh, and in a few other isolated tracts of severest crop failure, the people do not seek employment on relief works; and the forced sales of jewellery and of cattle (though taking place), the increase in the number of beggars, and the increase of crime are not so great as one would expect to find if the Province were passing under the shadow of the overwhelming disaster which the estimates of the District Officers imply. That a period of famine in several districts and of great distress for great numbers is imminent if rain does not fall within a few days, there is no doubt; but that, if we have the usual winter rains, it will attain the magnitude apprehended by the District Officers the Lieutenant-Governor does not believe. But

he has not thought it right to give effect to his own ideas on this matter to the extent of curtailing the provision to be made for relief in the event of the worst anticipations being verified. Sir Antony MacDonnell hopes that his own expectations may be verified. but he has not trusted to chance, and the relief system established will, he believes, fully respond to the larger strain. The demands upon it have already begun, there being at present 100,000 persons on relief.

12. The preceding paragraphs have dealt with the reasons for anticipating that distress will occur, and also with its probable extent and severity. I am now to state the measures which have been taken to meet the difficulties which confront us. These measures may be divided into two broad classes: first, measures devised with the object of preventing famine; second, measures concerned with the relief of famine where it occurs.

Under the first class come (*a*) the advances made for the construction of wells and for the purchase of seed; (*b*) suspensions of revenue; (*c*) facilitation of private trade. In most parts of these provinces irrigation from wells is generally practised, and, wherever the nature of the subsoil permits, temporary or *kachchá* wells are usually made by the people. In order to stimulate activity in this direction and thus in some manner neutralize the effects of the short rainfall, advances to the extent of 18 lakhs of rupees were made since the 1st October partly for the construction of wells, partly for the purchase of seed. The effect of these advances has been everywhere excellent, and the following passage taken from a report by the Commissioner of the Fyzabad Division, dated 12th November, may be taken as applying to all parts of the provinces where the construction of temporary wells for irrigating purposes is practicable:—"I would invite attention to the marked spirit of energy aroused amongst the agricultural classes by the system introduced of giving timely advances for earthen wells to village communities on the joint security of proprietors and tenants. In many villages a system of co-operative labour has been organized out of the funds so advanced, with the very best results, every man having an interest in seeing that the money is devoted to the purposes for which it was given. The stimulus so imparted has been widespread and has led indirectly to the construction of many wells other than those paid for out of Government funds. The people have thus responded to the aid so opportunely given them in a manner that must be seen to be realized; and the heart given them has enabled them to meet the crisis with a spirit that in 25 years' residence in India I have never seen equalled." The returns of the number of temporary wells constructed by means of the Government advances, by means of the funds which the partial suspension of the *kharif* instalment of revenue has permitted the landlords to devote to the same object, and from other sources, are not yet complete, but from the figures received it seems that in five out of the seven divisions affected the number has already reached 225,000. And doubtless many more will be made. In the estates under the management of the Court of Wards advances have been made liberally from the funds at their disposal in furtherance of this same object. All of these wells may not last throughout the entire cold season; but the probability is that their construction will add about a million acres to the *rabi* area which, failing rain, will this year yield a crop. On this head, therefore, the measures adopted with the approval of His Excellency in Council have proved highly successful.

13. In connection with the subject of advances by Government, the great assistance which the people are deriving from the opium advances must not be overlooked. According to statements submitted by Mr. Wright, Opium Agent, Benares Agency, these advances have already amounted to R34,99,510, besides R97,598 for wells. Should the opium crop verify its present good promise, the cultivators should receive before next June a further sum of about 90 lakhs of rupees in these provinces. The money already advanced, *i.e.*, 35 lakhs in round numbers, has been paid out in the ordinary course of the business of the Opium Department and independent of the threatened scarcity: but obviously these advances have very greatly improved the condition of the cultivators to meet the pressure of hard times.

14. A minor method of increasing the food-supply of the Provinces, which this Government with the assistance of the Government of India has

adopted, is the purchase of potato and carrot seed for distribution to the various districts which were unable to provide themselves with an adequate supply of these seeds. Potatoes and carrots are widely used and favourite vegetables in these provinces, and they can be raised in garden plots by well irrigation. They yield food, to which the people are now accustomed, in vastly larger quantities than cereals grown in the same area would yield. The potato seed was procured locally in districts not affected by scarcity; but the local supply of carrot seed in the quantities required was wholly insufficient. The resources of the English market have been drawn upon (although we do not expect that the English will be so good as the acclimatized seed). It is a curious fact that the resources of the English market were able to supply but little more than one-half of the quantity required. The seed usually sold in ounces or pounds, we wanted in tons.

15. The second of the preventive measures was the suspension of revenue. The suspensions of revenue allowed up to date amount almost exactly to 80 lakhs of rupees. Besides this, the new assessments in Oudh, which were to have come into force this year, amounting to 6¾ lakhs of rupees, and the balances outstanding in the Allahabad Division owing to the Bundelkhand famine, amounting to 14 lakhs of rupees, have been postponed. The total relief thus given to the landlords of these provinces exceeds one *crore* of rupees.

This relief has had a most excellent effect upon the capacity of the people to withstand the pressure of hard times, while it has been most opportune for the landlords. No remissions of revenue have yet been made, and the Lieutenant-Governor and Chief Commissioner proposes to make none until, from knowledge of what the coming months may bring forth and of the prospects of the succeeding year, he is in a position to judge of the material condition of the country and the chances of its speedy recovery from the existing depression.

16. In regard to the question of food supplies and private trade, the only measure which the Lieutenant-Governor and Chief Commissioner has been able to suggest was the reduction of railway freights on food stuffs consigned to these provinces. All that could be done in this way has been done by the Government of India and no further measure seems practicable, unless a departure be made from the principle of non-intervention with private trade. But the Lieutenant-Governor is strongly averse from such a departure and has publicly expressed his aversion It is true that the prices of food grains throughout these provinces at the present time are phenomenally high and that the lists of prices current present many of the features, notably that of approaching equality between the prices of the coarsest and the best food grains, which characterize famine times. But trade at the present time is active. Without pretending to accuracy on the question of food stocks available in the province—a matter on which, indeed, accuracy is unattainable—His Honor believes that there is an ample supply for three or four months, and even should this supply not receive the full accretion from the *rabi* crops which is to be reasonably expected, still he thinks that private trade may be fairly trusted to make good the deficiency. At all events, there is nothing in the present condition of things which induces Sir Antony MacDonnell to recommend any interference with the free play of private trade.

17. Coming now to the measures taken for dealing with actual distress (which has already shown itself in the Lucknow, Benares, and Allahabad Divisions), I am to offer the following explanations Under the Famine Code the relief system falls under the following heads:—

I.—Employment on large relief works entered on the administrative programme (article 17, Famine Code) and managed by the Public Works Department or similar agency.

II —Employment on small relief works [article 65 (*a*), Famine Code] controlled by District Officers.

III —Gratuitous distribution of relief in poorhouses, State kitchens, and hospitals to the poor and infirm unable to work, until they can be sent to their villages or become fit for labour.

IV.—Employment at their homes of respectable, but indigent, people who are debarred by national custom from appearing in public.

V.—Gratuitous distribution of relief at their homes to persons of respectable position and family who are reduced to starvation.

18. The employment offered by the Public Works Department, [head I], will consist in the repair of old and construction of new district and provincial feeder roads, and of large and roadside tanks and reservoirs, in the construction of the embankments of new lines of railway, and in the extension of the existing system of canal works. The roads which will be undertaken or repaired have been selected with a view to improving and completing the system of inter-district communications and railway feeder roads. This scheme was discussed some time ago, but work on it was postponed owing to the poverty of local funds. The present opportunity will be made use of in order to give effect to the policy which had been previously considered. In regard to railways, the Lieutenant-Governor is in hopes that the Government of India may see their way to beginning work not later than the commencement of the new year on the Agra-Delhi line, the Ghaziabad-Moradabad line, and the Shikohabad-Farukhabad line. A good deal of work yet remains to be done on the extension of the Bengal and North-Western system in the Gonda, Azamgarh, Ghazipur and Ballia districts, and in the extension of the Oudh and Rohilkhand Railway from Rae Bareli to Benares. These lines will afford suitable employment in portions of the country which will need relief works; later on it may be desirable to afford relief in Dehra Dún by undertaking the Hardwár-Dehra extension of the Oudh and Rohilkhand Railway line.

The Lieutenant-Governor has been in communication with the Agent of the Bengal and North-Western Railway as to further possible extensions of that line which might be serviceable as famine relief works, and Mr. Izat has promised to submit a scheme for the consideration of Government at an early date. On this point a further reference will be made to the Government of India should it appear desirable.

19. The canal works on which the Lieutenant-Governor intends to give employment are extensions of the Lower Ganges and Eastern Jumna Canals which have already been projected and some of which are now in hand. A special local enquiry has been set on foot in respect to the Sarda Canal scheme in Oudh; but Sir Antony MacDonnell does not think that the enquiry will be so far advanced or the preliminary negotiations with the Government of India and the Taluqdars of Oudh so far concluded as to warrant an expectation that this great scheme can be turned to account as a famine relief work.

The number of labourers for whom employment is provided by the present Public Works Department programme is as follows, division by division (Meerut and Kumaun omitted):—

Division.	Number of labourers reduced to units of one day for whom work on district and provincial roads is available.
Rohilkhand	27,478,440
Gorakhpur	57,545,160
Benares	30,835 680
Allahabad	74,682 880
Agra	29,160,000
Lucknow	31,834,680
Fyzabad	26,063,160
TOTAL	277,800,000

This gives a daily average of 3,086,000 persons for three months

It will be noticed that the programme suffices for the numbers which, according to the Lieutenant-Governor's worst anticipations, may be expected

to come upon our hands except in Oudh, though not sufficient if the worst anticipations of the District Officers are realized. But this programme takes no account of the railway and canal works referred to above, nor of the village works which it is the Lieutenant-Governor's intention to employ in the way I am now to explain. With those works added, the provision is ample for all contingencies..

20. In the system of the Famine Code small relief works "should be utilized in the early days of a scarcity," while large relief works "are the backbone of the system of relief in the later stages of the famine." The experience which Sir Antony MacDonnell has had in the administration of famine relief leads him to differ from the Code procedure on this point and to claim a much wider discretion as to the order of employing these methods of relief. It is, perhaps, on the present occasion, unnecessary to dwell on the numberless embarrassments attaching to the prosecution of large relief works in the plains of India during the hot months of the year. These embarrassments were, His Honor cannot doubt, present to the minds of the framers of the Famine Code; but they were driven to incur them in the belief that the successful employment of large numbers of people on small works near their homes was impracticable. But this Government believes that there is nothing impracticable about it if the administration only succeeds in associating the landlords and village headmen with it in the control and supervision of the village works. Our experience in Bundelkhand last year has abundantly proved that the system of village works controlled by men of local influence is not only an effective method of affording relief, but a very economical method. It is true that instances have occurred, and may again occur, in which village landlords entrusted with the distribution of relief funds have abused their trust. But the public feeling is against them; and a distressed village will not be slow to bring the shortcomings of the landlord in this connection to official notice should his backsliding escape the scrutiny of the supervising officers.

But even if this system of village works were not economical, it would still in certain circumstances have advantages over the system of the Code which, leaving no discretion, makes "large relief works the backbone of the system of relief in the later stages of a famine." The difficulties connected with water supply in the hot weather months, the certainty of cholera and other epidemic disease, the frequent recurrence of panics, and the demoralization attending the concentration within comparatively small areas of vast masses of people unaccustomed to discipline and control, produce dangers which should, when possible, be avoided. In addition to this, there is the consideration of the extreme unproductiveness of famine labour during the hot months of the year. These disadvantages present themselves in a much less aggravated form during the early months of the year, when the climate is temperate, and control, especially by European officers, may be more constant and effective. For these reasons, the Lieutenant-Governor, while maintaining an adequate complement of works under the Department of Public Works, intends to pursue, on a larger scale, the policy which he found effective in Bundelkhand last summer, *viz.*, the policy of expanding the system of village works on the approach of the hot weather, drawing the people from large works back to their homes and employing them in their own villages, the water supply and general sanitary condition of which he thus hopes to improve.

On the present occasion the Lieutenant-Governor and Chief Commissioner is encouraged to follow this plan sketched above by the arrangement which he has provisionally made with the Taluqdars of Oudh and many of the landlords in the North-Western Provinces with whom His Honor has conferred. The arrangement is that the Government should ascertain the various works necessary for the improvement of the water supply, irrigation, and general sanitary condition of the villages; should estimate the cost of effecting these improvements; and then should carry out the works as measures of famine relief through the agency of the landlords, though under the general control of the officers of Government. The necessary funds would be advanced to the landlords on condition of their repaying a proportion which might in some cases be three-fourths, in some cases two-thirds, and in some cases

B 2

one-half of the sum advanced, the balance being remitted. In this way the Government and the landlords will be associated together on suitable terms for the relief of distress, and the danger obviated to a large extent of relief intended for the distressed being intercepted in the process of distribution. Lists have been prepared, and more are in course of preparation, of village works which, when executed, will add to the comfort and the material prosperity of the people.

Some landlords have expressed to the Government their preparedness to accept these advances on condition of repayment in full. But these are matters of detail which will resolve themselves in practice, and nothing seems, in His Honor's opinion, to militate against the scheme, unless it be the indebtedness to Government on the landlords' part which the arrangements will entail and the difficulty of finding sufficient work in all villages for all in need of relief. But the former difficulty is clearly not insuperable, while the latter difficulty, whenever found to be real can be easily met by continuing relief on a Public Works Department work, which would be supplementary to the system of village relief. No hard and fast rule would be laid down, but each system would be worked according as it seemed more suitable to the requirements of the case and of the particular locality

21. In regard to the third class of measures of relief mentioned in paragraph 17 above, *viz*, poorhouses, State kitchens, and hospitals, I am to say that the principles laid down in Chapters VIII and IX of the Famine Code for the regulation of these institutions will be strictly adhered to The poorhouse and the State kitchen are not intended as permanent asylums for famine-stricken people; they are merely intended as places of refuge in which the waifs and strays may be received and supported until arrangements can be made for sending them to relief works or to their villages. One of the first indications of approaching famine is an increase in the number of beggars. Private charity, which in ordinary years in an Indian village is liberally dispensed, becomes contracted when hard times come, and the result is that beggars gravitate to the towns and other chief centres. This phase has already appeared in these provinces, and poorhouses have been already established at all these towns and centres for the reception of such wandering mendicants and other indigent persons Others are in process of being opened to meet demands as they arise. But as time goes on the poorhouses should become of less importance in the general scheme of relief, as the inmates will on convenient opportunities be sent to their homes. Attached to each poorhouse there is a hospital in which the sick receive medical treatment.

22. The fourth and fifth heads of the system of relief referred to in paragraph 17 above fall under Chapter X of the Famine Code. In every town and in many villages there are respectable people in reduced circumstances whose women are debarred by national custom from appearing in public, while the men also have not been accustomed to such labour as can be offered on relief works. It is true, no doubt, that in past famines, when starvation had touched these people, they came upon the Government relief works, where they were employed, as far as possible, according to their castes and aptitudes.* But it is consonant with native feeling that relief should be distributed to these classes in their own villages, if this can be done consistently with reasonable economy and a due outturn of work. This is one of the chief reasons for establishing the system of relief circles prescribed in Chapter IV of the Famine Code The instructions contained in that chapter for the division of each district into relief circles, and the appointment of officers to the charge of circles, have been complied with in each district of these provinces in which distress is anticipated, and the lists of people entitled to gratuitous relief contemplated by Chapter V of the Code are ready in some divisions in which distress is imminent and are in process of preparation for others. It is not the Lieutenant-Governor's intention that the provisions of Chapter V should be rigidly interpreted; but that the chapter should be administered in the spirit which pervades the Code—the prevention of loss of human life.

* See paragraph 15 of the Lieutenant-Governor's Resolution on the Bundelkhand Famine, referred to in paragraph 2.

23. Article 53 of the Famine Code enables the District Officer to associate the Local or District Board with himself for the purpose of advising and assist-

ing him in matters connected with the prevention and relief of famine. It is true that in some backward districts, as in Bundelkhand, these Boards contain the intelligence of the district, and no practical good could come from going outside them for relief committees. But in most districts the case is otherwise, and accordingly local committees have been established in most districts in these provinces, more especially for the purpose of supervising the distribution of relief under Chapter X of the Code. The principle in view is the association of men of local influence with the Government in the distribution of gratuitous relief, whereby the abuses inseparable from dependence on subordinate petty officials may be, as far as possible, neutralized.

24. Next in importance to the provision of relief for the people is the question of the fodder supply for cattle. In Appendix F attached to this letter will be found a statement drawn up under the Lieutenant-Governor's orders in consultation with the Conservators of Forests in these provinces as to what can be done and what it is proposed to do for the grazing of cattle in the Government forests should a scarcity of fodder make itself felt. In the event of its being necessary to open the Government reserves for grazing in the way set forth in the Conservators' memorandum, it would probably be necessary to suspend temporarily the levy of grazing fees.

25. It is essential that the ordinary district executive staff should be strengthened when apprehension of imminent and serious scarcity exists. It will be seen from the various district memoranda appended to this letter that sufficient action for the present has in the case of each district been taken in this direction. Should the scarcity not develop very greatly, the resources of the Province may suffice to meet the call of the various districts for men: otherwise the provincial staff will not be sufficient, and the Lieutenant-Governor must in that case apply for assistance to the Government of India The staffs which will need strengthening are—

(1) The ordinary district executive staffs.
(2) The Medical staff.
(3) The staff of the Public Works Department.
(4) The Accounting staff.

In regard to (1), the most efficient assistance would consist of civil officers accustomed to the ordinary executive work of a district. But if other Provinces can spare no men, the Lieutenant-Governor will be satisfied by the temporary deputation of young commissioned military officers acquainted with Urdu or Hindi, the vernaculars of these provinces. So far as His Honor can at present see, his maximum requirements in this way would be met by the deputation of fifty such officers.

In regard to the Medical staff, the Inspector-General of Civil Hospitals in these provinces has been for some time in communication with the Director-General, Indian Medical Service, and the Principal Medical Officer, Her Majesty's Forces in India, and with the medical authorities in other Provinces, and Surgeon-Colonel Warburton has, His Honor is glad to say, received assurance of assistance as regards both the superior and subordinate grades of the Medical Service On this head, therefore, the Lieutenant-Governor thinks it unnecessary at present to trespass further on the attention of the Government of India.

In regard to the Public Works Department staff, the extent to which assistance will be required must depend first on the development of distress and next on the extent to which the system of village works can be expanded. His Honor has already made arrangements through the Board of Revenue for the enrolment of four hundred men of the naib tahsildar class for employment as officers in charge of large works under article 77 of the Famine Code, as our Bundelkhand experience (see clause 5, paragraph 28 of the Resolution dated 20th October on the Bundelkhand Famine) proved the great advantage resulting from the employment of officers of this class under the Public Works Department. But the provincial resources will not suffice to meet the demand for Public Works officers in case of severe famine, and in this case His Honor hopes to receive assistance from the Government of India. In this case he would put his maximum requirements at thirty engineers.

In regard to the Accounts, there is the utmost advantage in keeping accounts and auditing them from the very outset in a regular systematic way. For all expenditure incurred by the Public Works Department that Department will provide the funds and account for them; and it will be the Examiner's duty to see that his establishments are expanded sufficiently to meet any extra strain thus thrown upon them. But no organization exists in the Commissioners' or Collectors' offices to meet the pressure which may be anticipated, and an organization must be established. Accordingly the Lieutenant-Governor has already applied to the Government of India (Financial Department) for the services of two enrolled officers, whose duty it will be to visit in turn and constantly each district in which relief operations are in progress and elaborate and maintain a system of account and audit, whereby there may be no difficulty afterwards in accounting for the expenditure incurred.

26. The preceding remarks have set forth the action which the Lieutenant-Governor has taken and proposes to take on the chief points connected with the relief of distress in these provinces. There are many smaller, though not in themselves unimportant, matters which have been attended to, but with the relation of which it is unnecessary to load this report.

AGRICULTURAL PROSPECTS IN THE PUNJAB.

Letter from the Government of the Punjab, to the Government of India, No. 13, dated 23rd November, 1896.

In the circular of the Government of India, No. 5—48, dated 2nd March 1892, the rule quoted in the margin, which is reproduced in Section 45 of the Punjab Famine Code, prescribes the submission to the Government of India of a general report on the conditions of tracts suffering from failure of crops.

III.—As soon as the information is available, a general report should be submitted, giving an account of the economic condition of the affected districts or groups of districts in ordinary times, and indicating the crops affected and the extent to which they have suffered, the contingencies on which the probable duration of distress depends, the position of the affected area as to local trade, food supply and communications, and any other general information likely to be instructive.

Present report not confined to particular districts.

2. The Government of India have already been made aware from the weekly telegraphic reports that famine relief works are in progress in the Phália Tahsíl of the Gujrát District, that test relief works have been opened in the Karnál District, and that relief works are about to be commenced in the Hissar District. In addition to these tracts the districts of Rohtak and Umballa (southern tahsíls) have just been reported to Government as areas in which scarcity is prevalent and famine is imminent; and the Commissioner of Delhi has directed the submission of similar reports under Section 43 of the Famine Code for the remaining plains districts of his Division. The Lieutenant-Governor does not, however, in the present report propose to deal only with the circumstances of the tracts so affected The present scarcity or famine appears to have visited practically the whole of India; and though particular districts may, from their having obtained timely rain or in consequence of the large proportion of irrigated area which they contain, have enjoyed good harvests and produced a sufficiency of grain and fodder for their own requirements, yet such tracts in the present days of improved communications cannot remain isolated from the effects of the generally prevailing scarcity; and high prices with their attendant consequences make themselves felt even in localities so favoured. Sir Dennis Fitzpatrick's view of the situation thus created is explained in the following extract from a circular issued to District Officers a fortnight ago:—

The period during which sowings for the rabi are possible is now rapidly passing away without any sign of rain, and a point may very soon be reached at which a wide spread failure of the rabi crop will be a certainty. The result of this would in all probability be that prices, high as they are now, would go up much higher with a sudden bound, and that though there might be ample stocks in the country to last for a long time to come, vast numbers of people would not be able to pay the price of their daily food, and would be thus thrown on our hands.

2. The Lieutenant-Governor desires to draw the attention of Commissioners and Deputy Commissioners to the possibility of this happening very suddenly and very soon, and to remind them that, owing to the failure of the crops extending over so many parts of India and to the great facilities of transport created of late years tending to equalize prices all over the country, this result may come about very suddenly and very soon not only in those tracts where the crops fail for want of rain, but also in tracts which may be regarded as from the agricultural point of view well protected It is therefore most necessary that *everywhere* preparations for relief should be so complete that relief measures could be started at a moment's notice.

For the above reasons it is now proposed to discuss the situation for the Province as a whole.

Causes of the present situation.

3. It is apparent that the present distress is due to two causes, *viz.*—

(1) Failure of harvests within the Province itself; and

(2) Rise in prices caused partly by (1) and partly by the conditions existing in other parts of India.

It will be convenient to deal with these two causes separately.

Normal crop statistics for the Province.

4. The normal* area of matured crops in the Punjab is as follows:—

1	2	3	4
Harvest	Irrigated	Unirrigated	Total.
	Acres.	Acres.	Acres.
Kharif	2,5 2 219 (25)	7,591,037 (75)	10,154,146 (43·5)
Rabi	4,515 983 (34)	8,684 4 5 (66)	13,200,408 (56 5)
Total	7 078,202 (30)	16,276,352 (70)	23,354,554 (100)

Note.—The figures in brackets in columns 2 and 3 represent percentage of irrigated and unirrigated to total area on which crops have been matured, those in column 4 indicate the relative proportions of kharif and rabi.

It will be seen from the above table that the rabi is the most important crop both in point of the actual area sown and the greater predominance of the edible grains, that 30 per cent. of the crops grown are irrigated, and that the largest proportion of irrigation takes place in the rabi. In different parts of the Province, however, the proportions indicated by the percentages shown in the table vary considerably. Thus the proportion of crops irrigated to total crops in the six Divisions is as follows:—

Division	Percentage	Division.	Percentage.
Delhi	11	Ráwalpindi	31
Jullundur	26	Peshâwar	35
Lahore	57	Derajât	41

The Delhi Division is thus much more dependent upon rainfall, and therefore a much more precarious tract than any other portion of the Province. In respect of the greater importance of the kharíf harvest the Delhi Division also differs from the rest of the Punjab. There are only seven districts in the Province in which the normal kharíf area exceeds that of the spring harvest. Three of these, Simla, Kángra and Hazára, are in the hills, and can generally count on a sufficiency of monsoon rain; a fourth, Dera Ghâzi Khan, is largely dependent upon inundation canals The remaining three, Hissar, Rohtak and Gurgaon, are in the Delhi Division, and the kharíf harvest in these three districts, which depends almost entirely upon the monsoon rains, is in area on the average about double the rabi. In the remaining districts of the Delhi Division the normal rabi area only just exceeds that of the kharíf harvest. The average area under wheat in the whole of the Delhi Division is less than the average area of this crop in the Dera Ismail Khan and Bannu Districts together, and amounts to only 9 per cent. of the total area under the crop It will therefore be understood that this Division is more affected by bad kharíf harvests than by failure of the spring crops; and, as of the past three harvests which have been much below the average two are kharíf harvests, the calamity is most felt in this part of the Province, and perhaps most of all in the Hissar District, in which the kharif harvest in a nor-

* Based on the returns of 10 harvests for kharíf and 11 harvests for rabi.

mal year amounts to 70 per cent. of the total crops and pays five-sixths of the revenue of the district.

Abstract of information contained in District reports.

5. Reports as to the character of past harvests and as to present agricultural prospects were called for from all Deputy Commissioners last month. These have now been received, and an abstract of their contents in tabular form is annexed to this letter. The percentages shown in the abstract indicating the próportion of the area of crops in each harvest to the normal area do not of course make any allowance for poorness or excellence of outturn as distinguished from area matured. In the districts of Jhang and Gujránwála there has been a considerable extension of cultivation on the Chenab Canal and the percentage figures for recent harvests are on that account largely swollen.

Character of rabi harvest of 1895.

6. Generally speaking the spring harvest of 1895 was a good one. In area it was 10 per cent. above the normal and the outturn was estimated by the Director of Land Records and Agriculture as an average one.

Character of kharíf harvest of 1895.

7. The kharíf crop of 1895 was a bad one. In area it was 15·5 per cent. below the normal, and was rated by the Director of Land Records and Agriculture as a 12-anna crop. The Hissar District suffered most, the matured area being only 50 per cent. of the normal. Those districts in or near the hills which are generally in danger of suffering from an excess of rain did well. There was a great lack of fodder in most districts.

Character of rabi harvest of 1896.

8. The rabi crop of 1896 may be described as decidedly bad. In area it was 20·6 per cent. below the normal. Not only were sowings greatly contracted owing to the early cessation of the previous monsoon, but the winter rains in December and January failed largely. The contraction of the unirrigated area amounted to 37·7 per cent. as compared with the average of 11 years, but this was to some extent compensated for by an increase of 543,750 acres (or 12 per cent. above the normal) in the irrigated area. In fact the irrigated area, which on the average amounts to 34 per cent. of the whole, in this season amounted to 48 per cent. of the cropped area. The proportion of matured crops to normal area in the six Divisions was as follows :—

Division.	Percentage	Division.	Percentage.
Delhi	61	Ráwalpindi . . .	83
Jullundur	86	Peshâwar	83
Lahore	87	Derajât	90

The Delhi Division, as in the previous season, suffered the most. In no tract except the Chenab Colony was the harvest a good one. In the Sharakpur Tahsíl of the Lahore District, a purely unirrigated tract, it was found necessary to start relief works which were continued until the autumn of the year. They have not been re-opened as the work on the Gugera Branch of the Chenab Canal in the adjoining district affords employment to residents of this tract.

Present kharíf harvest.

9. The area returns of the present kharíf harvest are not to hand yet, but are being compiled, and a detailed report on the character of the harvest will shortly be submitted. It, however, may be stated that except in a few localities the crop is a bad one. The estimates of the District Officers as to the character of the harvest are noted in column 5 of the annexed abstract, but can be regarded only as estimates of the roughest description. The Director of Land Records and Agriculture has examined these estimates and has recorded a note thereon which is enclosed, but which I am to say His Honor is inclined to think takes too sanguine a view of matters. There has, it should be stated, been a great increase in the area irrigated from Government canals which will to some extent counterbalance the falling-off in the area of rain crops.

10. As regards the prospects of the coming rabi, the early failure of the monsoon rains and the almost total absence of rain since the end of August are undoubtedly very serious features in the situation, as implying very contracted sowings on rain lands. In this respect the prospects are as unfavourable for the spring crop as they were on the same date last year, but even yet there is a hope that if rain fall in November or in some parts of the Province early in December, which is however not likely, there will be a considerable area of unirrigated land sown, especially in the northern and western districts of the Province. Even if this does not happen, it is not to be assumed that the usual winter rains will fail. Should they come at the usual time and be sufficiently copious, a large area of crops that would otherwise fail may be expected to reach maturity, especially in the case of late baráni sowings and irrigated crops on overworked wells and on inundation canals, as well as of crops on *sailáb* lands. The irrigated area also may be expected to exceed even that of last year, as the tendency in this direction is progressive. In the Delhi Division, however, the ordinary time for sowings has already passed, and apart from this circumstance the rabi crop in the distressed tracts is of minor importance as compared with the kharíf, and its success would not so much improve the situation as its failure would aggravate it.

Prospects of coming rabi harvest.

11. Adverting now to the other cause of the present distress—the rise in prices—this is undoubtedly as much due to failure of crops in other parts of India as to short harvests in the Punjab. The present unfavourable prospects of the coming rabi are without doubt a factor in the situation, as speculation and market prices are influenced as much, if not more, by future prospects as by past events. The speculation or gambling—for this it often amounts to—which is reported to be taking place on a large scale among grain dealers, is regarded by the Native Press and by the Native public generally as the main cause of the present famine prices. It is no doubt largely owing to this that the prices are raised and kept high. The cause of this state of things is the anticipation of an insufficiency of stocks and the absence at present of any favourable agricultural prospects. Nothing but the appearance of some favourable feature, such as an early and wide-spread fall of rain in tracts which would benefit thereby, is likely to bring about that turn of the market which would convert those who bought for a profit into sellers to secure that profit or to save a loss. When the highest point will be reached it is difficult to say, but if the speculation is as wide-spread as is reported it seems likely that when the corner is turned and prices begin to fall there will be a scramble to realize profits or avoid losses.

Rise of prices.

12. As to the extent to which the depletion of stocks of grain is responsible for the present high prices it is difficult to obtain any accurate information. In the reports which Deputy Commissioners have submitted, as noted in the enclosed abstract, attempts have been made to estimate the stock of grain in each district, but, with the free flow of produce from surplus tracts into distressed areas no estimate of the stocks in existence at any moment in a single district is of much value. The Director of Land Records and Agriculture in an addendum to the note referred to above has calculated the outturn of past harvests, and deducting therefrom the amount of grain estimated to have been consumed and exported, he arrives at the conclusion that, apart from the produce of the present kharíf and the coming rabi harvests, there is a sufficient stock of grain in the Province to carry us on to the 15th of April next. The kharíf now being garnered is estimated to provide for the consumption of a further three months, after which there would be the whole of the produce of rabi 1897. There are, however, so many speculative elements in such calculations that it would be unsafe to rely much on them.

State of grain stocks.

13. The extent to which recourse will be necessary to relief works cannot at present be very well gauged, and the estimates given in our returns of the number of persons we are likely to have on our hands in a season of distress in each tract are, His Honor thinks, purely speculative. For the reasons explained in paragraph 2 above, relief works may, owing to high prices, be found necessary in districts in

Relief works for what classes required.

which the character of the harvests alone would not point to the necessity of any such measures. In such districts, and indeed in any district, the chief class for which relief works may be expected to provide employment is that of agricultural labourers or *kamins*. In 1886 a confidential inquiry was made in this as in other provinces into the allegation that a large proportion of the population habitually suffer from insufficiency of food. In the report submitted to the Government of India (Punjab Government letter No. 263 S., dated 23rd June 1888), which was based on inquiries made in the districts, Sir James Lyall, while repelling the above assertion as regards the population generally, was of opinion that in insecure tracts when crops fail badly or are scanty for two or more seasons the village artizans, field labourers and some of the poorer tenants show signs of insufficient diet. These together with the poorer classes in towns who suffer from high prices are the classes who will first be driven to the acceptance of famine wages on relief works. The experience up to date in Gujrát where relief works are in progress is that very few agriculturists apply for work. In Karnál upon the test works which have been started according to recent reports agriculturists have not yet applied for employment. No reports have yet been submitted from Hissar. Generally it may be anticipated that if the winter rains do not fail such relief works as may be started will be mainly required for workers of the *kamin* classes, though in some districts considerable numbers of the poorer agriculturists too will be driven to look for employment. If, however, the rabi harvest proves a failure, relief operations for agriculturists as well as for other classes may be necessary on a very large scale. In this connection, however, it must be borne in mind that in a season like the present those zamíndár's whose holdings are irrigated, especially from a perennial canal, must reap very large profits, and it is only reasonable to suppose that a portion of those profits would find its way in some shape or other into the hands of their poorer neighbours.

State of preparedness.

14. It is of course necessary, while not at present assuming that the next rabi harvest will be a failure, to make preparations for such a contingency. For the past year the Lieutenant-Governor has been constant in directing the attention of District Officers to the preparation and revision of relief programmes for the insecure tracts mentioned in the list on page 6 of the Punjab Famine Code. For most of these fairly adequate programmes exist, and where this is not so steps are being taken to add new works. The preparation of relief programmes for districts not mentioned in the above list has been directed by the Lieutenant-Governor in the circular referred to in paragraph 2 above It is believed that under the guidance of Deputy Commissioners District Boards generally are alive to the situation, and will by carrying out ordinary works of a suitable description afford sufficient employment where more extensive relief measures are not required. The work on the Chenab Canal is of immense value in affording employment to the inhabitants of the distressed tract in the Lahore and Gujránwála Districts, and it even attracts labourers from the Phália Tahsíl of Gujrát. His Honor is about to address the Government of India with a view to the provision of additional funds to admit of this work being continued and extended as a relief work. In general, His Honor prefers that money should be spent on large works of this description which must be constructed some day or another than that it be frittered away on small works of much less importance and utility.

Immediate outlook as regards relief operations.

15. Pending the uncertainty as to the future of the next rabi, it will no doubt be necessary to continue the relief works in Gujrát. The numbers on the test works in Karnál are increasing week by week, and it will soon be necessary to adopt relief measures in that district under the Code rules. In Hissar the relief works about to be commenced will probably have to be kept open for several months, and the condition of Rohtak in this respect seems similar. As regards these districts and the Delhi Division generally it was found in the case of previous famines that provision had to be made not only for the inhabitants of the tract, but also for emigrants from the States of Rájpútána. The extent to which emigration will take place on the present occasion depends upon whether sufficient employment on relief works for their subjects will be provided by the States concerned; and it is most desirable in the Lieutenant-Governor's opinion that the necessity for providing such employment be urged upon the attention

of the Darbárs. Already an influx of men from Bikaner is reported from the Karnál District, the immigrants being described as begging their way from village to village. The difficulty will to some extent be met by the Ghaggar Canal project which will immediately be started on the border of Hissar and Bikaner and so supply relief work in the tract where it is most urgently needed, and the assistance thus rendered will be supplemented to some extent if the Ludhiána-Dhuri-Tohána and the Ludhiána-Ferozepore Railways are taken up.

16. A separate report will, as required by the rules in the circular of the Government of India, No. 5—48 of 2nd March 1892, be submitted to the Government of India in regard to the financial position. The abstract tabular report which is among the present enclosures shows the amounts of fixed land revenue remaining uncollected on 30th September 1896 on account of the rabi harvest of 1896 and the amount which it is anticipated will in addition have to remain uncollected on account of kharíf 1896 on 31st March next. The former amount is just under 6 lakhs, the latter is estimated at a little over 19 lakhs, but this estimate can, pending the report of the Girdáwari, be regarded a little better than a guess in most districts. In addition to this, it is probable that collections on account of fluctuating and miscellaneous land revenue will be some two lakhs below the budget estimate for the year.

Extract from a Memorandum, dated the 30th October 1896 by the Director of Land Records and Agriculture, Punjab.

SUMMARY.

Taking the Province as a whole, we have two patent facts to face,—very high prices and a scarcity of fodder. The high prices are produced by a number of causes. Scarcity in other parts of the country, gambling, and the possibility of a failure of the next rabi are the principal ones. The reports of the Deputy Commissioners and my own calculations and whatever information I have been able to collect show to my mind conclusively that stocks particularly in the hands of traders, are still large, ample for the Provincial consumption from 6 to 10 months if not depleted by export elsewhere. Seed grain is dear and difficult to get in places, mainly because the owners are holding up for high prices. Takkávi is urgently called for in several districts. Cattle are suffering from want of fodder and are being moved about to river sides, hills, etc., where more grazing can be got, but on the whole the account of the cattle is better than might have been expected, and it is remarkable that there is hardly any disease among them. A good deal more of the rabi crop for 1897 appears to have been sown than would have been supposed, and the situation really resolves itself into this, that if good rain falls in the winter, I mean at the ordinary time in December and January, there will be no famine, but only some scarcity, and should it fall by any extraordinary good luck by 15th November, there will be a fall in prices at once and very little trouble. Looking at special localities, we may say that if it were not for scarcity elsewhere and high prices there is nothing unusual in the condition of the Peshâwar and Deraját Divisions, which have much irrigation and mainly depend on their irrigated crops. The same may be said of the districts of Mooltan and Jhang Montgomery is said to be worse off, and one part of Lahore is no doubt in difficulties. There is nothing alarming at present in Shahpur, Jhelum or Siálkot, but the western portion of Ráwalpindi is in as bad a state as any in the Province. Gujránwála is fairly safe with a large area of irrigation; in Amritsar there is nothing like serious distress, and a good deal has been sown for rabi 1896. Gurdáspur is not in bad case, and stocks of grain are large. Hoshiárpur and Kángra are not suffering. Jullundur, Feroezpore and Ludhiána are all spoken of in somewhat gloomy terms by their Deputy Commissioners, all very junior officers, but the Commissioner does not take the same view.* The Delhi Division is really the only one which is seriously threatened. Hissar is suffering severely, and Karnál seems to be in a precarious state. Umballa wants watching, and neither Rohtak nor Gurgaon are in a very good condition.

Famine has certainly not reached as yet, and if the winter rains come in due course, even if we get no more till December or January, it will not come next spring, but there will be serious difficulty in places. If the winter rains fail, and there is no reason why they should, the situation will undoubtedly be a very grave one indeed. It may be as well to note here, however, that of the whole area of the Province ⅖ is irrigated in the rabi and ¼ area in the kharif. Over four millions of acres are produced on irrigated land each rabi. The rabi of 1896 for the Punjab was 13 annas, the kharif of 1895 was above 13 annas, and the rabi of 1895 was above average, rather more than 17 annas. Taking the Province as

* His Honor is inclined to think that the Commissioner with whom he has discussed the position within the last few days takes a somewhat too sanguine view.

a whole the rabi of 1896 was not a good one. The kharif of 1895 was a bad one, and there was a great lack of fodder. It was estimated at a 12-anna crop. The rabi of 1895, though it varied a good deal from place to place, was on the whole a good one and above average.

STOCKS AND CONSUMPTION.

As regards stocks in hand, to make any calculations of the actual produce of a large Province like the Punjab, and also of the actual consumption is obviously a very difficult matter and one into which large errors may very easily creep The figures of the multiplicand are so large that a very trifling alteration in the calculation of individual consumptions must make an enormous difference in the Provincial total Still it seems to be worth while to make some calculation of the total outturn of the last three harvests, the home consumption during that period, and the export, and to see what it leaves.

The first factor to consider in this calculation is the rate of yield to be assumed. I have made two calculations on different lines, and put up both for what they are worth.

First, we have simply taken the rates of yield calculated in our office in 1892 and submitted to Government in reply to Government of India Circular No 3—45, dated 20th February 1892, in regard to the principal crops. These were taken mainly from assessment reports and, being used for assessment, are unquestionably under estimates For wheat we have in this calculation taken the figures published in the various yearly final forecasts.

As regards exports, figures are not available after June 1896, but as export from the harvest treated of could not commence before June 1895, we have equalized matters by adding in April, May and June 1895. The figures taken are from 1st April 1895 to 30th June 1896. So much for the calculation of outturn and export.

Next we have to consider the question of consumption. I do not propose to make any new calculation, but to take the estimate given in the Decennial Material Progress Report of the Punjab, page 14. This gives the consumption per head at 6 maunds per annum for the whole population, a much higher rate than the Famine Code ratio.

The result of taking the figures in this way is as follows :—

Total outturn of the three harvests, rabi 1895, kharif 1895 and rabi 1896, is 205,383,402 maunds. Total export from 1st April 1895 to 30th June 1896 is 18,722,668 maunds, leaving for consumption 186,660,742 maunds. The consumption for the period 15th June 1895, on which date the produce of the rabi harvest may be assumed to have been first indented on to 15th June 1896, on the above calculation comes to 145,779,691 maunds, leaving, on 15th June 1896, 40,881,051 maunds, which at the above rate gives sufficient for 3½ months, or up to 1st October only, to which must be added the entire produce of the present kharif, which may be assumed as at least sufficient for three months. Thus even calculating at the higher rate of consumption, which includes allowance for cattle, seed grain, etc, etc., this would show a surplus which would last up to 1st January.

We have, however, now got more data than we had in 1892 on which to calculate the outturn of various crops, and a revision of our estimated rates has been ordered to be made in 1897. We have for the last three years been making careful experiments on the outturn of various crops in all parts of the Province, and the result is to give a very materially higher rate than those hitherto assumed. Thus we find as the result of our three years' experiments taking simply the arithmetical average, an outturn which compares as follows, omitting odd seers, with the rates assumed in the calculations given above :—

RESULT OF EXPERIMENTS.

	Irrigated.	*Unirrigated.*	*Assumed in estimate*
	Mds.	Mds.	Mds.
Wheat	15¼	11½	7⅜
Gram	17⅜	13¼	6⅞
Barley	18	13¾	7¾
Maize	24⅛	14⅓	10⅜
Jowár	8¾	5	5⅜
Bájra	9¼	6⅓	4⅓

These experiments are free from much of the suspicion attaching to experiments made during Settlement operations. These experiments were made in 14 typical districts and tracts, and consequently I think we are quite safe in deducing the following rates, which are still moderate, from them on which to calculate the outturn : Wheat 10 maunds, gram 11 maunds, barley 11 maunds, maize 14 maunds, jowár 6 maunds, and bájra 6

maunds. These rates are still, I think, moderate. The result of the calculations made at these rates are as follows :—

OUTTURN.

	Mds
Rabi 1895	128,014,331
Kharif 1895	49,763,464
Rabi 1896	90,834,806
TOTAL .	268,612,601
Deduct export from 1st April 1895 to 30th June 1896	18,722,660
Deduct consumption by population 15th June 1895 to 15th June 1896	125,382,610
Consumption for seed, cattle, etc.	20,578 505
TOTAL CONSUMPTION .	164,683,775
Balance on 15th June 1896 . .	103,928,826

This balance gives sufficient for 8½ months' consumption at ordinary rates and 11¾ months at Famine Code rates But the assumption that there was no balance in hand on 15th June 1895 is hardly justified, as will be seen :—

	Mds.
Outturn of rabi 1894	137,936,020
„ kharif 1894	54,596,736
TOTAL .	192,532,756
Total of one year's consumption of all kinds . . .	145,961,115
Export between 1st April 1894 and 30th March 1895 . .	29,132,720
TOTAL CONSUMPTION .	175,093,835
Balance	17,438,921

which would be sufficient for the consumption at ordinary rates of 1½ months, that is to say at ordinary rates stocks should be sufficient for ten months or at Famine Code rates for rather more than 13 months. This calculation allows for all kinds of consumption, and is I believe not very far from the truth. Ten months from 15th June 1896 would carry us on to 15th April, and we have the entire kharif crop of 1896 to add to this, which would take us on to 15th July 1897 without taking account of the rabi 1897.

This corresponds very fairly with the views generally expressed by Deputy Commissioners. It must also be remembered that in this calculation only cereals and pulses have been taken into consideration. I may note that the food crops grown on irrigated lands alone in the next rabi would in my opinion not fall short of 45,000,000 maunds, which is equal to three months' consumption, inclusive of seed, cattle etc., and to about 4½ months at Famine Code rates. This is assuming that there is no baráni rabi at all which is a very gratuitous assumption.

This according to my calculation, allowing for a minimum rabi, there should be enough food to last up to the kharif up to next year, 1897. This of course takes no account of possible export, which cannot be calculated.

AGRICULTURAL PROSPECTS IN BENGAL.

Letter from the Government of Bengal, to the Government of India, No. 4549 Agri., dated the 18th November 1896.

In continuation of this office letters, No. 951-T—R., dated the 16th October, and No. 1012-T—R., dated the 31st October, 1896, submitting for the information of the Government of India preliminary reports, dated the 8th and 23rd October, 1896, by the Commissioner of Patna, on the state and prospects of the crops in that Division, together with copies of the orders passed by the Lieutenant-Governor on them, I am now directed to lay before the Supreme Government the annexed report, dated the 11th instant, drawn up by Mr. Bourdillon, Commissioner of Patna, in conformity with section 9 of the Famine Code, and at the same time to offer the following remarks on the state and prospects of the crops and probability of distress in Bengal generally and in Bihar in particular.

Earliest intimation of possible distress.

The Government of India will doubtless have observed that in the weekly telegraphic weather and crop reports indications of the possible failure, in greater or less degree, of the coming winter rice harvest owing to the early cessation of the monsoon rains were given from nearly all the districts of these Provinces; but though Sir Alexander Mackenzie and his officers, under his instructions, have been closely and anxiously watching the position, His Honour has hitherto thought it premature to address the Government of India, hoping as he did, till very recently, that a propitious fall of rain during what are known as the Hatiya and Siwati asterisms, *i.e.*, from the 25th September to 10th October, and from 22nd October to the 5th of November, might still avert serious failure of the winter rice crop, and give promise of a favourable *rabi* harvest. These hopes have not been fulfilled.

Principal harvests in Bengal.

2. As the Government of India are aware, there are three principal harvests in these provinces—

(1) The *bhadoi*, consisting principally of *aus* (early rice) in Bengal Proper and Orissa, and of *makai* (Indian-corn) and millets in Bihar and Chota Nagpur. This harvest, sown in April, May and June, is reaped in August and September.

(2) The *aghani* or *hymanti*, corresponding, according to the Commissioner of Patna, to the *kharif* of the North-Western Provinces, and consisting of the great winter rice crop, reaped in November, December and the beginning of January.

(3) The *rabi*, consisting of *boro* or spring rice and pulses in Bengal Proper and Orissa, and of wheat, barley and pulses in Bihar, sown in October and November and reaped chiefly in March, April and May.

In order to estimate the effect of the early cessation of the rains which occurred in September, it is necessary to state approximately the relative importance of these different harvests as regards food-supply, the rainfall conditions which produce good harvests, and the extent and effect of the divergence from these conditions which has taken place in the present year.

Relative importance of the principal harvests.

3. According to the statistics furnished by the Department of Land Records and Agriculture which, though not pretending to accuracy, and not based on patwaris' returns as in other provinces, but on rough estimates formed by Collectors and other authorities, are still the best available and are on the whole believed to be approximately correct, the following table shows

the relative importance of the different harvests described in the preceding paragraph :—

ngal Agricul- al Statistics for 4-95, page 25, umn 2

Total area under food-crops.

	Acres
Rice (winter, *bhadoi*, and spring)	38,983,000*
Bhadoi (excluding *aus* rice)—	
Millets	1,240,000
Maize	2,041,000
	3,281,000
Rabi (*exclusive* of spring or *boro* rice)—	
Wheat	1,472,000
Barley	1,023,000
Gram	1,566,500
Other food-grains	5,761,500
	9,823,000
Total area under food-crops .	=52,087,000
Percentages on total area under food-crops—	
Rice	= 74·9
Bhadoi (exclusive of *aus* rice)	= 6·3
Rabi (exclusive of *boro* rice)	= 12·8

* The winter rice area is estimated to be about three times that of the *bhadoi* or *aus* and *boro* rice, so that the area under winter rice alone is about 30 million acres.

It will be seen from the above table that the rice crop is incomparably the most important, covering, as it does, thirty-nine million acres—an area three times as great as that under all other food-crops put together, and it therefore follows that meteorological conditions which cause a failure of that crop have a more serious effect in Bengal than they probably would have in provinces where the autumn (*bhadoi*) and spring (*rabi*) crops are more extensively grown. All known famines in Bengal and Orissa have been rice famines. In Bihar and Northern Bengal the *bhadoi* and *rabi* crops may be the turning point between famine and no famine, but even there the immediate cause of scarcities and famines has always been the failure of the great winter rice crop. It is necessary to bear this fact in mind in estimating the probable results of the early cessation of the monsoon rains in the present year.

Distribution of rainfall favourable to the crops.

4. The distribution of rainfall most favourable to the winter rice crop is when premonitory showers fall in May or early in June. The rain in the latter half of June and in July should be heavy; then should come an interval of comparatively fine weather, so as to permit of weeding operations being successfully carried on. The September rains should be heavy, shading off into fine weather with showers in October. On the sufficiency of the rainfall in September, more than in any other month, depends the character of the outturn of this crop. The preparation of rice land commences much earlier in East and North Bengal, and in the eastern districts of South-West Bengal, than in the rest of the Lower Provinces. The ante-monsoon showers, which fall in April, May and the first part of June, are, in consequence, of more importance in these latter parts than in other places where lands are usually prepared after the commencement of the monsoon rains.

Divergence of rainfall conditions this year from the normal.

5. The rainfall of the present year was far different from the cultivators' ideal, as will appear from the memorandum annexed to this letter, prepared by Mr. Little, Meteorological Reporter to Government.

It will be seen on a perusal of that memorandum that the rainfall was below the normal in Bihar in every month of the present year except May, and ceased prematurely in the most critical period by the 19th of September, since which date there has been practically none. On the other hand the fall in Orissa during June, July and August being far above the normal, resulted in floods. As regards the rainfall in Bengal, Bihar and Orissa generally, Mr. Little writes :—

Other parts of the province.

With the setting in of the monsoon a marked change appeared. A low pressure area formed over the north of the Bay, and within this one cyclonic storm after another

sed. They followed almost the same track westward across Orissa and part of ota Nagpur, and caused much heavier rainfall in the southern districts than in the north of the province.

In June South-West Bengal, Orissa and Chota Nagpur received from 28 to 62 per cent., and in July Orissa and Chota Nagpur from 12 to 31 per cent. in excess of the normal. During these weeks from the middle of June to the end of July the northern districts received less than usual. North Bengal had only 49 per cent. of the normal in June, with practically the usual amount in July, and Bihar rather over 80 per cent. throughout. The effect therefore of the continued low pressure in the north of the Bay was to deprive North Bengal and Bihar of a considerable portion of the rainfall in perhaps the most important part of the monsoon season

From the beginning of August there was a decided weakness in the monsoon current, except in Orissa, where the average rainfall was 28 per cent. in excess. The total fall in North Bengal was only 39 per cent., in East Bengal 46 per cent., and in South-West Bengal and Bihar from 70 to 75 per cent. of the normal. The rainfall occurred during the passage of shallow depressions, and it was not well distributed, especially in Bihar, where a large proportion of the rain was received in heavy falls on the 21st, 22nd and 23rd. Thunderstorms were more frequent than usual, and being followed by brighter sunshine, an appreciable part of the rainfall was probably soon lost in vapour.

There would have been very little rain in September but for a shallow depression which formed in the north of the Bay about the middle of the month, and followed a zig-zag path, first north into the Sundarbans, then west across Lower Bengal into Chota Nagpur, and afterwards north-east into North Bengal, where it filled up. This irregular course brought every part of the province under its influence, except the extreme west of Bihar, where very little rain fell throughout the month There were several days of general rain, moderate in amount in Lower Bengal, Orissa and Chota Nagpur, but excessive in the east of Bihar and north of Bengal during the two last days of the existence of the depression. The average fall during these two days must have been about 8 inches, a large portion of which must have been carried away by surface drainage. From the middle of the month rainfall became more scattered, and in Bihar almost entirely ceased. The greater part of the rainfall in the last week was in East and North Bengal, but at times it spread westwards, though in no great quantity, to South-West Bengal and Orissa. In consequence of the heavy fall in the middle of September in North Bengal and the continued showery weather throughout in East Bengal, these were the only divisions that received excess falls. In the west and centre of the province amounts were from 12 to 35 per cent. in defect—the latter in Chota Nagpur.

From the beginning of October rainfall all but entirely ceased, except in North Bengal, where light showers fell at the beginning and towards the end of the month. The average fall was practically *nil*, except in East Bengal, where it was 9 per cent, and North Bengal, where it was 26 per cent. of the normal fall. In addition to the absence of rainfall, day temperatures were steadily several degrees above the normal, and the hot, dry westerly winds which blew across a great part of the province must have quickly dried up whatever moisture was near the surface.

Effect of the unfavourable rainfall this year.

6. The effect of these abnormal meteorological conditions on the *bhadoi* and winter rice crop, according to the latest estimates of the Director of Land Records, is shown in the annexed table (Appendix II).

It appears from these estimates that though the rice corp is everywhere likely to be seriously short, it is only in the Patna Division, and in parts of the Jessore, Nadia, Pabna, Rajshahi, Cuttack and Balasore districts, that it was reported to be so seriously deficient (considerably less than 8 annas) as to give cause for apprehension of local distress. The Lieutenant-Governor is unable to understand why the prospects of the rice crop in Nadia, Jessore, Rajshahi and Pabna should be so bad as they are reported to be, compared with other parts of Lower Bengal. It is probable that the local officers have overstated the extent of failure in these districts, and the Commissioners of the Presidency and Rajshahi Divisions have been requested to make local enquiries on the point and report the result at an early date. In Manbhum, Palamau and Hazaribagh the rice crop is also reported to be less than 8 annas.

First indications of scarcity shown in Bihar parision of condition of Bihar now and in 1873-74.

7. Though the monsoon rains ceased everywhere about the middle of September, the effect on the crops was more disastrous in Bihar than elsewhere, partly because the lands of that part of the country are comparatively high and require more moisture for the successful growth of rice and some of the other crops than the low-lying alluvial and partially water-logged districts of Bengal. In Bihar, too, the population is extremely dense, and the great majority of the people are much poorer than in most other parts of these provinces. The ordinary wages of agricultural labour are extremely low, being for an able-bodied agricultural labourer only from 1½ to 2½ annas a day, and they have, owing partly to the growth of population, and partly to the influence of

custom, remained practically unaltered for the past 20 years or more, while the prices of food-grains have increased largely during the same period. On the other hand, it is to be noticed that the Bihar of to-day is in some respects far better prepared to meet a serious scarcity than it was in 1873-74. Then there were no canals completed and there were no railways in North Bihar; in the south of the Patna Division there was no railway except the East Indian Railway. Now the head-quarters of every district, and of most sub-divisions, are connected by rail with the markets of India. Canals have been completed in the Shahabad and Gaya districts, the country is better known than it was in 1873-74, the people have confidence in the power and will of Government to save them from starvation, and such problems as whether they will come on to relief works, accept task work, eat imported grain, and the like, which were cause for doubt and anxiety in 1873-74, have by experience been removed from the region of speculation, and no longer present any difficulties. It is known that the people will labour on relief works and seek and accept gratuitous relief rather than starve in their homes, and it is also known that recent scarcities caused by the early cessation of rains in the years 1888-89 and 1891-92 were efficiently met without loss of life and at moderate expenditure. All this has to be borne in mind in considering the probable effect of a failure of crops in that part of the country at the present time.

But though there are many grounds for confidence now that did not exist in 1873-74, the fact cannot be overlooked that there are also some fresh grounds for anxiety. Prices of food-grains have steadily risen during the past ten years, and are now higher than they ever have been before; this fact coupled with the facts already mentioned that wages have not risen proportionately to prices, that the purchasing power of the poorer classes has therefore been steadily diminishing and is now less than it ever was, that whereas in former years of scarcity prices were kept down by importation from the North-Western Provinces and Lower Bengal, in the present year supplies from these sources cannot be confidently relied upon—are all circumstances that give fresh cause for anxiety which had no existence in 1873-74.

Narrative of action hitherto taken

8. The areas likely to be affected by, and probable extent of, distress will, so far as possible, be described later on. I am here to summarise the action hitherto taken by the Lieutenant-Governor with a view to meet such distress as may occur As was to be expected, it is in Bihar on the present as on all former occasions, that the symptoms of approaching distress have first presented themselves, and have caused the most serious anxiety to this Government and the local officers

The Lieutenant-Governor's special attention has been directed for some weeks back to this and other parts of the province where distress is apprehended. As even in the most favourable years some part or other of these provinces is known by experience to suffer from local and temporary distress due to floods, breaking of embankments, and other disasters, a letter was addressed to all Collectors so far back as the 26th June last, in which their attention was called to the Famine Code, and they were requested to watch carefully the vicissitudes of the season, and to report promptly to Government any special circumstances, such as deficient or excessive rainfall, floods or other calamities which might indicate the probability that measures of relief or expenditure of money would be required

In conformity with these instructions, the Commissioner of Orissa reported officially on the 21st September, in his letter No. 17 P. F. of that date, a copy of which was submitted to the Government of India with my letter No. 870T.—R., dated 8th October 1896, that injury to the standing rice crops of a more or less serious nature has been caused in all the districts of that division Some hardship and temporary suffering had been caused to the people, but such distress as existed was met by advances under the Agricultural Loans' Act, by the employment afforded by the railway line under construction in Orissa, and by private charity. The Commissioner at that time entertained no feeling of anxiety for the future unless the rains should cease prematurely. The rains, however, did cease prematurely, and the Commissioner now thinks that the winter rice crop will be seriously short, but does not apprehend any serious distress for a few months to come. This subject will be reverted to later on, and is mentioned here only

in order to preserve the historical continuity of the narrative of the action taken by this Government.

9. Observing the shortness of the rainfall in September, and the high prices that prevailed in Bengal generally, and the Patna Division in particular, the Lieutenant-Governor called on the Patna Commissioner, by telegram, for a special report on the state and prospects of the crops on the 23rd September. In response to this telegram the Commissioner reported on the 25th September that heavy rain which had fallen in every district of the Division during the week ending the 19th September had done much good, that all cause for anxiety had disappeared for the time, and that if rain should fall between the 25th September and 8th October (the *hatiya* rains) all would be saved. No rain did, however, fall in that period, and the Commissioner was obliged to report on the 8th October* that a strong west wind had been blowing from the 20th to the 25th September, and again during the few days preceding the date of his report, which had the effect of greatly drying up the land, withering the standing crops, and retarding the preparation of land for showing of *rabi*. It was at the same time reported that there had been a sharp rise in prices almost everywhere during the preceding week, due to the failure of the *hatiya* rains and large purchases for exportation to the North-Western Provivces, and that there had been some temporary ebullition of popular feeling. The Commissioner was of opinion that there was a sufficiency of grain in the Division, and that what was required was money to buy it He therefore proposed to open test relief works, but was unable to say that scarcity prevailed or that "famine was imminent." Mr. Bourdillon still hoped that rain might fall by the end of the "Siwati asterism" (*i.e.*, by the 6th of November), but if no rain were to fall by that date, he had no doubt that scarcity, if not famine, would supervene.

* His No. 565G. of that date.

In passing orders on that report the Lieutenant-Governor, in my letter No. 940T.—R., dated the 15th October, again drew attention to the provisions of the Famine Code, and directed that no time should be lost in offering work on district roads under the conditions prescribed in section 56 of that Code, treating the district roads for the present as test work under section 11, and that the District Boards should be called upon to revise their budgets by cutting out all avoidable expenditure and appropriating all the funds they could find to relief works proper. It was pointed out by Government that should no rains fall before the end of October there could be little doubt that a serious failure of the *aman* rice and *rabi* crops would be inevitable, and that the Local Government would have to largely supplement the Board funds. Meantime all Executive officers were to be instructed by the Commissioner to study carefully the Famine Code and the history of past scarcities. The Magistrates and Police were to keep a sharp look out for any indications of rioting and to take prompt steps to suppress it. The standing crops were to be carefully watched, the stocks of food-grain were to be enquired into, and every effort was to be made to utilise, for the purposes of irrigation, whatever supply of water there might be from hill streams, tanks, and wells. The Commissioner was also authorised to give loans freely for well-sinking, and to employ, for the purposes of local enquiries, the officers of the Opium, Survey, and Settlement Departments, without at the same time interfering for the present with their ordinary duties. It was added that the Lieutenant-Governor would be prepared to place an officer on special duty to assist the Commissioner should the situation become worse.

10. The Commissioner submitted another report, No. 579G., on the 23rd of October 1896. In this letter it was stated that the condition of the people had undergone no change, except in parts of Shahabad; but that the outlook for the future was certainly more gloomy, by reason of the total absence of rain. The want of the *hatiya* and *chitra* rains, which were necessary to keep the winter rice crop alive in tracts not commanded by irrigation, had, he wrote, made the failure of that crop certain. Mr Bourdillon estimated that the outturn of the winter rice crop might, in case rain did not fall soon after the date of his report, be taken at 4 annas at the outside. In reply to this communication, the Lieutenant-Governor, in my letter No. 1010T.—R., dated the 30th of October, remarked that if the Commissioner's estimate was

correct the outturn would be less than in any previous year of scarcity on record, except perhaps 1873-74. His Honour expressed the hope that the Commissioner's estimate was unduly low; but added that if it were correct, the extensive failure of the rice crop, coupled with the facts that the *bhadoi* harvest was short, and that prices of food-grains were higher than they ever had been at that time of the year, while wages of able-bodied agricultural labourers were stationary, could hardly fail to cause most serious distress. The Commissioner was at the same time called upon to submit the report required under section 9 of the Bengal Famine Code.

ecial enquiries ed to be under- n in all Divi s.

11. Meanwhile, pending receipt of the Commissioner's special report under section 9 of the Code, the Lieutenant-Governor caused to be prepared a note giving a *resumé* of the history of past scarcities in Bihar, comparative statements of rainfall month by month, outturn of crops, prices of food-grains, number of persons who came on to relief works or who received gratuitous relief in every year of scarcity since 1873-74, and circulated it with my letter No. 71.—R., dated 3rd November 1896, to all Commissioners and Public Associations. In that letter and its annexures, copies of which have been submitted to the Government of India and published in the newspapers, the intention of Government to refrain from all interference with private trade was enunciated and emphasised—all the information then available to Government was given with the special object of assisting the mercantile community in forecasting the quantity of grain which it may be profitable for them to import, and further detailed enquiries were ordered to be undertaken with a view to ascertaining, as nearly as may be, the stocks in hand and the deficit or surplus under or over the requirements for local consumption. A supplementary note, of which a copy is annexed, giving similar information in detail for subdivisions and for all districts, has since been prepared by the Director of Land Records, and is being also circulated.

e Commission- special report section 9 of amine Code.

12. Reverting to the narrative of the Patna Division, I am to state that the special report called for from the Commissioner under section 9 of the Code, as mentioned in paragraph 10 above, has now been received (Commissioner's No. 609G., dated the 11th November 1896), and is herewith submitted for the consideration of the Government of India.

The report has, in Sir Alexander Mackenzie's opinion, been prepared with much care and ability.

It will be noticed that the Commissioner traces an extraordinary similarity between the meteorological history of the present year and that of 1873-74 (paragraphs 94 and 95 of his report), and that while the estimated outturn of the crops is generally better now than in that year, Mr. Bourdillon adheres to his previous estimate of only a 4-anna rice crop for the whole Division. There was a fairly good fall of rain, which saved the *rabi* crops in the months of December, January and February 1874. If there should be similar showers in the coming year, which there is no reason to despair of, the outturn of food-supply as a whole should be at least as good as it was in 1874, and will probably be better. But, as the Commissioner remarks, conclusions from the experience of the past are in this year liable to be vitiated by the predominating new factors already referred to in paragraph 7 above, and especially by the circumstance that whereas in former years of scarcity in Bihar, grain was available, and was largely imported from the North-Western Provinces, this year the North-Western Provinces require all that they can produce for their own consumption, and were till very recently importing largely from Bihar.

mates of area population d in the Patna on.

13. The Commissioner estimates the total area and population of the area likely to be affected by distress respectively at 4,322 square miles and about 3,400,000 persons. He calculates that five per cent. of this population, or 170,000 persons, will require relief in the shape of employment on works, or gratuitously, during the next few months.

In the famine of 1873-74, 10 per cent. of the entire population of Bihar received relief for a period of nine months, and the numbers in receipt of direct relief at one time reached about two millions daily. Compared with these figures the Commissoner's present estimate is extremely sanguine.

Famine Commission's Report Part I, page 26.

The Famine Commissioners, in page 26, Part I of their report, paragraph 75, take 15 per cent. of the entire population in the affected area as the maximum likely to be in receipt of relief in the worst months, and 7 to 8 per cent. of the population as the average number likely to require relief continuously, for a year, but Mr. Bourdillon* has only taken 5 per cent. of the urban population and of the tracts where the crops are particularly bad. Calculated on this basis, the numbers likely to require relief would, as above shown, be about 170,000. But it does not appear that the Famine Commissioners' estimates were intended to be thus restricted to percentages on the particular areas in which crops are particularly bad, and the Lieutenant-Governor is disposed to think that Mr. Bourdillon's calculation in this respect cannot be relied upon.

* Paragraph 48 of his Report.

The Commissioner also calculates that the numbers who may require relief will have to be supported for only a few months. According to all experience, relief should be required from January at least till the rains break, or to the end of June, when credit may be expected to be restored and the people are assured of a coming harvest in August and September following.

Estimates of food deficit in Patna Division

14. Turning to the Commissioners' estimates of food-supply, I am to observe that Mr. Bourdillon, taking the areas under food-crops and the average outturn per acre as given in the statistics furnished by the Department of Land Records and Agriculture, calculates—

(*a*) the normal outturn of food-crops in his division at 14,97,39,000 maunds of 82 lbs each, and

(*b*) the outturn of the present year assuming the *rabi* to be as good as in 1874 (*i.e.*, an average crop in South and an 8 to 10-anna crop in North Bihar), at 6,64,45,000 maunds, or about $\frac{7}{16}$ths of the normal.

Assuming, as Sir Antony MacDonnell does in his Report on "Food-supply and Famine Relief in Behar and Bengal," that the rate of daily consumption per head is three-fourths of a seer, the total population of the Division being 16 millions, the total requirements for local consumption for 12 months would be 108 million maunds, against a total outturn of 66½ million maunds. Assuming also, as Sir Antony MacDonnell did, that the people always keep three months' supply of food in hand from previous years, equal to 27 million maunds, the figures will stand thus:—

Page 8, paragraph 36, *et passim*.

Page 15, paragraph 64 of his Report.

	Maunds.
Requirements for 12 months' consumption	10,80,00,000
(1) Outturn of this year's crop . .	6,60,00,000
(2) Stocks from previous years . .	2,70,00,000
TOTAL .	9,30,00,000
Deficit .	1,50,00,000 maunds, or 550,000 tons.

15. These figures would be alarming if they could be relied upon, but the Lieutenant-Governor hopes that the outturn of this year's crops and the amount of the stocks in hand are under-estimated. Even in 1873-74 the total imports by Government and private trade together to all distressed districts were not more than a million tons, or 27 million maunds. The Lieutenant-Governor has already expressed the hope in my No. 1010T.R., dated 30th October, to the Commissioner of Patna, that Mr. Bourdillon's estimates of the outturn of the rice crops are below the truth, and the above figures would seem to support that surmise; but if Mr. Bourdillon's figures are even approximately correct, the question where this enormous deficit is to come from becomes one of the gravest importance. This is the question which has caused, and is causing, Sir Alexander Mackenzie the most serious anxiety. There will be no difficulty in providing relief works, of which programmes are ready for every district, as required by section 5 of the Famine Code. It is a fortunate circumstance

See page 44 of Sir Richard Temple's minute, dated 31st October 1894.

also that railways are already in the course of construction between (1) Moghulserai, Debree and Gaya, and (2) Lakhisarai and Gaya, and that the railways noted in the margin, which pass through the most distressed districts, have been aligned or proposed and may be undertaken at any time with the sanction of the Government of India. As already remarked, among the beneficient effects of the policy of liberal expenditure adopted in 1873-74, were these—that the people of Bihar became accustomed to come on to relief works, that they learnt to have confidence in the power and desire of the officers of Government to save them from starvation, and that these officers acquired experience of relief administration which will stand them in good stead in the present time. But on the other hand, among the drawbacks of that policy, it may be feared that the people may have too much confidence in Government and rely too little on themselves, that they may on this account, and also because of the great improvement in communications and high prices, have allowed stocks to become depleted. If the year's outturn plus stocks in hand is not sufficient for local consumption, and if private trade does not step in, in time, to supply the deficit, there may at any time be a panic and a sudden rise of prices.

(1) Hajipur *vid* Begumsarai to Katihar with branch to Khagaria (134 miles in the Muzaffarpur, Darbhanga and Monghyr districts).
(2) Segowli to Raksaul (17 miles, Champaran).
(3) Sakri to Jainagar (27 miles, in Darbhanga).
(4) Revilganj to Manjhi (7 miles in Saran).

[Cons]ideration of the [ques]tion—Will [pr]ivate trade [su]pply the deficit.

16. The question whether private trade will do all that is required is in reality the *crux* of the situation. As the Famine Commission remarked, the action of Government itself prevented this question being brought to the test of experience in 1873-74, and no one can say with certainty what would have happened had private trade been left to itself. The Famine Commissioners themselves were of opinion that in consequence of the extension of railways no such measures of importation by Government as were adopted in 1873-74 would ever again be necessary, and should in no case be resorted to without the most complete proof of their necessity; but they added* that a resolution to rely on the ordinary operations of trade to meet the wants of the country unquestionably rests not only on the activity of traders, but also on the probability of the requisite supplies of food being forthcoming at the critical time. The question, they said, should therefore be asked whether there is sufficient ground for believing that the quantity of grain likely to be needed to meet the wants of such large areas as may be stricken with famine in a single year will be certainly forthcoming. In a subsequent paragraph, 159, of their report they admitted that there may be cases in which Government interference is admissible, such as for the purpose of providing food required for payment of wages on relief works and distribution of gratuitous relief, stimulating trade where it is sluggish or fails to act, or grain-dealers combine and refuse to sell.

Page 148, paragraph 109, Part III.

* Paragraph 155, Part I of their Report.

17. Sir Alexander Mackenzie agrees with the conclusions come to by the Famine Commission. His Honour gathers from the utterances of the Government of India that they expect that the requisite supply of food for India as a whole will be forthcoming through the operations of private trade; and in order to satisfy himself on this most important point as regards these provinces, he has caused enquiries to be made from local merchants and the Chamber of Commerce as to what is being actually done or intended to be done in the matter of private importation Particular importance attaches to this question of importation from beyond sea, because the high prices in Eastern Bengal, and the indications of distress already existing in districts that were always considered free from risk of scarcity show that little reliance can be placed on supplies from within the Province.

[Impor]tation of [wh]eat.

18. His Honour is informed that three cargoes of Californian wheat, aggregating about 14,500 tons, are on the way to Calcutta, but merchants generally are at present indisposed to import wheat largely from California, because of the uncertainty as to the demand in India, the high prices for wheat prevailing throughout the world, doubts as to whether native dealers will purchase and have the grain, if imported, carried into the mufassal where it may be required, and generally because of the difficulties that attend on the diversion of trade from its ordinary channels, that is, from being an export to an import trade. They,

moreover, believe that the stocks in Northern India and Bombay are sufficient for the requirements of local consumption. Cargoes of Californian wheat of 4,000 to 5,000 tons each can at present quotations be landed at Calcutta at R5 to R5-1 per maund. Offers for such cargoes to arrive in two months or more are not higher than R4-10 to R4-11, a fact which indicates that in the opinion of merchants who ought to be the most competent judges in the matter, the price of wheat will not, in Calcutta, rise beyond R4-10 to R4-11 within the next two months. The importation of wheat is not, however, a question of so much importance to Bengal as it may be to other provinces.

Importation rice.

19. In Lower Bengal and Orissa rice is almost the sole article of food, and in Bihar rice, barley, maize and millets (but not wheat) are principally consumed. It is fortunate that the rice crop is a good one in Burma. The quantity available for export in the present year is estimated to be 1,400,000 tons: of this about half would ordinarily be exported to Europe, but owing to high prices the demand for European countries is likely to be smaller than usual this year, so that the trade can be easily diverted to India. The rice crop is also reported to be good in Siam, Saigon, Java and Shanghai, and the Lieutenant-Governor is informed that arrangements are already under consideration by private traders for large importations from Burma to Calcutta. His Honour is informed that 500,000 tons of rice can be landed in Calcutta two or three months hence if found to be required. Rice can now, it is understood, be purchased at about R3-6 to R3-8 a maund to be delivered in Rangoon two months hence, but purchases for Calcutta are so far limited—a fact which indicates that it is not anticipated by merchants that prices in Calcutta will be more than R4 to R4-8 a maund at that time.

Opinion food-wants of gal can be m private trade.

The Lieutenant-Governor therefore thinks that there is ground for confidence that the food-wants of these provinces will be met by the importations of private trade, but it is necessary to repeat that, in view of the unparalleled highness of prices and of extent of the area over which there has been shortness of crops throughout India, the situation as regards the food-supply is not free, even in Bengal, from elements of doubt and anxiety.

Divisions than Patna.

20. So far particular stress has been laid on the requirements of the Patna Division. For other divisions special reports under section 9 of the Code have not yet been received, and these divisions may be treated very briefly.

Orissa Divi

The worst next to Patna is Orissa. The Commissioner of that Division in his latest report, dated the 5th of November, says that the outturn of the rice crop will be very poor, but he does not apprehend distress for a few months to come. It is not now possible to say what the extent of that distress may be.

Presidency sion.

It is reported that some relief will be required in three thanas in the Satkhira subdivision of the Khulna district, where the rice crop is said to be likely to be a total failure. The Commissioner has been requested to go on the spot and arrange for such measures of relief as may be necessary.

Bhagalpur sion.

The Commissioner of this division reports that prices are high, but that so far there are no signs of distress though anxiety prevails.

Dacca, Raj and Chi Divisions.

No reports of approaching scarcity have been received from these divisions, but prices rule unprecedentedly high, and districts which ordinarily export are said to have begun to import. This would indicate a dangerous depletion of stocks.

Chota N Division.

The Commissioner has just reported that Hazaribagh is the only district that gaves any cause for anxiety in the immediate future, but even there no expenditure by Government is required at present.

General re

21. Most of the subjects mentioned in section 15 of the Famine Code have been touched upon in the preceding paragraphs, and such information as is available at present has been furnished: it only remains to add that it is not possible at present to give anything like an approximate estimate of the probable expenditure that may be required, and that this Government does not anticipate that there will be any necessity to remit or suspend Government revenue. The numbers of persons employed on test relief works are given in Appendix A to the Patna Commissioner's report. The Lieutenant-Governor has observed that a certain number of persons have been employed on daily wages irrespective of task, and has called the Commissioner's attention to section 64 of the Code. Whether the Provincial staff will have to be increased

cannot be now stated with any certainty. The Lieutenant-Governor is about to visit Bihar, and after consulting local officers, indigo planters, zamindars and others, His Honor will be in a better position, as events develop, to report to the Government of India on this and other questions. The Bengal Distress Relief Committee, formed in Calcutta in 1888, have in hand a sum of R34,000 which is now available for charitable relief. Sir Alexander Mackenzie proposes to ask the Committee to place this amount at the disposal of the local officers of distressed districts at an early date, as soon as he is in a position to say where it is most required.

22. The Lieutenant-Governor, agreeing with the Collectors and Commissioner of the Patna Division, the Director of Land Records and the Board of Revenue, has not thought it necessary to suspend settlement or survey operations in Bihar, at any rate for the present. The survey programme has been altered to this extent only, that the survey party is to be employed in South Darbhanga and South Saran, where distress has never been very great, instead of in North Darbhanga, where scarcity and distress have always been most serious. It is reported by Captain Crichton that most of the field work will be completed by the end of March. If it should become necessary, the survey and settlement operations can then be suspended, and the officers engaged on these operations can be utilised on famine work.

Extract from report by Commissioner of Patna.

PART III.

GENERAL REMARKS.

93. Having now examined the condition of each district, chiefly upon the basis of the reports submitted by the Collectors, I turn to make some observations on the state of affairs in the Division as a whole, and upon certain points which are not touched upon in the preceding paragraphs. I follow in general the list of subjects mentioned in paragraph 9 of the Famine Code.

94. *Grounds for apprehending scarcity.*—These have been set forth in detail in the account for each district, and need not be referred to again at any length. There has been all over the Division a deficiency of rainfall as shown in the margin. But as is well known, this does not necessarily give rise to scarcity, provided that the rain is well distributed. This year, however, that element of disaster also was forthcoming, and the characteristics of the rainy season of 1896 have been everywhere a late commencement of the monsoon in June, and heavy rain early in July: then followed two long periods of drought till the middle of August and the middle of September respectively, since which time no rain has fallen at all. The universal result has been damage to the *bhadoi* from floods first in some places, and afterwards from drought, a withering of the rice seedlings, and late transplantation, and then the dying out of much of the crop: for the *rabi* crop the preliminary moisture which is so essential in September and October, has been entirely absent, and thus great fears are entertained for it also. In these circumstances the estimates of the *bhadoi* and *kharif* crops, framed by the District Officers, are, as given in the margin, expressed in annas of an ordinary average crop. Naturally, the mind turns to a comparison of these figures of rainfall and outturn with those recorded in 1873-74. In Appendix B I have given figures comparing the rainfall month by month in every district together with the normal fall. An extraordinary similarity is visible in the meteorological history of the two years in every district; but, in spite of that, the estimated outturn of the two crops, as given in the margin, varies a good deal from that of the present year. It

DISTRICT.	Deficiency	Percentage on normal.
1	2	3
Patna	10·53	25·53
Gaya	7·34	17·80
Shahabad	10·30	25·84

Champaran	19·96	41·67
Muzaffarpur	10·16	22·87
Darbhanga	7·95	17·33

1896.	Bhadoi.	Kharif.
1	2	3
Patna	10	9
Gaya	12	8
Shahabad	7½	4
Saran	6	3
Champaran	8½	3½
Muzaffarpur	5	3
Darbhanga	8	5

1896.	Bhadoi.	Kharif.
1	2	3
Patna	4	2
Gaya	8	6
Shahabad	4	2
Saran	10⅜	1⅜
Champaran	10	2
Muzaffarpur	11¼	4⅝
Darbhanga	9	2¼

will be seen that, except in Saran and Muzaffarpur, the estimates of the present year are higher than those of the District Officers in 1873; and if the estimates in both years are right, then the people have far better crops now than they had in 1873.

95. Moreover, it is fair to assume, I think, that the people are now in better case than they were at the previous period. The year 1873 was the last of a series of years which were marked by abnormal rainfall, and generally unusual weather. The year 1871 was an unusually wet year; the following year was unusually dry; while in 1873 the rainfall was deficient, almost beyond precedent. In spite of the unusual weather, fair crops were reaped, and it may be assumed that at the beginning of 1873 the condition of the people was not much below its usual standard. The distress of 1873-74 was entirely due to the failure of the rains of 1873, and chiefly to their deficiency during the three latter rainy months. In 1896 the situation is much better. The crops of 1893-94 and 1894-95 were excellent, the Commissioner reporting that the year 1894-95 had been "a decidedly prosperous one for agriculturists north of the Ganges and a good average one for those in the south, except in Shahabad, where it was below the average." In 1895-96 agricultural affairs were not so prosperous, but on a review of the whole year, it appears that there was a crop estimated at two-thirds of the usual outturn. I infer therefore that, so far as we have gone, not only are the people in better condition than they were in 1873-74, but that the two crops, of which we have fairly certain knowledge, are better, except in Muzaffarpur and Saran. In Champaran they are about the same.

96. Before leaving this part of the subject, it is necessary to say a word or two as to the *rabi* crop, though any estimate of its outturn must for the present be purely speculative. We are justified, I think, in the expectation that, as the weather of 1896-97 has so far been extremely similar to that of 1873-74, the parallel may be continued, and that for the remaining months of the year 1896-97 we may have the same rainfall that was recorded during the last five months of 1873-74 and similar harvests. If this prove to be so, there is further reason to take courage, for the crops reaped in the spring of 1874 afford the most convincing evidence of the vitality of the *rabi*. It is usually stated, and with perfect truth, that in order to obtain a good *rabi* crop heavy rain is essential in September and October, but the statement takes no account of the efforts to irrigate which are made in a bad year, nor of the extent to which lands usually too wet for *rabi* are sown at such a time. In 1873-74, after a great deficiency of the rains in September, and an entire absence of rain in October and November, the showers which fell in December, January and February and even in March did so much to revive the crop that the recorded outturn in annas was as in the margin. A similar experience in 1896-97 will go far to rehabilitate the people. I shall return to the subject again below.

Patna	12
Gaya	16
Sahabad	16
Saran	7
Champaran	8
Muzaffarpur	10
Darbhanga	8

97. But though the estimated outturn of the *bhadoi* and *kharif* crops is so much better this year than it was in 1873, prices are vastly higher, and it is on this account that pressure is already beginning to make itself felt. This question must be regarded from two points of view. So far as the general agricultural population is concerned, who form the great bulk of the inhabitants of the Patna Division, it is a commonplace to say that high prices do not necessarily imply distress. The fact has often been stated, and in particular I would draw attention to the statistics of the famine in Bijnour at page 247 of Mr. Geddes' "Administrative Experience of former Famines." What really brings general distress is the cessation of employment. The zamindar and the ordinary agriculturist have everywhere their own stores of grain, and, so long as work is available, the daily labourers and landless men are paid in kind sufficient for their daily food, and have little or no concern with the price of grain in the bazar. It should never be forgotten that thousands of these daily labourers are practically permanent servants of a particular master who takes care to feed and assist them. On this subject of employment Mr. Stevenson-Moore has supplied me with a note which I give as Appendix E, after adding a calendar of agricultural operations, Appendix F.

98. On the other hand, there is a considerable class whose income is not paid in grain, and who have to pay with cash for their daily food. This includes all persons with fixed incomes, many of the artisans, the majority of the dwellers in towns and the great body of widows and other dependants together with the beggars and the very poor. It is upon these people that the stress of high prices first falls, and it is a feature of the present scarcity that this class will be inconvenienced at a much earlier period than is usual. At the same time it is to be remembered that their numbers are comparatively small; there must of necessity be many such who dwell in small villages of whom it is impossible to make any estimate, while on the other hand not all the people who live in towns will be immediately affected by the high price of grain. For the sake of convenience, however,

I have assumed that the whole urban population of each district will be seriously straitened, and may require relief at an early date. They are estimated in Mr. O'Donnell's Census Report at 2·9 per cent. of the whole in North Bihar, and at 6·5 per cent. of the whole in South Bihar. The figures for each district have been mentioned in the district accounts. The especial attention of District Officers will again be called to this matter, which is at the present time one of the first moment.

99. The next step after ascertaining how prices range and what is the estimated outturn of the different crops in each district, is to ascertain what those figures represent when reduced to maunds of grain. I have prepared, in Appendices C and D, two statements to which I would now invite attention. The first shows for each district the normal outturn, in an ordinary year, of each crop, and the ratio which such outturn bears to the total food-crop of the district. It is expressed in thousands of maunds. It is also accompanied by a chart which gives the same information in graphic form. The second statement shows side by side the normal outturn of each district together with the estimated outturn this year.

100. The first statement in Appendix C is full of information. It shows in the clearest manner how the different crops are in each district of widely different importance, and read with the second statement it shows why at the present moment there is much greater apprehension in some districts than others. In Patna, for instance, where the *bhadoi* and *kharif* crops are equivalent to nearly 64 per cent. of the total, the *rabi* is of minor importance. In Gaya almost everything depends on the rice crop, and with its admirable irrigation system the district is nearly always safe. In Shahabad the *bhadoi* is of little consequence, and the *kharif* and *rabi* are of about equal importance. This explains at once why the failure of the rice and the expected failure of the *rabi* make the outlook there so grave. Saran is most fortunately placed, as all its crops are of fairly equal value, and whatever happens it is pretty certain always to have one-third of its food crop safe. In Champaran the *rabi* crop is of comparatively little value, and it is this consideration which lends additional gravity to the situation: two crops of the year have passed, one with half an average outturn and the other with only a fourth. Darbhanga is in somewhat similar case, but the outlook is worse, because its rice is most important and the *bhadoi* and *kharif* have failed to a greater extent. In Muzaffarpur the proportions are much the same as in Patna, but it has not so much to expect from its *rabi*, and the failure of its *bhadoi* and *kharif* has been much greater.

101. The next statement (D) enables me to determine to what extent the crops up to date have in each district fallen short of the normal outturn, and to forecast what the total result may be. Taking first the *bhadoi* and *kharif* crops, for which we have now a fairly substantial estimate, it will be seen that the outturn of those crops in a normal year and in the present season compare as follows (thousands of maunds being omitted):

DISTRICT.	Normal outturn of bhadoi and kharif.	Estimated outturn of bhadoi and kharif in 1896-97.	Deficiency	Percentage of column 3 on column 2.	REMARKS.
1	2	3	4	5	6
Patna	8,181	4,664	3,517	57	
Gaya	18,429	9,910	8,519	53·77	
Shahabad	15,448	3,335	12,113	21·58	
Saran	11,040	3,191	7,849	28·59	
Champaran	15,215	5,197	10,018	34·57	
Muzaffarpur	13,794	3,182	10,612	23·06	
Darbhanga	20,391	6,824	13,567	33·46	

These figures again confirm what has been said above in regard to the relative position of the different districts. We know from the above statement what the percentage of outturn is for the *bhadoi* and *kharif* crops in each district, and we know what proportion to the whole food-crop of the district is borne by those crops in an ordinary year. From these two factors, it is easy to calculate what percentage of their usual food-crop for the year each district has already secured, and what remains to be filled up by the *rabi* crop or by other means. The figures are given in the margin. They must be read with those which show the proportion of the *rabi* to the whole food-crop of the district which are these: Patna 36·01, Gaya 24·47, Shahabad 48·11, Saran 38·38, Champaran 21·02, Muzaffarpur 30·21, Darbhanga 21·05. It is manifest once more that with an ordinary *rabi* crop Patna and Gaya are both safe. For Shahabad everything depends on its *rabi*. Saran, with a larger *rabi* crop to look forward to, is a good deal better off than Champaran, while Muzaffarpur and Darbhanga are both in an equally perilous position.

Patna	41·86
Gaya	40·62
Shahabad	11·19
Saran	17·94
Champaran	27·29
Muzaffarpur	16·08
Darbhanga	26·41

102. It will be interesting to carry this calculation a little further and to speculate what will be the result of the year's crop if, as suggested in paragraph 96 above, we take for granted that the *rabi* crop of 1874 will on the whole be repeated in 1897, and I take the *rabi* outturn as follows:—Patna, Gaya, and Shahabad 12 annas each, Saran, Champaran, and Darbhanga 8 annas each, and Muzaffarpur 10 annas. I assume that the normal area will be sown with *rabi* because I set off against the land in which it has not been sown the empty rice lands in which winter crops will certainly be sown this year. The figures are given in columns 3, 5, &c., of the lower line in the statement shown as Appendix D. The result is as follows:—

DISTRICT.	Normal outturn.	Estimated outturn in 1896-97.	Deficiency.	Percentage of column 3 on column 2.	REMARKS.
1	2	3	4	5	6
Patna	12,786	7,868	4.918	61·53	
Gaya	24,401	14,389	10,012	58·96	
Shahabad	29,773	14,078	15,695	47·28	
Saran	17,918	6,630	11,288	37·	
Champaran	19,266	7,222	12,044	37·48	
Muzaffarpur	19,767	6,915	12,852	34·98	
Darbhanga	25,828	9,543	16,285	36·94	
Total	149,739	66,445	83,094	......	

If the estimates suggested above are fulfilled, the outlook in all four northern districts will be gloomy, but at present we need not adopt them, and may await the development of events.

103. Before leaving this part of the subject, I desire to add that everywhere it is reported that *rahar* and sugarcane are doing remarkably well, and it is anticipated that opium will again be a good crop. Little can be expected from indigo, but my information is that in much of the land which is not commanded by irrigation planters will sow maize and other food-crops, which will yield an early return, and give them time to prepare the ground for the sowings of 1898. Similar steps were taken in 1866 and 1874.

104. *The area and population likely to be affected.*—These have been given in detail in the examination of districts, but the following synopsis will be useful:—

DISTRICT.	Area.	POPULATION. Urban.	POPULATION. Agricultural.	TOTAL.
	2			
Patna	250	115,263	600,000	715,263
Gaya	600	139,291	200,000	339,291
Shahabad	1,301	134,155	344,902	479,057
Saran	523	71,515	430,335	501,850
Champaran	467	53,924	177,506	231,430
Muzaffarpur	507	81,672	462,198	543,870
Darbhanga	674	81,256	507,350	588,606
TOTAL	4,322	677,076	2,722,291	3,399,367

105. *Communications.*—Full details have been given under this head in treating of the different districts, but it is as well to bring into prominence the entire revolution which has been wrought in all the conditions of famine relief in this Division by the immense development of communications since 1873-74. In that year there was only one railway in Bihar—the East Indian Railway, and it ran through two districts only—Patna and Shahabad, the total length of rail in the Division thus amounting to 147 miles only. At the present moment there is at least a line of rail in every district, and the mileage of open line is as in the margin.

Patna	115
Gaya	39
Shahabad	58
Saran	84
Champaran	52
Muzaffarpur	75
Darbhanga	166
TOTAL	589

In 1873-74 the Sone Canals had not been opened; now they supply water communication for many miles. In the same year there were, I believe, no steam ferries in the Division, and the cost of importing steamers from England was a large item in the cost of the famine. Now there is a steam ferry at every railway crossing; many ferry farmers use steam, and the India General Steam Navigation Company has a bi-weekly service running up the Ganges, and steamers ply up and down both branches of the Sone

Canals. Lastly, in 1873-74 the number of roads were a mere fraction of what they are now, while the miles of road open on the 31st March 1896 were as follow:—Patna 1,212, Gaya 1,403, Shahabad 1,855, Saran 2,664, Champaran 1,359, Muzaffarpur 1,630, Durbhanga 2,331—total 12,454. These are changes which must immensely facilitate and render vastly less expensive the supply of grain and the execution of all operations connected with the relief of distress.

106. *Grain stocks.*—On this subject I can speak with little certainty, for it will be seen from a perusal of what has been said above in dealing with the Collector's reports that accurate information on the point does not exist, while mere opinions vary widely. I believe personally that there is everywhere at least three months' supply, and that in many instances this is a low estimate From all that I can learn the development of communications and the multiplication of railways has not induced the Bihari raiyat to encroach upon his food reserve or sell out his stocks: he is before all things cautious, prudent, and the slave of custom in all agricultural matters, and I am confident that as in 1874, when Sir A P. MacDonnell wrote his Report on Food-grains in Bihar, so now his first care is to lay by enough for himself and his dependants, and that it is only the surplus with which he pays his rent, and which he sells to provide himself with homely luxuries. In a subsequent report I hope to be able to give more information and to examine also the consumption of each district in connection with its imports and exports and its capacity for self-support.

107. *Sources of food-supply.*—In a Division so amply provided with means of communication the markets of the world are open to its demands, provided that communication with them is opened by steam from Calcutta On this point more information is urgently needed, and any intelligence of a reassuring character, which could be published with the *imprimatur* of Government would have the most beneficial effect, not only on the minds of the people, but also on the prices of grain.

108. *Proposed measures of relief.*—These have been fully described above district by district, and I need only summarise them here for convenience sake. Test relief works have actually been commenced only in Patna, Shahabad, and Darbhanga, but before the next report falls due, others will be started in all the remaining districts. It is the unanimous opinion of all persons that, so far, the population are in good case, and no emaciation or actual distress has yet appeared, and that there is still sufficient field work. Advances are being given freely everywhere except in Darbhanga, and almost all officers have asked for a large addition to their allotments. Considering the urgency of the case, I have taken the responsibility of allowing District Officers to spend large additional sums in anticipation of formal sanction. Public meetings have been called in some districts, and it is time that they should be called everywhere in order to organise charitable relief.

109. It is a most providential circumstance that just at this time of stress new railway works should be opened in every district of the Division except Patna, and even here the Gaya-Lakhiserai line will run so close to the eastern boundary of the Bihar sub-division that it will certainly attract labourers thence. These works will be of incalculable value in providing profitable employments for thousands of the labouring class for the next eight months.

110. Lastly, I think it would be most desirable if, in the present circumstances, the operations of the Survey-Settlement Department could be interrupted for a year. These operations, for reasons which it is unnecessary to enumerate, are a heavy burden on the villagers, and in such a season as the present I should be glad to save them every pice that it is possible In order to avoid breaking up the survey parties, they might, perhaps, be allowed to continue in selected localities.

111. *Estimate of Expenditure.*—The District Boards everywhere have been revising their budgets and allotting funds for relief works. The following is a synopsis of their operations:—

District.	Amount available in 1896-97.	Amount available in 1897-98.
1	2	3
	R	R
Patna	25,000	25,000
Gaya	51,850	60,000
Shahabad	40,000	55,000
Saran	78,000	80,000
Champaran	25,000	25,000
Muzaffarpur	Not stated.	Not stated.
Darbhanga	45,000	1,00,000

These sums will suffice for the present, and will enable all District Officers to make a beginning with relief. Nothing but experience can show what further sums will be required and what the limits of our operations will be.

112. *Conclusion.*—I have now to bring this long report to a close. After a careful consideration of all the circumstances of the case, I am convinced that for the present there is no occasion for panic. We are in all respects but two in a better position than we were in 1873-75. The people start with better years behind them, and the material prosperity of the Division must have increased during the last quarter of a century; the *bhadoi* and *kharif* crops have been better than they were in 1873; our statistical information is much more full than it was in that year; and, lastly, our communications have developed to a marvellous extent. On the other hand, prices are extraordinarily high, and the scarcity extends over a far wider area, so that not only are our usual markets closed to us, but all markets are filled with competitors. Much depends on the result of the *rabi*. If we have a total failure, distress will be very severe; if we have a full crop, it will be moderate: but assuming that we have such crops as were reaped in 1874, we shall win through, with difficulty certainly, but still I believe without loss of life, and at a much less cost, provided that a steady supply of grain is available at rates which are not prohibitive. The note of the day is the opening of test relief works in the areas first to be affected, and the immediate organization of charitable relief for the non-agricultural population.

Extract from remarks by His Honor the Lieutenant-Governor of Bengal at a Conference held at Sonepur on the 20th November 1896.

There were two dangers they had to avoid, *firstly*, that of over-estimating the distress, thereby leading to extraordinary and extravagant expenditure as in 1873-74, and, *secondly*, a tendency to over-confidence generated, to some extent, by the knowledge of the previous over-estimation.

The tract south of the Ganges presented no features of grave anxiety at present. Gaya had always been regarded as a district fairly safe. Nothing like widespread distress need be apprehended there.

In Patna there was no danger of widespread scarcity, and in Shahabad only local distress need be apprehended which could probably be dealt with by local agency.

The north of Darbhanga, Muzaffarpur and Champaran, however, are purely rice tracts. In those parts there appeared to have been a general failure of crops, and considerable distress might be anticipated.

In the rest of the country north of the Ganges he understood that the *rabi* crop was germinating well, and the area under *rabi* larger than usual. In 1873-74, one of the most striking features was that the *rabi* crop, subsequent upon seasonable winter rains, turned out to be much larger than was expected, and if rain fell in December and January, the present *rabi* crop would be fairly safe.

GOVERNMENT OF INDIA.

(a) Includes the Bhopal-Itarsi railway.
(b) Includes the Godhra-Rutlam Nagda railway.
(c) Includes the Guntakal-Mysore frontier section.
(d) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(e) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(f) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(g) Includes the Wardha Coal, the Dhond-Manmad, the Khamgaon, and the Amraoti railways.
(h) Total earnings from 11th to 30th November 1895.
(i) Total earnings from 15th July to 28th November 1896.
(j) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.
(k) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(l) Total earnings from 1st August to 30th November 1895.

CALCUTTA, *the 11th December 1896.*

G. A. ANDERSON,
Under Secretary.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

No. XXXIII of 1896-97.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total earnings from 1st April 1896*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week in 1895-96.	Week ending 30th November 1895 — Mean mileage worked.	Week ending 30th November 1895 — Earnings — Total.	Week ending 30th November 1895 — Earnings — Per mile open per week.	Week ending 28th November 1896 — Mean mileage worked.	Week ending 28th November 1896 — Earnings — Total.	Week ending 28th November 1896 — Earnings — Per mile open per week.	Earnings from 1st April to 30th November 1895.	Earnings from 1st April to 28th November 1896.	Increase.	Decrease.

(*a*) Includes the Bhopal-Itarsi railway.
(*b*) Includes the Godhra-Rutlam-Nágdá railway.
(*c*) Includes the Guntakal-Mysore frontier section.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*e*) Total earnings from 1st July to 30th November 1895.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, the Dhond-Manmád, the Khamgaon, and the Amráoti railways.
(*i*) Total earnings from 1st May to 30th November 1895.
(*j*) Total earnings from 11th to 30th November 1895.
(*k*) Total earnings from 15th July to 28th November 1896.
(*l*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*m*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*n*) Total earnings from 1st August to 30th November 1895.

G. A. ANDERSON,
Under Secretary.

CALCUTTA, *the 11th December 1896.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 28th, 1896.

A very important burst of light to moderate rain occurred over North Bombay, Rajputana, the central parts of India, the North-West Provinces and West Bengal during the week under review. This rainfall was due to the cyclonic storm which was shown over Kathiawar at the close of last week, and which, during the early days of the present week, advanced quickly through the Central Provinces and entered the eastern districts of the North-West Provinces. In this position it apparently filled up and the barometer rising briskly all over Northern India the usual antioyclonic distribution of pressure was re-established and the rainfall ceased. In Southern India on the contrary the weather has been unsettled and rainy throughout the week. A low pressure area has held steadily over the south-west of the Bay, and the northerly and north-easterly winds have brought up daily rain to the south of the Peninsula. The rainfall was mainly confined to that portion of the Peninsula lying to the south of Masulipatam on the east and Goa on the west, and the districts of Vizagapatam and Gopalpur have been practically without rain. Neither of these disturbances in any way affected North-East India and as a consequence the provinces of Burma, Assam and Bengal Proper have been almost wholly without rain during the week. The Punjab was very slightly affected by the cyclonic storm which advanced through the Central Provinces and one or two stations in that province received trifling amounts of rain. The heat was again greater than usual over the greater part of the country on most days of the week, but the excess was very small on the first four days during which the influence of the rainfall was felt in lowering the general temperature.

Daily Summary.—*Sunday, 22nd November.*—The barometer had recovered rapidly over Gujarat and Kathiawar and had fallen rapidly over West Bengal and the east of the North West Provinces and of the Central Provinces. The cyclonic storm which lay over Kathiawar on the previous morning had advanced quickly west-north-westward and the centre apparently lay near Sutna. The winds were largely influenced by this storm and blew from cyclonic directions over a large part of the country. Some of the more central stations had experienced gales. The mean temperature was slightly to very largely below the normal average over Gujarat, Rajputana and the neigbouring districts, and was slightly below over Burma, Assam and part of Bengal. Elsewhere the heat was excessive—more especially so over the central parts of the country. Rain had fallen over the greater part of the Peninsula, over North Bombay, over the Bombay Deccan, over the central parts of India and over the North-West Provinces. It was not, however, heavy except at Madras

Monday, 23rd November.—The barometer had risen briskly over the central parts of the country, but had changed only slightly elsewhere. The depression had largely filled up and the ordinary cold weather distribution was appearing, *i.e.*, pressure was high in the north-west, relatively high in the north-east, and low over the south of the Bay. The winds were very variable. The general distribution of pressure with respect to the normal was the same as on the 22nd. Rain had been received over the North-West Provinces, West Bengal, the central parts of the country and the greater part of the Peninsula. The amounts were heavyish over the south of the Peninsula but were moderate or light in other places.

Tuesday, 24th November.—Pressure had increased everywhere—slightly in the south and in Burma and briskly to rapidly elsewhere. The depression had practically disappeared and readings ranged from 30·06" in the North Punjab to 29·79" in Ceylon. The barometer read below the normal average everywhere. Calms prevailed over Northern India and light east to north winds elsewhere. The mean temperature was lower than usual over the west coast districts, North Bombay, Rajputana, the North Gangetic plain and North Bengal, but was generally excessive elsewhere—though less so than on the two preceding days. Fairly general rain had fallen over the Madras Presidency south of Coconada,

but in other parts of the country only a few light passing showers were reported.

Wednesday, 25th November.—The barometer had continued to rise. Pressure ranged from 30·14" at Rawalpindi to 29·84" in Ceylon, so that the general distribution was unchanged. The winds were about normal in direction, and the force was light or moderate generally. The mean temperature had fallen over Lower Bengal and part of the Central Provinces. The distribution of the mean temperature with respect to the normal was complicated and irregular. The rainfall of the previous twenty-four hours had been practically confined to Madras where moderate to heavy rain had been received.

Thursday, 26th November.—The barometer had begun to fall. In the Punjab and Rajputana the fall had been brisk to rapid, but in all other places the changes had been slight. The general distribution of temperature was little changed, but the pressure difference had decreased. South-easterly and easterly winds had appeared in North-West India, but this was the only important alteration in the wind directions. The mean temperature had been excessive over the Punjab, Sind and the more central parts of the country. Rain had fallen in Baluchistan and showers had continued over the greater part of Madras.

Friday, 27th November.—The barometer had risen briskly over the west of the Punjab and fallen briskly at Madras, but in all other parts of India the changes were slight. A small centre had apparently been developed within the low pressure area over the south-west of the Bay, and this small disturbance was apparently advancing towards Madras. The wind force had increased along the Madras coast, and later in the day strong winds were experienced at Madras station. The mean temperature remained largely excessive over the central parts of the country, but over part of North-West India a brisk fall of temperature had taken place. Light showers had fallen on the North-West Hills, fairly general showers over Madras and a few local showers at some scattered stations.

Saturday, 28th November.—Pressure had fallen in the north-west and a shallow depression had appeared over the Southern Punjab. Elsewhere the changes were unimportant. Readings were highest over the west of the North-West Provinces and lowest in the extreme south of the Peninsula, and pressure was almost everywhere below the normal average. The winds were cyclonic in the extreme north-west and were more or less variable in other places. The mean temperature was about normal over Bengal, Assam and Burma, but was excessive in the other provinces. Rain and snow had fallen in Baluchistan and rain over a few districts in the Punjab, Rajputana and Central India. Widely scattered showers were reported from the Peninsula.

Temperature.—The following table gives the variations of the mean temperature from the normal in the different provinces of India :—

Province.	November 1896.							Mean variation of week.
	22nd.	23rd.	24th.	25th.	26th.	27th.	28th.	
Burma	−2·2	−1·8	−0·9	−0·5	+0·3	+0·3	+0·4	−0·7
Bengal and Assam . .	+0·6	+3·2	+1·3	+1·5	+1·3	+0·6	+0·1	+1·2
North-Western Provinces and Oudh	+1·2	+0·9	+0·2	+1·7	+1·8	+2·1	+3·5	+1·6
Punjab	+0·4	+1·6	+1·5	+2·9	+3·6	+1·4	+4·4	+2·3
Bombay	+2·5	−0·6	−2·3	−0·1	+1·4	+2·8	+3·3	+1·0
Central Provinces and Berar	+10·4	+5·7	+3·1	+1·7	+5·5	+7·5	+7·8	+5·8
Central India and Gujarat .	−1·2	−2·5	−2·0	+0·8	+3·4	+4·9	+5·8	+1·3
Sind and Rajputana . .	−5·7	−3·2	−1·5	−0·4	+1·2	+3·9	+5·8	0
Madras	+1·9	+2·1	+0·8	+1·8	+2·0	+2·9	+1·9	+1·9
Mean for whole of India	+0·9	+0·6	0	+1·0	+2·3	+2·9	+3·6	+1·6

On the 24th the mean temperature of the whole country was exactly normal, and on the 22nd, 23rd and 25th the departure from the average was small, but by the 26th the influence of the rainfall of the early part of the week was disappearing and the amount of rain in the Peninsula was beginning to fall off, and from the 26th to the close of the week the heat was again excessive. The pro-

vincial variations show that the mean temperature of the week was about normal in Burma, Sind and Rajputana and was excessive elsewhere—most so in the Central Provinces. In Sind and Rajputana the contrast of temperature during the week was very marked, thus on the first day the mean was 5°·7 below and on the last day 5°·8 above the normal average.

Rain.—The rainfall returns for the week under review exhibit a great improvement compared with the returns of previous weeks in all parts of the Indian region except the north-east. This extension and intensification of the rainfall was due to three causes. The first was the low pressure area which held steadily during the week over the south-west of the Bay. This depression occasioned north-east and north-west winds over the south of the Peninsula which gave moderate to heavy rain over the Madras Presidency. In addition to this general effect a small local storm or squall formed within the major area of depression and passing inland near Madras occasioned very heavy local rain in the neighbourhood of Madras itself. The second cause of rain was the cyclonic storm which struck the Kathiawar coast at the close of last week, and which during the present week passed quickly through North Bombay and the Central Provinces and gave widely extended moderate rain over Western and Central India. The third cause was a shallow depression which appeared in the north-west and more local in its effects than the two preceding disturbances and occasioned rain over Baluchistan, the North of the Punjab and part of Kashmir. The results of these three causes are shown in the table at the close of the summary which gives the rainfall data. This table shows that effective rainfall, *i.e.*, rainfall of 0·10″ and over, was received during the week under review in no less than thirty-two of the rainfall divisions, and that in sixteen more divisions some rain was received though the average actual rainfall in these divisions was less than one-tenth of an inch. In Burma, East Bengal, Assam (Surma), Sind and the East coast [north (*a*)] no rain whatever was received, while the region of effective rainfall included the following divisions:—Chota Nagpur; all the North-West Provinces divisions; the Punjab (south-east, Hills, and north); Malabar; Madras (south-central, central and south); Coorg; Mysore; the Bombay Deccan; Khandesh; Berar; all the Central Provinces divisions; Kathiawar; Baluchistan; Central India; Rajputana (east), the East coast (north, central and south); and Hyderabad (south). Within these thirty-two divisions the average actual rainfall varied from 5·99″ in the East coast (central), 5·58″ in the East coast (south) and over 2·00″ in Madras (central), Hyderabad, and Coorg to only 0·10″ in Khandesh. The third column of the table shows that the week's rainfall was excessive over a very large part of the country. The excess over Northern and Central India [except the Central Provinces (east)] was only moderate, varying generally between a quarter and half an inch, but over the Peninsula the excess was much greater amounting to as much as 4·77″ in the East coast (central); to 3·75″ in the East coast (south); to 2·01″ in Hyderabad (south); and to over 1 inch in Madras (central), Mysore, Coorg and Malabar.

The three concluding columns of the table show the state of the seasonal rainfall, that is, the fall between October 18th and November 28th, and these columns exhibit a much more favourable condition than that disclosed by preceding returns. In Burma, Assam and Bengal there has been little change and the percentage figures show a greater or less deficiency over those three provinces, but in the North-West Provinces and the south-east of the Punjab there has been a great change and an excess of rain is reported. In other parts of the Punjab there is still deficiency. Over the south of the Peninsula and the south of the Nizam's dominions an excess of rain is shown, but in Mysore and the northern half of the Peninsula—more particularly in parts of Ganjam—the rainfall remains deficient for the whole season. The Central Provinces have received a large excess of rain in the East, and about the normal amount in the two remaining divisions, while Central India (west) and Rajputana have received an excess of rain.

The following considerable or important totals were recorded during the week, November 22nd to 28th:—Robertsgunj (Mirzapur) 1·92″; Rath (Hamirpur) 1·78″; Nuh (Gurgaon) 1·37″; Dharampuri (Salem) 4·82″; Bangalore 4·52″; Ranebennur (Dharwar) 3·96″; Kelapur (Yeotmal) 2·49″; Mul (Chanda) 2·76″; Jetalsar (Kathiawar) 2·25″; Coringa (Godavery) 4·26″; Sedsont (Cuddapah) 5·54″; Iskapally (Nellore) 14·00″; Madras 19·52″; Kalohasti (North Arcot) 14·28″; Sivaganga (Madura) 12·11.″

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 3rd December 1896.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 5th December.*—The rainfall has been heavy in the greater part of the Carnatic; moderate falls have occurred in parts of Cuddapah and the Central and Southern districts and on the West coast; and light falls in parts of Anantapur. There has been no rain in the remainder of the Deccan districts and Circars. Water-supplies in the Carnatic, Southern and Central districts and parts of Cuddapah are generally adequate for the present; but are very deficient in the Circars, except in deltas, and in the remaining Deccan districts. Ploughing and sowing are progressing generally except in Ganjam and Vizagapatam; but in the most affected portion of the Deccan districts it is very doubtful whether more than fodder will be secured. There has been some improvement in pasture after the late rainfall, but fodder is generally scarce. Prices are slightly easier in the Circars, Kistna, and the Carnatic except Madras and also in Southern districts and West coast; but have risen slightly in the Central and sharply in the Deccan districts. In the latter *Cholum*, the staple grain, is now dearer than the scarcity rate. Relief workers 22,483, weavers 972, at kitchens 652; all in Deccan districts. The decrease is general, except in Cuddapah, and is owing to the demand for field labour.

Bombay.—*For week ending 9th December.*—Slight rain during the week in parts of the Panch Mahals, Ahmednagar, Dharwar, Surat, Khandesh and Colaba. More rain is urgently wanted generally for the late sowings in Deccan and Bijapur. The standing crops have been damaged by locusts in two talukas of Shikarpur and Upper Sind Frontier and one of Hyderabad. Preparations for the late crops or sowing are progressing throughout the Presidency Proper in places where sufficient moisture exists, except in Thar and Parkar, Panch Mahals, Bijapur and Kolaba where they are completed or nearly so. The autumn harvest is almost finished; cotton-picking continues in Ahmedabad and Khandesh. Fodder is sufficient in Gujarat, Konkan and most of Sind except Shikarpur; scarce in the Deccan, Bijapur, Belgaum and parts of Dharwar. Agricultural stock are healthy except in parts of seven districts. Prices are rising in seven districts and parts of five; stationary in five and parts of two; falling in parts of five. Prices in seers per rupee of the staple food-grains in the affected districts are:—Khandesh 9; Poona, Nasik 10; Sholapur, Bijapur, 10½; Ahmednagar, Belgaum, 11; Dharwar 13½. Number on seven ordinary works in Dharwar 753, on test work 392. Number on eight relief works in Khandesh 722, in Nasik 4,629, in Ahmednagar 6,949, in Belgaum 2,093. Figures for Poona, Sholapur, Bijapur, and Dharwar have not been reported.

Bengal.—*For week ending 7th December.*—With the exception of light showers in Jalpaiguri and Darjeeling, there was no rain during the week, and prospects continue unaltered. In South Bihar and in Saran the spring crops are germinating well. In the rest of Bihar rain is still urgently needed for these crops; but they are doing fairly well in Champaran and in Darbhanga (except Madhubani). In parts of North Bengal the prospects of the spring crops are fairly good, but they are poor in the rest of Bengal and in Orissa. The harvest of the winter rice is proceeding. A flight of locusts passed over the district of Khulna on the 28th and 29th November, but no damage to the crops is reported. Cattle are generally in good condition. The price of common rice is reported to have fallen slightly in Patna, Gaya, Saran, Champaran, and a few other districts, but is still very high everywhere. Prices in seers per rupee of the staple food-grains in the affected districts are:—Nadia 8 to 11, Khulna 8 to 9½, Patna 10½, Shahabad 9 to 10, Saran 10¾, Champaran 10, Muzaffarpur 8, Darbhanga 10. The numbers on relief works and in receipt of gratuitous

relief on Saturday, the 5th December, were—Relief works—Nadia, 449; Patna, 74 (men 36, women 12, and children 26); Shahabad, 1,251 (men 526, women 486, and children 239); Saran, 345 (men 97, women 132, and children 116); Champaran, 2,981 (men 1,627, women 817, and children 537); Darbhanga (Madhubani Sub-division), 154 (men 77, women 41, and children 36). Gratuitous relief—Saran, 530 (men 131, women 246, and children 153); Darbhanga, 61 (men 48, women 6, and children 7).

North-Western Provinces and Oudh.—*For week ending 9th December.*—Save for a hill-shower there was no rain during the week. The spring sowings still continue but are near completion in most districts. The seed is generally reported to have germinated well and in some districts the young crops are said to be flourishing. Poppy sowings continue in the Central districts. Slight damage was done to the wheat crop in a portion of the Mirzapur district by the *katni* insect and to the crops in parts of Almora and Garhwal by locusts. The numbers in receipt of relief on Saturday, the 5th December, in nine districts officially recognised as distressed, were as follows:—Banda 51,823; Hamirpur 12,816; Allahabad 12,871; Jhansi 10,299; Jalaun 16,130; Jaunpur 13,727; Rae Bareli 17,393; Sitapur 6,390; Hardoi 14,228; total 155,677. This total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 108,365; relieved as "dependants" 26,513; relieved in poorhouses 11,322; relieved under other provisions of the Famine Code 9,477. The numbers relieved in seventeen districts which are under observation but not yet officially recognised as distressed, were on the same date as follows:—Relieved on test relief works 14,476; relieved in poorhouses, 11,805; relieved under other provisions of the Code 4,893; total 31,174. The grand total in receipt of relief on the last day of the week was therefore 186,851. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices are still high and are showing a tendency to rise in some districts and to fall in others. The prices in seers per rupee of staple food-grains on which famine wages are based are as follows in the districts officially recognised as distressed:—Banda 11, Hamirpur 9½, Jhansi (not stated), Jalaun 10⅜, Allahabad 9⅞, Jaunpur 11¼, Rae Bareli 10½, Sitapur (not stated), Hardoi 9¼.

Punjab.—*For week ending 9th December.*—Rain has fallen in parts of Ferozepore, Rawalpindi, Dera Ismail Khan and Peshawar. Harvesting of the autumn crops is nearly completed. Picking of cotton and pressing of sugarcane continue. Sowings of the spring crops on canal and well-lands are in progress, and also on dry-land in Gurgaon. The condition and prospects of the spring crops are generally reported average to poor. The condition of the irrigated crops is said to be good in Gurgaon, and the prospect of canal crops is favourable, and of crops irrigated by wells, fair in Gujranwala. The outturn of the autumn crops is poor in Mooltan and below average in Dera Ismail Khan. The recent rain has benefited the standing crops slightly in Dera Ismail Khan. More rain is urgently needed to improve the condition of the spring crops already sown. The stock of food grains is insufficient in Hissar, Amritsar and Rawalpindi and in parts of Jullundur, Ferozepore and Shahpur. It is average in Peshawar and getting low in Gujranwala. Cattle are generally in poor condition owing to deficiency of water and hard work. Fodder is scarce in all districts, except Umballa, Peshawar, Rohtak and Gurgaon. The aggregate number of persons employed on relief works in Gujrat on Saturday, the 5th December, was 12,508 including non-working children. Famine works have also been opened in Hissar, Rohtak and Karnal, and the number of persons employed in each district is 8,293, 182 and 1,363, respectively. Relief works have also been started by the Mooltan Municipal Committee. Prices are rising in Peshawar and are high elsewhere. Wheat is selling from 7 to 9½, bulrush millet 8 to 10, gram 8 to 9½, maize 9 to 11½, great millet 8¾ to 11, and rice 7 to 8 seers per rupee.

Central Provinces.—*For week ending 9th December.*—The weather is generally clear and cool. Sowing of the spring crops still continues after the recent rain in parts of Jubbulpore, Wardha and Raipur and their prospects are generally improved, especially in Saugor and Bilaspur. The proportion of

normal area sown ranges between four and eight annas in Saugor, three annas in Damoh and Bilaspur, four annas in Raipur and fourteen annas in Nagpur. The anticipated outturns are:—in Nimar four to six annas, in Bilaspur sixteen annas with rain and twelve annas if no more rain falls. In Wardha the estimate of wheat and linseed ranges from four to twelve annas. Reaping of the autumn crops continues. The estimated outturn ranges between two and eight annas in Saugor, between six and twelve in Nagpur and between seven and twelve in Sambalpore. In Raipur it is four annas. Prices are generally steady with a downward tendency. The price of rice has fallen by one and quarter seers in Saugor and Bilaspur. Fodder is insufficient in Hoshangabad and Nagpur.

Burma.—*For week ending 5th December.*—LOWER BURMA: Reaping of early paddy is in general progress. Crop prospects on the whole are excellent. Some damage has been caused to crops on high lands in Akyab and in part of Prome by drought. UPPER BURMA: No rain has fallen during the week in any district of the dry zone with the result that the *jowar* (*Sorghum vulgare*) and late sessamum crops are almost complete failures; unirrigated paddy has failed and both irrigated paddy and island crops are beginning to suffer from want of rain. Prospects are very bad. The price of paddy has fallen considerably in Rangoon, Bassein, Tavoy and Thayetmyo, and slightly in Henzada and Myaungmya. Elsewhere prices are stationary. Numbers on relief works, 26,514; on gratuitous relief, 2,597.

Assam.—*For week ending 8th December.*—The weather is seasonable. Rain is wanted for the cold weather crops in Cachar. A hailstorm is reported to have damaged the crops in parts of the Sibsagar district. Prospects of the crops are not favourable in parts of the lower districts of the Assam Valley. Reaping of late rice continues. Fodder is sufficient except in the Khasi Hills and in parts of Cachar. The water-supply is adequate. The price of food-grains is high, but rice is now cheaper in Sylhet.

Mysore and Coorg.—*For week ending 9th December.*—MYSORE: Good rain in parts. *Ragi* (*Eleusine coracana*) is being harvested in Bangalore, Kolar, Tumkur, Mysore and Shimoga. Prices have risen in four districts.

COORG: The rice crop is ripening. Picking of coffee continues. Water and fodder for cattle are sufficient. Prices of food-grains are steady.

Berar and Hyderabad.—*For week ending 9th December.*—BERAR: The weather is clear and cool. Cotton-picking and cutting of *Jowar* (*Sorghum vulgare*) are in progress. Crop prospects in Melghat are unfavourable and it is feared that the winter crops will suffer through insufficient moisture. Scarcity of fodder and water prevails in most districts. High prices for food-grains continue, and relief works appear likely to be necessary early next year.

HYDERABAD: Rainfall 9 cents; total from 1st January 27 inches 89 cents. The standing spring crop is in good condition. More rain is wanted. Prices: wheat 7¼, coarse rice 6¾, white *jowar* 9¾, yellow *jowar* 11⅔, gram 8 and *tur* (*Cajanus indicus*) 10½ seers per current rupee.

Central India.—*For week ending 9th December.*—Some rain fell in the Gwalior districts during the week; more rain is still wanted throughout Central India. Agricultural operations continue at a standstill in Baghelkhand but are in progress in other Agencies. The crops have been damaged for want of rain in all Agencies, except in Malwa where the wheat crop is in good condition. Agricultural stock in fairly good condition in all Agencies except in Gwalior and Baghelkhand. Pasturage is fair in Bhopal and Malwa, insufficient and indifferent elsewhere. Prices are above normal in all Agencies except in Bhopal. The opium crop is partially injured in Bhopawar, but is good in Malwa and is being sown in Bhopal. The numbers of persons employed on famine relief works were:—Bundelkhand 609; Baghelkhand 980; on Goona-Bara railway 14,032. The numbers on gratuitous relief were:—Bundelkhand 1,451, Baghelkhand 1,238.

Rajputana.—*For week ending 9th December.*—Rainfall slight in Pertabgarh, Meywar, Kotah, Deoli, Bundi, Ajmere, Bhurtpore, Alwar, Sujangurh, Reni; no rain elsewhere. Sowing of the spring crops is in progress in Serohi, Marwar, Meywar, Ajmere, Bhurtpore, Alwar, Jaisulmere, but is completed in Haraoti and Kerowli. Agricultural operations are satisfactory in Jhallawar, Kotah, Jeypore, fair in Khewara. The standing crops are generally good. The harvest is fair in Ajmere, Jeypore; below average in Haraoti. Cattle are generally in good condition. Pasturage or fodder is sufficient except in Meywar, Tonk, Jeypore, Dholepore and Bhurtpore. Prices of food-grains are rising in Pertabgarh, Bikanir, Jaisulmere; falling in Marwar, Meywar, Jhallawar, Kotah; steady elsewhere. The numbers of persons employed on relief works were:—Kotah 364, Dholepore 4,917, Bikanir 20,769, Jaisulmere 122. The numbers on gratuitous relief were 3,491 in Bikanir. Gratuitous relief has been sanctioned in four districts of Marwar and test relief works started in Bhurtpore.

Kashmir.—KASHMIR VALLEY.—*For week ending 8th December.*—The weather is fine. Spring sowings are still in progress in some places. Prices are below normal.

JAMMU PROVINCE.—*For week ending 9th December.*—No rain. The spring crops are suffering. Fodder is scanty. Relief works have commenced. Remission and suspension of revenue will be necessary in the Jammu and Jasrota districts. Prices are high.

Nepal.—*For week ending 5th December.*—The weather is fine and warm. Sowing of wheat continues.

No. 951 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 16th December 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government therewith promulgated.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Government of Bengal, No. 1129 R., dated the 29th October 1896 forwarding letter from the Managing Agents of the Deoghur railway, No. 1585D. dated the 1st October 1896.

Letter from the Government of Bengal, No. 1352 R., dated the 9th December 1896.

OBSERVATIONS.—The Managing Agents of the Deoghur railway have applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Deoghur railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 1st January 1897, the application to the Deoghur railway of the General Rules, cited in the foregoing observations, for working open lines of railway in British India administered by the Government, in supersession of the rules now in force.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Government of Bengal, Railway Department, for information and guidance.

TELEGRAPH.

The 17th December, 1896.

No. 520.—The Governor General in Council is pleased to order the following reversions in the Superior Establishment of the Indian Telegraph Department, with effect from the dates specified.—

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 17th December, 1896.

NOTIFICATIONS.

No. 3523 R.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 12th December 1896:—

No. 423 of 1896.—Frederic Fowler Farlow, engineer, of Bombay, for a self-acting tank low water alarm.

No. 424 of 1896.—John Poyser, engineer, of Bolehill, Wirksworth, near Derby, England, and Francis Livingstone Ball, engineer, of 16, Charlotte street, Edgbaston, Birmingham, England, for improvements in let off motions for weaving looms.

No. 425 of 1896.—Henry Allan Moss, executive engineer, public works department of India, and general superintendent of the Government workshop, Madras, of Peters road, Madras, for disc-roller bearings for reducing the friction in bearings and journals of machinery, vehicles, etc.

No. 426 of 1896.—John Townsend Trench, land agent, of Kinmare, county Kerry, Ireland, for improvements in pneumatic tyres.

No. 427 of 1896.—Pietro Veraci, engineer, of Florence, Italy, for improvements in tables for cutting out tobacco wrappers and for rolling cigars.

No. 428 of 1896.—John Poyser, engineer, of Bolehill, Wirksworth, near Derby, England, for improvements in battens for weaving looms.

No. 429 of 1896.—Roderick McLeod, junior, tea merchant, of 69, George street, Edinburgh, and Alexander Mathers McLeod, solicitor, of 20, Greenhill gardens, Edinburgh, for improvements in and connected with pneumatic tyres of cycles, carriages, motor cars, and other vehicles.

No. 430 of 1896.—Emil Paul Schoenfelder and Emil Kehle, chemists, of 27, South Orange avenue, Newark, county of Essex and state of New Jersey, United States of America, for improvements in and connected with photographic cameras.

No. 431 of 1896.—Maung Chit Pe, of No. 32, Kyaikpane, Pagoda street, Moulmein, for an improved vertical rice pounding or cleaning machine.

No. 432 of 1896.—Henri Edouard Couzineau, clothier, of 81, Rue Gambetta, Lille, France, for improvements in apparatus for printing or impressing designs, patterns, or outlines of garments on fabrics or other materials, or for analogous purposes.

No. 433 of 1896.—Jahar Lal Dhar, professional scientist, of 97, Beadon street, Calcutta, for a cheap and smokeless kerosine lamp.

No. 3524 P.—SPECIFICATIONS of the undermentioned inventions have been filed under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 256 of 1896.—John Coryton Roberts, planter, of 16, Cromwell grove, West Kensington, London, for improvements in the manufacture of tea chests, and other packing cases or boxes. (Specification filed 8th December 1896.)

No. 346 of 1896.—Messrs. Redlhammer Brothers, manufacturers, of Gablonz, Bohemia, for improvements in bracelets, necklaces and the like. (Specification filed 5th December 1896.)

No. 3525 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 94 of 1888.—William Gadd, civil and consulting engineer, of 64, Barton Arcade, Manchester, England, for improvements relating to the construction of gas-holders. (From 23rd January 1897 to 23rd January 1898.)

No. 142 of 1890.—Richard Stanfield, professor of engineering of Heriot-Watt College, Edinburgh, and Thomas Clarkson, demonstrator in metallurgy, of King's College, London, for an improved method and means for separating metals and heavy minerals from ores. (From 12th January 1897 to 12th January 1898.)

No. 260 of 1892.—Albert Legg and Charles Ward Weston, of Milton, in the county of Ulster, and State of New York, for improvements in sewing machines. (From 14th January 1897 to 14th January 1898.)

No. 3526 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 114 of 1891.—Henry Rembert's invention for a new method of baling cotton. (Specification filed 9th September 1892.)

No. 190 of 1891.—Frank Harris' invention for a new and improved suspended sluice gate. (Specification filed 8th September 1892.)

No. 91 of 1892.—Thomas McMurray's invention for new or improved compounds to be used for disinfecting, deodorising, germicide, sanitary, manuring and like purposes. (Specification filed 12th September 1892.)

No. 97 of 1892.—James Mackay Taylor's invention for an improved water lift. (Specification filed 9th September 1892.)

No. 98 of 1892.—Thomas Obbinson's invention for an improved method of, and apparatus for, advertising. (Specification filed 9th September 1892.)

No. 102 of 1892.—Alfred Basch's invention for an improved lamp reflector. (Specification filed 7th September 1892.)

No. 112 of 1892.—Wilhelm Kohler and Daniel Kegler's invention for vitrification furnaces. (Specification filed 12th September 1892.)

No. 164 of 1892.—Henry Edmund Collins' invention for a new or improved bow-facing apparatus for rowing on the rachet principle. (Specification filed 12th September 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No. 163 of 1891.—Dorabji Burjorji's invention for the economic leather roller for the cotton gin. (Specification filed 7th September 1896.)

Fee in respect of the continuance of an exclusive privilege—

(b) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office, are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

Straits Settlements, China, and Japan	23rd "	Per Steamer *C Apcar.*
Rangoon and Moulmein . .	25th "	Per B. I. S. N. Co's Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	22nd "	Ditto
Rangoon, Moulmein, Penang, and Singapore.	19th "	Ditto.
Ditto ditto (Supplemental)	20th "	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	23rd "	Ditto.
Port Blair	21st "	*Viâ* Madras.
Ditto	23rd "	Ditto.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *viâ* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9 30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8;* per eight-ounce tin, *R5;* per pound tin, *R10.* The general public can be supplied by the Superintendent, Botanic Garden, *for cash only,* at the under-noted rates. per four-ounce tin, *R3;* per eight-ounce tin, *R6;* per pound tin, *R12.* This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبري فيوج يعني تپ بهگانے والے سنکونا *

سنکونا فبري فيوج کلکته کے بوٹانکل گاردن يعني کمپني باغ کے سپرنٹندنٹ صاحب سے هرايک ملازم سرکاري اور ايک مشت چهه پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هی — يعني چار اونس والا ٹين بقيمت دو روپيه آٹهه آنه ؛ آٹهه اونس والا ٹين بقيمت پانچ روپيه ؛ ايک پونڈ والا ٹين بقيمت دس روپيه *

عام آدميون کو يهه دوا بوٹانکل گارڈن يعني کمپني باغ کے سپرنٹندنٹ صاحب سے نقد حسب نرخ ذيل مل سکتي هی — يعني چار اونس والا ٹين بقيمت تين روپيه ؛ آٹهه اونس والا ٹين بقيمت چهه روپيه ؛ ايک پونڈ والا ٹين بقيمت باره روپيه *

يهه دوا کلکته کے بڑے بڑے ولايتي اور ديسي دواخانون مين بهي بکتي هی — ماسواے قيمت مذکورهٔ بالا کے محصول ڈاک چار اونس والے ٹين کا چار آنه ؛ آٹهه اونس والے ٹين کا آٹهه آنه ؛ اور ايک پونڈ والے ٹين کا باره آنه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows.—

1-pound tin,	R18,	or,	post free,	R18-12.
½	„	R 9,	„	R9-8.
¼	„	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৮৲	বা	ডাকমাশুল সমেত	১৮৸০
½ আধ „ „	৯৲		„	৯৷০
¼ সিকি „ „	৪৷০৲		„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশ্রিত নয় তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 17th December, 1896, and is hereby promulgated for general information :—

ACT NO. XXI OF 1896.

An Act to amend the Indian Paper Currency Act, 1882.

WHEREAS it is expedient to authorise an increase of the amount which may be invested in securities of the Government of India out of the coin and bullion received for currency notes under the law relating to the Government paper currency; It is hereby enacted as follows:—

Short title and commencement.

1. (1) This Act may be called the Indian Paper Currency Act Amendment Act, 1896; and

(2) It shall come into force at once.

Amendment of section 19, Act XX, 1882.

2. Section 19 of the Indian Paper Currency Act, 1882, as amended by Act No. XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*), shall be read as if for the words "eighty millions" the words "one hundred millions" were substituted.

Repeal of Act XV, 1890.

3. Act No. XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*) is repealed, but not so as to affect the validity of anything heretofore done in pursuance of the provisions of that enactment.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 17th December, 1896:—

NO. 27 OF 1896.

A Bill to provide for the compulsory registration of certain transfers and dispositions of goods in order to prevent debtors from defeating the claims of their creditors by secret assignments of such goods.

WHEREAS it is expedient to provide for the compulsory registration of certain transfers and dispositions of goods in order to prevent debtors from defeating the claims of their creditors by secret assignments of such goods; It is hereby enacted as follows:—

Short title, extent, application and commencement.

1. (1) This Act may be called the Indian Bills of Sale Act, 1896;

(2) It extends to the whole of British India; and

(3) It shall come into force only in such local areas and with effect from such dates as the Local Government may, by notification in the official Gazette, direct.

Definitions.

2. In this Act, unless there is anything repugnant in the subject or context,—

(1) "bill of sale" means any document recording the sale, mortgage or other transfer of goods, or creating any charge thereon, and includes a license to seize goods;

(2) "goods" mean all corporeal moveable property other than money; and

(3) "assignee in bankruptcy" includes any person in whom the estate of an insolvent or bankrupt is vested by any law for the time being in force.

Avoidance of certain transactions unless registered.

3. Subject to the provisions of section 4, where the owner of goods (hereinafter called the grantor) sells, mortgages or otherwise transfers the property therein, or creates any charge thereon, or gives a license to seize the goods, and such grantor remains in the apparent possession of the goods, such sale or other disposition as above-mentioned shall be void as against an execution-creditor or the assignee in bankruptcy of such grantor unless the following conditions are complied with, namely:—

(1) the sale or other disposition must be recorded in a bill of sale;

(2) the bill of sale must be registered within seven days of the completion of such sale or other disposition.

Explanation.—Goods shall be deemed to be in the "apparent possession" of a grantor so long as they remain or are in or upon any house, warehouse, building, works, land or other premises occupied by him, or are used or enjoyed by him in any place whatsoever, notwithstanding that formal possession thereof may have been taken by, or given to, any other person.

Illustration.

A and B are husband and wife. A by an unregistered instrument transfers his household furniture to B. As long as A and B are living together, the furniture remains in A's apparent possession, and can be taken in execution for his debts.

Saving for mercantile transactions, etc.

4. Nothing in this Act shall apply to or affect the operation of—

(1) any mercantile document of title to goods, that is to say, any bill of lading, dock-warrant, warehouse-keeper's certificate, warrant or order for the delivery of goods, or any other document used in the ordinary course of business as proof of the possession or control of goods or authorizing or purporting to authorize, either by endorsement or delivery, the possessor of the document to transfer or receive goods thereby represented,

(2) any ante-nuptial marriage settlement;

(3) any bill of sale executed outside British India;

(4) any right of distress for rent, revenue or otherwise, or any right of priority given by law:

nor shall anything in this Act apply to or affect the transfer or other disposition of any ship or share therein, which is required to be registered under any Merchant Shipping Act for the time being in force.

Power to make rules.

5. (1) The Governor General in Council may, by notification in the Gazette of India, make rules—

(a) for the publication of registered bills of sale, or such particulars thereof as it may be expedient to publish;

(b) for applying, with any necessary modifications, the provisions of the Indian Registration Act, 1877, in regard to bills of sale, and for fixing fees for the registration and publication thereof; III of 1877.

(c) for extending, under special circumstances, the time for registration; and,

(d) generally, for carrying out the objects of this Act.

(2) Any rule so made may from time to time be in like manner varied or rescinded.

STATEMENT OF OBJECTS AND REASONS.

THE attention of the Government of India was in 1894 directed to the case of a merchant who had given to his bankers by way of security a bill of sale over his entire stock in trade, the bill, which had apparently run for years without the knowledge of the grantor's other creditors, never having been registered by him. The "reputed ownership clause" (section 23) of the Indian Insolvency Act, 1848 (11 & 12 Vict., c. 21), which applies only to the Presidency-towns and to creditors in insolvency, contains a provision inserted with but little variation in every English Bankruptcy Act since the reign of James I, but technical and somewhat narrow interpretations have been placed upon it by the Courts at home, and it has been found necessary in England to supplement it by the Bills of Sale Acts and other legislation. In India sections 108 and 178 of the Indian Contract Act (IX of 1872), in so far as they are relevant, merely enable the apparent owner of goods to sell or pledge them, although he has not obtained the consent of the true owner, while they do not touch the case of creditors, who, it follows, are, save for the very limited and rather uncertain protection afforded by section 23 of the Indian Insolvency Act of 1848, entirely left out in the cold in this country. It seemed, therefore, to the Government of India that a *primâ facie* case for legislation had been made out, and the whole question has since formed the subject of correspondence with the Secretary of State and the various Local Governments and Administrations, who have been consulted upon it, with the result that there appears to be a general consensus of opinion that a law is required in India to safeguard execution-creditors and creditors in insolvency against such secret assignments of property as that referred to above. The form which legislation should take has been carefully considered, and it is thought that the Bill which it is now proposed to introduce in Council will be found to proceed on sound lines and to accomplish the object in view. Its main provision is to the effect that, where a person sells or charges his moveable property, but remains in ostensible possession under such circumstances as to be the apparent owner thereof, such property shall be liable to be taken in execution or by the assignee in bankruptcy unless the assignment or charge is in writing and is duly registered, but the Bill in no wise interferes with the validity of any transaction, as between grantor and grantee. In order to avoid interference with the ordinary course of trade, mercantile documents of title, such as bills of lading, dock warrants, etc., must continue to be exempt from registration and are, therefore, removed from the operation of the proposed enactment along with ante-nuptial marriage settlements, bills of sale executed outside British India, rights of distress and rights of priority specially conferred by law. Power is at the same time taken by clause 5 of the Bill for the Governor General in Council to make rules to supplement its provisions where necessary.

M. D. CHALMERS.

The 15th December, 1896.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 17th December, 1896:—

NO. 28 OF 1896.

A Bill to amend the Indian Paper Currency Act, 1882.

WHEREAS it is expedient to authorise an increase of the amount which may be invested in securities of the Government of India out of the coin and bullion received for currency notes under the law relating to the Government paper currency; It is hereby enacted as follows.—

Short title and commencement.

1. (*1*) This Act may be called the Indian Paper Currency Act Amendment Act, 1896; and

(*2*) It shall come into force at once.

Amendment of section 19, Act XX, 1882.

2. Section 19 of the Indian Paper Currency Act, 1882, as amended by Act No. XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*), shall be read as if for the words "eighty millions" the words "one hundred millions" were substituted. XX of 1882.

Repeal of Act XV, 1890

3. Act No. XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*) is repealed, but not so as to affect the validity of anything heretofore done in pursuance of the provisions of that enactment.

STATEMENT OF OBJECTS AND REASONS.

THE circulation of Currency Notes has very largely increased since power was taken in 1890 to raise to eight crores the limit of the amount of the Currency Reserve which may be invested in Government Securities.

It is proposed accordingly to take power to invest up to ten crores.

J. WESTLAND.

The 11th December, 1896.

J. M. MACPHERSON,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 51.} CALCUTTA, SATURDAY, DECEMBER 19, 1896.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 5th, 1896.

Pressure has been higher than usual, and the weather generally quiet and settled, during the week under review. The barometer has been steadily highest over Northern India and lowest over the extreme south of the Bay and of the Peninsula. This is the ordinary distribution of pressure at this season, and, as in the present case, is usually associated with fine and dry weather over the greater part of the country, though at times, when the low pressure area in the south intensifies and gradients become steep over the Bay, showers are experienced over the south of the Peninsula. Rain was reported on the first day of the week from a few stations in the extreme north, a fall of rain due to the shallow depression which was noticed over the western desert at the close of the previous week. This was the only rainfall received over northern and central parts of the Indian region until the last day of the week when some light showers were reported from parts of Assam and of Upper Burma. In Southern India the rainfall, though much heavier and more general than the fall in Northern India, was much lighter and less continuous than in the same area in previous weeks. Thus on the 29th fairly general showers were reported the heaviest being 2·85" at Mysore; on the 30th general showers were again reported, but the heaviest was only 0·54" at Bangalore; on the 1st December the only shower was 0·18" at Trivandrum; on the 2nd and 3rd there was no rain in this region, but on the 4th showers recommenced lightly at a few places in the South Carnatic, and on the 5th these showers became heavier

and more-extensive, Negapatam reporting over 5 and Madras over 4 inches of rain. The mean temperature of the whole country has been steadily excessive, the abnormal excess ranging from 4°·4 on the 30th November to 2°·5 on the 2nd and 2°·6 on the 5th of December.

Daily Summary.—*Sunday, 29th November.*—Pressure had increased everywhere—slightly in Burma and North-East India, briskly over the Peninsula and rapidly over North-West India, whence the small depression noticed on the previous day had disappeared. Readings were highest over the west of the Punjab and lowest in Ceylon. Calms and variable light breezes prevailed in the Gangetic Plain, and the ordinary northerly to easterly winds elsewhere. The mean temperature was excessive except in the extreme north-east and extreme north-west. The abnormal heat was very great over the Central Provinces. Showers were reported on the hills and over the neighbouring submontane regions and general showers over the southern half of the Peninsula. In the former region the heaviest fall was 1·2" at Murree, in the latter 2·85" at Mysore.

Monday, 30th November.—Pressure had risen briskly over Baluchistan, Sind and the west of Rajputana, and fallen briskly in Bihar, but elsewhere the changes were slight. An area of relatively low pressure had appeared over North Bihar, but this was the only change in the general distribution. Strong north-westerly winds were blowing down the Gangetic Plain, but elsewhere the winds were generally the same as on the 29th. The heat was less than usual in the extreme north-west and greater than usual elsewhere. Rain had ceased in the north west. Showers continued in the South of the Peninsula, but had become lighter, the largest amount reported having been 0·54" at Bangalore.

Tuesday, 1st December.—The barometer had given way everywhere and over North-West India rapidly. Readings were highest over Sind and Rajputana, and lowest over the south of the Bay. Strong north-westerly winds continued down the Gangetic Plain, northerly winds prevailed over the Bay and easterly winds elsewhere. The mean temperature remained low over North-West India and Baluchistan, and was lower than usual at a few places in Burma, Assam and South Madras. Elsewhere the heat was excessive, but especially so over the Central Provinces. The only rainfall reported was light showers at Colombo, Trincomalee and Trivandrum.

Wednesday, 2nd December.—The barometer had continued to fall in the north-west, but in all other places a recovery had set in, which had been brisk to rapid in the north east. Readings were high and fairly uniform over the north and centre, whence they decreased slowly southward to a low pressure area over the South of the Bay. The north-westerly winds, down the Gangetic Plain, had fallen off, but in other places there was no important change. The distribution of the mean temperature relatively to the normal was the same as on the 1st. Showers had been received at Sibsagar and Colombo.

Thursday, 3rd December.—The barometer had risen briskly in the north of the Punjab, but elsewhere the changes were small or slight. Readings were highest in Eastern Rajputana and lowest near Ceylon. Northerly to easterly winds prevailed except over Northern India where calms and light variable breezes were reported. The temperature conditions were generally unchanged. Some rain had fallen in Ceylon but there had been none over India and Burma.

Friday, 4th December.—The pressure changes had been slight or small and the distribution was practically unaltered. Calms continued to prevail over Northern India and northerly to easterly winds over the Bay area, the Peninsula and the Central Provinces. The mean temperature continued slightly below the normal over Bengal, South Madras and part of the Punjab, while elsewhere the heat remained excessive. Light showers of rain were reported from Cuddalore, Negapatam and Madura, but from no other Indian station.

Saturday, 5th December.—Pressure had risen in most places. The rise had been greater in the north than in the south and the pressure difference, between the high pressure area in the north and the low pressure area in the south, had increased and the winds had risen over the Bay. There was no

other change of importance, but the increased air movement over the Bay had resulted in increased rainfall in Madras where Negapatam reported 5·30" and Madras 4·32". The temperature conditions were unaltered.

Temperature.—The temperature conditions throughout the week had been remarkably steady. There has been a daily large excess of heat over the central parts of the country. From this central area, where the mean temperature was from 10° to 14° above the normal, the amount of the excess gradually decreased in all directions, and in parts of North-Western, of North-Eastern and of Southern India disappeared and was replaced by a slight abnormal defect.

The following table gives the variations of the mean temperature from the normal average in the different provinces of India :—

Province.	November 1896		December 1896					Mean variation of week.
	29th.	30th.	1st.	2nd	3rd.	4th	5th.	
Burma	+0·6	+1·5	+0·9	+0·4	—0·3	+1·9	+2·8	+1·1
Bengal and Assam . .	+1·3	+2·9	+4·6	+2·2	+1·4	+1·4	+2·1	+2·3
North-Western Provinces and Oudh	+6·2	+8·9	+4·1	+0·7	+1·7	+1·8	+1·1	+3·5
Punjab	+4·2	+0·9	+0·6	+0·8	+0·7	+0·5	+0·7	+1·2
Bombay	+3·5	+4·7	+4·9	+5·3	+4·7	+3·8	+4·4	+4·5
Central Provinces and Berar	+8·2	+9·3	+10·7	+10·4	+10·4	+9·7	+8·1	+9·5
Central India and Gujarat .	+6·6	+6·7	+5·6	+3·7	+2·5	+2·8	+1·8	+4·2
Sind and Rajputana . .	+3·7	+1·5	—3·7	—3·1	+0·6	+0·7	+1·0	—0·1
Madras	+2·8	+2·8	+1·5	+2·0	+3·1	+1·9	+1·7	+2·3
MEAN FOR WHOLE OF INDIA	+4·1	+4·4	+3·2	+2·5	+2·8	+2·7	+2·6	+3·2

On each day of the week the mean temperature of the whole country was excessive, the abnormal excess being over 4° for the whole of India on the 29th and 30th of November. The provincial variations show that the mean temperature of the week was nearly normal in Sind and Rajputana, but was excessive elsewhere, the variation over the Central Provinces being as much as +9°5. The night temperatures which were recorded over the central parts of India throughout the week were very remarkable.

Rain.—The rainfall returns of the present week exhibit a much less extended and a much less heavy fall of rain than was the case in the preceding week. In the case of the present week the rainfall has been confined to two areas—one the North-West of India, the second the south of the Peninsula, though in parts of North-East India a few local showers have been received. The rainfall over North-West India was the result of a slight depression which appeared over the Punjab at the close of last week, and which occasioned slightly unsettled and showery weather over a considerable part of the Punjab and over some districts of the North-Western Provinces and of Central India. This disturbed weather only lasted during the first few hours of the week under review, after which fine weather, with low humidities, set in and continued till the close of the week. The scattered showers noticed in the North-East of the Indian region occurred mainly on the last day of the week. They were nowhere of any particular importance. In the southern half of the Peninsula rain fell as fairly general showers on the first two days of the week; then followed three dry days during which practically no rain fell, after which showers recommenced, and on the Madras coast the rainfall became heavy.

The concluding table gives the rainfall data. Rain fell during the week only in twenty-two of the rainfall divisions as compared with forty-eight divisions last week. Of the twenty-two divisions reporting rainfall ten have received amounts of less than one-tenth of an inch of rain for the week for the division. Consequently effective rain was received only in twelve divisions, which were as follows: Upper Burma; Assam (Brahmaputra); the North Punjab; Malabar; Madras (south-central, central and south); Coorg; Mysore; Central India (East);

and the East Coast (central and south). The average actual rainfall in these divisions varied from 1·27" in the East Coast (south) and 1·07" in Madras (south-central) to 0·12" in Central India and to 0·11" in Upper Burma. The anticipated rainfall over India during the week under review is almost everywhere small; hence where rain has occurred, the amount received has in several cases exceeded the amount anticipated, so that, Assam (Brahmaputra), North Bengal, the Punjab (central, submontane, north and west), Malabar, Madras (south-central), Coorg, Mysore, Khandesh, Madras (central) and the East Coast (central), in all thirteen rainfall divisions received more than the average normal fall. The deficiencies were in no way remarkable and the only cases of important excess were in the North Punjab and Madras (south-central) divisions.

The three concluding columns of the table exhibit the average actual and average normal rainfall for the period October 18th to December 5th. The variations between the actual and normal rainfall as exhibited by the column of percentages are very irregular, and though frequently very large, express in many cases only small differences in the actual amount of rainfall. Thus, in parts of the North-Western Provinces, of Oudh and of the Punjab, the actual average rainfall has varied roughly between one-tenth of an inch and three-quarters of an inch for the whole season, while the normals vary between one-tenth of an inch and one-third of an inch, so that though the actual difference in the amount of rainfall received and anticipated has been only small, the percentage variations are in some cases very large.

The following are the most important total falls recorded during the week, November 29th to December 5th: Magok 1·17"; Dibrugarh 0·65"; Hoshiarpur 1·04"; Murree 1·25"; Abbottabad 1·43"; Hungu (Kohat) 1·48"; Manjeri (Malabar) 1·82"; Pollachi (Coimbatore) 3·98"; Kodard (Nilgiris) 2·50"; Hosur (Salem) 1·95"; Mysore 2·04"; Naidurbar (Khandesh) 1·27"; Gadour (Nellore) 4·95"; Madras 4·81"; Negapatam 5·54".

Province.	Division.	Rainfall data for week ending December 5th, 1896. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from October 18th to December 5th, 1896. Average actual rainfall of season to date.	Average normal rainfall, Oct. 18th to Dec. 5th. W. L. DALLAS,
Offg. Meteorological Reporter to the Government of India.

SIMLA, *the 10th December 1896.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th December.*—Rainfall very heavy in the Carnatic, south of Nellore, and in the Southern districts. Moderate rain in most parts of the Central districts and Malabar. Water-supplies are ample in the southern half of the Presidency, but are very scanty except under the larger irrigation works over most of the remainder. Sowings are proceeding actively in the southern half, but are restricted or have not begun elsewhere. Pasture and fodder are scarce in many parts of the Circars and fodder is scarce and dear in the Deccan; elsewhere the supply is sufficient. Cattle are generally in fair condition. Prices show very little change and are fluctuating irregularly. *Cholam* in Kurnool is 13·5, Bellary 13, Anantapur 14, and Cuddapah 13 seers per rupee. The numbers relieved were:—Relief workers 23,412; fed at kitchens 829, and weavers 984, all in the Deccan districts. The increase is slight except in Cuddapah. Test works opened in Ganjam attracted no workers for the famine wage.

Bombay.—*For week ending 16th December.*—No rain during the week. More rain is urgently wanted for the crops sown after the recent rain in Broach and the affected districts generally. The standing crops have been damaged by locusts in three talukas and by drought in one taluka of Karachi, and are withering for want of rain in parts of Bijapur. Preparations for the late crops or sowings are progressing in Sindh, Khandesh, Ratnagiri, Ahmednagar and Kanara, and are nearly completed in Thana. The standing spring crops are reported to be thriving in Gujarat, Kolaba and the unaffected tracts of Dharwar, but are poor in the affected districts. The autumn harvest is nearly finished, except in the Upper Sind Frontier, Khandesh and Dharwar. Fodder is sufficient except in Shikarpur, and the Deccan and Karnatak districts; it is generally very dear. The grain supply is generally sufficient in the affected districts. Cotton-picking continues in Ahmedabad, Khandesh and Broach. The condition of agricultural stock is deteriorating in the affected tracts owing to lack of fodder. Prices are rising in Shikarpur, Ahmedabad, Poona, and in parts of Broach, Surat, Ratnagiri and Sholapur, but are stationary in Bijapur and parts of Surat and Broach and are falling in parts of Surat, Broach and Khandesh. Prices of the cheapest staple food-grain in the affected districts are:—Ratnagiri 8½, Khandesh, Nasik and Kolaba 9, Poona 9½, Sholapur and Satara 10, Belgaum and Bijapur 10½, Ahmednagar 11, Dharwar 12½ seers per rupee. The numbers on ordinary works in Dharwar were 905, and on test work 62. The numbers on relief works were:—Khandesh 2,613; Ahmednagar 16,014; Satara 5,406; Bijapur 20,459; Sholapur 29,961; Belgaum 1,403; Nasik 6,442. Figures for Poona have not been reported. The numbers on gratuitous relief were:—Khandesh 740, Satara 5, Sholapur 144.

Bengal.—*For week ending 14th December.*—There was no rain during the week, and little change in the agricultural prospects of the Province. The harvesting of winter rice is in progress in all districts. The prospects of the spring and poppy crops in Patna, Gaya, Shahabad and Saran continue favourable; but elsewhere in Bihar these crops, though so far fair, are urgently in need of rain. In North Bengal and in Mymensing the spring crops are doing well. In almost all other parts of the Province they are reported to be poor. In Orissa sowings of *dalua* or spring rice have begun. Sugarcane is doing well, and pressing has commenced in some districts. The price of common rice is reported to have fallen in a few stations in the Burdwan and Presidency Divisions. In Patna, Gaya, Saran and Champaran it is said to have slightly risen. Prices of common rice in the distressed districts are:—Nadia 11 seers, Khulna 8 seers, Patna 10½ seers, Shahabad 9½ seers, Saran 10 seers, Champaran 9⅝ seers,

Darbhanga 10 seers; in Muzaffarpur *makai* (Indian corn) sells at 12 seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 12th December, were:—Relief works—Nadia, 389; Khulna, 82 (for 8th December); Patna, 92 (men 40, women 20, and children 32); Shahabad, 749 (men 340, women 297, and children 112); Saran, 943 (men 249, women 335, and children 359); Champaran, 6,323 (men 3,206, women 1,697, and children 1,420); Darbhanga, 1,144 (men 505, women 332, and children 307); Gratuitous relief—Saran, 547 (men 124, women 333, and children 90); Champaran, 1,129 (men 316, women 605, and children 208); Darbhanga, 306 (men 137, women 113, and children 56).

North-Western Provinces and Oudh—*For week ending 16th December.*—There was no rain during the week. Spring sowings are near completion in some districts but in others are still being vigorously carried on. Irrigation is actively progressing and the crops are generally reported to be doing well though rain is urgently needed. Poppy sowings are almost complete and the crop is doing well. Slight damage to the wheat crop from the *Katni* insect is reported in the Mirzapur district and from locusts in the Almora district. The numbers in receipt of relief on Saturday, the 12th December, in nine districts officially recognised as distressed were as follows:—Banda 69,312; Hamirpur 18,224; Allahabad 21,845; Jhansi 14,120; Jalaun 17,185; Jaunpur 16,497; Rae Bareli 19,528; Sitapur 8,031; Hardoi 20,942; total 205,684; this total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 142,845; relieved as dependants 33,274; relieved in poor-houses 17,895; relieved under other provisions of the Famine Code 11,670. The numbers relieved in twenty-four districts which are under observation but not yet officially recognised as distressed were on the same date as follows:—relieved on test works 30,941; relieved in poor-houses 11,284; relieved under other provisions of the Code 8,597; total 50,822. The grand total in receipt of relief on the last day of the week was therefore 256,506. Supplies generally are sufficient. Fodder is somewhat scarce in places. Prices remain high though in some districts they are fractionally lower. The prices of staple food-grains on which famine wages are based are as follows:—In the districts officially recognised as distressed—Banda $10\frac{5}{16}$ seers per rupee, Hamirpur $10\frac{3}{16}$, Jhansi $10\frac{1}{2}$, Jalaun $10\frac{1}{16}$, Allahabad $9\frac{13}{16}$, Jaunpur 10, Rae Bareli $10\frac{3}{4}$, Sitapur $13\frac{2}{5}$, and Hardoi $9\frac{1}{2}$.

Punjab—*For week ending 16th December.*—No rain. Harvesting of the autumn crops is nearly completed. Cotton-picking and sugarcane-pressing continue. Sowings of the spring crops on irrigated lands are in progress; but dry lands are generally lying unsown. The condition and prospects of the standing crops are reported average to poor. The crops on well and canal lands are flourishing in Rohtak. Prospects of the crops are favourable on canal and fair on well irrigated lands in Gujranwalla. The outturn of the autumn crops is poor in Mooltan and below average in Dera Ismail Khan. More rain is urgently wanted. The cold dry winds are causing damage to the crops in Umballa. The stock of food-grains is insufficient in Hissar, Amritsar, Rawalpindi and in parts of Jullundur and Ferozepore; it is average in Peshawar, and is getting low in Gujranwalla. Cattle are generally in poor condition owing to deficiency of fodder and hard work; their condition is reported fair in Delhi and Shahpur and good in Umballa, Amritsar, Mooltan and Peshawar. Fodder is scarce in all districts except Umballa, Peshawar, and Rohtak. The aggregate number of persons employed on famine relief works were:—Gujrat (Saturday, 12th December) 14,642 including non-working children; 5,071 in Hissar; 98 in Delhi; 622 in Umballa; 1,577 in Mooltan; 319 in Rohtak and 1,875 in Karnal. Small test works have also been started in the Sialkot city. Gratuitous relief has not yet been started in Hissar. Prices of staple grain on which famine wages are based are in Delhi bulrush millet $8\frac{1}{2}$ seers, in Umballa maize 10 seers, in Mooltan wheat 9 seers, in Rohtak barley 9 seers, in Karnal maize 10 seers. Prices are rising in Peshawar, but are falling in Rohtak and Gurgaon; elsewhere prices are high. Wheat is selling from 7 to $9\frac{1}{2}$ seers, bulrush millet and gram 8 to 10, maize 9 to $11\frac{1}{4}$, great millet $9\frac{1}{4}$ to $9\frac{1}{2}$, and rice 7 to 8 seers per rupee.

Central Provinces.—*For week ending 16th December.*—The weather is clear and very cold. Prospects of the spring crops are generally fair but more rain is required, especially in Hoshangabad where the crops are withering but would be slightly improved if rain falls. Harvesting of the autumn crops is approaching completion. Fodder is generally sufficient, but is insufficient in Hoshangabad. The numbers on relief works and in receipt of gratuitous relief in districts from which reports have been received are as follows:—Saugor 3,185, Jubbulpore 5,440; Narsinghpur 1,062; Nimar 494; Nagpur 5,489; and Wardha 269. Of these 5,834 were gratuitously relieved. 13,800 people were also employed on railway and other ordinary works in Saugor and Jubbulpore. Some relief works have been started in the Raipur district. The prices of staple food-grains upon which famine wages are based are:—Hoshangabad, Nagpur and Bhandara 10, Nimar 9½, Mandla 9¾ and Betul 11 seers per rupee.

Burma.—*For week ending 12th December.*—In Lower Burma reaping of the early paddy is completed in Tavoy and Toungoo and is in progress in other districts. Crop prospects are very good. In Upper Burma reaping of the early paddy is completed. Reaping of the main paddy crop has commenced; and ploughing for dry weather paddy and sowing of island crops are in progress. Prospects are bad in the unirrigated areas of the dry zone and the rain which fell in a few districts being untimely has not improved the standing crops. The price of paddy has fallen considerably in Thaton and slightly in Rangoon and Thayetmyo; elsewhere prices are stationary. The numbers on relief works in Meiktila and Myingyan districts were: 16,502 and 19,690 respectively; on gratuitous relief 219, and 2,856 respectively. Prices of rice are: Meiktila and Myingyan, 9 seers per rupee.

Assam.—*For week ending 15th December.*—The weather is seasonable. Prospects of the crops in Kamrup are not favourable. Harvesting of the late rice continues. The condition of tea is fair. Fodder is sufficient except in the Khasi hills and parts of Cachar. The water-supply is sufficient. Prices of food-grains are high in Darrang, Nowgong and Sibsagar. Rice is cheaper in the Surma Valley.

Mysore and Coorg.—*For week ending 16th December.*—MYSORE: Slight rain fell in parts. The standing crops are in good condition. *Ragi* (*Eleusine coracana*) and paddy have been harvested in parts. Prices have fallen in Bangalore, Mysore, Chitaldroog and Shimoga, but have risen in Kolar.

COORG: Rice harvest has begun. Coffee-picking continues. Water and fodder for cattle are sufficient. Prices of food-grains are steady.

Berar and Hyderabad.—*For week ending 16th December.*—BERAR: The weather is cool. No rain during the week. Cotton-picking and cutting of *jowar* (*Sorghum vulgare*) continues. In regard to the winter crops the young plants are in poor condition in most districts. Sowing operations are in progress in Basim, Buldana and Ellichpur. Fodder and water are generally insufficient. Prices have fallen in Buldana and Wun, but have risen in Amraoti; elsewhere prices are stationary.

HYDERABAD: Rain is wanted for the spring crops, especially in the Gulburga and Aurangabad divisions. The water-supply is deficient. Pasture is scarce. Prices are:—wheat 7¼, coarse rice 6¾, white *jowar* 10, yellow *jowar* 12½, gram 8¼, and *tur* 10½ seers per current rupee.

Central India.—*For week ending 16th December.*—No rain fell during the week. Agricultural operations are in progress in all Agencies, except Baghelkhand. The spring crops are good in Malwa, fair in Bhopal, parts of Bundelkhand * and in one district of Gwalior, bad in Baghelkhand and parts of Gwalior. Agricultural stock are in fairly good condition in Bhopal, Bundel-

* The report from Bundelkhand is not complete.

khand, Malwa and some districts of Gwalior, but are indifferent elsewhere. Pasturage is fair in Bhopal and Malwa and in three districts of Gwalior, but is insufficient and indifferent in Bundelkhand and Baghelkhand and in parts of Gwalior. Prices are above normal in Bundelkhand, Baghelkhand and Malwa and are rising in some districts of Gwalior, but are low in other districts. Opium is being sown in Bhopal and is in good condition in Malwa. The numbers employed on famine relief works were: Gwalior 11,582, excluding persons employed on the Goona-Bana Railway; Bundelkhand 1,473; Baghelkhand 2,125. The numbers on gratuitous relief were: Bundelkhand 1,541, and Baghelkhand 1,425. No report received from Bhopawar.

Rajputana.—*For week ending 16th. December.*—No rain throughout Rajputana. Agricultural operations are satisfactory in Jhallawar, Kotah, Ajmere, and Jeypore. Spring sowings are in progress in Sirohi, Marwar, Meywar, Ajmere and Ulwar, and are completed in Haraoti and Jaisulmere. The standing crops are good throughout. Prospects of the harvest are good in Merwara, Jeypore, Kotah and Jhallawar, but are below average in Haraoti. Agricultural stock are in fair condition in Meywar, Dholepore, Bikanir and Jaisulmere, and good elsewhere Pasturage and fodder are sufficient, except in Tonk, some tehsils of Jeypore, Dholepore and Ulwar. The prices of food-grains are falling in Pertabgurh, Meywar, Jhallawar, Kotah and Kerowli, but are high in Haraoti and fluctuating in Sirohi; elsewhere prices are steady. The numbers employed on relief works were:—Marwar 2,780, Kotah 420, Dholepore 4,829, Bikanir 18,459, Jaisulmere 118. The numbers on gratuitous relief were:—Bikanir 2,504. Gratuitous relief has been sanctioned in five districts of Marwar.

Kashmir.—KASHMIR VALLEY.—*For week ending 15th December.*—The weather is fine. Spring sowings are still in progress in some places. Prices are below normal.

JAMMU PROVINCE.—*For week ending 16th December.*—No rain. Fodder is scanty, the crops suffering. Relief works are in progress. The total number of labourers employed on relief works from the 5th to 11th December was 1,816. Taccavi for seed is being distributed. Prices are high.

Nepal.—*For week ending 12th December.*—The days continue fine and warm, nights are frosty. Wheat is still being sown. Prices 7 seers.

DENZIL IBBETSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

(a) Includes the Bhopal-Itarsi railway.
(b) Includes the Godhra-Rutlam-Nágdá railway.
(c) Includes the Guntakal-Mysore frontier section.
(d) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(e) Total earnings from 1st July to 7th December 1895.
(f) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(g) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(h) Includes the Wardha Coal, the Dhond-Manmád, the Khamgaon, and the Amráoti railways.
(i) Total earnings from 1st May to 7th December 1895.
(j) Total earnings from 11th November to 7th December 1895.
(k) Total earnings from 15th July to 5th December 1896.
(l) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(m) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(n) Total earnings from 1st August to 7th December 1895.

G. A. ANDERSON,
Under Secretary.

CALCUTTA, *the 17th December 1896.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, No. $\frac{30}{62-3}$ (Meteorology), dated Calcutta, the 16th December 1896.

METEOROLOGY.

READ—

Letter from the Meteorological Reporter to the Government of India, No. 3586, dated the 2nd October 1896, submitting the Annual Report on the Administration of the Meteorological Department for the year 1895-96.

RESOLUTION.

THE number of observatories maintained by the Government of India under the control of the Meteorological Department during the year was 175 or one fewer than in 1894-95. Observations were received regularly during the year under report from the Seychelles Islands, and arrangements were made for the receipt of a daily weather telegram from that place during the months of May and June of the present year, in order to test its value as a weather indicating station for the advent and progress of the South-West Monsoon. Daily telegrams were also received during the past winter from the observatories at Astor and Minimarg which were found useful in forecasting the cold weather storms of the period.

Arrangements were also made with the Director of the Persian Gulf Section of the Indo-European Telegraph line for the receipt of daily weather telegrams during certain months of the year from Ispahan, Teheran, Bushire and Jask free of cost to the Department.

Sets of meteorological instruments and forms for the record of meteorological observations were supplied to the medical officers of the Afghan-Baluch Boundary Commission and the Khyber-Âsmer Boundary Delimitation Commission, and valuable series of observations were received from the former officer.

The observatory at Camorta in the Nicobar Islands was closed for some time during the year owing to no observer being available; but on the transfer of the Andaman Orphanage from Port Blair to Car-Nicobar, it was arranged that meteorological observations should in future be taken by the Catechist in charge of the Orphanage.

2. Fewer observatories were inspected during the past year than in the year 1894-95—63 against 102—but the condition of the observatories inspected was found on the whole to be satisfactory. During the year the Meteorological Reporter to the Government of India inspected for the first time the observatories in the Persian Gulf at Bushire, Jask and Muscat, and found them in excellent condition and the work of observation accurately performed.

3. The system under which observatory buildings were kept in repair by the agency of the Meteorological Department having proved unsatisfactory, the work has in most places been transferred to the Public Works Department. The attention of Local Governments has at the same time been drawn to the great

importance of maintaining the conditions of exposure of meteorological instruments as nearly constant as possible.

4. Nine hundred and forty sets of special observations of storms, clouds, and other meteorological phenomena were received during the year, and special rewards of small amount were awarded to the observers.

5. Under Marine Meteorology a large amount of work was done during the year. Meteorological data were systematically collected from ships' logs and were utilized in the preparation of the Monthly Weather Reviews In accordance with the opinion of the leading meteorologists of Europe and America as to the importance of the Indian monsoon area charts, their publication has been continued for another four years. The publication of these charts has fallen into arrears, but the Meteorological Reporter has now made arrangements to ensure greater punctuality in their issue.

6. The same methods were employed as in previous years to obtain as full and accurate information as possible of the amount, distribution and time of occurrence of the snowfall in the Himalayas and the Afghan mountain area. The information received from many gentlemen, both official and non-official, was fairly complete, and made it possible to determine the probable effect of the cold weather snowfall in modifying the distribution of the South-West Monsoon rainfall of 1896. Information based upon special observations was also received from the Deputy Conservators of Forests of the Chamba and Bashahr Divisions and the Assistant Commissioner, Kulu, regarding the depth of snowfall in their districts. The Government of India are indebted to the reporters for their assistance

7. Meteorological observations in Forests were continued in certain forest areas in order to obtain data showing the influence of forest growth in modifying the distribution and amount of rainfall. It was found, however, that it was impossible to secure the close supervision which was necessary: the results obtained were not satisfactory, and orders have been issued for the discontinuance of the observations.

8. No change was made in the system of rainfall registration during the year. Thirteen new rain-gauge stations were established and eight abolished, showing a net increase of five stations. It is satisfactory to notice that a larger number of rain-gauge stations were inspected during the past year than in previous years, but the reports of controlling officers shew that inspections are not satisfactorily conducted in all provinces. Frequent inspection is essential if the work of rainfall registration is to be carried out systematically and satisfactorily, and the Government of India again desire to emphasise its importance. It appears from the report that there is still much room for improvement in accuracy of observation, more especially in certain provinces.

9. The seasonal forecasts continued to be issued and published in the same form as during the past four years, and the Government of India agree with the Meteorological Reporter in considering that the forecasts were in fair agreement with the facts.

10. The issue of storm and flood warnings was carried out satisfactorily during the year, ample, early, and definite warnings being given in the case of all the more important storms which visited the Indian coasts in 1895-96. Special arrangements were sanctioned by the Government of India during the year for the acceleration of the despatch of meteorological messages, such messages being now classed as "urgent" telegrams; and this change has accelerated the issue, not only of special warnings, but also of the Daily Weather Reports in the various provinces.

11. The publications of the Department were issued with regularity, and the tabulation and issue of the Trevandrum observations continue to make satisfactory progress.

12. The Government of India again desire to acknowledge the excellent work done by Mr. Eliot, his Assistants, and the Provincial Reporters, and their indebtedness to the many gentlemen unconnected with the Department who have rendered it valuable assistance.

ORDER.—Ordered, that the foregoing Resolution be forwarded to the several Departments of the Government of India, to Local Governments and Administrations, to the Director General, Indian Medical Service, to the Surveyor General of India, and the Meteorological Reporter to the Government of India.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 17th December, 1896.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Honour Sir Alexander Mackenzie, K.C.S.I., Lieutenant-Governor of Bengal.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble J. Woodburn, C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble C. C. Stevens, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble Sir G. H. P. Evans, K.C.I.E.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Pandit Bishambar Nath.

NEW MEMBERS.

The Hon'ble RAHIMTULA MUHAMMAD SAYANI and the Hon'ble PANDIT BISHAMBAR NATH took their seats as additional Members of Council.

MERCHANT SHIPPING BILL.

The Hon'ble MR. CADELL moved that the Hon'ble Mr. Chalmers be substituted for Sir A. E. Miller as a member of the Select Committee on the Bill to consolidate and amend certain Indian enactments relating to Merchant Shipping and the carriage of passengers by sea.

The motion was put and agreed to.

FISHERIES BILL.

The Hon'ble MR WOODBURN moved that the Bill to provide for certain matters relating to Fisheries in British India be referred to a Select Committee consisting of the Hon'ble Mr. Chalmers, the Hon'ble Mr. James, the Hon'ble Rai P. Ananda Charlu, Bahadur, the Hon'ble Rao Sahib Balwant Rao Bhuskute and the mover. He explained that a couple of years ago the Bill was introduced into the Council. The Bill had been before the Local Governments in the interval, and the Government of India had decided to make material alterations in it. The reason for these alterations he had explained at a recent meeting of the Legislative Council at Simla.

The motion was put and agreed to.

CRIMINAL TRIBES ACT, 1871, AMENDMENT BILL

The Hon'ble MR. CADELL moved that the Bill to amend the Criminal Tribes Act, 1871, be referred to a Select Committee consisting of the Hon'ble Mr. Woodburn, the Hon'ble Mr. Chalmers, the Hon'ble Pandit Bishambar Nath and the mover. He said that the opinions of the different Local Governments had now been received with reference to the Bill.

The motion was put and agreed to.

NEGOTIABLE INSTRUMENTS ACT, 1881, AMENDMENT BILL.

The Hon'ble MR. CHALMERS moved that the Bill to amend the Negotiable Instruments Act, 1881, be referred to a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Rai P. Ananda Charlu, Bahadur, the Hon'ble Sir Griffith Evans, the Hon'ble Mr. Glendinning, the Hon'ble Mr. Playfair and the mover. He explained that this was a Bill which had stood over from last session and would be familiar to the members of the Select Committee.

The motion was put and agreed to.

UNITED KINGDOM PROBATES BILL.

The Hon'ble MR. CHALMERS moved that the Bill to provide for the recognition in British India of Probates and Letters of Administration granted by Courts in the United Kingdom be referred to a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Mr. Woodburn, the Hon'ble Rai P. Ananda Charlu, Bahadur, the Hon'ble Sir Griffith Evans, the Hon'ble Mr. Sayani and the mover. He said that this was also a Bill which stood over from last session and would be familiar to the members of the Select Committee to which it was referred last year.

The motion was put and agreed to.

MEMONS BILL.

The Hon'ble MR. WOODBURN moved that the Bill to render it permissive to the members of the Memon Community to declare themselves subject to Muhammadan law be referred to a Select Committee consisting of the Hon'ble

Mr. Chalmers, the Hon'ble Mr. Stevens, the Hon'ble Nawab Amir-ud-Din Ahmad Khan, Bahadur, the Hon'ble Mr. Sayani and the mover.

The motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble MR. WOODBURN moved that the Bill to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders be referred to a Select Committee consisting of the Hon'ble Mr. Chalmers, the Hon'ble Sir A. S. Lethbridge, the Hon'ble Mr. Cadell, the Hon'ble Rao Sahib Balwant Rao Bhuskute, the Hon'ble Pandit Bishambar Nath and the mover.

The motion was put and agreed to.

ACT XXXVII OF 1850, AMENDMENT BILL.

The Hon'ble MR CHALMERS moved that the Bill to amend Act XXXVII of 1850 (*for regulating Inquiries into the Behaviour of Public Servants*) be referred to a Select Committee consisting of the Hon'ble Mr. Woodburn, the Hon'ble Mr. James, the Hon'ble Mr. Rees, the Hon'ble Nawab Amir-ud-Din Ahmad Khan, Bahadur, the Hon'ble Sir Lakshmishwar Singh, Maharaja Bahadur of Durbhanga, and the mover. He said:—"This Bill was introduced at Simla and the amendment is almost purely a formal one. It is simply an amendment of the definition of 'Government'. The definition originally inserted in the Bill applied to the various Local Governments as they existed in 1850 Now it is proposed to extend the definition to the various Local Governments throughout India."

The motion was put and agreed to.

INDIAN PAPER CURRENCY ACT, 1882, AMENDMENT BILL.

The Hon'ble SIR JAMES WESTLAND moved for leave to introduce a Bill to amend the Indian Paper Currency Act, 1882. He said:—"On the 26th March last I took the opportunity of the Budget debate to inform this Council that one matter had been under the consideration of the Government, which would eventually come before this Council for the purpose of legislation. The question was that of increasing the investment of the Government currency reserve, which is at present limited to eight crores of rupees, up to ten crores of rupees. Shortly after the session in Calcutta closed, various papers were published in the Gazette of India of the 11th April last, showing the nature of the proposal which the Government made and the reasons by which they justified it. I may remark that this question is to a certain extent one of the public credit of the Government and of the Currency Department, and although I might be quite ready to justify to my own mind the proposal to raise the investment, still I would consider it necessary to judge it, not by mere logical deductions from the facts which were within my knowledge, but to a large extent by the opinions of experts regarding the proposal; that is to say, the importance of the convertibility of the currency is a matter of such great moment to the banking and mercantile community, that, however I might myself feel justified in proposing a measure which affected that convertibility, I would nevertheless consider it necessary before adopting it, to satisfy myself that the mercantile and banking community thoroughly approved the measure and considered that it could be carried out without in any way impairing the credit of the Currency Department. Taking this view, the Government referred the question to the mercantile community and the banking community, namely, to the five principal Chambers of Commerce and to the three presidency banks. I shall refer to the replies given to us by these institutions in order to show that they, with a modified exception, thoroughly approved the measure which the Government had suggested.

"First of all, to take the case of the banks The reply which the Bank of Bombay gave us to the proposal was that they 'desired to express their entire approval of the proposal submitted for their opinion'. The reply which the Bank of Madras gave to us was that 'they are of opinion that the cash balance held in the Currency Department may be reduced by two crores with perfect safety.'

"The Bank of Bengal, in the same way, said :—

'The proposed increase of securities in the paper currency reserve should therefore leave a stock of coin and bullion sufficient to ensure convertibility of the notes under all circumstances for which it appears necessary to provide.'

"They go on to discuss certain matters which do not refer immediately to the question as it relates to the Currency Department. They pointed out that certain other consequences which stood apart altogether from the question of the safety of the convertibility of the currency were affected by the transfer of two crores of rupees from currency to treasury and from treasury into ordinary circulation; but, so far as regards the Currency Department, they were satisfied that there was no impairment of the security of the currency by the addition of two crores to the amount. With reference to these collateral points, I shall quote part of their letter as I shall have to refer to it later on. After giving their opinion that the two crores might with safety be invested, they pointed out the necessity of choosing, with reference to the state of the money market generally, the time when that investment should be made. They say :—

'In India the currency has no self-adjusting power. It has no fixed specie export point, while its fixed specie import point (1*s*. 4*d*. *plus* transit charges) is far beyond the present range of exchange; and this want of elasticity might create a stringency at a time when the reserve treasury balances were low, which would best be met by an addition to the currency such as Government propose to make. The stringency might occur suddenly and require prompt relief, and, under these circumstances, I have to suggest, for the consideration of His Excellency the Governor General in Council, that the power contemplated should be obtained from the Legislature, but should be reserved either for use in an emergency such as above described or until the currency is made automatic.'

"I am quoting this opinion in order to show that the Bank of Bengal, although they confessed to certain doubts regarding the consequences of the proposed measure, nevertheless recommended that the powers which I now ask leave to legislate for, should be obtained from the Legislature, and also made a proposal that we should watch the time at which it was brought into operation so as to make it consonant with the interests of the money market.

"I shall presently show that the Bank of Bengal are at the present moment very strongly of opinion that the precise moment which they contemplated has now arrived, and that they strongly recommend the immediate adoption of the measure to which they gave their conditional approval so long ago as last November.

"I go on to quote the opinions which were given to us, in reply to our references, by the various Chambers of Commerce. The first is that of the Bombay Chamber. They say :—

'The proposal to take power from the Legislature to raise the limit of the paper currency reserve from eight to ten crores of rupees meets with their entire approval, and the Committee will be glad to learn that early legislative action has been taken to give it effect.'

"The next reply is from the Chamber of Commerce, Rangoon, in which they say that 'the Committee approve of the proposal.' From Madras we were told—

'This Chamber sees no objection to the proposal in so far as it will affect the proportion of cash to be held in order to make good the issue of currency notes.'

"They then go on to discuss certain questions relating to the currency policy of the Government. The Karachi Chamber give their reply that they 'see no objection to the increase of the reserve as contemplated, provided it is done gradually and at a favourable time.' The Chamber of Commerce, Calcutta, were

divided as to the merits of the proposal, and I, therefore, quote their opinion neither on one side nor on the other, but my hon'ble friend Mr. Playfair will presently, I understand, give a strong opinion that, if we are going to do it, it is time to do it now.

"I have quoted these opinions in order to show that the mercantile community and the banking community, who are pre-eminently interested, have given their cordial approval to the measure which I now bring before the Legislature; but I wish to go a little further and show that the Legislature has in its past action with reference to the Currency Department, practically given its approval to the grounds on which I base the measure which I am now about to bring before the Council.

"The Currency Department started in 1862, and the law at that time (Act XIX of 1861) gave permission to invest out of the currency reserve an amount not exceeding four crores of rupees. That was the amount up to the amending Act, which was No. XXIII of 1871. I have placed upon the table, in the hands of Members, statements which I now desire to make reference to with a view to enabling them to follow the remarks which I have to make. The first statement to which I draw attention is that headed No. 3 and I wish to point out that, during the last five years of the period during which the Currency Department was conducted under the Act of 1861, the minimum circulation was about seven or eight crores. At that time the amount which we had invested was about 41 or 43 per cent. of the total amount of the reserve. In 1870-71 the proportion was 37 per cent. At that time the new Act—Act XXIII of 1871—was passed, the Legislature giving authority to raise the investment to six crores; that is to say, that they were quite satisfied that it was safe to increase the investment of the reserve beyond 37 per cent., and the permission they gave to the Government at that time was to invest an amount, which was at the time of passing the Act as high as 66 per cent. of the minimum circulation. This Act remained in force for about 20 years. We had during the whole of these 20 years a sum of practically 6 crores of rupees invested, the remaining part of the currency reserve being held in the form of cash or bullion, ready for the encashment of the notes presented. The currency circulation during these 20 years very considerably increased. Towards the end of this 20 years the circulation varied between about 16 crores as a maximum and 12 or 13 crores as a minimum. The amount that we had invested, being 6 crores, was over 40 per cent. of the amount of the minimum circulation. At that time the Government again came before this Council and asked for permission to increase the amount of the investment. That permission was given, and the permission practically meant that, whereas the maximum investable balance was 40 per cent. of the minimum circulation, they agreed to the amount being raised to about 53 per cent.

"Since this Act of 1891 was passed the circulation has undergone a still further development, and the amount that was our minimum circulation then is very far below the amount which is our minimum circulation now. The result is that the proportion of the minimum circulation which the Legislature at present allows us to invest amounts to only about 30 per cent. of the minimum circulation for which we have to provide. This is far below the proportion which the Legislature has on two previous occasions declared that it is quite safe for us to invest, and that is one of my justifications for now asking the Legislative Council to pursue the same policy which it has hitherto pursued and allow us to increase the investment. I am not asking for permission to increase up to 66 per cent. which the Legislative Council gave in 1871, nor am I asking for permission to increase up to 53 per cent. which the Legislative Council gave us in 1890. The amount which we really ask for only comes to 41 per cent.; that is to say, that, if the Government take advantage of the Bill, which I hope the Council will pass, to invest a total amount of 10 crores in the currency reserve, the total reserve investment will amount, after all, to only 41 per cent. of the minimum circulation.

"I now wish to say a few words on the merits of the question as apart from merely quoting the authority of the banking community, the mercantile community and this Legislative Chamber itself, and for that purpose I ask Hon'ble Members to look at the statements Nos. 1 and 2 which I have also had prepared and laid on the table. The first of these statements shows the total circulation

of currency notes. It will be seen that in 1894-95 it was very high, well over 30 crores. Since then it has gradually come down, and we are now at 24 or 25 crores. It was with reference to these 24½ or 25 crores that I offered the Legislative Council just now the calculation that the investment of 10 crores which we proposed to make comes to only 41 per cent. of what should be regarded as the present minimum circulation; but I desire to call particular attention to the second statement, which affords an even stronger argument for the security of the note circulation than statement No. 1.

"There are in this country two large reserves of funds: one is the large sums of money which are held by the presidency banks of Calcutta, Bombay and Madras, the other is the reserve treasury, in which we deposit, for treasury purposes, the amount of money which is not immediately required for our purposes, but which, as our transactions bring us in a large amount of revenue at one time of the year, and a smaller amount of revenue at another time of the year, it is necessary for us to hold in order to tide over the low balance period of the year. Those two reserves are very naturally held, to a large extent, in currency notes. These currency notes, therefore, may be regarded as a kind of circulation quite different from the general circulation of notes in the hands of bankers, merchants and private individuals all over the country. Statement No. 2 shows what the circulation of the paper currency stands at, if we exclude the amounts which are held in the balances at the presidency banks and in the reserve treasuries; and the point to which I would desire to draw special attention is the remarkable steadiness of these figures of what I may call the net circulation. During the last four or five years they varied by not so much as 10 per cent, that is to say, by something like 5 per cent. in either direction. Now during this period we have passed through two or three peculiar experiences as affecting the money market. The bank rate, for example, has been as low as 3 per cent., and it has been as high as 10 per cent. The total treasury balance has been as high as 25 crores, and it has been as low as 7½ crores. Moreover, at one period, which will be within the recollection of us all, there was a very curious state of affairs which resulted from the currency legislation of June, 1893, and was followed by something like half a year during which the Secretary of State drew no Council bills and there was a large amount of money accumulating on this side. Notwithstanding all these causes of stringency, or ease, in the money market, the net circulation, as I have called it, preserved the even tenor of its way. It stood continuously at 19, 20 and 21 crores and varied to a very small amount. The argument which I wish to base upon this is that it is possible that reasonable objection might be taken to the figures in statement No. 1. The person who objected to our policy might say—'You show in statement No. 1 that the circulation has gone as high as 30 crores and on one occasion to 32 crores, but it has also come down to 24 or 25 crores; what security have you that we may not have another tumble down to a still lower figure?' In short it may be said that statement No. 1 shows a large amount of variability in the circulation, and does not give that confidence which it is necessary to inspire in the Legislative Council in giving us permission to take a fixed figure as the minimum circulation on which we base our present proposal. But if you look at statement No. 2 it will be seen that these large variations which have taken place in the total circulation altogether disappear: that is to say, those variations in circulation are entirely due to the variations in the amounts which are held by the presidency banks and which are held in the reserve treasury. The amount in circulation which is in the hands of the public generally, including private individuals, is remarkably steady. It varies, as I have pointed out, but the variations are so small that it is hardly possible to conceive any ordinary circumstances under which it would be materially reduced below the 21 or 22 crores at which it has stood for a considerable time.

"On these grounds, therefore, I think I have established the point that, in asking the Legislature to agree to our investing 10 crores of the balances, we are taking a measure which is a long way within the margin of safety which we ought at all times to preserve in the Currency Department.

"I have been at pains to explain this matter very fully to Hon'ble Members of this Council, because, as will be seen from the notice-paper, it is my intention

to propose presently that the measure be taken into consideration with the view to its being passed immediately. I do this not for any object which the Government itself has in view, but entirely with reference to the present peculiar state of the money market, with reference to which it has been represented to the Government that, if this measure is to pass, it is desirable that it should pass immediately. I hope I have satisfied the Legislative Council that the measure may be taken practically as one already much discussed and fully established, and that they will be prepared, after hearing the reasons for the urgency which I shall bring forward, to pass it in the course of this meeting.

"It is a peculiar feature of the money market of India that it is very closely connected with the Government balances. Practically almost the whole of the available current capital used in commerce is composed of the Government balances.

"In the middle of October last, when we saw the approach of famine and its necessary consequences in stopping the incoming of revenue and creating large outgoings in the way of expenditure, we saw that there would be a time when the depletion of the balances would have a serious effect upon what is ordinarily called the money market. It will be remembered that in the middle of October the Secretary of State suddenly reduced to a very large extent his drawings. He did so because we were obliged to inform him that, although we had made the usual preparations and the usual calculations in order to get over what we call our minimum balance period, that is, December, with the balance of about eight crores or a little more, yet we had before us the prospect of having to use a considerable portion of these eight crores for the purposes of prevention of distress. We had a demand made upon us for the suspension of a crore of revenue in one Province alone, and we also had a demand made upon us for making large advances, to the extent of tens of lakhs of rupees, for the purpose of meeting and avoiding as far as possible agricultural distress. The result is that at least a crore and a half of the funds which, under normal circumstances, would at the present moment be at head-quarters in Calcutta and Bombay and would be, under ordinary circumstances, at the disposal of the mercantile community for purposes of trade, are now either placed in the pockets of agriculturists all over the country in the shape of advances or are left with them in the shape of suspensions of revenue. Notwithstanding the extremely small drawings of the Secretary of State during the past month, the Government balance at the beginning of this month was only 7¼ crores of rupees—an amount which is smaller than has been experienced at any time within the last 20 years. The result is an extreme stringency in the money market. We foresaw this in October, and we have been watching with some anxiety the state of affairs ever since about the 10th of November. I may also mention with His Excellency's permission that our opinion of the stringency was so great that, under His Excellency's orders, I had prepared the necessary measures for stepping in at any moment if I were called upon to do so by the mercantile and banking community. Fortunately the official rate never went above 8 per cent. till quite recently, and it was unnecessary with the bank rate at that amount to take any heroic measures. Now I would not recommend any measure affecting our currency department upon the mere grounds of stringency in the money market, a thing that has nothing whatever to do with the safety of our currency and our currency circulation, and I do not bring this stringency forward at present in order to recommend the measure to the Council as one which it ought to pass. But it will be observed that the introduction of the measure has nothing whatever to do with the state of the money market. If reference be made to the papers which were published in the Gazette of India on the 12th September last, it will be seen that, with the sanction of the Secretary of State, in August last it was determined that this measure for increasing the currency investment should be brought forward at the first session of this Council in Calcutta. At that time nobody foresaw the stringency which has come to the market since then. But having thus, on independent grounds, determined to introduce the measure, we now urge that in consideration of the position of the money market, and of the relief it will obtain by our increasing the investment of the currency, the measure we propose can be carried into effect with great opportuneness at the present time. We have been pressed by the Bank of Bengal, whose duty it is of course

to take a lead in these matters, to take up this question as urgently as possible. I had some personal communications with Mr. Cruickshank of the Bank of Bengal and also with the Hon'ble Mr. Playfair with reference to this matter as soon as the Viceroy arrived in Calcutta; and I shall read the letter which at that time I caused to be addressed to the Secretary to the Bank of Bengal, because it shows the position which I took up in dealing with the representations made to me by the two gentlemen I have named. The letter runs.

'The Bill for increasing the currency investment to 10 crores will be introduced in the Legislative Council on the 17th. In ordinary course it will be brought up in the Council with a view to its being passed on the 7th January. Sir James Westland considers himself bound to regard the measure purely from a paper currency point of view, and is not prepared for any reasons affecting the Government to press it as an urgent measure on the Legislature. The question of its urgency from the point of view of the money market is more immediately one for the consideration of the banking and mercantile community, and it is for them in the first place to raise that question. Any representation which you or your Directors or the representatives of the mercantile community may desire to make will receive the earliest attention at the hands of the Government.'

"The result was that both the mercantile community as represented by the Chamber of Commerce and the Bank of Bengal took action immediately after receiving this intimation of the views which, by His Excellency's orders, I communicated to the Bank of Bengal. On the 15th December that is to say, two days ago, we received from the Bank of Bengal a letter which I have caused to be circulated to Hon'ble Members, and upon which I based the notice which was given in the notice-paper circulated yesterday that I intended to propose that the Bill should be immediately taken into consideration. It will be seen that both the Bank of Bengal and the mercantile community urge that, if this measure is at all to be passed, it should be passed at once, and that the relief which will thereby be given to the money market will come at a very opportune time and will remove the stringency which is at present affecting commerce, on this side at least, of India.

"Having thus explained the measure itself and having explained the urgency which causes me to propose that it should be passed to-day, I have only to say further that, while I hope that there will be no opposition to the proposal which I make to pass it to-day, Hon'ble Members will necessarily have an opportunity of stating their objections on the question of procedure when the motion is made that the Bill be taken into consideration. At present my motion is merely for leave to introduce a Bill to increase the investment of the currency reserve."

The Hon'ble MR. PLAYFAIR said:—"As explained by the Hon'ble Member in charge of Finance, I understand that the policy of the Bill now before Your Excellency's Council has not met with the approval of the whole of the mercantile community, but that the preponderance of opinion is in favour of the measure provided the opportunity taken to put it into operation be carefully considered. In addition to the statements and information that have been specially prepared and published in explanation of the measure, Government has opportunities, not available to the general public, for coming to a conclusion that it will be safe in the interests of the finances of the State, and of trade, to adopt this measure of liberating two crores of coin held as reserve against the paper currency, and I am, therefore, content to leave the decision with Government. I desire, however, to represent to Your Excellency's Government that the finances of the country and the position of the money market have become altered since the date on which the expressions of public opinion I have referred to were received, and I believe I am justified in saying that many who expressed themselves doubtful of, or opposed to, the policy of the Bill, as well as those who have expressed their opinion in favour of the measure, consider it desirable that, if Government has decided to take legislative powers to decrease the metallic reserve of the paper currency, by the substitution of Government securities, this Bill should not only be passed promptly, but action should follow immediately. The opinion expressed by the Directors of the Bank of Bengal, after consultation with the Committee of the Bengal Chamber of Commerce and other representatives of the European and Native mercantile community in their letter of 15th instant, addressed to the Government of India, support the conclusion I have come to. I would emphasise the remarks made by the Hon'ble Member on the Government cash balances,

and point out that these have fallen from 16½ crores estimated as the closing balance of 1895-96 to 7¼ crores at 30th November, or to a point that was not anticipated by the Hon'ble Member when, in paragraph 178 of his Budget Statement presented to Your Excellency's Council last March, he placed the minimum cash balance required by the Government of India in November and December at between 8 and 9 crores of rupees. This depletion, I understand, arises in part from the outlay made necessary by the programme for the construction of additional lines of railway entered upon by Your Excellency's Government, to the satisfaction of the commercial community, and by the expenditure on the army mobilization scheme which was explained so clearly to this Council by General Sir Henry Brackenbury last March. On the other hand, income from railways has diminished and the treasury has not been replenished by the usual instalments of land-revenue owing to the most untoward failure of the autumn crops—an occurrence that has been so unfortunately general throughout the Empire. The Secretary of State has for some weeks past reduced his drawings, it may be presumed, not because he is holding for a better rate of exchange than the current market will yield, but on account of the restricted cash resources with the Government of India available for the purpose of meeting these drafts. As the Secretary of State's bills and telegraph transfers are now the chief medium of financing the export trade of the country, it is evident that any undue restriction of these bills must be an embarrassment to trade. The embarrassment in the present instance must become more serious as the resources of the joint stock banks in this country become reduced in the ordinary course of business without the means of being replenished. Nor can the banks be blamed if, under such circumstances, they arrest business in their careful regard for the cash balances held by them. This is a matter of additional importance at the present juncture, when it is particularly desirable that no monetary check to the free transfer of food supplies from one part of the Empire to another, such as from Burma to Hindustan Proper, should occur. If the effect of liberating these two crores of coin will be to enable the Secretary of State to resume the sale of his bills and telegraph transfers more freely, the present stringency in the money markets of India, which I feel myself justified in characterising as extreme, will be relieved, trade, it is to be hoped, will then be able to be carried on without interruption, and Government itself will be able, with comfort, to meet its engagements until such time as the treasury shall again be strengthened with the land-revenue which it has been compelled in part either to forego or postpone.

"With reference to remarks that have fallen from the Hon'ble Member upon the bank rate being only 9 per cent. and less than quotations reached on previous occasions, I would like to observe that the current rate is not in itself a criterion of the present stringency in the money market. I understand that the Directors of this Presidency Bank, realizing that a higher rate would not, under existing circumstances, produce adequate supplies, have wisely, in the interests of trade, not forced a higher quotation, which might in itself have created that extreme apprehension which leads on so easily to panic. My Lord, my proposal does not imply that the currency reserve is a useful fund to fall back upon when the cash balances may happen to be unduly low, but, as this Bill, after mature consideration with the best authorities, comes before this Council at a time when its effect can be of use to the cash balances, I would represent to Your Excellency's Government the advisability of meeting this monetary stringency by making the proposed addition to the currency without formal delay. In other words, I wish to say that it is desirable under the present unusual circumstances of the money market that what the Government has decided to do should be done quickly, and I rest the urgency of the case on the present position of the cash balances in relation to the money market and to the danger to trade in suspending the Secretary of State's drawings."

The Hon'ble MR. GLENDINNING said:—After the able speech which we have just heard, it is not my intention to take up the time of the Council further than to say that I also beg to support the Bill. It seems to me to be a distinct measure of relief at the present time to the mercantile community, and I would hope and urge that it may be brought into operation at once."

The Hon'ble SIR GRIFFITH EVANS said:—"I do not propose to discuss any of the questions which have been raised with regard to the policy of this Bill. It is sufficient to say that it is practically agreed on all hands that it does not in any way endanger the convertibility of the Government currency. Under these circumstances and after the reasons which have been put forward by the Hon'ble Financial Member, it has become apparent to everyone, whether they like it or whether they do not, that the Bill is certain to be passed on the 7th of January next. The question then that has got to be considered is mainly this: seeing that there is no danger to the currency, and seeing that this Bill is certain to be passed at the latest on the 7th of January, is it desirable to suspend the standing orders and to pass it without further discussion to-day? To put it in other words, the question is · is the advantage that is likely to be derived from any further discussion between this and the 7th January greater than that which will be derived by giving immediate relief to the present stringency of the money market? It is within my knowledge, as it is within the knowledge of almost all people who live in Calcutta, than that stringency has been extreme and unusual—far more so than is indicated by the bank rate. It is in the knowledge of many of us that firms of undoubted solvency who have ample security to offer, other than Government paper, have found the greatest difficulty in obtaining the necessary cash advances—I mean cash advances which they ordinarily obtain for the ordinary purposes of business at this time of the year. It is also known that it has been a question with the Bank of Bengal whether they would not stop advances, or contract advances even upon Government paper. This is a very unusual state of things, and is crippling the trade of the country; I do not propose to discuss what the reasons of it are. The reasons are various, and some of them have been indicated by the Financial Member; but, the position being such as I have stated, it is quite evident that if, as everybody seems agreed, the immediate passing of this Bill and the immediate putting of it into operation will have the effect of relieving the stringency, any small and doubtful advantage which might be gained by further discussion is far and away less than what will be derived by the immediate passing of the Bill. I say doubtful advantage with regard to further discussion, because this question does not come upon anybody as a surprise. It has practically been before the public for a very considerable time. It has been known for some time that it was coming on. It has been discussed outside, and really I think there is very little to add to what we already know about it. Under these circumstances I have no hesitation in agreeing with the views expressed by the Hon'ble Mr. Playfair that it is better under these circumstances to pass the Bill to-day and give immediate relief, seeing that it is certain to be passed on the 7th January next."

The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN said:—"There is one passage in the speech of my hon'ble friend Mr. Playfair to which I would venture to invite attention, as it affects the question of military expenditure. The passage to which I refer is that relating to the mobilization of the army and the expenditure thereon. As far as I could gather, it might be inferred from what Mr. Playfair said, that one of the chief causes, or one of the causes at all events, which has led to the depletion of the cash balances has been the expenditure on the mobilization of the army. I should like to point out that the sum after all was not a considerable one, and that, although arrangements have been made during the present financial year to meet the mobilization requirements, a good deal of it has not yet been spent, and in fact the cash has not actually been paid."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND introduced the Bill.

The Hon'ble SIR JAMES WESTLAND moved His Excellency the President to suspend the Rules of Business to admit of the Bill being taken into consideration.

THE PRESIDENT declared the Rules to be suspended.

The Hon'ble SIR JAMES WESTLAND moved that the Bill be taken into consideration. He said:—"I have just explained in full the circumstances which led Government to take this course, but I am pleased to find that justification for it has been made so complete by the speeches of the Hon'ble Mr. Playfair and the Hon'ble Sir Griffith Evans. Allusion has been made to the fact that discount rate o. the Bank of Bengal is not above 9 per cent., but my information on that subject exactly corresponds with that already communicated by my hon'ble friend Mr. Playfair. The rate of 9 per cent. does not express the rate at which business is being done. It unfortunately at this moment expresses the rate at which business is not being done. The Bank of Bengal has been obliged to contract its operations, and this contraction of its operations, and the necessary limitation of the advances which under ordinary circumstances it would make, is part of the state of circumstances which we desire to remedy."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND moved that the Bill be passed. He said:—"I wish to add one remark, namely, that the Government intend that immediate action should be taken as soon as the Bill is passed. According to the law it is necessary to obtain the sanction of the Secretary of State before any steps are taken, because the law provides that the amount of investment shall be fixed by the Governor General with the consent of the Secretary of State. This consent, which is necessary by law, will be obtained by telegraph, and as soon as it is obtained the necessary action will be taken."

The motion was put and agreed to.

BILLS OF SALE BILL.

The Hon'ble MR. CHALMERS moved for leave to introduce a Bill to provide for the compulsory registration of certain transfers and dispositions of goods in order to prevent debtors from defeating the claims of their creditors by secret assignments of such goods. He said:—"The scope and objects of this measure are pretty fully set forth in the Statement of Objects and Reasons which will be published with the Bill, but I ought, perhaps, to add a few words of explanation here. The Bill originated in this way. The attention of the Government of India was called to a case where a merchant had secretly assigned the whole of his goods and the whole of his stock-in-trade to a particular creditor, but he remained in apparent and ostensible possession of the ownership of his goods and of his stock-in-trade. He got into difficulties, and then, when the general body of his creditors sought to realise his estate, the secret creditor came in and swept away the whole. The Government of India made enquiries, and they found out that in India, as in England, this was by no means an uncommon state of affairs They consulted Local Governments and the Secretary of State and people at home as to whether it was desirable to pass some measure somewhat on the lines of the English Bills of Sale Act of 1878, and there seems to be a universal consensus of opinion that legislation somewhat on those lines is desirable, and the present Bill has accordingly been drafted to give effect to those recommendations.

"The Bill is a short one. It consists of five clauses only. The first clause requires very little to be said about it. It contains the title of the Bill, namely, 'the Indian Bills of Sale Act,' and provides for its extent and operation. We propose that the Bill shall only be brought into operation in any place where the Local Government thinks fit to bring it into operation. I take it, probably, that in the first instance it will only be brought into operation in large towns, such as Presidency-towns, or towns with a large mercantile community.

"The second clause is a definition clause.

"The third clause is the operative clause. It provides that where a man, whether a trader or not,—for it is not confined to traders,—that where a man sells, mortgages or charges his goods, but remains in apparent possession of them, then, although the transaction will be perfectly good as between the grantor and the grantee, still it will not be good as against either the execution-creditor or

the assignee in bankruptcy, unless the sale, mortgage or charge is reduced into writing and registered under the Indian Registration Act.

"We do not propose for a moment to interfere with any transaction as between a grantor and grantee. We only provide that if a man chooses to assign or charge his goods, and his creditor chooses to allow him to remain in possession of them and in ostensible ownership, then, as long as he is in ostensible ownership, they will be liable to be seized by either an execution-creditor or an assignee in bankruptcy representing the general body of his creditors. Of course, we must take great care not to interfere with ordinary mercantile practice. We have, of course, saved the operation of all mercantile documents of title, such as bills of lading, dock-warrants, and all those mercantile documents of title which by mercantile usage throughout the world represent ownership. It is immaterial from the mercantile point of view to have actual possession of the goods, because for all mercantile purposes they are deemed to be in the possession and to be the property of the person who has the mercantile document of title to them. We have, therefore, exempted mercantile documents of title from the operation of the Bill, and we have also exempted certain other documents such as ante-nuptial marriage settlements and transfers of ships, which are already registered.

"The fifth clause gives power to make rules to supplement the provisions of the Bill where necessary. Of course, it is easier in India than it is in England to provide for registration. We already have existing machinery here which everybody understands and which operates automatically as soon as we require an instrument to be registered.

"There are only two other remarks that I ought to make. To any English lawyer, or any one cognisant of English law, it is well known that our English legislation concerning bills of sale has given rise to an enormous amount of vexatious and futile litigation, and we ought to be very careful in introducing any system of registration of bills of sale to avoid, if possible, the difficulties which have arisen in England. During the twelve years that I sat as a Judge in England, I do not suppose that a week passed without some question turning up about a bill of sale. As far as my experience goes, and as far as the experience of those with whom I have discussed the matter goes, the difficulty which has arisen in England is mainly attributable to two sources. In the first place, the English Acts only strike at documents and do not strike at the transactions themselves. The consequence is that continual attempts are made to evade the Act by setting up fraudulently, or sometimes honestly, an antecedent verbal transaction which does not require registration; supplemented of course by fictitious transfers of possession We seek to get over that by providing that the transaction itself should be voided if the proper document is not executed and registered. When the Bill goes, as I presume it will go, into Committee, I shall be prepared to consider whether we ought not, for the sake of peace and quietness, to exempt certain small transactions altogether and fix a money limit. Another difficulty in England which has given rise to more trouble than any other is this: the Legislature in dealing with bills of sale and protecting the general body of creditors has also endeavoured to protect the debtor from the money-lender. It has done this more or less by a side wind. I am sure that the protection of debtors from money-lenders must be kept quite distinct from the protection of the general body of creditors from a particular secret creditor. The result of the English legislation—a well-meant endeavour to protect debtors from money-lenders—has been simply to raise the rate of interest charged to debtors and to upset a great many honest transactions which could not be brought within the complicated terms of the Act. I do not think a really fraudulent transaction has often got within the meshes of the Act. I hope we have to a great extent avoided the pitfalls which underlie the English legislation, and that this Bill, though a small one, will be of some advantage to the mercantile community."

The motion was put and agreed to.

The Hon'ble MR. CHALMERS introduced the Bill.

The Hon'ble MR. CHALMERS moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in

the local official Gazettes in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

RULES FOR THE CONDUCT OF BUSINESS.

The Hon'ble MR. CHALMERS moved that a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Mr. James, the Hon'ble Mr. Cadell, the Hon'ble Sir Griffith Evans, the Hon'ble Sir Lakshmishwar Singh, Maharaja Bahadur of Durbhanga, the Hon'ble Rao Sahib Balwant Rao Bhuskute and the mover be appointed to consider certain amendments in the Rules for the Conduct of the Business of the Council which are thought to be necessary. He said:—"This is a matter which I believe stands over from last session. The amendments proposed are small ones, but the Rules have been several times amended since they were passed and published, and, if we can make these fresh amendments, the new edition of the rules, which is much required, will be published shortly."

The motion was put and agreed to.

The Council adjourned to Thursday, the 7th January, 1897.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 18th December, 1896.

NOTE.—The meeting of Council which was fixed for the 29th October, 1896, was subsequently postponed, and the next meeting was held in Calcutta on the 17th December, 1896.

No. 527.—The following is published for general information :—

No. 947 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC

Calcutta, the 15th December 1896.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India Circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government therewith promulgated

Government of India, Public Works Department, notification No 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India Circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Chief Commissioner of Assam, No. 4242, dated the 8th July 1896, forwarding letter from the Agent and General Manager of the Assam Railways and Trading Company, Limited, No. 1603G, dated the 20th June 1896.

Letter from the Chief Commissioner of Assam, No 6943, dated the 2nd December 1896, forwarding letter from the Agent and General Manager of the Assam Railways and Trading Company, Limited, No. 3348 G, dated the 17th November 1896.

OBSERVATIONS.—The Agent and General Manager of the Assam Railways and Trading Company, Limited, has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), may be made applicable to the Dibru Sadiya railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 1st March 1897, the application to the Dibru Sadiya railway of the General Rules, cited in the foregoing observations, for working open lines of railway in British India administered by the Government, in supersession of the rules now in force.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Chief Commissioner of Assam, for information and guidance.

TELEGRAPH.

The 21st December, 1896.

No. 526.—The Governor General in Council is pleased to order the following officiating promotion in the Superior Establishment of the Indian Telegraph Department, with effect from the date specified, and until further orders:—

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 23rd December, 1896.

NOTIFICATIONS.

No. 3596 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 19th December 1896:—

No. 434 of 1896.—Guglielmo Marconi, student, of 21, Burlington road, Westbourne park, Middlesex, for improvements in transmitting electrical impulses and signals, and in apparatus therefor.

No. 435 of 1896.—Ivan Levinstein and Levinstein, Limited, chemical manufacturers, both of Minshull street, Manchester, for the production of a new colour base, and of colouring matters therefrom.

No. 436 of 1896.—The Publishing, Advertising and Trading Syndicate, Limited, of 40, King street, Cheapside, London, for improvements in the manufacture of battery cells or vessels to contain acids or other chemicals.

No. 437 of 1896.—The Publishing, Advertising and Trading Syndicate, Limited, of 40, King street, Cheapside, London, for improvements in the manufacture of material suitable for belting, carding cloths, soles of boots and like uses.

No. 438 of 1896.—Silvio Alimonda, gentleman, of Spezia, Italy, for an improved process for the tanning of skins.

No. 439 of 1896.—Joseph Gaut, artist, of Renwick street, Leichhardt, near Sydney, in the colony of New South Wales, for an improved electric photographic time and position recorder, specially useful for races.

No. 440 of 1896.—Henry John Lawson, engineer, of 40, Holborn viaduct, Middlesex, for improvements in or relating to bicycles.

No. 441 of 1896.—James Patterson, engineer, of Mather house, Gourock, Renfrewshire, and James Ramsay Sandilands, insurance manager, of 141, West George street, Glasgow, for improved apparatus for utilizing the waste heat of furnace gases.

No. 442 of 1896.—Siddi Schwarzenberger, director of a society, of 38, im Trutz, Francfort on Main, for improvements in apparatus for releasing horses from vehicles.

No. 3597 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and

Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 67 of 1896.—Theobald Alexander Martin, indigo planter, of Azamgarh, North-Western Provinces, for an indigo washing process. (Specification filed 23rd November 1896.)

No. 110 of 1896.—The Hall Signal Company, of 80, Broadway, New York city, United States of America, manufacturers, for improvements in railway signals. (Specification filed 11th December 1896.)

No. 145 of 1896.—Alister MacNab, merchant, of 23, Great Winchester street, London, for an improvement in the treatment of bay salt. (Specification filed 8th December 1896.)

No. 155 of 1896.—Gaston Ragot, engineer, of 163, Avenue Van Volxem at Forest-Brussels, Belgium, for improvements relating to the production of acetylene gas, and to the utilization of the same for lighting purposes. (Specification filed 11th December 1896.)

No. 160 of 1896.—Sidney Pattisson, gentleman, of 20, Edwardes square, Kensington, for improvements in saddles for velocipedes. (Specification filed 7th December 1896.)

No. 190 of 1896.—Alfred Parry and Eigil Möller, engineers, of Garden Reach, Calcutta, for an automatic tip tub, suitable for loading or unloading coal, salt, and other materials. (Specification filed 12th December 1896.)

No. 313 of 1896.—Julius Stockhausen, soap manufacturer, of 105, Fischnerstrasse, Crefeld, Prussia, for improvements in the manufacture of acid, neutral and basic gelatinous soaps. (Specification filed 8th December 1896.)

No. 322 of 1896.—John Thompson and Charles Everard, manufacturers, both of 13, Brook street, Peterborough, Northampton, for improvements in and relating to bicycles. (Specification filed 7th December 1896.)

No. 348 of 1896.—Andrew Pillatt, of the firm of A. Pillatt and Company, furnace engineers, of Queen's road works, Queen's road, Nottingham, for improvements in furnaces, and in rocking grate bars for the same. (Specification filed 7th December 1896.)

No. 3598 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 32 of 1888.—Fakir Chand Das, mistry, of Bantra, near Howrah, in the district of Hugli, Bengal, for improvements in sugarcane mills. (From 22nd December 1896 to 22nd December 1897.)

No. 17 of 1891.—C. K. Subba Rao, sub-assistant director of agriculture, of Saidapet, Madras presidency, for a low-picottah double *mot* for raising water for irrigation as well as for household purposes. (From 20th November 1896 to 20th November 1897.)

No. 111 of 1892.—Harry Parkhurst Clark, gentleman, of 249, Madison avenue, New York, United States of America, for vapour burners or plumbers' torches. (From 10th December 1896 to 10th December 1897.)

No. 216 of 1892.—Bruce Green, gentleman, of No. 57, Chancery lane, Middlesex, for improvements in or connected with coin-freed or coin-operated sight-testing apparatus. (From 12th December 1896 to 12th December 1897.)

No. 3599 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 315 of 1891.—Herbert Leslie Manton's invention for an electric device for indicating tabulated public information. (Specification filed 16th September 1892.)

No. 8 of 1892.—William Wright's, Julius Hirshfeld's, Andrew Patterson Morison's and William Morison's invention for improvements in light protectors for lamps. (Specification filed 14th September 1892.)

No. 66 of 1892.—Michael Snee's invention for an improved range finder. (Specification filed 14th September 1892.)

No. 106 of 1892.—Romulus Norwood's invention for the manufacture of an improved compound for coating walls and other surfaces, and for the production of casts or mouldings, and for analogous purposes. (Specification filed 14th September 1892.)

No. 115 of 1892.—Otto Umlauf's invention for an improved rail joint. (Specification filed 16th September 1892.)

No. 118 of 1892.—Romulus Norwood's invention for the manufacture of an improved compound for coating walls and other surfaces, and for analogous purposes. (Specification filed 19th September 1892.)

No. 120 of 1892.—Frederick Giles' invention for an improved apparatus for propelling boats by hand power. (Specification filed 14th September 1892.)

No. 123 of 1892.—Joseph Boykin Underwood's invention for improvements in cigarette machines. (Specification filed 16th September 1892.)

No. 137 of 1892.—Robert Hodges Bishop's and William Down's invention for improvements in receptacles for coins. (Specification filed 16th September 1892.)

No. 147 of 1892.—Martin Rose Ruble's invention for centrifugal blowers and injectors. (Specification filed 16th September 1892.)

No. 165 of 1892.—James Lefevre Myers' invention for machines for treating vegetable fibres. (Specification filed 14th September 1892.)

No. 180 of 1892.—Alfred John Gasking's invention for improvements in driving belts, applicable to other purposes. (Specification filed 19th September 1892.)

No. 200 of 1892.—Harriet Ruth Tracy's and Jeremiah Evarts Tracy's invention for improvements in sewing machines, to be known as "peripherally driven loop taker with indentations". (Specification filed 19th September 1892.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

No. 318 of 1890.—David Caird's invention for improvements in the manufacture or construction of metal barrels, and other similar vessels. (Specification filed 14th September 1891.)

Fee in respect of the continuance of an exclusive privilege—

(b) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

J. H. GILLILAND,
Offg. Registrar.

SENATE HOUSE,
The 22nd December, 1896.

AGENT TO THE GOVR.-GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 14th December, 1896.

No. 9023.—Consequent on the reduction of Maulvi Abdul Rahim, Extra Assistant Commissioner, and his appointment hereby made to be Native Assistant to the Agent to the Governor-General in the Khojak Pass, with effect from the afternoon of the 13th January, 1895, the following promotions in and appointments to the list of Extra Assistant Commissioners in Baluchistan are made with effect from the same date :—

(*a*) Sheikh Abdul Rahman, Native Assistant to the Agent to the Governor-General in the Khojak Pass and Officiating Extra Assistant Commissioner, is confirmed as an Extra Assistant Commissioner.

(*b*) Mir Shams Shah, Sarishtedar in the office of the Revenue Commissioner in Baluchistan and Officiating Native Assistant to the Agent to the Governor-General in the Khojak Pass, is appointed to officiate as an Extra Assistant Commissioner and is posted as Extra Assistant Commissioner, Pishin, *vice* Maulvi Abdul Rahim, reduced to the post of Native Assistant to the Agent to the Governor-General in the Khojak Pass.

This office Notifications Nos. 222 and 503, dated the 14th and 28th January, 1895, respectively, are hereby cancelled.

No. 9024.—A substantive vacancy having occurred in the list of Extra Assistant Commissioners in Baluchistan through the death, on the 13th June, 1895, of Kazi Imam-ud-din, Diwan Utam Chand (Head Clerk in the office of the Political Agent and Deputy Commissioner, Thal-Chotiali), Extra Assistant Commissioner, substantive *pro tempore*, is confirmed as an Extra Assistant Commissioner, with effect from the 14th idem.

This office Notification No. 2765, dated the 6th April, 1896, is hereby cancelled.

No. 9025.—Under the provisions of Article 372 of the Civil Service Regulations, the extraordinary leave for periods aggregating one year granted to Maulvi Abdul Rahim, Native Assistant to the Agent to the Governor-General in the Khojak Pass, in this office Notifications Nos. 494 and 4087, dated the 25th January and 21st June, 1895, respectively, is hereby extended up to the 21st March, 1896 inclusive.

No. 9026.—On return from the extraordinary leave granted to him in this office Notification No. 9025, dated the 14th December, 1896, Maulvi Abdul Rahim, Native Assistant to the Agent to the Governor-General in the Khojak Pass, is appointed to be an Extra Assistant Commissioner, substantive *pro tempore*, and is posted to Pishin, with effect from the afternoon of the 21st March, 1896, *vice* Diwan Utam Chand, confirmed.

This office Notification No. 2766, dated the 6th April, 1896, is hereby cancelled.

No. 9027.—Consequent on the retirement from the public service of Rai Bahadur Hittu Ram, C.I.E., an Extra Assistant Commissioner in Baluchistan, in the forenoon of the 1st October, 1896, the following promotion is made in the list of Extra Assistant Commissioners in Baluchistan :—

Lala Udho Dass *walad* Dhanpat Rai, Tahsildar, 2nd grade, at present on deputation in Foreign Service, is appointed to be an Extra Assistant Commissioner in Baluchistan, but will continue in Foreign Service.

This office Notification No. 6970, dated the 5th October, 1896, is hereby cancelled.

The 15th December, 1896.

No. 9080.—With the previous sanction of the Governor-General in Council, the Chief Commissioner in British Baluchistan, is hereby pleased to declare, under the provisions of sub-section I of section 10 of the British Baluchistan Forest Regulation, 1890, that the area specified below which, in the Chief Commissioner's Notification No. 5781, dated 22nd October, 1890, was declared to be a State Forest, under section 3 of that Regulation, shall cease to be a State Forest, with effect from the 1st January, 1897 :—

Specification of land disforested.

Name of Reserve or portion of Reserve disforested.	District.	Pargana.	Mouza.	Area in Acres.
Shebo plantation	Quetta-Pishin	Pishin	Batazai	2,682

Boundaries.

East.—Batazai branch of Shibu canal.

South.—The military road from the bridge over the canal as far as the entrance to the rest house compound, thence the south-east and north-east banks of Tank No. III, thence a line of pillars in a north-westerly direction down to the Surkhab River.

West.—Surkhab River.

North.—A deep nala running from No. 1 Tank near Batazai to the Surkhab.

Brief description.

A narrow strip of land, situated on the Sind-Pishin Section of the North Western Railway with its centre at the Saranan station. Extreme length about five miles with breadth varying from $\frac{1}{4}$ to $1\frac{1}{2}$ miles, the area is divided into 5 blocks, 4 of which are trenched and planted to a certain extent with miscellaneous trees.

Reasons for disforestation.

The area in question has proved to be unsuited for a State Forest. The cost of treating it as such would be excessive.

By Order,

S. G. KNOX, *Lieut.*,

for *First Assistant.*

CHIEF COMMISSIONER OF AJMERE-MERWARA IN THE PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Camp Nusseerabad, the 16th December, 1896.

Straits Settlements, China, and Japan.	30th "	Per Steamer *Suisang*.
Rangoon and Moulmein . .	25th "	Per B. I. S. N. Co.'s Steamer.
Rangoon, Moulmein, Tavoy, and Mergui.	29th "	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	26th "	Ditto.
Ditto ditto (Supplemental)	27th "	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon.	30th "	Ditto.
Port Blair	29th "	*Vid* Rangoon.
South African Ports . . .	30th "	Per Steamer *Umlazi*.
	1897.	
Mauritius, Réunion, Mayotte, and Nossi Be.	1st Jan.	*Vid* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,

Presidency Postmaster, Calcutta.

PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنکونا فبری فیوج یعنی تپ بھگانے والے سنکونا *

سنکونا فبری فیوج کلکته کے بوٹانکل گارڈن یعنی کمپنی باغ کے سپرنٹنڈنٹ صاحب سے ہرایک ملازم سرکاری اور ایک مشت چھه پونڈ تک لینے والا ہر آدمی حسب نرخ ذیل خرید کرسکتا ہی — یعنی چار اونس والا ٹین بقیمت دو روپیه آٹھه آنه ؛ آٹھه اونس والا ٹین بقیمت پانچ روپیه ؛ ایک پونڈ والا ٹین بقیمت دس روپیه *

عام آدمیوں کو یهه دوا بوٹانکل گارڈن یعنی کمپنی باغ کے سپرنٹنڈنٹ صاحب سے بقیمت نقد حسب نرخ ذیل مل سکتی ہی — یعنی چار اونس والا ٹین بقیمت تین روپیه ؛ آٹھه اونس والا ٹین بقیمت چھه روپیه ؛ ایک پونڈ والا ٹین بقیمت باره روپیه *

یهه دوا کلکته کے بڑے بڑے ولایتی اور دیسی دواخانوں میں بھی بکتی ہی — ماسواے قیمت مذکورہ بالا کے محصول ڈاک چار اونس والے ٹین کا چار آنه ؛ آٹھه اونس والے ٹین کا آٹھه آنه ؛ اور ایک پونڈ والے ٹین کا باره آنه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	R18,	or, post free,	R18-12.
½ ,,	R 9,	,,	R9-8.
¼ ,,	R4-8,	,,	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন ..	১৮,	বা ডাকমাশুল বিনা	১৮৸৽
½ আধ	৯,	,,	৯৷৽
¼ সিকি	৪৷৽	,,	৫,

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গ্যারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিন্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.*,
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876:—

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

Nomenclature and Classification of State Railway Stores 3rd Edition, 1895. F'cap., boards. R2 (6a.)

Copies of the Book of Bridge and Culvert Tables, prepared under the orders of the Government of India by MR. E. HERBERT STONE, M.I.C.E., are now available for sale to the public in *book form* and in loose sheets, at the prices named below :—

The book bound complete. R15 per copy. (R2.)

Each separate sheet mounted on cloth of the following—8a. (3a.)

5 sheets girder bridges, 5' 6" gauge.
5 sheets ditto, metre gauge.
13 sheets arched culverts, heavy type, both gauges.
13 sheets ditto, light type, ditto.
4 sheets open and flat-topped culverts, ditto.

Drawings of Girders, Permanent-way, Station Machinery, etc., are obtainable on payment from the officer in charge Technical Section of the Office of Consulting Engineer to the Government of India for State Railways, Calcutta.

Proceedings of the Committee of Locomotive and Carriage Superintendents, Vol. III. F'cap., half calf. R7-8 (R1-2.)

Ditto, Vol. V, " R7-8 (9a.)
Ditto, Vol. VI, " R7-8 (13a.)

Reprint of ditto, Vols. I to V, " R2-0 (5a.)

Railways in India. Administration Report on the, For 1894-95, Part II, R2 (11a.)

History of Services of the Officers of the Engineer, Accounts, and State Railway Revenue Establishments of the Government of India. Corrected to 31st December 1895. Vol. I. R2-8 (5a). Vol. II. R2-8 (5a.). Complete R5 (8a.)

System of recruitment and examination for appointment and confirmation of candidates to the Superior Revenue Establishment of State Railways, Traffic Department. Reprint of Rules regarding the. 8vo., paper cover. 4a. (1a.)

Rules for the examination for appointment to and confirmation in the Superior Accounts Branch of the Public Works Department. Paper cover, 8vo. 4a. (1a.)

General Directory and Railway List. Locomotive and Carriage Superintendents for India, corrected up to 1st January, 1895, 1896. Paper cover, F'cap. R1 (3a.) each.

Budget Estimate of the Indian Telegraph Department for 1895-96 and 1896-97. F'cap., paper. 8a. (3a.) each.

Ditto Indo-European Telegraph Department for 1895-96 and 1896-97. F'cap., paper. 8a. (1a. 6p.) each.

Budget Estimate, Imperial Civil Works, for 1895-96, 1896-97. R1-8 (7a.) each.

Ditto, **Provincial and Incorporated Local Civil Works,** 1895-96, 1896-97. R3 (10a.) each.

Ditto, **Irrigation Branch,** 1895-96, 1896-97 R1 (6a.) each.

Ditto, **State and Guaranteed Railways** for 1895-96 and 1896-97. R5 (12a.) each.

Ditto, and **Budget orders** for 1896-97 9a. (3a.)

Complete Catalogue of all books kept in stock can be had free of charge on application.

BOOKS AND PUBLICATIONS

FOR SALE AT THE

BENGAL SECRETARIAT BOOK DEPÔT,

WRITERS' BUILDINGS, CALCUTTA.

NOTICE.—Books required for private use only can be purchased. Applications should be accompanied by a remittance, unless it is wished that the books should be sent by value-payable post, in which case, besides the ordinary postage, an additional charge will be made for registration and commission.

Books required for the public service should be obtained through the Heads of Departments.

The amounts within parentheses are for packing and postage.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, No. $\frac{2\text{-F.}}{76\text{-}8}$, dated Calcutta, the 23rd December 1896.

READ—

Letter from the Chief Commissioner, Central Provinces, No. 4988, dated 16th December 1896.

RESOLUTION.

The letter referred to above contains a full report on the agricultural situation in the Central Provinces, and the Governor General in Council is pleased to direct that it be published for general information. The complete enclosures will be published in the *Central Provinces Gazette.*

[True extract.]

DENZIL IBBETSON,

Secretary to the Government of India.

AGRICULTURAL PROSPECTS IN THE CENTRAL PROVINCES.

Letter from the Chief Commissioner, Central Provinces, to the Government of India, No. 4988, dated the 16th December 1896.

I am directed to invite the attention of the Government of India to this Administration's letter No. 2161, dated the 13th June 1896, dealing with the agricultural situation in these Provinces up to that time. Owing to the peculiar character of the monsoon rainfall of the current year, the situation has, instead of improving, become very much more serious, and even on the most favourable view of the outturn of the spring crops, it is certain that there will be severe distress, especially in the northern and central parts of the Province, and that large expenditure will be necessary in connection with famine-relief.

2. I proceed to show the circumstances which have resulted in the present situation, to state what has been done to meet such distress as exists, and to forecast, as far as is now possible, the prospects of each district and the measures which will be necessary for the effective relief of the agricultural and labouring classes.

The main features of the rainfall of 1895 were described in paragraph 5 of the letter already referred to, and until quite recently the course of the rains this year very closely resembled that of 1895. In June and July there was plentiful rain in all districts of the Province, while in August the fall was unusually heavy—heavier indeed than it had been in the previous year. There had been nearly everywhere sufficient breaks to allow of sowing and weeding being carried on, and, though the heavy rain of August had damaged the rice in some parts, there seemed every hope of an unusually plentiful autumn crop. With the end of August, however, the rain abruptly ceased and September was practically rainless in nearly all districts of the Province. It was only in Raipur (5·18 inches distributed over four weeks) and Sambalpur (5·67 similarly distributed) that there was good rain throughout that month, while in Nagpur, Chanda and Damoh there was fair rain in parts of each district. Elsewhere there was practically none, the scanty local showers which fell in places being of no benefit to the standing crops. October was entirely rainless throughout the Province, and when the first half of November had passed without further showers, prospects were exceedingly gloomy. Not only had the early and high-lying rice, as well as the lesser millets which form the main food of the poorer classes, been ruined by the early cessation of rain, but there seemed every likelihood that the further course of the seasons would resemble that of the previous year: that there would be no cold weather rains, and that, except in embanked and irrigated lands, the spring crops would fail even more entirely than the autumn crop had done. But the very heavy rain in the earlier monsoon months had left the soil charged with moisture. In spite of two months' drought, the spring crops germinated with a fair degree of success wherever they had been sown, and week after week passed without their showing (except in a few places) serious signs of withering. At last on the 22nd November and the two following days rain came, and fell in all parts of the Provinces. In the Nagpur and Chhattisgarh Divisions, as well as in Damoh, Mandla and Seoni in the Jubbulpore Division, and in the Chhindwara District of the Nerbudda Division, the fall was general and fairly plentiful. The prospects of the crops which had already germinated were greatly improved, and the land was sufficiently moistened to allow of further sowings, which were taken in hand in all these districts. Even in the other districts, with the sole exception of Saugor, Hoshangabad, Betul and Nimar, where the fall was very slight and scattered, the rain was sufficient to improve very materially the previous situation; standing crops were benefited, and though the fall did not, in many places, suffice to allow of further sowings, it diminished the fears of a failure in the fodder-supply. It must also be noted that this most timely fall removed the fear that this year's season would resemble that of 1895-96 in having no winter rain. There is now (it may reasonably be hoped) every prospect of further rain at the usual time during the cold weather, and in most

districts the outturn of the spring crop, on the restricted area sown, ought, so far as any forecast is possible at this early stage, to be at least an average one.

3. Turning now to the actual outturn of the autumn crops and the prospects of those of the coming spring, it will be well in the first place to review briefly the harvest results of the previous year : the power of the poorer classes to resist failure being obviously much less when the failure extends over more than one year. In paragraphs 5 and 6 of the letter of last June the outturn of the crops of 1895-96 was dealt with in detail, and in paragraph 7 these results were summarized. It will be seen that only in five districts were the harvests of that year fair or good (Nimar, Chhindwara, Wardha, Nagpur and Chanda, those in the last three districts following on poor harvests in previous years), while in the remaining thirteen they were poor or bad. In ten of these the crops of previous years had been much below the average, while in the three districts of Jubbulpore, Saugor and Damoh the previous two years' crops had not merely been below the average, but had been so bad as to cause widespread agricultural distress. In the annexed table the districts are again shown in the same order, columns being added to show the percentage outturn of the crops of 1895-96, the ratio of the rabi to the kharif area in each district, the probable outturn of the present kharif, the proportion of the rabi area sown, the proportion which has germinated, and the prospects of the spring harvests:—

DISTRICTS.	Average outturn of past three years (100 = full crop).	Average outturn of worst two successive years in the past three.	Average outturn of 1895-96 (full crop = 100).	Average anna outturn of current kharif.	PROPORTION OF KHARIF TO RABI AREA. Kharif.	Rabi.	Proportion of normal rabi area sown.	Proportion germinated.	Present prospect of spring crop.
1	2	3	4	5	6		7	8	9
A. DISTRICTS.									
Nimar . . .	72	71	76	7 to 8	87	13	56	25	Poor.
Chhindwara . .	77	76	...	5	58	42	87	69	Good.
B. DISTRICTS.									
Wardha . . .	58	53	70	8	60	40	87	95	Good.
Nagpur . . .	63	57	75	8	50	50	87	75	"
Chanda . . .	49	48	60	8	66	34	75	75	"
C. DISTRICTS.									
Raipur . . .			54	4	69	31	25	75	Good.
Bilaspur . . .	79	77	39	5	64	36	31	81	"
Sambalpur . . .			70	10	98	2	20	50	"
Betul . . .	67	65	48	4	61	39	75	85	Poor.
Mandla . . .	71	69	43	3	67	33	25	87	Good.
D. DISTRICTS.									
I.—POOR.									
Seoni . . .	62	61	59	4	48	52	60	90	Good.

Hoshangabad . .	58	49	59	5 to 6	27	73	75	96	Poor to fair
Bhandara . . .	53	50	40	6 to 7	63	37	85	90	Good.
Balaghat . . .	57	52	48	3	75	25	25	75	"
II.—BAD.									
Jubbulpore . . .	55	48	45	5	48	52	66	87	Good.
Damoh . . .	47	43	41	6	46	54	60	100	Fair.
Saugor . . .	47	35	47	5 to 6	38	62	31	100	Bad.

4. The situation of the several districts may now be considered in detail, the succession given in the preceding table being followed as most convenient for the purpose of comparison. In Nimar and south Chhindwara the kharif crops were fair ; juar, which is largely grown in both districts (⅓ of the total cropped area in Nimar and a little less than ½ in Chhindwara) yielding 8 annas,

In the Chhindwara Tahsil of the latter district, however, and in the Jagirs to the north of it, where the people depend largely on the lesser millets, the kharif outturn was very scanty, and the total average kharif outturn of the district is estimated at only 5 annas. In Nimar the spring crops are quite unimportant, but in Chhindwara, where 42 per cent. of the cropped area is under rabi, prospects have been much improved by the recent rain, and sowings have been resumed. Neither of these districts as a whole gives cause for serious anxiety, though the poorer classes in the Chhindwara Tahsil, in the Jagirs to the north of it, and in the new Harsud Tahsil of the Nimar District, will certainly need Government assistance. The 1,600 square miles of country which form the Chhindwara Jagirs are a mass of hills and forest inhabited by Gonds and Korkus, who mix very little with the population of the plains, and the scattered nature of whose villages makes it specially difficult to ascertain their necessities or to organize relief. Special care will be needed in dealing with these people and the similar population in Mandla and parts of Betul.

5. As regards the B. Districts—Wardha, Nagpur and Chanda—where last year's crops were good, but those of the two previous years poor, juari, which occupies between a third and a quarter of the total cropped area in all three districts, has yielded well in good soils, and the outturn of the kharif is estimated generally at from 8 to 10 annas. In all three districts the rabi area is also important, being 34 per cent. of the total in Chanda, 40 in Wardha, and 50 in Nagpur. The recent rain has enabled sowings to be resumed, and though, owing to drought in September and October, less than the normal area has been taken up, the prospects of the growing crops are hopeful. No general distress is anticipated, but relief will be necessary in the Umrer Tahsil and some portions in the north of Nagpur, where a poor kharif crop has followed past poor harvests, and in the north-east zamindaris of Chanda.

6. In the C. Districts—Raipur, Bilaspur and Sambalpur (forming the Chhattisgarh Division), Betul and Mandla, where last year's harvest (except in Sambalpur) was poor, but those of the two preceding years good, there is no cause for anxiety, (except in one isolated tract in the north-west) in Sambalpur. The main rice crop has yielded 10 to 12 annas in good soils, and the outturn of the early reaped rice was also good. Rabi is quite unimportant here, being only 2 per cent. of the total.

Both in Bilaspur and Raipur the kharif has been a very poor one, averaging about 4 annas, except in the Dhamtari Tahsil of the last district. In both these districts, especially in Bilaspur, the rice crop of the previous year (1895-96) was also unfavourable, and there will be considerable distress in the southern part of Bilaspur and the northern half of Raipur. In both districts, however, over 30 per cent. of the total cropped area is under rabi, and the prospects of this crop have been greatly improved by the recent rain. In Betul the rabi is the chief harvest of the level portions of the district, while the hilly tracts depend almost entirely on the kharif. The early sown kharif (some three-eighths of the whole) has yielded tolerably well, 8 to 10 annas, while the outturn of the late sown varies from 2 to 6 annas. Only some 60 per cent. of the usual rabi area was, however, originally sown, and the recent rainfall has been too scanty and scattered to materially improve prospects. It is not, however, anticipated that there will be severe general distress, but there will, no doubt, be considerable suffering all through the upland tracts and among the poor who have no stocks to fall back on, and who have this year been deprived of their usual harvest earnings.

In Mandla the situation is serious; kodon, the most important kharif crop (covering about half of the total area under these crops) and the chief food of the aboriginal population, has yielded from 1 to 4 annas. Kutki, which covers one-eighth of the kharif area, has been an entire failure, while rice, which occupies about one-fourth of the kharif area, has only yielded from 4 to 6 annas. More than two-thirds of the population of this district depend upon kodon and kutki; the harvests of the past year were poor, and the people, who are mainly aborigines, are unaccustomed to lay up any store against possible accidents of season. The prospects of the rabi have, it is true, been improved by the recent rain, but this harvest is not an important factor in the agricultural situation here. Prospects in this district are certainly bad.

7. The D. Districts (Seoni, Narsinghpur, Hoshangabad, Bhandara, Balaghat, Jubbulpore, Damoh and Saugor), where up to the current year harvests had, for some years, been poor or bad, have next to be dealt with. It is here (and in Mandla) that the situation is most serious.

In Seoni the kharif crops have been very seriously injured by drought. Even irrigated rice yielded only 4 annas, while on the unirrigated area the yield was practically nothing. The kodon crop failed, and juar only gave a fair crop on the richer black soils. More than half the cropped area of this district (52 per cent.) is normally under rabi, but even allowing for further sowings after the recent rain, only 60 per cent of this area has been sown, and though the seedlings are doing well, there will be nothing like a full crop. Past years' crops have been poor in this district, and severe distress is anticipated, especially in the Lakhnadon Tahsil, where kodon, which is the staple crop, was an utter failure.

In Hoshangabad three-quarters of the western half of the district, except in the Charwa Pargana, are under rabi, but in the east and north there is a considerable kharif area. The people in the latter tract have been much impoverished by three bad years, and except juari, which has yielded annas, the present year's kharif has been a failure. Heavy exports have caused high prices all along the Railway line, and in those parts of the district in which the kharif is important it is feared that there will be much distress. The recent rain did not reach this district except in scattered showers, and has not materially benefited the rabi. Even in the richer areas of the district the outlook is therefore not altogether favourable, while in the eastern tahsils and in the Charwa tract there will probably be general distress.

In Narsinghpur the rabi area consists of a belt of land about 12 miles broad running from east to west through the centre of the district. Of this area 50 per cent. has been sown and half of this is said to have germinated. The recent rain has not, so far, been sufficient to allow of further sowings, though it has somewhat improved the prospects of the standing crops. Of the kharif crops rice has yielded 6 annas, kutki 4 and kodon 6. The kharif outturn as a whole is estimated at 6 annas. In the hilly tracts to the north and south of the district the people depend chiefly on the lesser millets, and are mostly poor. The scanty crops of this year, combined with past bad years and the high prices of all food-grains, will cause considerable suffering among these classes, and work will have to be provided for them. Even in the richer rabi area the outlook is gloomy. The failures of past years have exhausted resources; only half the normal area has been sown and germination has been defective. Distress may therefore be expected over the greater part of the district.

In Bhandara rice is by far the most important crop. High-lying rice has, owing to the early cessation of rain, been a failure, while on the better situated soils the outturn has been from 5 to 6 annas. On irrigated land, on the other hand, which in this district is nearly half of the total rice area, the outturn is estimated at from 8 to 14 annas. As regards the rabi, 37 per cent. of the total cropped area, large tracts were, owing to the early cessation of rain, left unsown. But sowings have been resumed now that general rain has fallen; 85 per cent. of the normal area is said to have been put under crop, and a fair outturn may be expected. The situation in the greater part of this district cannot therefore be considered as serious, but it is anticipated that there will be distress among the poorer classes in the thinly populated forest tracts in the south-east and in the northern portion of the district. Here the chief food crop is rice, grown on poor unirrigated soil. This crop has yielded little or nothing either in the present or last year, and there are no stocks for the people to fall back upon.

In Balaghat, again, rice is by far the most important crop, occupying two-thirds of the total cropped area, only 31 per cent. of this being irrigated. On the irrigated land the outturn is estimated at 9 to 10 annas, but on the unirrigated, 69 per cent. of the whole, it will not be more than 4 to 6 annas in the Balaghat Tahsil and 2 to 3 annas in Baihir, the large upland area forming the northern portion of the district. Over the whole district it is estimated at not more than 3 annas. There have been several successive bad years in this district, and the bulk of the population is very poor and has no

reserves of any kind. Considerable distress already prevails, and it is certain that this will become more acute with each succeeding month, especially in the Baihir Tahsil. Recent rain has improved rabi prospects, and may enable cultivators to sow more land with gram and pulses, but in view of the fact that the ordinary rabi area is only 25 per cent. of the total, this cannot materially alter the general situation.

8. The three remaining districts—Jubbulpore, Saugor and Damoh—have suffered severely from bad harvests for the last two years, and large measures of relief in the way of revenue remission and famine works have been found necessary. All three are to a preponderating extent rabi districts, though less markedly so than Hoshangabad and Narsinghpur. This harvest was poor last year in Saugor and in those parts of Jubbulpore which lie outside of the rich plain known as the *haveli*. It was also very poor in Damoh. The kharif crop was very scanty in all three districts.

In Jubbulpore the kharif crop, chiefly rice, kodon and kutki, has again failed in the parts of the districts where distress was previously most serious, the outturn being estimated at from 3 to 6 annas. Rabi sowings have also been much restricted, only two-thirds of the normal area having been sown. In the rest of the district, the *haveli*, where there is much embanked land, the kharif has not been so bad, and with the aid of the recent rain a good rabi outturn is expected. Owing, however, to the successive failures of the past three years there will be much distress, especially in the Murwara or northern tahsil, where the people chiefly depend on the kharif harvests.

In Saugor the kodo crop was very poor, and the kharif outturn as a whole is estimated at 5 to 6 annas.

A very large proportion of the rabi area, estimated at 70 per cent., has partly in consequence of want of seed and partly owing to failure of rain, remained unsown, and as the recent rain was not at all general in this district, the prospects are most unfavourable; much distress already exists here, and severe pressure must be anticipated in all tahsils. Indeed, there is no district in the Province where the outlook is so gloomy, or where such acute and general distress is probable.

In Damoh there was some useful rain in September, and the kharif crop has been generally better than it was last year, except in parts of the Hatta Tahsil where it was poor. The rabi sowings were restricted to a much smaller area than in the previous year (60 per cent. of the normal), but the recent rain, though not heavy, has been fairly general, and what has been sown is doing well. Distress here will not, it is anticipated, be general, but there will be considerable need for relief in the south-west of the Damoh Tahsil and in the north of Hatta.

9. Summarizing these details, it may be said that there will be some measure of distress among the labouring poor and the smaller cultivators in all districts except Sambalpur, and that there will be acute distress in the districts of Jubbulpore, Saugor, Mandla and Balaghat, and among the poorer classes in the Nerbudda Valley Districts (with the possible exception of Nimar), in Damoh, Seoni, Chhindwara, Betul, Bhandara, Raipur and Bilaspur. The extent and intensity of this distress greatly depends, except in Balaghat and Mandla, on the outturn of the rabi crops. But in Saugor, although it is essentially a rabi district, sowings have been so greatly restricted that the rabi outturn must in any case fall very far short of the normal, and cannot materially alter the present situation. Elsewhere the recent general rain has much benefited these crops, except in Hoshangabad, where there has been a very slight and scattered fall; but the area sown is still in most districts, owing to the drought in September, considerably less than the normal, and some degree of damage had been done to the growing crops by the premature cessation of the monsoon. Hence anything like a full rabi crop cannot be hoped for even under the most favourable weather conditions. It has been already noticed that the power of resistance possessed by the poorer classes in face of harvest failure greatly depends on whether the bad crop comes on the top of previous good harvests or is one of a succession of bad ones. The unfortunate feature of the present situation is that in two of the worst districts, Saugor and Balaghat, the present unfavourable season has been preceded by others scarcely more favourable.

In both these districts stocks have been exhausted and the resources of the people overtaxed in meeting the calamities of previous years, and it is on this account that the situation in them is so grave. The same considerations apply to the distressed areas in Jubbulpore and Damoh. In Mandla harvests were fairly good up to 1895-96, but in that year the yield of the chief crops was poor, and there has been a good deal of distress throughout the summer and autumn. Moreover, the bulk of the people are poor and thriftness, and have no stocks of any kind. The same is the case with the greater part of the cultivators on the poorer soils of the other districts, and any considerable failure even of one year's crop is sufficient to reduce them to great distress.

I am further to observe that the distress which has resulted from the wide-spread failure of the autumn crops will, in most of the affected tracts, be only very partially alleviated by the reaping of the rabi harvests. The great majority of the classes who in these Provinces will suffer most are almost entirely dependent on the autumn crops—rice, juar and the lesser millets. Nearly all their land is cropped with these grains, and when these fail, as they have this year almost eveywhere failed, the most plentiful outturn of wheat and gram is, apart from its effect in lowering the general price of food stuffs, of little or no benefit to the people. Harvest labour will, no doubt, be a resource for a few, but in most cases distress must continue and grow more severe until the progress of the monsoon rains allows of their special food-crops being again sown and reaped. The Chief Commissioner therefore thinks that we must be prepared to face continued and general distress until well on in July or August. With favourable rains and really good autumn harvest, the distress would probably diminish towards the close of the rains when the early crops ripen, and field work becomes available for the labouring poor. It may then gradually disappear with the beginning of next cold weather. But in some parts, notably Saugor, Jubbulpore, Balaghat and parts of Damoh, past years have been so bad, and the people are so depressed and impoverished by the calamities of successive seasons that it will, in Mr. Lyall's opinion, take at least a year of renewed agricultural prosperity to make the poorer classes independent of Government relief. This, he thinks, is the utmost that can be said. We know too little of the resources of the people in times of need, and of the extent of the stocks they may have to fall back upon, to enable us to make even an approximate estimate of the numbers that will have to be relieved. All that Government can do is to have provision ready for a *maximum* number. But the Chief Commissioner thinks that it is quite useless to attempt in this letter any exact statistical forecast regarding the probable numbers to be relieved, when sufficient data for such statistics are admittedly not available.

10. Apart from the actual outturn of the crops, the most important factor in determining the intensity of such agricultural distress as has to be dealt with in these Provinces is the price of ordinary food grains, and it seems desirable to forecast, as far as this may be possible, what the course of prices is likely to be during the next few months. On this point, however, it is, the Chief Commissioner thinks, unsafe to base conclusions as to the probable course of prices this year exclusively on a study of the prices which ruled in the later cold weather and hot weather months of 1895-96. Last year there was practically no rain after October, and there are strong reasons for thinking that, until the November rains of the current year, dealers were fixing prices on the assumption that the cold weather months of 1896 would resemble the same period in 1895: that there would be no winter showers, and that the coming rabi crop would, in most part, be a total failure. Prices were still further hardened by large exports to the North-Western Provinces and the Punjab, due to similar anticipations in those Provinces. These anticipations have, however, not been fulfilled. There has been general rain in the present month, and it seems not improbable that there will be further rain before the standing crops ripen. So far then as can now be foreseen, the rabi outturn on such land as has been sown will be nearly if not quite up to the average. In these circumstances it seems not improbable that the present very high prices will not be maintained, that they will gradually get lower as the rabi prospects improve, and that they will eventually be not higher than they were last year.

The statement which accompanies this letter shows for the last three years the prices of wheat and rice in each district on the 15th November, and also shows for the two years 1894 and 1895 the prices of the same grains on the 15th of each month up to April. It will be seen that the prices of these grains at present are at least 50 per cent. higher than they were on the same date last year, and a scrutiny of the figures for previous months shows that they have been steadily rising since September, the rise between the 31st October and 15th November, between which dates the hoped-for Diwali rains did not fall, having been considerable in nearly all cases. If these exceedingly high prices are maintained, they will materially aggravate the severity of the situation, but, as has been pointed out, they will probably fall now that there has been general rain, and will get gradually lower as the prospects of the spring crops become more certain.

It must also be remembered that with the enormous extension of railroads which has taken place in recent years and the remarkable cheapening in ocean freights, the prices of all universal necessaries, such as food-grains, have ceased to be dependent, except in a few isolated districts, on local circumstances. In these Provinces they depend on general harvest prospects and on general demand quite as much as on local harvests and on local demand. The rain which fell here extended over the greater part of India, and has, over large areas, improved prospects to an even greater extent than they have been improved here. This should largely diminish the demand for export from these Provinces, and the knowledge that in a few months grain will, in some parts, be plentiful, should have a strong effect in lowering prices here. It must also be recollected that even a slight rise in price is sufficient to check export abroad, and the fact that such export demand cannot be calculated on will also tend to cheapen all food-grains.

All these anticipations are of course conditional on sufficient winter rains; but provided these do not fail, the Chief Commissioner sees no reason to think that prices will, in the hot weather months, be much above the level of the last season.

11. Such being the general situation in these Provinces, it remains to state the measures which the Chief Commissioner has so far taken to cope with the anticipated distress, and what further measures will, so far as can be judged, be necessary to meet the probable future development of events.

As has already been indicated, agricultural prospects up to the first week in September were very bright, and it was only when this month passed without rain, and when the weather signs were such as to indicate that the monsoon had prematurely ceased, that anxiety regarding the agricultural outlook began to be felt. But by the end of September there seemed cause for serious anxiety. The early sown rice then ripening was rapidly being ruined, the remaining kharif crops were suffering from want of moisture, and rabi sowings could not, owing to the hardness of the soil, be taken in hand. Consequently on the first of the following month a letter (copy of which I am to forward) was sent to all Commissioners asking them to submit without delay a report on the agricultural prospects of their Division, stating where distress was likely to occur, and what measures of relief it would be advisable to take. They were further instructed to arrange for numerous crop experiments both on early sown and late sown soils, and to report the results when complete.

As the weeks passed without rain, it became more and more certain that, in view of the poor harvests of the previous year, grave and general distress would have to be dealt with; and on the 22nd October the Chief Commissioner again addressed all Commissioners of Divisions (*vide* letter No. C-447-450, dated the 22nd October 1896, copy attached) asking them to submit concise estimates of probable famine relief expenditure up to the end of the present financial year. This estimate was to show probable requirements for—

(1) Works under the Public Works Department, or to be carried out on estimates prepared by that Department.
(2) Minor Works under District agency.
(3) Poor-houses and children's kitchens.
(4) Gratuitous relief outside poor-houses.
(5) Miscellaneous.

They were also asked to state what part of this total could be provided from local funds or from private charity.

The Chief Commissioner also addressed the Government of India (letter No. C.-451, dated the 23rd October 1896) stating how matters stood, and asking for a provisional special grant of five lakhs of rupees for expenditure on famine relief. This grant was sanctioned by the Government of India in Mr. Sly's letter No. 1979—27-13, dated the 31st October 1896, and has been distributed as follows in the different Divisions—

Jubbulpore	Two lakhs.
Nagpur Nerbudda Chhattisgarh	Each one lakh.

The interval before the receipt of the reports called for from Commissioners was occupied in the issue of Circular orders to the several heads of Departments, directing them to arrange for the instruction of their subordinates in the duties imposed on them in time of scarcity by the provisions of the Famine Code. The Chief Commissioner also arranged Conferences with the Commissioners and Deputy Commissioners of the Nerbudda and Jubbulpore Divisions. These took place on the 15th October and 3rd November respectively, and the opportunity was taken of ascertaining the general situation in each district and indicating the lines to be followed in dealing with distress.

Early in November, Mr. Lyall proceeded to Nagpur and discussed the situation there with the Commissioner and local officers. In Chhattisgarh the area to be dealt with was so large, and detailed local experience seemed so essential, that the Chief Commissioner thought it advisable to depute the Commissioner of Settlements and Agriculture, Mr. Carey, who had been in charge of the Settlement operations in the Raipur District, to make a rapid tour through the most distressed parts of that district, and to assist the Deputy Commissioner with his great local experience. Mr. Carey's conclusions were embodied in a Memorandum (copy of which I am to forward) which proved of very great assistance in organizing a scheme of relief for this district. On the 20th November Mr. Lyall visited Raipur, and fully discussed the situation with the Commissioner and the Deputy Commissioners of the Division. The conclusions arrived at at this Conference were embodied in a Memorandum which is submitted for the information of the Government of India.

12. The first reports of the Commissioners of Division on the districts under their control (with the exception of those from Chhattisgarh) were received by the beginning of November, and are submitted with this letter. In the Nagpur Division the situation was sufficiently clear to allow of orders being passed at once (*vide* Secretariat letter No. 4415, dated the 16th November 1896, copy enclosed), and work in the districts of that Division is now proceeding on these lines. In the Nerbudda Division some further information had to be awaited, but orders have now been passed (*vide* letter No. 4729, dated the 28th November 1896, copy enclosed). In Jubbulpore sanction was given at the Conference held on the 3rd November to all necessary preliminary measures being taken, but the Chief Commissioner had to await the preparation of a complete list of the larger relief-works proposed before passing final orders on the Commissioner's reports. A copy of these orders is now submitted (*vide* Secretariat letter No. 4951-A., dated the 11th instant). As regards the Chhattisgarh Division, Mr. Carey's Memorandum, already referred to, was made the basis of the orders issued for the Raipur District. These orders will be found in paragraphs 1 to 10 of the notes on the Raipur Conference, appended to this letter. Similar orders with regard to Bilaspur will be found in paragraphs 11 to 17 of the same document.

In Sambalpur a very full and complete report has been submitted by the Deputy Commissioner (*vide* his No. 6445, dated the 18th November 1896, copy appended) and orders (copy also submitted) have been passed on this. It will be seen that preliminary arrangements have now been made throughout the Province; that in the Nagpur, Jubbulpore and Nerbudda Divisions, detailed instructions have issued, and that it is only in Raipur and Bilaspur that the particular methods to be followed in the organization of relief have not been completely worked out. A programme of relief works under the Public Works Department has, however, been drawn out for those districts, and work has been

started in all cases where the local officers considered this necessary. But in Raipur and Bilaspur, as indicated in paragraph 8 of Mr. Carey's Memorandum, our main reliance will, at least in the earlier months of the scarcity, be placed on local works carried out from Land Improvement Loans; and although a sum of R50,000 has been placed at the Commissioner's disposal to commence with, it is hoped that much larger sums will be applied for and met from the grant of 10 lakhs for such loans for which, in my letter No. 4697, dated the 26th November 1896, the Chief Commissioner has asked the sanction of the Government of India. The importance of completing all arrangements as early as possible has been impressed on the Commissioner of the Division, and it is hoped that the arrangements in this Division will very shortly be as complete as the care and thoroughness with which local officers have dealt with the question have enabled the Chief Commissioner to make them elsewhere.

I am to enclose copies of the programmes framed for each Division in the Public Works Department for large relief works, which will, in accordance with the system so successfully adopted in the North-Western Provinces and Oudh, be administered in that Department; it will be seen that in each case the programme includes a list (Statement A) of works calculated to meet any possible development of distress, and a selection (Statement B) out of the larger list of works which, it is thought, will suffice for present requirements, and which it has been arranged to put in hand at once.

The appended statement gives the estimates submitted by Commissioners showing their probable requirements up to the end of the current financial year, and also their estimates of the contributions which may be expected from Local Funds and private charity. It will be seen that the total sum which will be needed from Government is put at approximately 14½ lakhs of rupees. From the nature of the case, however, Mr. Lyall does not think that these figures can be taken as more than a rough preliminary estimate of what will be required. It has often been remarked that famine relief operations are "fruitful in surprises". The estimate may fall short in one district, and be found in excess of necessities in another. Immigration from one part of the Province to another, or from Native States into British territory, may swell the numbers in any particular district above what is anticipated. For these reasons the Chief Commissioner deprecates too strict criticism of the figures. He has already, in the Nerbudda Commissionership and in Raipur, raised the figures of column 3 (works under the Public Works Department) above the totals included in the programmes of works in the light of information received since these were framed.

13. It will, the Chief Commissioner thinks, be unnecessary to trouble the Government of India with a detailed account of the schemes of relief which have been approved for each district, but it seems advisable to state generally the lines on which it is proposed to organise relief measures both as regards the provision of work for those able to labour: for the relief of those whom hunger or weakness may render temporarily incapable of work; and, finally, for the helpless members of the community who are unable to move from their homes, and to whom aid must be given in their villages. As regards relief-works those to be first taken in hand are, wherever this may be possible, *village* works, such as the deepening of existing tanks, excavation of new tanks, making field embankments, or eradicating *kans* grass. In the Chhattisgarh Division, especially in Raipur and Bilaspur, it is reported that there are but few villages in which there is not scope for further tank construction or field embankment. Rice is the staple crop here, and the widespread and extensive failure of this crop in the current and preceding years, owing to the absence of artificial irrigation. has made the people especially alive to the importance of the storage of water. A good deal of this work will, it is expected, be carried out by the well-to-do out of their own funds, but there are many others who, though willing and anxious to secure their villages against future failure of rain, have not the money available to do this. In these cases takavi advances will be most useful, and to meet these and other similar demands, Mr. Lyall has asked the Government of India, in my letter No. 4697, dated the 26th November 1896, to sanction an additional grant of 10 lakhs of rupees under the Land Improvement Loans Act. The greater portion of this sum will, it is anticipated, be spent in

the Chhattisgarh Division, but there is also scope for similar work in Nagpur, Bhandara and Balaghat in the Nagpur Division; and to a limited extent in Jubbulpore, and in Chhindwara and Seoni on the Satpura plateau. Even in the wheat districts of Hoshangabad and Narsinghpur it is now reported that there is some scope for further field embankment, and the Chief Commissioner is confident, as he has already stated, that the sum asked for can be usefully allotted before the end of March.

There are, in Mr. Lyall's opinion, strong and practical reasons for an extensive scheme of village works in the present circumstances of these Provinces. Failure of rain has not hitherto been a usual feature in the local agricultural economy; even now it is hoped that the distress is purely temporary, and that with the advent of the next monsoon the people will once more be able to take up their ordinary occupations. Under these conditions, the main thing to be done is to keep the people on their land, and to provide sufficient work and food for them near their homes to prevent their throwing up their holdings before better times come round again. If in securing this end we can at the same time help in ensuring the land from the consequences of future drought, the work becomes doubly valuable, and the Chief Commissioner is desirous that wherever such works are practicable they should be set in hand without delay. It may be added that they are an invaluable complement to centres of gratuitous relief. The main object of these centres is to provide food for those whom weakness and hunger may have temporarily rendered unable to labour, and to permit of their recovering their strength for regular work. In such cases suitable local labour must be provided, and the proposed village works will precisely meet this want. The opening of village works in all localities where scope for such works exists will therefore be the first stage in the organization of a system of relief.

It has, however, been already pointed out that there are considerable areas of the provinces, especially in the northern districts, where distress will be severe, but where there is little or no scope for village works. It is also impossible to start such works in the hilly uplands of the Plateau districts or in the poor and sparsely peopled parts of Balaghat, Hoshangabad or Narsinghpur. Moreover, as distress deepens and the number to be relieved grows, such works will be quite insufficient to meet the demand for remunerative labour. To meet these circumstances, a detailed programme of large road works has as already stated, been drawn up in the Public Works Department, after careful consultation with District and Divisional officers, and has been approved by the Chief Commissioner. Where local works are insufficient, the more important of these works will be started at once, and further works will be taken up as the need for them is pointed out by local officers.

It may be observed that no unmetalled roads are included in this scheme, labour on such roads being found to be generally, in this Province, money thrown away. The more useful existing roads are to be raised in class, new feeder roads constructed, and metal collected for existing roads. Metal can usefully be prepared and stacked in large quantities, and work of this nature can be easily supervised and measured. The Chief Commissioner therefore anticipates that it will have to be very largely relied on, especially in the rains, when earthwork becomes impossible.

All large works will be under the Public Works Department, and the Chief Commissioner has ordered that payments are, as far as possible, to be in the hands of a responsible official not below the rank of a Naib-Tahsildar. In this he has followed the course adopted in the North-Western Provinces by the Government of Sir A. MacDonnell, whose recent Resolution on the Bundelkhand scarcity of 1896 has proved and will prove of great value to himself and his officers in the present juncture. He has also arranged for the issue of instructions for the guidance of Officers in charge of such works on the lines of those issued in the North-Western Provinces in the printed rules of the 1st December 1896, and the Chief Engineer has been requested to communicate direct with the Public Works Department in the North-Western Provinces with a view to settle any doubtful points as to the adaptation of those rules to our circumstances here.

13. As an aid to small and large works, and to afford some immediate relief to the poorer classes and aborigines, who are accustomed in times of scarcity to resort to the forests for food, Mr. Lyall has ordered the opening of the forests for the extraction of edible roots, mowha and fruits, in all cases where local officers may declare this to be desirable. He has also allowed free grazing to agriculturists where want of fodder was otherwise anticipated.

For the provision of gratuitous relief, a beginning has been made by establishing poor-houses at all centres where any general distress is anticipated, and their number will be increased as necessity arises. These will be supplemented, where more extensive distress makes this advisable, by more numerous relief centres brought nearer the homes of the people, and with local relief-works attached to them wherever this may be possible. As distress spreads and becomes really acute, it will eventually be necessary to organize village relief on the basis of lists drawn up by Mukaddams and Patwaris ; but as yet this has been taken in hand only in a few of the districts where the situation is most serious.

With respect to advances for Land Improvement Loans, it may be remarked that, in addition to the usual allotment, a further sum of R1,80,000 was made available by reappropriation from local loans. This has now been distributed, and as there are large further demands from the districts of the Nagpur and Chhattisgarh Divisions, the Chief Commissioner has, as has already been pointed out, recently asked for a further allotment of 10 lakhs of rupees for this purpose.

14. As regards the sum which will be required for the general purpose of famine relief, it is yet difficult to form a satisfactory estimate. The forecasts of expenditure prepared by Commissioners were based on the assumption of a poor or bad rabi harvest. On the other hand the Chief Commissioner is inclined to think that in some cases, especially in parts of the Nerbudda Division and in the Raipur and Bilaspur Districts of the Chhattisgarh Division, the probable extent of the distress was, in the first instance, considerably underestimated. The total estimate up to the 31st March next is roughly 14½ lakhs of rupees, and the Chief Commissioner thinks that 10 lakhs of rupees, in addition to the five lakhs already granted (*vide* Government of India, Revenue and Agricultural Department, letter No. $\frac{1079}{37\text{-}13}$, dated the 31st October last, is the least that he should ask for in present circumstances for relief purposes up to the close of the present financial year. The Government of India may be confident that whatever sum is granted will be spent with the utmost regard to economy and efficiency, and that no expenditure will be sanctioned that is not actually needed for the relief of distress. Where the object in view is the saving of life and the maintenance of the cultivating classes or their land, no reasonable expenditure can be said to be wasted. Moreover, the scarcity which has to be dealt with is, as has been already indicated, a quite abnormal event in the history of these Provinces. It is not, so far as previous experience enables any conclusion to be arrived at, likely soon to recur, and if relief is organized in a sufficiently liberal and comprehensive manner to keep cultivators on their holdings and the labouring classes in their villages, it may be confidently anticipated that with a cycle of favourable seasons the Provinces will rapidly recover their former prosperity. The Chief Commissioner trusts, therefore, that the Government of India will sanction the grant now asked for.

15. There still remain for discussion the important question of the extent to which Revenue suspension and remission may become necessary, but the Chief Commissioner thinks that it will be best to defer any detailed treatment of this subject until the outturn of the kharif crops is more fully known in detail and the prospects of the rabi are more certain. Collections for 1895-96 were in general punctually made, in spite of the trying circumstances of that year, and, except in the Jubbulpore Division, where the measures of suspension and remission detailed in this Administration's letter No. 2283, dated the 27th June 1896, were found necessary, but little difficulty was experienced in realization. There were, however, short collections in the Hoshangabad and Chhindwara Districts, but in the remaining districts of the Nerbudda Division and in the Nagpur and Chhattisgarh Divisions the demand has been collected in full.

Provided that rabi prospects continue good, the mere fact that the kharif outturn has been bad would not in itself justify *general* suspension, though it is certain that considerable measures of suspension will be necessary in numerous cases in areas where the kharif harvest greatly preponderates over the rabi.

The dates of the kharif instalments of land revenue in these Provinces vary from the 1st February in the Jubbulpore and Nerbudda Divisions to the 10th February in the Nagpur Division and the 1st March in Chhattisgarh. The rents of privileged tenants are payable 15 days, and those of ordinary tenants one month, before the dates of the revenue instalments. There is thus some time to elapse before orders as to suspension or remission of revenue (which will in all cases be coupled with conditions as to a corresponding suspension or remission of rents) need be passed. Mr. Lyall is on the point of starting for a detailed visitation of all the distressed districts of the Province, and he will on arrival in each carefully consider the question of what orders are necessary in communication with the Commissioner and Deputy Commissioner, and arrange for the submission of proposals upon a systematic basis.

As at present advised, the Chief Commissioner thinks it likely that considerable suspensions and some remission will be necessary in Saugor and Damoh and in parts of Jubbulpore. Some degree of suspension will also probably be needed in Mandla, Balaghat, and the Narsinghpur and Hoshangabad districts, as well as in the worse-off parts of Betul, Seoni, Chhindwara, Raipur and Bilaspur. But it is impossible to make any reliable forecast on this point at present, and its detailed treatment will be taken up separately later on when the situation is more accurately known.

STATEMENT A.—Showing the prices of Wheat and Rice in each district on the 15th November for the last three years, and for the two years 1894-95 on the 15th of each month up to April.

Division	Name of District	Year	Prices of food-grain on 15th November: Wheat.	Prices of food-grain on 15th November: Rice, common.	Prices of food-grain, 1895-96: 15th January: Wheat.	15th January: Rice, common.	15th February: Wheat.	15th February: Rice, common.	15th March: Wheat.	15th March: Rice, common.	15th April: Wheat.	15th April: Rice, common.

Finance and Commerce Department,
December 19, 1896.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 12th, 1896.

During the week under review the pressure changes were of the usual oscillatory character and the weather was, as is ordinarily the case during the first three weeks of December, fine and settled over Northern and Central India, and the northern half of the Peninsula. A wave of low pressure crossed the north-west frontier on the 8th and passed eastwards across Northern India during the next three days, but it was of very feeble intensity and its effect on the weather was but slight. It gave moderate cloud to the Punjab and light snow to the higher elevations of the Kashmir-Himalayas from the 8th to the 10th. It was followed by a wave of cold which reduced temperature very considerably in Baluchistan on the 10th, and in Sind and Rajputana on the 11th. The reduction averaged as much as 9° in Baluchistan during the 24 hours preceding 8 A.M. of the 10th. Another *low pressure* wave affected Baluchistan and North-Western India on the 11th and 12th, but its passage across these areas was not accompanied by any change in the weather.

Pressure was in considerable to large excess in Burma and Bengal during the first four days of the week and only in slight excess in Ceylon and the south of the Bay, and hence very steep gradients favouring the prevalence of strong north-easterly winds across the Coromandel coast obtained during this period. General rain occurred in the southern half of the Peninsula. Moderate to heavy in the Coast districts and moderate in the interior. Winds fell off over the Bay during the next two days and the rainfall diminished rapidly both in amount and extent. Practically no rain was reported from the Peninsula on the 12th, except in Upper Burma, which obtained some local showers on the 6th and 7th; weather was fine throughout the week in Burma.

The temperature conditions were unusual over a large part of India during the greater part of the week but to a less extent than during the past five or six weeks. There was a steady decrease of temperature throughout the week, which reduced the prevailing excess very largely, and eventually resulted in the establishment of fairly normal conditions.

Daily Summary.—*Sunday, 6th December.*—Pressure had increased over the whole of India—briskly to rapidly over Northern and Central India and slightly over the Peninsula. The distribution of pressure was practically the same as at the close of last week, but the range of pressure between the region of high pressure in the north and of low pressure in the south was somewhat greater than on the preceding day. The air movement was fairly normal, light airs and calms prevailing over Northern India and winds from between east and north over the remainder of India. Skies were heavily clouded on the southern half of the Peninsula and light to moderate showers had fallen in Southern India during the previous 24 hours. Negapatam had obtained 3·04 inches and Madras 1·32 inches. Skies were partially clouded in Burma and some local thunder showers had occurred in Upper Burma. Fine weather held in Northern, Central and Western India. The temperature conditions were very unusual over the greater part of the country. Temperature was in large excess in the Central Provinces and Berar, in considerable excess in Bombay and in moderate excess in Burma and Madras (excepting the Coromandel coast districts).

Monday, 7th December.—Pressure had changed very irregularly. The changes were, however, too small to modify the distribution of pressure to any important extent. Pressure contiuued in general excess. The excess was greatest in North Bengal and Assam and least in the extreme south of the Peninsula and the south of the Bay. Steeper gradients than usual hence obtained over

the Bay. Winds had shifted round to west north-west at Colombo and were blowing freshly. Strong north-east winds were blowing across the Madras coast and occasioning heavy rain on the coast districts and moderate showers on the interior. The largest falls during the previous 24 hours were 4·40 inches at Madras and 4·23 inches at Cuddalore. A few local showers of little significance had again fallen in Upper Burma. Temperature had decreased briskly in the area of greatest excess in the Central Provinces, but was still in considerable excess in that area.

Tuesday, 8th December.—Pressure had fallen slightly in Baluchistan, Kashmir and the greater part of North-Western India. Pressure had risen slightly in Burma and was in large excess in that area. Over the remainder of India the changes were again small and irregular. Unusually steep gradients prevailed between Burma and the south-west of the Bay and very strong winds were blowing at Diamond Island and probably over the centre of the Bay. Skies had become overcast in the Punjab Himalayas and light snow was falling in Kashmir. There was a good deal of cloud over the Punjab and in Kumaon Himalayas. Fairly general rain hed again been received in the south of the Peninsula, but the amounts were smaller than on the previous two days. The largest fall was 2·60 inches at Cuddalore. Temperature was normal in Burma, in slight defect in the area of rainfall in Southern India and more or less in excess in the remainder of India. The excess was greatest in a belt stretching from Khandesh to Ganjam and Orissa. It was, however, steadily decreasing in amount.

Wednesday, 9th December.—Pressure had given way over nearly the whole of India, briskly over a large part of Northern and Central India and slightly elsewhere. A slight low pressure area had appeared over the South Punjab and the adjacent districts of Rajputana. Except within the depression area, where it was normal, pressure continued in general excess. The amount of excess was, however, not so large as hitherto. Gradients were less steep over the Bay than on the previous day, and winds had fallen off in strength in that area. A feeble cyclonic circulation obtained in the depression area in North-Western India. Weather was cloudy in the Punjab, light snow continued to fall in Kashmir. Moderate general rain had again occurred in the south of the Peninsula where the heaviest fall was 1·99 inches at Cuddalore.

Thursday, 10th December.—Pressure had increased briskly in Baluchistan and slightly in Upper India and had fallen slightly in the Gangetic Plain. The shallow low pressure area noticed in the Punjab on the 9th had apparently moved south-eastwards and now lay over the area defined by the stations of Agra, Jeypore, Jhansi, Cawnpore and Sutna, where pressure was in very slight defect. If was not, however, shown in the Pressure Chart as a distinct system, and its existence was revealed only by the pressure abnormals. Over the remainder of the country the barometer had changed but slightly and the general pressure conditions were unaltered. Skies had cleared in the Punjab and were only moderately clouded in Kashmir. Light showers of no value had fallen in Kashmir. Winds were north-westerly on the Coromandel coast and the rainfall had diminished considerably in Southern India. Only light showers had fallen in that area during the previous 24 hours. A feeble cool wave was affecting Baluchistan and occasioning a rapid reduction of temperature in that area.

Friday, 11th December.—The barometer had risen slightly over the area occupied by the low pressure area on the 10th and had fallen slightly to briskly over North Bihar and Bengal to which region the low pressure area had been transferred during the previous 24 hours. Pressure had fallen briskly in Baluchistan due probably to the approach of another feeble low pressure wave from the westward. Elsewhere the changes of pressure were unimportant. Pressure was normal or in slight excess except in North Bihar where there was a slight local deficiency. Winds were reverting to their normal north-easterly directions on the Coromandel coast. Skies were partially clouded in the southern half of the Peninsula and clear over the remainder of India. Some sporadic showers had occurred in Southern India, chiefly on the coast districts. The cool wave had extended on to Sind and Rajputana.

Saturday, 12th December.—Pressure was stationary in North-Western India, the west coast districts and Lower Burma and had risen elsewhere. The rise was brisk to rapid over North-Eastern and Central India. The wave of low pressure, which was approaching Baluchistan on the 11th, had marched rapidly eastwards and covered the sub-montane districts from Umballa to Gorakpur. Pressure was highest over East Rajputana and lowest in Malabar, and the intervening gradients were steeper than usual. Winds were rising on the Bombay coast and were unchanged in most other places. Skies were clearing in the Peninsula and practically no rain had fallen in that area during the previous 24 hours. Fine dry weather held over the remainder of India. Temperature had fallen generally and was now practically normal except in Bombay (+3°·4), the Central Provinces and Berar (+2°·3) and Burma (−2°·5).

Temperature.—The temperature conditions have changed considerably during the week. There has been a steady fall of temperature so that the abnormal excess which prevailed during the past five or six weeks over the greater part of the country has been very largely reduced, and in the case of Burma and Sind and Rajputana replaced by a moderate amount of deficiency. Thus the mean temperature of the whole of India for the week was only 1°·6 above the normal as compared with 3°·2 during the previous week and of the Central Provinces and Berar—the area of greatest excess of temperature—4°·1 above as compared with 9°·5. At the end of the week temperature was in slight to moderate defect in Burma, Sind and Rajputana, in slight excess in Madras, in moderate to considerable excess in the Central Provinces and Bombay and normal in the remaining provinces.

It is noteworthy that higher maximum or day temperatures were recorded at Poona and Akola on the 6th than have been registered in December during the last twenty years. The following gives data for these two stations :—

Station.	Maximum temperature of 24 hours preceding 8 A. M. of 6th.	Highest maximum temperature recorded in December previous to 1896.	Year in which recorded.
Akola	91°·4	89°·8	1877
Poona	91·5	90·6	1885

The following table gives the variations of the mean temperature from the normal in different provinces of India :—

Province.	December 1896.							Mean variation of week.

Rain.—The rainfall during the week under review occurred almost solely in the southern half of the Peninsula and was due to the prevalence of very strong

north-east winds across the Coromandel coast during the first four days of the week. The falls were heavy in the Coast districts and moderate in the interior. Madras and Cuddalore were the centre of the heavy precipitation in the Coast districts. The largest amount received in 24 hours was 8·64 inches at Chingleput (Madras) on the 7th. Winds fell off in strength during the last three days of the week and the rainfall was very light and scattered on the 10th and 11th, and absolutely *nil* on the 12th. A feeble disturbance affected North-Western India from the 8th to the 10th and gave light snow to the higher elevations of the Kashmir Himalayas and one or two showers in Garhwal. Some light local showers also fell in Upper Burma on the 6th and 7th, and in the Assam Valley on the 11th and 12th.

The concluding rainfall statement shows that only ten divisions out of the 57 received any rain during the week, and that in five out of these ten divisions the total fall of the week was less than a tenth of an inch, and hence of no value. The remaining five divisions, including East Coast (Central), East Coast (South), Madras (South), Malabar coast and Madras (South-Central) received total amounts ranging between 0·57 inch and 4·66 inches. The fall was normal in East Coast Central and very excessive in the remaining four divisions—from three to four times the normal of the week.

The rainfall of the period up to date is more or less in defect in Arakan, Cachar, Bengal, the greater part of the Punjab, Sind, the greater part of the Central Provinces, Berar, the Deccan and Ganjam. The deficiency is, both absolutely and relatively to the normal, largest in Bengal and Ganjam which usually receive moderate to heavy rain during the period.

The following large totals were recorded during the week. Chingleput (Madras) 14·76 inches, Shiyali (Tanjore) 12·80 inches and Cuddalore 12·62 inches.

Province.	Division.	Rainfall data for week ending December 12th, 1896. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from October 18th, to December 12th, 1896. Average actual rainfall of season to date.	Average normal rainfall, Oct. 18th to Dec. 12th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

LALA HEM RAJ,

Acting Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 17th December 1896.*

DENZIL IBBETSON,

Secretary to the Government of India.

R

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th December.*—No rain has fallen in the Circars and the Deccan, except a few light showers in parts of Cuddapah and Anantapur. Good to heavy rain is reported in the Carnatic from Nellore southwards and in the Central and Southern districts. Light showers have also fallen in Malabar. The water-supply is good in the Southern half of the Presidency but poor or bad elsewhere, except under the largest irrigation works. Cultivation is proceeding actively in the former area and to a slight extent in parts of the Deccan. The standing crops in the Carnatic, Central, Southern and West coast districts are in good condition, though damaged in parts by excessive rain. Elsewhere they are poor, except where irrigated. Some fair harvests have been gathered in the former districts, and partial crops are still being gathered in the Deccan and the Circars. Fodder is generally scarce; but pasture, for the most part, is available, though scarce in parts of the Deccan, where cattle are suffering. Prices are slightly easier especially in the Deccan districts. *Cholam* (*Sorghum vulgare*) in Kurnool and Anantapur is 14½, and in Bellary and Cuddapah 13½ seers per rupee. The numbers relieved were: Relief-workers 22,578; fed at kitchens 721, and weavers 2,943; all in the Deccan districts. There has been a slight decrease in workers owing to the organization of a Weavers' relief, in Cuddapah, and a slight increase in workers in Bellary.

Bombay.—*For week ending 23rd December.*—No rain fell during the week. More rain is urgently wanted for the crops sown after the recent rain in the Deccan and the Karnatak districts. The standing crops have been damaged by locusts in one taluka of Karachi and are withering for want of rain in Bijapur and Belgaum. They are poor in Thana and are reported to be thriving elsewhere. Preparations for the late crops or sowings have been completed, except in Ratnagiri and the Upper Sindh Frontier. Sowing of garden lands in Ahmednagar, Nasik and Khandesh is still proceeding. The harvesting of the autumn crops is nearly finished, except in Khandesh, Dharwar and Baroda. Fodder is sufficient, except in the Deccan, Karnatak, Shikarpur and one taluka of Baroda, it is dear in Kaira. The grain supply is generally sufficient in affected districts. Cotton-picking continues in Ahmedabad, Broach, Khandesh and Baroda. The condition of the agricultural stock is deteriorating in Poona, Sholapur, Bijapur, Dharwar and parts of Ahmednagar, but is healthy elsewhere, except in parts of Khandesh, Ratnagiri and Thar and Parkar. Prices are rising in parts of Broach, Surat, Ratnagiri, Sholapur and Bijapur; are falling in parts of Broach, Surat, Ratnagiri, Sholapur, Bijapur, Belgaum and the Upper Sindh Frontier, and are stationary in Ahmedabad, Kaira, Nasik, Kolaba, Poona, Kathiawar and parts of Broach and Surat. Prices in the affected districts are :—Dharwar 13, Belgaum 11½, Sholapur 11, Bijapur 10½, Ahmednagar 9¾, Poona 9½, Satara 9½, Khandesh, Kolaba and Ratnagiri 9 and in Nasik 8½ seers per rupee. The numbers on relief works were :—Nasik 8,948, Khandesh 3,333; Ahmednagar 22,896 including non-working children. The numbers on gratuitous relief were :—Khandesh 1,435. The numbers in Poona, Satara, Sholapur and Bijapur have not been reported.

Bengal.—*For week ending 21st December.*—There was no rain during the week. The harvesting of winter rice is proceeding, and is approaching completion in some districts. The outturn of winter rice as finally estimated is 7½ annas for the Province as a whole. The prospects of the spring crops in some districts of the Patna and Rajshahi Divisions are so far fair, though more rain

is of course wanted, but generally throughout the Province they are poor. In Behar the prospects of the poppy crop are satisfactory. The pressing of sugar-cane is going on in some districts. Prices continue high. In the distressed districts the prices per rupee of staple food-grains are—Nadia (common rice) 11 seers, Khulna (common rice) 9½ seers, Patna (common rice) 10¼ seers, Shahabad (common rice) 9½ seers, Saran Indian-corn) 11 seers 10 chitaks, Champaran (Indian-corn) 10¾ seers, Muzaffarpur (Indian-corn) 11 seers, Darbhanga (common rice) 9 seers. The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 19th December, were—Relief-works:—Nadia (18th December) 777, Khulna (18th December) 129, Shahabad 710 (men 287, women 270, and children 153), Saran 1,852 (men 464, women 700, and children 688), Champaran 20,645 (men 8,757, women 7,125, and children 4,763), Darbhanga 5,228 (men 2,430, women 1,708, and children 1,090); Gratuitous relief—Saran 290 (men 77, women 170, and children 43), Champaran 1,178 (men 277, women 602, and children 299); Darbhanga 3,308 (men 971, women 1,547, and children 190). Only two test-works are now open in Patna.

North-Western Provinces and Oudh.—*For week ending 23rd December.*—There was no rain during the week. The spring sowings are almost complete. Irrigation is actively progressing and the crops are said to be doing well, though rain is urgently needed. The poppy sowings are nearing completion. The crops have suffered slightly in portions of a few districts from westerly winds and frost, and a flight of locusts passed over a portion of the Almora district and caused slight damage to the crops. The numbers in receipt of relief on Saturday, the 19th December, in twelve districts officially recognised as distressed were as follows:—Banda 84,843; Cawnpore 8,749; Hamirpur 24,734; Allahabad 30,318; Jhansi 16,952; Jalaun 18,247; Jaunpur 16,403; Lucknow 16,624; Unao 2,930; Rae Bareli 21,138; Sitapur 8,231; Hardoi 23,624; total 272,793. This total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 181,130; relieved as dependents 46,599; relieved in poor houses 23,019; relieved under other provisions of the Famine Code 22,045. The numbers relieved in twenty-one districts which are under observation but are not yet officially recognised as distressed were on the same date as follows:—Relieved on test-works 22,839; relieved in poor houses 9,771; relieved under other provisions of the Famine Code 836; total 33,446. The grand total in receipt of relief on the last day of the week was therefore 306,239. Supplies are generally sufficient, but fodder is somewhat scarce in places. Prices remain high though they show a tendency to fall in certain districts. The prices of staple food-grains on which famine wages are based are as follows in the districts officially recognised as distressed:—Banda, Cawnpore and Hamirpur 10½, Allahabad, Jhansi and Jalaun 9¾, Jaunpur and Lucknow 10, Rae Bareli 10¾, Sitapur 13½, and Hardoi 9¼ seers per rupee.

Punjab.—*For week ending 23rd December.*—No rain. The harvesting of autumn crops is nearly over. Sugarcane-pressing and cotton-picking are still going on. Sowings of the spring crops on wet lands are in progress, but most of the dry lands are lying unsown owing to the failure of the winter rains. The sessamum crop is still standing in Mooltan and is being harvested in Dera Ismail Khan. The condition and prospects of the sown crops are generally reported average to poor and the prospects of the spring crops are said to be fair. In Delhi wheat on dry lands is suffering from cold dry winds and from want of rain in Umballa. Rain is urgently wanted throughout the Province. The stock of food-grains is insufficient in Hissar, Amritsar and Rawalpindi. A supply has been imported from Karachi. In Hissar damage has been done to crops. The rape crop is being damaged by grubs in parts of Ferozepore. Locusts have appeared in two tahsils of Dera Ismail Khan and have slightly damaged the standing crops, but laid no eggs. Cattle are generally in poor condition. Their condition is fair in Delhi and Gurgaon and good in Amritsar. Fodder is scarce in all districts, except Rohtak. The number of persons employed on famine works were:—Umballa 1,099, Ferozepore 2,395, Mooltan 378, Karnal 2,208; and on test-works,—Delhi 96 and Rohtak 204. Test-works have also been opened in Sialkot and five tahsils of Rawalpindi, but no persons have attended.

the works as yet in the latter district. Prices are high in all districts but are falling slightly in Gurgaon. Wheat is selling from 7 to 9 seers, bulrush millet 7 to $10\frac{5}{16}$, great millet 9 to 10½, gram 8 to 10⅜, and maize 9½ to 11½ seers per rupee. The prices of the staple grains on which famine wages are based are—in Delhi, bulrush millet 8½ seers, Umballa, maize 10 seers, Ferozepore, maize 8 seers, Mooltan, wheat second quality 9 seers, Rohtak, great millet 9½ seers, and Karnal, maize 9½ seers per rupee.

Central Provinces.—*For week ending 23rd December.*—The weather is cold with occasional light clouds. The prospects of the spring crops continue generally favourable, except in Hoshangabad, where the crops are suffering from want of moisture. Fodder is insufficient in Hoshangabad. One-fourth of the linseed area has been sown in Raipur. The estimated anna outturns reported are:—wheat 10 in Nagpur and Chanda and 12 in Raipur. Grain is being imported into Nimar. The numbers on relief works and in receipt of gratuitous relief are:—Saugor 13,129, Damoh 5,087, Seoni 2,069, Narsinghpur 1,777, Hoshangabad 14,443, Nimar 756, Betul 1,713, Chhindwara 1,086, Wardha 251 and Nagpur 5,619. Of these 6,125 were gratuitously relieved. 6,276 persons were also employed on railway works in Saugor. No reports have been received from relief works in Jubbulpore, Mandla and Raipur. The prices of staple food-grains upon which famine wages are based are:—Saugor 8, Damoh and Mandla 9, Seoni, Narsinghpur, Hoshangabad, Betul and Raipur 10, Nimar 9½, Wardha 11¼ and Nagpur 13¾ seers per rupee.

Burma.—*For week ending 19th December.*—In Lower Burma reaping continues. Crop prospects are generally very good. In Akyab paddy on high lands has withered and in Kyaukpyu the early cessation of the rains has injured the crop. In the Shwel township of Prome one-fourth of the late planted paddy is suffering from want of rain. In Upper Burma no rain has fallen during the week. The reaping of wet-weather paddy is in progress, and cultivation of dry-weather paddy and island crops is progressing. It is reported that one-third of the crops on the irrigated areas in Minbu has failed for want of water. Rain would benefit peas and other island crops, but for other crops it is too late. The only districts in which crops may be said to be fair or good are Mandalay, Shwebo, Bhamo, Upper Chindwin, Thayetmyo and Kyauksi. In the other districts they are very poor. The price of paddy has fallen considerably in Rangoon and Thongwa, and slightly in Pakokku, while it has risen slightly in Thayetmyo. Elsewhere prices are stationary. The numbers on relief works were:—Meiktila 14,444, Myingyan 9,563, and on gratuitous relief:—Meiktila 2,549, Myingyan 3,326. Prices of rice are:—Myingyan 9 seers 12 chittacks, Meiktila 7 seers 12 chittacks.

Assam.—*For week ending 22nd December.*—The weather is seasonable. The prospects of crops in Kamrup are not good. The harvesting of late rice continues. The condition of tea is fair. The price of food-grains is high in Silchar, Darrang, Nowgong and in the Khasi Hills. Fodder is sufficient except in the Khasi Hills and in parts of Cachar. The water-supply is sufficient.

Mysore and Coorg.—*For week ending 23rd December.*—MYSORE: Slight rain in civil and military station. The standing crops are in good condition and prospects are favourable. Paddy and *ragi* (Eleusine coracana) have been harvested in parts. No marked change in prices.

COORG: The rice harvest and coffee-picking continue. Prices of food-grains are steady. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 23rd December.*—BERAR: The weather is cool. Picking of cotton continues and cutting of *Jowar* (*Sorghum vulgare*) is well advanced. Of the winter crops, wheat, gram and linseed are suffering in parts of the province owing to insufficient moisture. Sowing operations are almost completed. The fodder and water-supply are inadequate to wants. Prices fluctuating.

HYDERABAD: No rain during week. In the Central and Warangal divisions the standing spring crop is in fairly good condition, but more rain is

wanted for the crop in the Aurangabad and Gulburga divisions. Scarcity of fodder exists. Prices are: wheat 7, coarse rice $6\frac{5}{8}$, white *juar* $9\frac{3}{4}$, yellow *juar* 12, gram $8\frac{1}{2}$ and *tur* $10\frac{1}{2}$ seers per current sicca rupee.

Central India.—*For week ending 23rd December.*—No rain fell in Central India during the week. Agricultural operations are still suspended in Baghelkhand, have been completed in two States in Bundelkhand and are in progress in other Agencies. The spring crops are good in Malwa, fair in Bhopal and in parts of Bundelkhand, and bad in Baghelkhand. Agricultural stock and pasturage are fair in Bhopal, good in Malwa and indifferent in Bundelkhand and Baghelkhand. Prices are steady in Bhopal and above normal in other Agencies. The prices of staple grains on which famine wages are based are:—in Baghelkhand $9\frac{5}{8}$ seers per rupee, in Bundelkhand not reported. Opium is being sown in Bhopal and is in good condition in Malwa. The number of persons employed on famine relief works were:—1,437 in Bundelkhand and 3,020 in Baghelkhand; on gratuitous relief 1,550 in Bundelkhand and 1,503 in Baghelkhand. Reports from Gwalior and Bhopawar have not been received.

Rajputana.—*For week ending 23rd December.*—No rain. Agricultural operations satisfactory in Jhallawar, Kotah, Ajmere, Jeypur, Bhurtpur, fair in Kherwara and poor in Dholepur. The spring sowings are in progress in Sirohi, Meywar and some parts of Ulwar and have been completed in Jaisulmere. The standing crops are fair in Meywar, Haraoti, Ajmere, Bickanir, Jaisulmere, poor in Dholepur and good elsewhere. Prospects of the harvest are good in Jeypur, fair in Jaisulmere and below average in Haraoti. *Jowar* (*Sorghum vulgare*) has been damaged by frost in Jaisulmere. The agricultural stock is fair in Meywar, Dholepur, Bickanir, Jaisulmere and good elsewhere. Pasturage and fodder are sufficient except in Tonk and some places in Jeypur and Ulwar, and are failing in Dholepur and Bhurtpur. Prices are rising in Sirohi, falling in Pertabgurh, Jhallawar, Ajmere, Kishengurh and Dholepur, fluctuating in Meywar, high in Haraoti and steady elsewhere. The number of persons employed on relief works were:—Marwar 2,884; Kotah 386; Dholepur 4,584; Bhurtpur 9,050; Bickanir 18,668; Jaisulmere 147; and on gratuitous relief—Marwar 735, Bhurtpur 36 and Bickanir 2,533. The prices of the staple grains on which famine wages are based are:—in Kotah 14, Dholepur $11\frac{1}{4}$, Bhurtpur $9\frac{1}{2}$, Bickanir $7\frac{9}{16}$ to $8\frac{1}{16}$, Jaisulmere 8 to 12 seers per rupee.

Kashmir.—KASHMIR VALLEY.—*For week ending 22nd December.*—The weather is fine. Spring sowings are almost completed. Prices are below normal.

JAMMU PROVINCE.—*For week ending 23rd December.*—No rain. Prices are high in Jammu, Jasrota and in Mirpur and Manawar tehsils of the Bhimber district and comparatively favourable in the others. Fodder is scanty in hilly tracts where the crops also have suffered. Relief works are in progress. Prices $10\frac{1}{2}$ seers per rupee.

Nepal.—*For week ending 19th December.*—No rain. The weather is fine but cold and the sowing of wheat is finished. Price $8\frac{1}{2}$ seers.
